**THE CITY COUNCIL OF THE CITY OF RUSTON HEREBY ORDAINS AS
FOLLOWS:**

Section 1. Section 21.02.010 of the Ruston Municipal Code is hereby amended to read as follows:

21.02.010 Rate schedule.

Pursuant to the provisions of RCW 35.67.190, charges shall be made for the discharge of and the availability of the discharge of all sanitary sewage into the Ruston Municipal Sanitary Sewer System. Unless otherwise determined by the City no allowances will be made for vacancies or remodeling. Sewer charges shall be based upon highest class of sanitary sewer use when there is more than one type of user per premises. The charges shall be as follows:

- (a) Each single-family residence (including those instances where more than one family residence is served through one water meter) shall be charged a monthly charge computed as follows:

- (1) Effective Date: ~~September 1, 2013~~ April 1, 2014 a fixed charge of ~~\$58.06~~ \$58.99 plus a flow charge calculated at ~~\$3.47~~ \$3.82 per hundred cubic feet (ccf) of water consumption.

The water consumption for the flow charge shall be the average monthly use as measured during the most recent months of December, January, February, and March. If the average consumption results in a fractional part of a ccf, the number used for calculating the flow charge shall be the next highest whole number.

- (b) Multiple-family residences (two or more units) served through one water meter shall pay a monthly charge per living unit as above, except that the water consumed during the winter months shall be divided by the total number of living units served by the account to determine the per living unit flow volume. If the average consumption per unit results in a fraction, the number used for calculating the flow charge shall be the next highest whole number.

It shall be the duty of every person in possession, charge, or control of the entire premises consisting of two or more units, served by the sanitary sewer system, or to which such service is available, to be accountable for payment of each unit.

Where units in multiple-unit residences are separately metered, each unit shall be charged the appropriate single-family residence rate as set forth in subsection (a) of this section. Rate for user generating most sanitary sewage will be used for billing purposes.

- (c) In all cases other than residential charges hereinabove set forth, the sewer charge shall be computed and paid as follows:

- (1) **Metered Water Supply.** When charges and fees are based upon the water usage, such charges and fees shall be applied against the total amount of water used from

all sources unless, in the opinion of the Director of the City of Tacoma Public Works, significant portions of water received are not discharged to a sanitary sewer. The total amount of water used from public and private sources will be determined by means of public meters or private meters, installed and maintained at the expense of the user and approved by the Director of the City of Tacoma Public Works. Where more than one commercial/industrial facility is served by one water meter, the user group shall be determined by the activities of the largest water consumption used.
