

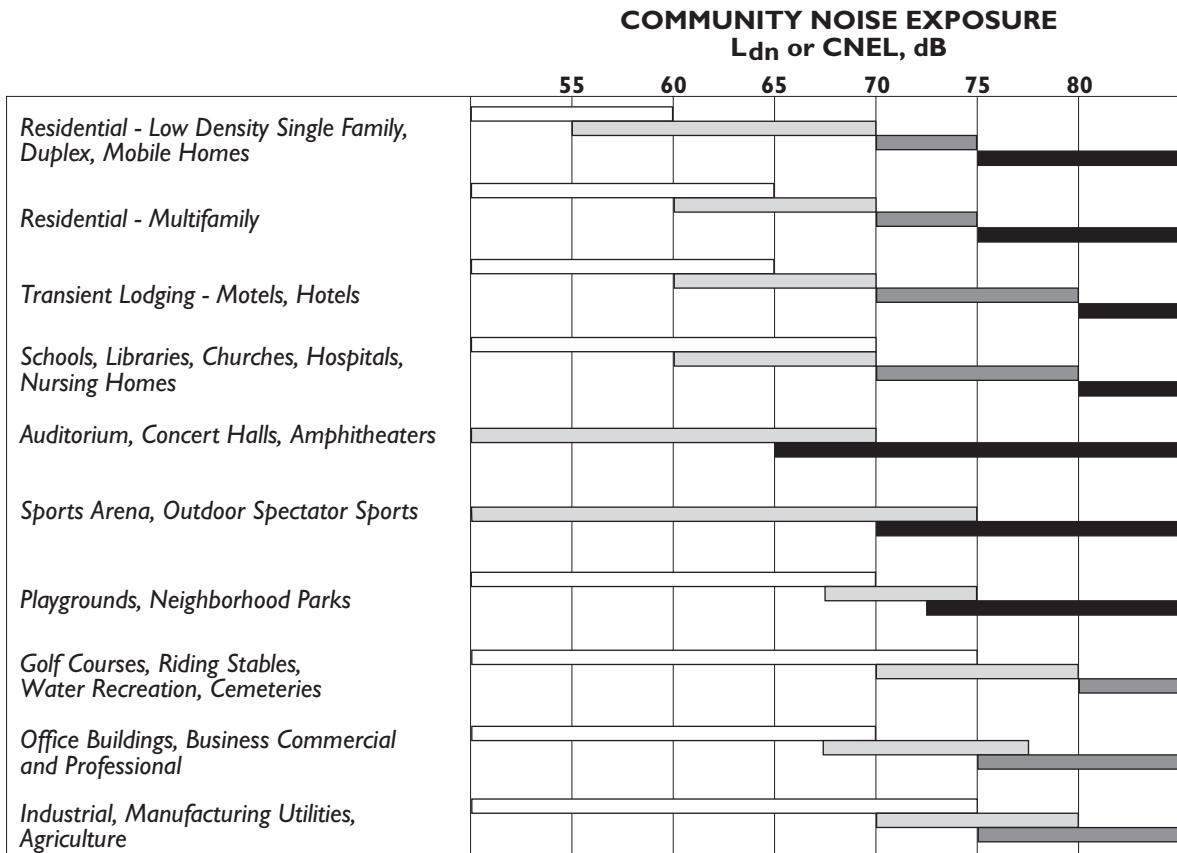

Figure 3.9-3

# LAND USE COMPATIBILITY STANDARDS

Petaluma General Plan 2025

## INTERPRETATION:

### **NORMALLY ACCEPTABLE**

Specified land use is satisfactory, based upon the assumption that any building involved is of normal conventional construction, without any special noise insulation requirements.

### **CONDITIONALLY ACCEPTABLE**

New construction or development should be undertaken only after a detailed analysis of the noise reduction requirements is made and needed noise insulation features included in the design. Conventional construction, but with closed windows and fresh air supply systems or air conditioning will normally suffice.

### **NORMALLY UNACCEPTABLE**

New construction or development should generally be discouraged. If new construction or development does proceed, a detailed analysis of the noise reduction requirements must be made and needed noise insulation features included in the design.

### **CLEARLY UNACCEPTABLE**

New construction or development should generally not be undertaken.
