

NOTICE

WE WILL BE WORKING ON YOUR STREET

Residents will know the exact date your street will be closed when you review the schedule on the reverse of this notice and observe the “No Parking” signs and written dates.

As part of the City of Petaluma’s pavement maintenance program **DRYCO CONSTRUCTION** and its subcontractors will be placing a **Polymer Modified Asphalt Rubber (PMAR) Cape Seal** on your street and/or adjacent streets in your neighborhood. **If your street is not completed on the date indicated, it will be performed on the following day.** Cape Seal is one of the most efficient and economical ways of resurfacing and maintaining your streets.

Cape Seal consists of a hot applied asphalt rubber emulsion applied to the existing surface, which is then covered with an aggregate rock called “chip”. The Chip Seal takes about 1 hour to cure.

There will be flagmen and other workers directing traffic to ensure the safe passage of all citizens and for the safety of our workers. Expect some delays, and choose alternate routes, if possible. The hours of construction will be from **7:00 AM to 5:00 PM**.

Your street may be closed to through traffic during the Cape Seal process. Streets that are to receive treatment will have “No Parking” signs placed along the street at least 24 hours prior to the work being started. These signs will have specific dates and times that all parking on the street will be restricted. **ANY CARS PARKED WITHIN THE POSTED AREA ON THE DAYS OF THE CHIP SEAL OR SLURRY SEAL PLACEMENT WILL BE TOWED.** In order to sweep excess loose chips after placement, we request that you **still park off the street or in some other convenient area for the two days following the placement of the chip seal.**

Important Notes:

- Do not drive on the surface treatment until streets have been reopened to traffic or directed by a flagger
- Please maintain low speeds while traveling through the work area.
- Garbage pickup will not be affected. Please place your trash bins on top of the curb.
- Please do not water your lawn on the days listed on the “No Parks” or the night prior.

The oil used in the Cape Seal placement can and will stain your carpets, floors, and other related items if traveled through before it is covered with chips or has had time to cure. If you do have oil on something, simple dish soap and water will clean the area if caught before the oil has had time to dry. Otherwise we recommend a citrus solvent type cleaner. If you have any questions, there will be a representative on the job site.

Questions or Concerns? If you have any questions about this project, please contact:

Dryco Construction; Mike Wallen at 916-381-8033

Or the City’s Engineer; Ken Eichstaedt, PE, TE at 707-776-3672
