LEVEE REBUILD-future project

Grading Permit Submittals Summer 2020
Work planned for 2021/2022
Allowed work window: Sept. 1 – Feb. 1

City/County Jurisdiction Line

ANNUAL SAFETY MAINTENANCE

The entire property is actively maintained throughout the year to minimize risks of flood, fire, and wildlife strikes on aircraft. This work is mandated and approved by various government agencies including City & County, FAA, and Army Corps of Engineers. Work includes disking, mowing, mulching, cleaning of drainage ditches, and minor road and levee repairs due to settlement, erosion, and burrowing animals. These maintenance practices are outlined in the Sports Project EIR and are specifically required and allowed under the Airport Master Use Permit.
