

Appendix A. NOP & NOP Comments

California Environmental Quality Act NOTICE OF PREPARATION AND SCOPING MEETING

Date: March 17, 2023

To: Responsible Agencies and Interested Persons

Subject: Notice of Preparation of a Supplemental Environmental Impact Report and Public Scoping Meeting for the Related Bristol Specific Plan Project

NOTICE IS HEREBY GIVEN that the City of Santa Ana ("City") has prepared this Notice of Preparation for a proposed Specific Plan Project located at 3600 South Bristol Street ("proposed Project" or "Related Bristol Specific Plan Project"). The City has determined that a Supplemental Environmental Impact Report ("EIR") to the City's General Plan Final Recirculated Program EIR (SCH # 2020029087) is necessary pursuant to California Environmental Quality Act ("CEQA") Guidelines Section 15163 to evaluate the potential environmental impacts from the proposed Project. The City is the Lead Agency for the proposed Project pursuant to CEQA Guidelines Section 15050. The purpose of this notice is (1) to serve as a Notice of Preparation of a Supplemental EIR pursuant to the CEQA Guidelines Section 15082; (2) to advise and solicit comments and suggestions regarding the scope and content of the forthcoming Supplemental EIR to be prepared for the project; and (3) to serve as a notice of the public scoping meeting. Copies of the Notice of Preparation are available for review at the following locations:

City of Santa Ana, Planning Division
20 Civic Center Plaza, M-20
Santa Ana, CA 92701

City of Santa Ana Public Library
26 Civic Center Plaza
Santa Ana, CA 92701

The documents can also be accessed on the City's website and on the CEQAnet webportal at:

<https://www.santa-ana.org/related-california-bristol-specific-plan/>

<https://ceqanet.opr.ca.gov/>

Notice of Preparation: Pursuant to Public Resources Code Section 21080.4 and CEQA Guidelines Section 15082, the City has prepared a Notice of Preparation to solicit comments related to the scope and content of the Supplemental EIR. The 30-day public comment period on the Notice of Preparation is from Friday, March 17, 2023 to Monday, April 17, 2023. The City, as the Lead Agency, requests that responsible and trustee agencies respond in a manner consistent with Section 15082(b) of the CEQA Guidelines. **All environmental related comments to the Notice of Preparation should be submitted in writing by 5:00 p.m. on Monday, April 17, 2023 to:**

Ali Pezeshkpour, AICP, Planning Manager
City of Santa Ana Planning and Building Agency
PO BOX 1988 (M-20)
Santa Ana, CA 92702
Email: APezeshkpour@santa-ana.org

Scoping Meeting: The City will conduct a public scoping meeting in conjunction with this Notice of Preparation in order to receive public comments and suggestions regarding the scope and content of the Supplemental EIR. The meeting will be held on:

Date: Thursday, March 30, 2023
Time: 5:30 p.m. to 7:00 p.m.
Location: McFadden Institute of Technology
2701 S Raitt Street
Santa Ana, CA 92704

Project Title: Related Bristol Specific Plan Project

Project Location: The Project site is approximately 41.1 acres and is located at 3600 South Bristol Street. The site is generally bordered by MacArthur Boulevard to the north, Sunflower Avenue to the south, Bristol Street to the east, and Plaza Drive to the west. The Project site includes the following nine parcels: (Assessor Parcel Numbers [APNs]) 412-131-12, 412-131-13, 412-131-14, 412-131-16, 412-131-17, 412-131-22, 412-131-24, 412-131-25, and 412-131-26.

Project Site Description: The 41.1-acre site is developed with 465,063 square feet (sf) of predominately retail and restaurant uses, with some medical office, financial, and fitness uses. The site includes 3 multi-story buildings and 11 one-story buildings occupied with single and multiple tenants. All parking is provided in surface parking areas located throughout the Project site.

The Project site is within the General Plan Land Use Element South Bristol Street Focus Area and is designated District Center-High (DC-5). The DC-5 designation has a maximum Floor Area Ratio (FAR) of 5.0, or 125 dwelling units per acre (du/ac) and a maximum height of 25 stories that would allow up to 8,733,780 sf of mixed uses, inclusive of residential uses, within the Project site.

