

- the camp is required to be inspected twice yearly; and
- the inspection reports and required plans are filed (address of state, county or city health department) and available for their review.

Responsibilities of Local Health Departments

- To review and approve the required written camp plans for compliance.
- To inspect camps to assure that: (1) all physical facilities are properly operated and maintained; and (2) adequate supervision exists to provide a healthy and safe environment in accordance with the New York State Sanitary Code.
- To issue a permit to operate when the required plans and inspection results are satisfactory.
- To investigate reports of serious incidents of injury, illness and all allegations of abuse or maltreatment.
- When requested, to provide parents or guardians of prospective campers an opportunity to review inspection reports and required plans.

The time and effort spent in selecting the camp your youngster will attend is important. Keep in touch, especially if it is your child's first camp experience. If possible, visit the camp before and during the camping season.

Information

For further information about New York State health laws relating to summer camps, call the State Health Department's Bureau of Community Environmental Health and Food Protection in Troy at 1-(800) 458-1158, ext. 27600.

Children's Camps in New York State

In New York State, summer camps must have a state, city or county health department permit to operate legally. These permits are issued only if the camp is in compliance with the state's health regulations. The permit to operate must be displayed in a conspicuous place on the premises.

The camp must be inspected twice yearly by a health department representative. At least one inspection must be made during the time the camp is in operation. Each camp is checked to make sure that the physical facilities are safe and that supervision is adequate. When choosing a summer camp for your child, consider the following:

Staff Credentials/Supervision

What are the qualifications of the camp director?

The New York State Health Code requires that the director of an overnight camp be at least 25-years-old or hold a bachelor's degree; a day camp director must be at least 21-years-old.

All directors must have experience in camping administration or supervision. Camp directors' backgrounds are screened by the Office of Children and Family Services Central Register Database for reported incidents of child abuse and maltreatment. Their backgrounds are also screened by the Health Department for criminal convictions. Only individuals who are considered to pose no risk to campers are accepted by the Health Department as camp directors.

What are the qualifications of the camp counselors and how are campers supervised?

Counselors must have experience in camping and supervision of children or have completed an acceptable training course. Stringent counselor-to-camper ratios and staff qualifications are mandated for supervision of swimming, archery, riflery and camp trip activities.

At overnight camps, 80 percent of the camps' counselors must be at least 18-years-old; up to 20 percent may be 17-years-old. There must be at least one counselor for every 10 children aged eight years or older, and one

Camp Safety

Are the camp facilities and activities safe?

The camp operator must develop a written plan to include maintenance of facilities, provisions for training staff members and orientation of campers, supervision of campers, campsite hazards, emergency procedures and drills, safety procedures and equipment for program activities.

Swimming

Are waterfront personnel qualified?

Are campers always supervised while in the water?

All waterfront activities at camps in New York State must be supervised by an experienced certified lifeguard or water safety instructor. On site, one qualified lifeguard is required for every 25 bathers. All aquatic staff are required to be trained in cardiopulmonary resuscitation (CPR).

Camps that use off-site pools or beaches operated by others must make special arrangements to provide a safe activity. Even off site, the camp remains responsible for supervising campers.

Some children's camps use sites for swimming that are not inspected by local health departments. Parental permission is required in these instances, and the camp must follow established guidelines to protect campers.

While campers are involved in aquatic activities on site, there must be one counselor for every 10 campers eight years or older; there must be one counselor for every eight children aged six and seven; and one counselor for every six children younger than six years old.

When swimming off-site, there must be one counselor for every eight campers six years or older and one

counselor for every six campers younger than six years.

Are bathing areas marked off for various swimming skills? Are campers tested to determine their level of swimming ability before participating in aquatic activities? Are nonswimmers kept in water less than chest deep? Is the buddy system used? Are campers required to wear life preservers when boating or canoeing?

New York State regulation requires that the answers to all these questions must be "yes."

Camp Trips

Are camp trips supervised by counselors who have the maturity and experience to make decisions that could affect the safety of campers?

All trips must be supervised by a trip leader who is at least 18 years old and competent in the activity. Counselors must accompany trips and all staff must review the safety plan prior to the trip.

Counselors should have the skills and expertise in the camp activity (canoeing, rock-climbing, etc.) to handle any emergency that might arise. Ask whether the camp has conducted similar trips in the past without incident.

In New York State, the drivers of camp vehicles must be licensed and at least 18-years-old. Seat belts must be worn when provided and vehicle capacities not exceeded. When transporting children in a truck, only a truck cab can be used.

Sports and Activities

How are activities in craft shops supervised, especially when campers are using dangerous tools, such as power saws and lathes? Are archery and rifle ranges at a safe distance from activity centers? Are spectators protected at baseball fields and similar areas? Do players wear protective equipment?

State regulation requires that archery, riflery and horseback riding be supervised by counselors with special training in those activities.

Fire Safety

Are there periodic fire drills for both campers and staff? Does each floor of every building have fire exits in two different locations? Are flammable materials (gasoline, pool chemicals, etc.) stored away from activity centers and kept under lock and key? Are functioning smoke detectors located in every sleeping room?

All of the above are mandatory in New York State.

Location and Facilities

Are barriers erected against such natural hazards as cliffs and swamps? Are foot trails located away from such dangerous areas and from heavily traveled roads and highways? Do the camp facilities (bunks, bathrooms, mess hall, recreation facilities) meet your aesthetic tastes and those of your child? Is the camp located in an area that will not aggravate your child's allergies? Will your child be required to perform chores, such as cleaning or cooking?

For information on the camp's location and facilities, visit the camp or interview the camp operator by telephone, prior to making a decision to enroll your child at the camp.

Nutrition

Are good health practices observed in the camp kitchens, dining areas and food services? Does the camp serve food your child likes?

At camps in New York State, food must be prepared from inspected sources. Food preparation and handling activities are reviewed to assure safe and sanitary practices. Kitchen employees must be healthy and follow hygienic practices. Potentially hazardous food must be maintained below 45°F or above 140°F.
