4th and 2nd Intersection - Dave Rhoads feedback.pdf;

Hi Rafat, April, and Lindsay,

Please see in the attached document my comments, feedback and concept proposals for the 4th / 2nd Street intersection project. This project is extremely important to get right, as it will likely be here for many many decades to come. The City absolutely should prioritize the pedestrian and bike experience at this intersection, as it's extremely dangerous today. If you'd like I'm happy to take a walking and/or biking tour of the intersection with anyone interested.

I look forward to hearing your thoughts and your presentation at next week's BPAC meeting.

Lindsay, I would greatly appreciate it if you could forward this note and attachment on to the entire BPAC at your convenience.

Thanks,
Dave
