- Site Plan, accurately drawn to scale, showing:
 - Existing features of subject property and surrounding area within at least 300' of the property.
 - General location or vicinity map of the proposed site in relation to major streets and geographic features, such as the Petaluma River.
 - All property lines with distances, including existing and proposed easements.
 - All existing features on the site including topography, any structures, street frontage improvements (i.e. curbs, gutters, sidewalks, edge of paving), utilities, power poles, easements, parking areas, trees, creeks, drainageways, etc. and name of adjoining streets, or right-of-way easements and nearest cross street.
 - Land uses on adjacent properties and location of structures and features including residences, buildings, power lines, drainageways and trees.
- Development Plan
 - Must have sufficient detail to ascertain the potential impacts of proposed changes, including: the general location of proposed uses, all building areas, outdoor use areas, access roads, driveways, parking areas, service or loading areas, drainage areas and landscape areas.

Application and Processing Timeline for General Plan Amendments

A General Plan Amendment application is a request to change the overarching plan document for the City of Petaluma. This process will require several public hearings and will take months to process.

* The Development Review Committee (DRC) is made up of representatives from various City departments, who will review your project and identify any issues (but is not the decision-making body for project approval). You will be invited to an internal DRC meeting approximately 2 weeks after project submission, to ask or answer any questions. The DRC meeting is not a public hearing.

** The applicant is responsible for all costs associated with public noticing and processing the application.

Purpose of a General Plan Amendment

The General Plan is a comprehensive and integrated statement of development policies and principles that guide future growth and development within a given community. The General Plan defines the public interest and reflects a community's vision and character, by establishing goals, objectives and policies for properties within the City.

The General Plan includes several mapped designations as well as written policies. A General Plan Amendment is required in order to change any of these maps or text, for example a change in a Land Use designation on the Land Use Map.

By State law, the City can only amend a General Plan Element up to four times per year. Separate amendments may be combined and evaluated together as one Amendment action. However, the effectiveness of the General Plan as a policy guide lies in its consistency and integrity in maintaining the public interest over the long term. Hence, the General Plan should not be changed without careful consideration.

Criteria for Project Review

State law requires that any decision on a General Plan Amendment be supported by findings of fact. At a minimum, findings and supporting factual information must address the four following criteria:

- A. The proposed amendment must be found to be in the public interest.
- B. Any proposed changes must be found consistent and compatible with the rest of the General Plan and any implementation programs that may be affected. General Plan Amendment applications are reviewed for conformance with all of the goals, objectives, policies and programs of the General Plan.
- C. The potential impacts of the proposed amendment must be assessed and the proposed changes found not to be detrimental to the public health, safety, or welfare.
- D. The proposed amendment must be processed in accordance with applicable provisions of the California Code and the California Environmental Quality Act.
