

ENCROACHMENT PERMIT

General Provisions & Standards of Conditions

ATTACHMENT A

Pavement Condition Index (PCI)	Restoration Guidelines
90+(1)(4)	Moratorium Street. Emergency encroachment only. Subject to special conditions and pavement restoration along entire property frontage.
70-90(1)(4)	For roads less than 24 ft wide: Up to full width restoration (when applicable). For roads over 24 ft wide: Restoration to centerline unless repair crosses the centerline then up to a full width restoration is required Restoration to extend up to 5 feet beyond each side of the trench excavation, including a structural pavement section extending 24 inches outside the limits of the trench ⁽⁵⁾ excavation per DWG No. 330 ⁽²⁾ and DWG No. 380 ⁽²⁾ .
55-70(4)	Restoration to extend up to 5 feet beyond each side of the trench excavation, including a structural pavement section extending 24 inches outside the limits of the trench ⁽⁵⁾ excavation per DWG No. 330, 360, 370, and 380 ⁽²⁾ .
0-55(4)	Restoration to extend minimum 2 feet beyond each side of the trench excavation, per DWG No. 330, 360, 370, and 380 ⁽²⁾ .

(1) ADA Curb Ramp upgrades on case by case basis

(2) Drawing can be found in the Uniform Construction Standards for All Cities and County of Marin, adopted July 2018.

(3) Compaction test results documenting the relative compaction of soil backfill will be required for projects involving significant excavation/trenching.

(4) The City reserves the right to make adjustments to the restoration based on existing conditions.

(5) Typical pavement restoration includes a 24-inch trench overcut to preserve the structural integrity of the roadway. This requirement can be reduced or eliminated if a Public Works representative inspects the trench during construction and provides written approval to modify the requirement.