Project Location

Proposed Specific Plan Project Description Summary: The Project proposes a Specific Plan to replace the existing General Commercial (C2) and Regional Commercial (CR) zoning on the Project site. The Specific Plan would include a site-specific plan for the Project site, identifying the allowable site uses, development standards, design guidelines, and the processes and procedures for the approval of future development within the Specific Plan area. In addition to the proposed Specific Plan, the Project also includes redevelopment of the site in three phases. The Project proposes to demolish the existing shopping center and related infrastructure and provide a mixed-use development with (i) up to 3,750 multi-family residential units; (ii) up to 350,000 sf of commercial uses; (iii) a hotel with up to 250 rooms; (iv) a senior living/continuum of care use with up to 200 units; and (v) approximately 13.1 acres of parks, pedestrian paseos and common open space. The Project would result in a FAR of 2.7 and density of 92 du/ac. Parking would be provided by above- and below-ground parking structures providing shared parking as well as ground level parking.

Proposed Specific Plan Land Uses: The proposed Specific Plan divides the planning area into 23 proposed development areas, each a different “Block” (including two common area blocks for common roads and sidewalks). The proposed Land Use Plan is comprised of two Mixed-Use districts: a high intensity, Mixed-Use/Village Core District, which is located south of Callen’s Common (and includes Blocks 11-21), and a lower intensity Mixed-Use/Residential District located to the north of Callen’s Common (including Blocks 1-10). These Districts are both comprised of a mixed-use development pattern, but the intensity of development character differs.

Proposed Land Use Blocks

Proposed Mixed-Use Districts

The number of residential units and non-residential square footage for both Districts is outlined in the table below.

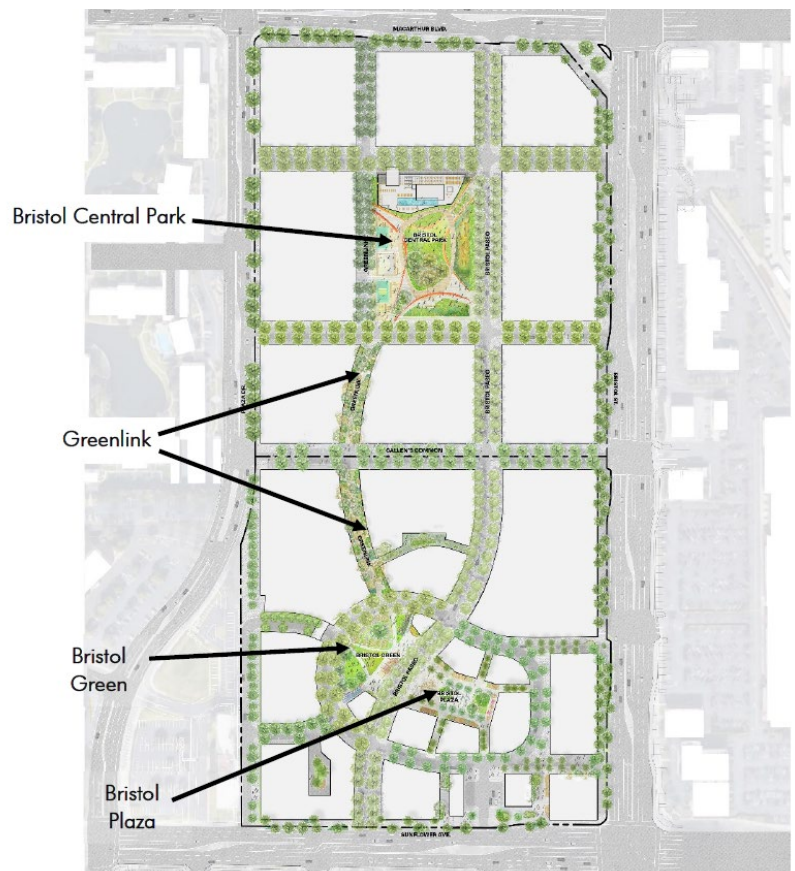

Proposed Land Uses	
Land Use	Proposed Intensity
Blocks 1-10 (Mixed-Use/Residential North District)	
Residential (units)	2,375 units
Private Amenity Building (in Bristol Central Park)	16,000 sf (target)
Commercial gross square feet (gsf)	100,000 sf
Bristol Central Park	2.5 acres
Greenlink	0.25 acres
Open Space (Programmable Roads and Parkways)	4.3 acres
Blocks 11-21 (Mixed-Use/Village Core District)	
Residential	1,375 units
Retail/Commercial (gsf)	250,000 sf
Hotel/Hospitality	250 rooms/150,000 sf
Senior/Continuum of Care (units)	200 units/225,000 sf
Bristol Plaza and Bristol Green, Retail Village Open Space	1.5 acres
Greenlink	0.3 acres
Open Space (Programmable Roads and Parkways)	4.3 acres

Residential: All residential development would be provided as for-rent multi-family uses. Residences would be in a vertical mixed-uses with residential on top of commercial uses and would include recreation areas, leasing offices, fitness rooms, pools/spas, business centers, etc. Residential uses would be located adjacent to public amenities including parks, open space areas, and the pedestrian-only green linkage (“Greenlink”) that connects the public open spaces throughout the Project site.

