

WESTCHESTER COUNTY
ANNUAL MUNICIPAL SEWER MAINTENANCE AND REPAIR
REPORT FORM

IN COMPLIANCE WITH THE COUNTY SEWER ACT
(Westchester Administrative Code Section 824.72.7)

Submitted on behalf of the: Village of Rye Brook

Date: September 14, 2023

Report Year: 2023

Report Prepared By: Michal Nowak 

Title: Superintendent of Public Works / Engineer

Address: 938 King Street
Rye Brook NY 10573

Telephone Number: 914-939 0753 x 2965

MAINTENANCE

1. Set forth the Maintenance Schedule in effect for the Municipal Sewer System for the Report Year:

The Village of Rye Brook Public Works Dept has a goal of performing flushing operations on village wide sewer mains on a 2 day per week schedule that is time and manpower permitted. This would provide that the system would be flushed once a year. Currently the Village has a private contract with Green Mountain Pipeline to light clean and TV inspect the Villages sewer system in a grid fashion over the next 10 years.

2. Describe method used to establish maintenance priorities:

Priorities are established on areas that are known to be troublesome due to elevation, low flow, or grease infiltration from commercial operations and businesses in the village. These areas get elevated care. Secondary method is notification from residents or contractors during or after construction or normal usage. Should abnormal events occur, further investigation is performed by remote camera equipment and corrective measures are assessed and implemented. Village has a current contract (21-03) with Green Mountain Pipeline to evaluate Manholes with 3D imagery, and to inspect a set number of sewers over a pre-planned schedule as well as to perform needed waterproofing and CIPP. Those reports will be evaluated, and a work plan will be created and capital funding will be allocated as deemed necessary.

3. Describe maintenance activities conducted in the report year (enumerate linear feet and number of manholes maintained and approximate percentage of total system):

a. Inspected :(describe method used such as TV, smoke & dye testing, etc)

Under multiyear Contract 21-03 Cleaning, Televising, Manhole rehabilitation and Cured In Place Pipelining the following work was performed:

- 11.3 Miles of sewer were Cleaned, and TV inspected. Page D1 and C2 of the 10 year Plan – Clean Sewers
- 255 Manholes were 3D inspected (approximately 24 more to be inspected when the ground hardens in winter and access is afforded). Due to locations in rear yards and near brooks, access is very limited with this equipment. Page B2 of 5 Year Manhole Map

b. Preventive Maintenance: (describe activities)

Contract 21-03 is being utilized to perform maintenance and repairs to various locations of sewer main throughout the Village. Highway Crews perform jetting of hot spot areas.

c. Cleaning: (identify methods used)

Two-man crew performed high pressure flushing and root cutting for sewer lines throughout the Village. Green Mountain Pipeline is on contract to perform TV inspections which also include cleaning.

REPAIR AND REHABILITATION

- 1. Set forth the linear feet of sewer repaired or rehabilitated in the report year, the methods used and enumerate the footage as a percentage of the total sewer system:**

4,684 Linear feet (0.89 Miles) of sewer line were relined this period. Village is reviewing current data from Television and 3d Manhole inspections and will be putting forth a series of work based on findings.

- 2. Set forth the numbers of manholes repaired or reconstructed in the report year and give the approximate percentage of the total number of manholes in the system:**

10 Manholes were replaced and repaired. 7 by highway Dept. and 3 by Paving Contractor.

- 3. Set forth the approximate amount of inflow/infiltration removed from the sewer system in this reporting year:**

Approx. 77,760 Gallons Estimated from illicit discharge from Sump Pump at 19 Ridge Blvd

Manholes Replaced

Approx. 12 gpm of inflow x 60 minutes = 720 gallons per hour x 24 hours = 17,280 gallons per day. Assumes 1" Rainfall on cover. X 10 Covers = 172,800 gallons

Total Approx. I/I Removed
250,560 gallons

- 4. Set forth the techniques used to discover illegal storm water connections to the sanitary sewer system and actions taken during the report year to remove illegal connections:**

Smoke testing, TV Inspections and as needed Dye testing have all been utilized in the Village.

Building Department personnel look for illegal connections while performing inspections associated with building permits and check for cross connections.

Code section 216 Storm Sewers and Sanitary Sewers has been revised – Attached previously

Affidavit of compliance was drafted and put into use by Building Dept. submitted previously

SEWER SYSTEM EVALUATION STUDY (SSES)

- 1. Identify the most recent SSES done for the Municipal Sanitary Sewer System, and submit a copy with this Report or an online site for accessing the report.**

SSES Engineering report done by Dolph Rotfeld Engineering September 20, 2017
Submitted previously.

SSES report done by Dolph Rotfeld Engineering February 7, 2017, submitted previously.

SSES Remediation report done by Dolph Rotfeld Engineering January 22, 2018, submitted previously.

- 2. Describe activities in the report year undertaken to implement SSES findings. (This may include cross references to MAINTENANCE and REPAIR and REHABILITATION sections of this report.)**

See other sections listed in this report . Village Continues to follow through in the work as outlined in report. Village may consider regrouping and reassessing the need for a update to SSES possibly in the near future. Main items have been addressed.

IMPLEMENTATION OF WESTCHESTER COUNTY POLICY FOR REMOVAL OF INFLOW AND INFILTRATION

The County of Westchester Planning Board has the authority under the County Charter, the NY General Municipal Law and the NY State Environmental Quality Review Act to comment on certain proposed real property development subject to approval by municipal authorities that will add sanitary sewage flow to the sanitary waste treatment facilities operated by the WCDEF. Where WCDEF has experienced inflow and infiltration related flow conditions at its facilities exceeding the County Sewer Act limits for inflow and infiltration that warrant attention by the municipality, WCDEF has, through the Planning Board, recommended the municipal lead agency require mitigation of such inflow and infiltration conditions as part of its SEQR findings. In some cases the municipal lead agency has required the property developer to undertake or fund sewer rehabilitation work in the municipality to remove three gallons of inflow and infiltration for every new gallon of sanitary flow the proposed development project will generate. For Fair and Affordable Housing development this requirement may be reduced to removal of one gallon of inflow and infiltration for every new gallon of sanitary flow. WCDEF supports the adoption of this policy for new development in every municipality where excess inflow and infiltration conditions have been identified in sanitary sewers tributary to County sanitary sewage facilities.

- 1. Identify any proposed real property development projects that became subject to County Planning Board review during the report year.**

- 2. Describe any SEQR impact mitigation requirements requiring inflow and infiltration removal imposed by a municipal lead agency during the report year.**
Project has Board of Trustee and Planning Approval, Awaiting Architectural Board Review.

- 3. Describe any inflow and infiltration reductions accomplished in the report year as the result of SEQR impact mitigation requirements imposed by municipal lead agencies.**
N/A
