INFORMATION / BACKGROUND

The City is permitted to recover the cost to the City of processing permit applications, inspecting and reviewing plans or preparing detailed statements as required by Chapter 43.21C RCW.¹ The City has adopted a Master Fee Resolution which is amended from time-to-time. The Council adopted an updated Master Fee Resolution (Resolution No. 636) on August 16, 2016. This Agenda Bill outlines the updates to the Master Fee Resolution since that time (Section number refers to section number in the Resolution). Unless otherwise listed below, the fees are unchanged from the prior Master Fee Resolution.

Section 2: Planning and Engineering Service Department fees.

The City charges Planning and Engineering Fees based on the hourly rates. These rates have not been revised in many years. A rate increase of 3 percent is recommended. This would change the rates as follows

| Fee Type | Old Hourly Rate | Proposed New Hourly Rate |
|-----------------------------------|-----------------|--------------------------|
| Planning and Development Services | \$250 | \$257.50 |
| Land Use Review | \$172.50 | \$177.68 |

¹ RCW 82.20.020

| | | |
|-----------------|----------|----------|
| DPD hourly rate | \$172.50 | \$177.68 |
|-----------------|----------|----------|

Section 3: Miscellaneous fees.

Scanning and Electronic copies have been added to the table with a cross reference to Public Records Rules for the costs.

Section 4: Business licensing fees.

A new line has been added to account for multi-day special events licenses. The one-day rate is \$10.00, so a multi-day license would be \$10 per day in the special event period with a notation that additional permits may be required.

Section 7: Electrical Meter fees.

A new service charge has been established for re-visits during temporary power or regular power installation in the amount of \$90. Previously we had no fee for this so the City was having to absorb the costs when we have sent a crew out to do an install and the site was not ready, the appointment was missed, a re-inspection was needed, etc. This will help the City cover these costs which should not be absorbed by rate-payers.

Section 8: Power extension.

The City has a policy in Chapter 18.01 RMC for full cost recovery for power extensions, including the coordination with the developer, however, this was not in the Master Fee Resolution. This addition sets the hourly rate at \$124 per hour (what the City currently pays our consultant) and makes it clear that the cost recovery for the actual expense is required to be borne by the developer and not by the electrical rate payers.

FISCAL CONSIDERATION

By adopting Resolution #664, the City will ensure cost recovery for its services to developers and other customers.

Any fee in excess of the final calculated fee shall be refunded pursuant to the Refund Section below.

The total fee is the fee for the final design plus the revision fee.
- B. The City may assess a fee in addition to fees already charged for the original permit if the applicant makes an amendment to an existing unexpired or reestablished permit. The applicable fees will be assessed for all work necessary to process the amendment, including review by the other departments, including engineering, environmental, building, electrical, etc. associated with the submitted amendment.

Additional hours worked that exceed the number covered by the minimum fee shall be charged at the current Land Use hourly rate and are required to be paid at the time of invoicing and/or prior to approval of permits. Land use review that is subject to the Land Use hourly rate may include, but is not limited to: review time for more than one technical reviewer, pre-application services, project review, permit issuance, inspection, and continued review during the building permit and construction approval phases of the project.
