Subject: 52-54 Fremont/Marquard

Hi Leslie, please have my letter included in the correspondence for 52-54 Fremont/Marquard project scheduled for DRB hearing on 11/16/21, and I would appreciate it if you would verify your receipt of this email.

My letter:

I live at [REDACTED] directly behind the proposed project, and the front of my house faces the project. I see the redwood trees which are being proposed to be cut down every single day, multiple times a day, and the presence of the redwoods is what attracted my partner and I (and many other residents of this neighborhood) to choose to live in this neighborhood. This is a precious pocket of San Rafael, and we really hope the City of San Rafael realizes that and takes whatever steps we possibly can to preserve it. There are other counties in Marin which have adopted protection measures for redwood trees and the result is their towns remain beautiful, natural, and a desirable place to live. These trees should not be cut down.

Thank you,
Stacy Clement