Commercial: The commercial uses would be centered around a pedestrian-focused circulation zone and Bristol Street to promote ground floor retail with clear wayfinding and easy access from surrounding streets and parking garages.

Open Space and Landscaping: Street trees would be installed along all streets within and adjacent to the Project site. New exterior lighting on site would be provided to accent landscaping, Project signage, walkways, parking areas, and to provide for security. The Project would provide the following open space areas that would be landscaped:

- **Bristol Green:** An approximately 0.7-acre open space area in the central portion of the Mixed-Use/Village Core.
- **Greenlink:** An approximately 0.6-acre landscaped pedestrian pathway linking the south and north areas of the Project site with shade trees, sitting areas, with connections to residences.
- **Bristol Plaza:** An approximately 0.9-acre urban plaza with seating, retail, outdoor dining, and landscaping.
- **Bristol Central Park:** An approximately 2.5-acre open space area with open play areas, walkways, seating, and a private recreation facility for residents.

Conceptual Open Space

Proposed Phasing: The proposed development would occur over three phases, as listed in the table below.

Conceptual Phasing				
Use	Phase 1	Phase 2	Phase 3	Total
Residential (units)	1,375	856	1,519	3,750
Commercial (gsf)	250,000	65,000	35,000	350,000
Hospitality (keys)	250	--	--	250
Senior/Continuum of Care (units)	200	--	--	200

The proposed Mixed-Use/Village Core District (Blocks 11-21) would be developed in Phase 1, located south of Callen's Common. Phase 2 and Phase 3 would develop the proposed Mixed-Use Residential North District (Blocks 1-14) which are located north of Callen's Common and extend to MacArthur Boulevard.

Phase 1: Phase 1 includes the demolition of all on-site buildings and infrastructure south of Callen's Common, and subsurface excavation for construction of two levels of subterranean parking. Phase 1 assumes the construction of approximately 1,375 multi-family residential units, 250,000 sf of retail uses, a 250-room hotel, a 200-unit senior living/continuum of care structure, and a public open space area, as well as associated landscape improvements and infrastructure upgrades, including offsite infrastructure upgrades. All existing development north of Callen's Common will remain operational during Phase 1.

Phase 2: Phase 2 includes the demolition of all on-site buildings and infrastructure within the Phase 2 area of the site, and subsurface excavation for construction of one level of subterranean parking. Phase 2 assumes the construction of approximately 856 multi-family residential units, 65,000 sf of retail uses, public open space areas, as well as associated landscape improvements and infrastructure upgrades.

Phase 3: Phase 3 includes the demolition on-site buildings and infrastructure within the Phase 3 area of the site. Subsurface excavation would occur for construction of one level of subterranean parking. Phase 3 assumes the construction of approximately 1,519 multi-family residential units, 35,000 sf of retail uses, public open space areas, as well as associated landscape improvements and infrastructure upgrades.

Proposed Mobility: The Project is intended to be a walkable, bikeable community and would include an onsite sidewalk, and street system that would connect to the existing adjacent roadways. The Project includes Greenlink, which would be a landscaped pedestrian paseo linking the north and south areas of the site, and have landscaping, seating areas, and connections to residences, open space, and commercial areas. The Project would also include offsite bike lane improvements to provide a Class I Bike Lane on Bristol Street and Class II bike lanes on MacArthur Boulevard and Sunflower Avenue.

Several of the proposed onsite streets, Bristol Paseo (the primary north/south street), the looped road ringing Bristol Green and Bristol Plaza areas, and the Shared Streets would be "Programmable" streets; such that they could be used for special pedestrian events such as farmers' markets, seasonal festivals, music events, etc.

Roadway Improvements: The Project includes roadway improvements to the adjacent offsite roadway system including: new curb cuts for ingress/egress, planted setback areas, sidewalks, and street trees, potential new medians and median modifications, travel lane and signalization modifications, and bicycle lane modifications.

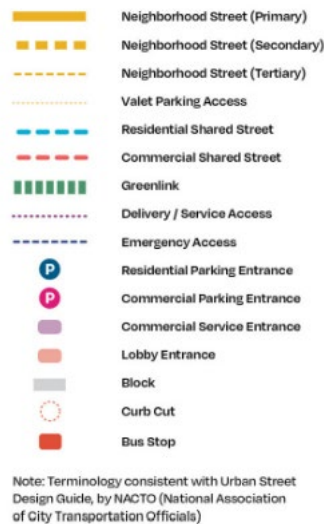

Conceptual Phasing Plan

Parking: The majority of parking would be provided in shared/joint/reciprocal subterranean and above-grade parking garages. One to two levels of subterranean parking are included in Phase 1 and one level of subterranean parking are included in Phase 2 and Phase 3. The Project also includes limited on-street parking.

