Please complete the following information related to permitting and installation of Electric Vehicle Service Equipment (EVSE) as a supplement to the application for a building permit. This checklist contains the technical aspects of EVSE installations and is intended to help expedite permitting and use for electric vehicle charging. Upon this checklist being deemed complete, a permit shall be issued to the applicant. In most cases, the City will be able to issue a permit same day or within 24 hours. However, if it is determined that the installation might have a specific adverse impact on public health or safety, additional verification will be required before a permit can be issued and a longer time frame may occur.

This checklist substantially follows the “Plug-In Electric Vehicle Infrastructure Permitting Checklist” contained in the Governor’s Office of Planning and Research “Zero Emission Vehicles in California: Community Readiness Guidebook” and is purposed to augment the guidebook’s checklist.

**ALTERNATIVES TO USING THIS CHECKLIST FOR PERMITTING EVSE**

- If you are seeking to install EVSE for a single-family home, you can *skip this checklist* and apply for an electrical permit online at [https://www.cityofsanrafael.org/building-permits/](https://www.cityofsanrafael.org/building-permits/).
- If you are a contractor and are submitting plans for construction that includes electric vehicle charging stations, you may provide all the information below in those plans in lieu of submitting this form.

---

**PROJECT OVERVIEW**

<table>
<thead>
<tr>
<th>Property Address:</th>
<th>Permit Number:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Click or tap here to enter text.</td>
<td>Click or tap here to enter text.</td>
</tr>
</tbody>
</table>

- Single-Family
- Multi-Family (Apartment)
- Multi-Family (Condominium)
- Commercial (Single Business)
- Commercial (Multi-Businesses)
- Mixed-Use

Number of EVSE to be installed by location:

- Garage ____
- Parking Level(s) ____
- Parking Lot ____

Description of Work:

**EVSE DESCRIPTION**

<table>
<thead>
<tr>
<th>EVSE Charging Level:</th>
<th>Level 1 (120V)</th>
<th>Level 2 (240V)</th>
<th>Level 3 (480V)</th>
</tr>
</thead>
</table>

- Maximum Rating (Nameplate) of EV Service Equipment = ____________ kW

- EVSE Voltage = ______ V
- Manufacturer of EVSE: ____________________________

- EVSE Mounting: Wall Mount | Pole Pedestal Mount | Other __________________
**ELECTRICAL SUMMARY**

System Voltage:
- ☐ 120/240V, 1φ, 3W
- ☐ 120/208V, 3φ, 4W
- ☐ 120/240V, 3φ, 4W
- ☐ 277/480V, 3φ, 4W
- ☐ Other: _______________

Rating of Existing Main Electrical Service Equipment = ______________ Amperes

Rating of Panel Supplying EVSE (if not directly from Main Service) = ______________ Amps

Rating of Circuit for EVSE: ______________ Amps / ______________ Poles

A.I.C. Rating of EVSE Circuit Breaker (if not Single Family, 400A) = ______________ A.I.C.
(or verify with Inspector in field)

**LOAD SUMMARY**

Specify Either Connected, Calculated or Documented Demand Load of Existing Panel:

- • Connected Load of Existing Panel Supplying EVSE = ______________ Amps; OR
- • Calculated Load of Existing Panel Supplying EVSE = ______________ Amps; OR
- • Demand Load of Existing Panel or Service Supplying EVSE = ______________ Amps
  (Provide Demand Load Reading from Electric Utility)

Total Load (Existing Load plus EVSE Load) = ______________ Amps

**CONDUCTOR SUMMARY**

*For single family dwellings (that are not using the electrical permit approach outlined on page 1):*

Size of Existing Service Conductors = # _________ AWG or kcmil; OR

Size of Existing Feeder Conductor Supplying EVSE Panel = # _________ AWG or kcmil

*For all other projects:*

EVSE Rating ______________ Amps x 1.25 = ______________ Amps =

Minimum Ampacity of EVSE Conductor = # _________ AWG

*NOTE: A site plan is required showing the location(s) of all existing and proposed parking space(s), and equipment serving the Electric Vehicle Charging Station. Show the location of the electric run and provide manufacturer sheets on all equipment to be used. Electrical plans are also required that detail the installation.*
NON-RESIDENTIAL CHARGING STATION STANDARDS

Charging stations shall not require site plan review approval provided the following standards are met. If any of the below standards are not met (unchecked), a ministerial site plan review shall be required to address the specific, adverse impact upon the public health or safety identified, except where design review may be required as noted below.

☐ Charging stations shall be located only on property developed in compliance with a previously approved site plan. Charging stations shall not be permitted on vacant land. (Development on vacant land requires design review)

☐ Charging stations shall be placed within existing parking stalls and shall not be placed in areas that impede required drive lanes, fire lanes, loading zones, and/or pedestrian paths of travel.

☐ No protected trees and/or trees required as part of a previous site plan approval for the development will be removed to accommodate the vehicle charging station.

☐ No changes to the direction of water flow and/or new drainage systems are required to accommodate new charging facilities and equipment.

☐ Equipment shall be placed underground or staged in a manner that does not displace parking spaces or create visual safety barriers. (Removal of parking spaces for equipment may require design review)

☐ Signage for the charging stations shall be limited to the labels and materials on the equipment.
