Smoke & Carbon Monoxide Alarm Self Verification Form

Building Permit # _____ Address: _____

Dear Property Owner:

The California Residential Code (CRC) requires carbon monoxide alarms in existing dwellings having a fossil fuel-burning heater or appliance, fireplace or an attached garage (CRC Section R315) as well as smoke alarms (Section R314) when building permits are issued and the scope of work exceeds a total cost or calculated valuation of \$1,000. In order to grant a final approval on your permit, it is necessary to verify the installation of these alarms within your dwelling. This form provides the property owner the ability to self-verify to the City of Petaluma Building Division when work done does not allow convenient access to the interior of the dwelling (such as re-roof projects or other exterior work that requires a building permit).

By signing this document, the property owner certifies to the City of Petaluma Building Division that both smoke alarms and CO alarms have been installed on the above referenced project as specified below:

Smoke alarms are installed in accordance with the approved manufacturer's instructions in all of the following areas:

- a. Each sleeping room
- b. Outside each sleeping area in the immediate vicinity of the bedrooms
- c. On each floor, if a multi-story, including basements and habitable attics.

Carbon Monoxide alarms, listed per UL2034, are installed in accordance with NFPA 720 and the approved manufacturer's instructions in all of the following areas:

- a. Outside each separate dwelling unit sleeping area in the immediate vicinity of the bedroom(s).
- b. On every level of the dwelling unit, including basement.

As of January 1, 2014 all new and replacement battery operated alarms must be equipped with a non-replaceable, non-removable battery capable of powering the alarm for 10 years.

All existing smoke alarms shall be replaced after 10 years from the date of manufacture or if the date cannot be determined.

Please fill in the requested information at the bottom of the form and return the form to the building inspector at the time of the final inspection or if the property is in conformance at the time of permit application, the signed and completed form may be submitted with the permit application.

Owner/Contractor/(Documentation Author's/Responsible Designer's Declaration Statement)

- ✓ I certify under penalty of perjury, under the laws of the State of California, the information provided is true and correct.
- ✓ The design features identified on this Certificate of Compliance are consistent with the information documented on other applicable compliance forms, worksheets, calculations, plans and specifications submitted to the enforcement agency for approval with the permit application.
- ✓ This building was built or available for use after January 1, 1994.