Infrastructure Improvements: The Project includes installation of new water, stormwater, sewer, drainage, gas, and electrical service lines and connection to the existing infrastructure in the adjacent street systems.

Discretionary Actions: The Project includes adoption of the Related Bristol Specific Plan to regulate future development at the site, certification of the Supplemental EIR, a Zoning Map Amendment to change the zoning of the site from Regional Commercial (CR) and General Commercial (C2) to Related Bristol Specific Plan District, a Tentative Tract Map (TTM) to delineate parcel boundaries and public rights-of-way, John Wayne Airport Land Use Commission (ALUC) review, and a development agreement detailing development rights and public benefits pursuant Government Code Section 65864 et seq.

Conceptual Circulation Plan

Environmental Issues: The City anticipates that the following environmental topic areas will be addressed in the Supplemental EIR:

- Aesthetics
- Air Quality
- Agriculture and Forestry
- Biological Resources
- Cultural Resources
- Energy
- Geology and Soils
- Greenhouse Gas Emissions
- Hazardous Materials
- Hydrology and Water Quality
- Land Use and Planning
- Mineral Resources
- Noise
- Population and Housing
- Public Services and Recreation
- Transportation
- Tribal Cultural Resources
- Utilities and Service Systems
- Wildfire
- Project Alternatives

AIRPORT LAND USE COMMISSION

FOR ORANGE COUNTY

3160 Airway Avenue • Costa Mesa, California 92626 • 949.252.5170 fax: 949.252.6012

April 17, 2023

Ali Pezeshkpour, Planning Manager
City of Santa Ana Planning and Building Agency
P.O. Box 1988, M-20
Santa Ana, CA 92702

Subject: Comments on the Notice of Preparation of Supplemental Environmental Impact Report (EIR) for Related Bristol Specific Plan Project

Dear Mr. Pezeshkpour:

Thank you for the opportunity to review the Notice of Preparation (NOP) for the Supplemental EIR for Related Bristol Specific Plan Project in the context of the *Airport Environs Land Use Plan (AELUP) for John Wayne Airport (JWA)*. We wish to offer the following comments and respectfully request consideration of these comments as you proceed with your Supplemental EIR.

The City of Santa Ana is located within the AELUP Notification Area for JWA. The Supplemental EIR and Specific Plan should address height restrictions and imaginary surfaces by discussing Federal Aviation Administration (FAA) Federal Aviation Regulation (FAR) Part 77. To ensure the safe operation of aircraft activity at JWA, structures anywhere in the JWA airport planning area should not exceed the applicable elevations defined in FAR Part 77 (Objects Affecting Navigable Air Space). The Supplemental EIR and Specific Plan should include height policy language and a mitigation measure that states that no buildings will be allowed to penetrate the FAR Part 77 imaginary surfaces for JWA to ensure the protection of its airspace.

Development proposals within the City, which include the construction or alteration of structures more than 200 feet above ground level, require filing with the FAA and Airport Land Use Commission (ALUC) notification. Projects meeting this threshold must comply with procedures provided by Federal and State law, and with all conditions of approval imposed or recommended by FAA and ALUC including filing a Notice of Proposed Construction or Alteration (FAA Form 7460-1). Depending on the maximum building heights that will be allowed within the Specific Plan, the City may wish to consider a mitigation and condition of approval specifying this 200 feet above ground level height threshold. In addition, any project that penetrates the Notification Surface for JWA is required to file FAA Form 7460-1.

Section 21676 of the PUC requires that prior to the adoption or amendment of a general plan or specific plan, or the adoption or approval of a zoning ordinance or building regulation within the planning boundary established by the Airport Land Use Commission pursuant to Section 21675, the local agency shall first refer the proposed action to the ALUC. We recommend that the City include policy in its Specific Plan and a mitigation measure in the EIR that states that the City shall refer projects to the Airport Land Use Commission (ALUC) for Orange County as required by Section 21676 of the California Public Utilities Code to determine consistency of projects with the *AELUP for JWA*.

The Commission requests that referrals for determinations be submitted to the ALUC after the city's Planning Commission hearing and before the City Council action. Since the ALUC meets on the third Thursday afternoon of each month, submittals must be received in the ALUC office by the first of the month to ensure sufficient time for review, analysis, and agendaing. For additional information, please contact Julie Fitch at (949) 252-5170 or at jfitch@ocair.com.

