WHEREAS, the City is charged for sanitary sewer services from the City of Tacoma; and

WHEREAS, Ruston has not increased its sewer rates since 2021; and

WHEREAS, the City of Tacoma raised its sanitary sewer rates on more than one occasion since Ruston last updated its sewer rates in 2021; and

WHEREAS, the City generally matches the flow charges with Tacoma’s current rates; and

WHEREAS, the proposed new flow charges are the same as are charged by Tacoma for 2023 with a second step increase effective in 2024; and

WHEREAS, on February 21, 2023, the City Council held the first reading of this Ordinance; and

WHEREAS, on March 7, 2023, the City Council adopted this Ordinance at Second Reading during its regular meeting following a public hearing; **NOW, THEREFORE,**

THE CITY COUNCIL OF THE CITY OF RUSTON HEREBY ORDAINS AS FOLLOWS:

Section 1. Section 21.02.010 of the Ruston Municipal Code is hereby amended to read as follows:

21.02.010 - Rate schedule.

Pursuant to the provisions of RCW 35.67.190, charges shall be made for the discharge of and the availability of the discharge of all sanitary sewage into the Ruston Municipal Sanitary Sewer System. Unless otherwise determined by the City, no allowances will be made for vacancies or remodeling. Sewer charges shall be based upon highest class of sanitary sewer use when there is more than one type of user per premises. The charges shall be as follows:

- (a) Each single-family residence (including those instances where more than one family residence is served through one water meter) shall be charged a monthly charge computed as follows:
 - (1) Effective Date: Effective ~~March 21, 2021~~ March 21, 2023, a fixed charge of \$67.67 plus a flow charge calculated at ~~\$5.15~~ \$5.65 per hundred cubic feet (ccf) of water consumption and effective ~~January 21, 2022~~ January 21, 2024, a fixed charge of \$67.67 plus a flow charge calculated at ~~\$5.23~~ \$6.05 per hundred cubic feet (ccf) of water consumption.

The water consumption for the flow charge shall be the average monthly use as measured during the most recent months of December, January, February, and March. If the average consumption results in a fractional part of a ccf, the number used for calculating the flow charge shall be the next highest whole number.

- (b) Multiple-family residences (two or more units) served through one water meter shall pay a monthly charge per living unit as above, except that the water consumed during the winter months shall be divided by the total number of living units served by the account

to determine the per living unit flow volume. If the average consumption per unit results in a fraction, the number used for calculating the flow charge shall be the next highest whole number.

It shall be the duty of every person in possession, charge, or control of the entire premises consisting of two or more units, served by the sanitary sewer system, or to which such service is available, to be accountable for payment of each unit.

Where units in multiple-unit residences are separately metered, each unit shall be charged the appropriate single-family residence rate as set forth in subsection (a) of this section. Rate for user generating most sanitary sewage will be used for billing purposes.

(c) In all cases other than residential charges hereinabove set forth, the sewer charge shall be computed and paid as follows:

(1) Metered Water Supply. When charges and fees are based upon the water usage, such charges and fees shall be applied against the total amount of water used from all sources unless, in the opinion of the Director of the City of Tacoma Public Works, significant portions of water received are not discharged to a sanitary sewer. The total amount of water used from public and private sources will be determined by means of public meters or private meters, installed, and maintained at the expense of the user and approved by the Director of the City of Tacoma Public Works. Where more than one commercial/industrial facility is served by one water meter, the user group shall be determined by the activities of the largest water consumption used.

(d) The charge for commercial/industrial sanitary sewer user groups shall be as follows:

(1) Effective Date: Effective March 21, 2021, a fixed charge of \$55.60.

Each commercial/industrial user shall be placed in a user group and shall pay the appropriate flow rate per 100 cubic feet (ccf) as listed below. ~~In addition, all restaurants and taverns shall be placed in the Category II group unless the customer provides documentation that they have an approved grease retention device conforming to current uniform plumbing code and City of Tacoma Public Works guidelines, and that the customer has an adequate ongoing maintenance program in place for that device. The customer will remain in the Category I group as long as those conditions are continually met. In the event those conditions are not continually met, the customer will be placed back into the Category II group.~~

INFORMATION / BACKGROUND

Under State law,¹ the City is authorized to provide sanitary sewer services to properties within the City. As a sanitary sewer utility provider, the City may establish charges for sanitary sewer service.² The City of Tacoma accepts the flow from Ruston sanitary sewers for the purpose of sewage treatment. The City of Ruston pays Tacoma for this service.

The last time the City of Ruston changed its rates was in March of 2021. Since that time, the City of Tacoma has instituted several sewer rate increases. This ordinance does not change the fixed rate for Ruston customers, which remain unchanged since 2017, but it does bring the flow charges equal to what Tacoma charges its customers for flow charges for both 2023 and 2024.

As is the City’s practice for utilities, rate increases are passed through to its rate-payers to ensure continued financial viability of the sanitary sewer utility. The rate increases are outlined below, including a look back at 2021 rates.

Rate Type	2022	Increase	2023	Increase	2024

The City Council will hold a Public Hearing on this Ordinance during Second Reading on March 7, 2023.

FISCAL CONSIDERATION

By increasing the sanitary sewer flow rates to be the same as Tacoma charges its sanitary sewer customers for flow for 2023 and 2024, the City will ensure that its sanitary sewer utility is self-sustaining and that these increased costs are born by the ratepayers rather than the general public.

RECOMMENDATION / MOTION

No action requested. This matter is scheduled for First Reading. Unless directed otherwise, this matter will return for a Public Hearing, Second Reading, and Adoption on March 7, 2023. The first rate increase will take effect on March 21, 2023.