Sincerely,

Lea U. Choum
Executive Officer

APezeshkpour@santa-ana.org

Subject: Notice of Preparation for SEIR for Related Bristol Specific Plan Project at 3600 South Bristol Street

Dear Mr. Pezeshkpour:

City of Irvine staff reviewed the Notice of Preparation (NOP) for a Supplemental Environmental Impact Report (SEIR) to the City's General Plan Final Recirculated Program EIR for the 2022 GPU (a.k.a., "Golden City Beyond, A Shared Vision"), excluding the 6th Cycle Housing Element update (SCH # 2020029087), for the proposed Related Bristol Specific Plan Project.

The approximately 42-acre project site consists of nine parcels and is generally bordered by MacArthur Boulevard to the north, Bristol Street to the east, Sunflower Avenue to the south, and Plaza Drive to the west.

The three-phase project proposes the following:

- Demolish the existing shopping center (465,063 square feet) and related infrastructure;
- Allow a mixed-use development with up to 3,750 for-rent multi-family residential units, up to 350,000 square feet of commercial uses, 250 hotel rooms, and 200 senior living/continuum of care units;
- Provide approximately 13.1 acres of parks, pedestrian paseos, and common open space;
- Result in a FAR of 2.7 and density of 92 dwelling units per acre (du/ac); and
- Provide shared parking via above- and below- ground parking structures and limited ground-level parking.

The project requires the following:

- Zoning Map amendment that proposed to replace the existing General Commercial (C2) and Regional Commercial (CR) to Related Bristol Specific Plan District;
- Specific Plan with two mixed-use districts (high intensity mixed-use/village core and lower intensity/mixed-use/residential) comprised of 23 different "blocks;"

- Tentative Tract Map to delineate parcel boundaries and public rights-of-way;
- John Wayne Airport ALUC review;
- Development Agreement; and
- Certified SEIR.

Based on the review of the NOP, staff would like to provide the following comments:

1. According to the NOP, the project site is within the Bristol Street Focus Area within the General Plan Land Use Element and is designated District Center-High (DC-5) with a maximum Floor Area Ratio of 5.0, or 125 dwelling units per acre (du/ac) and a maximum height of 25 stories that would allow up to 8,733,780 square feet of mixed uses, inclusive of residential uses, within the project site.

Page 5.10-19 of the Recirculated GPU PEIR states “As shown in Figure 3-7, the focus area will include District Center (DC)..” However, staff is unable to locate specific information/graphics on the Bristol Street Focus Area or DC-5. Please include pertinent information in the SEIR for reference purposes.

2. Clarify if the intensity in the SEIR is within the intensity of the City of Santa Ana General Plan Final Recirculated PEIR. If the proposed intensity is above and beyond the certified General Plan Final Recirculated PEIR, please include Dyer/SR-55 and Dyer Rd (SR-55 to Red Hill) in the project study area to determine if the project results in LOS deficiencies that must be mitigated based on City of Irvine performance criteria.
3. Please note that the performance criteria for any locations within Irvine must adhere to Irvine standards as defined in the City’s General Plan: (<https://www.cityofirvine.org/community-development/current-general-plan>) and adopted Traffic Study Guidelines: (<https://legacy.cityofirvine.org/civica/filebank/blobdload.asp?BlobID=32554>).

Thank you for the opportunity to review and comment on the NOP. Please add us to the project notification distribution lists (email and USPS) especially CEQA notifications, public meetings/adoption hearings, and approval notifications. Staff appreciates the opportunity to review any further information regarding this project as the planning process proceeds.

If you have any questions, please contact Senior Planner Melissa Chao at 949-724-6395 or via email at mchao@cityofirvine.org.

Mr. Ali Pezeshkpour

RE: Notice of Preparation (NOP) – Supplemental Environmental Impact Report (EIR) to the City's General Plan Final Recirculated Program EIR for 3600 South Bristol Street

Dear Ali Pezeshkpour,

Thank you for including the City of Costa Mesa in the environmental review process for the above referenced project. We appreciate the opportunity to work with the City of Santa Ana on the proposed project and the associated coordinated planning efforts.

As noted in the NOP, the project proposes a Specific Plan to replace the existing General Commercial (C2) and Regional Commercial (CR) zoning on the Project site. The Specific Plan would include a site-specific plan for the Project site, identifying the allowable site uses, development standards, design guidelines, and the processes and procedures for the approval of future development within the Specific Plan area. In addition to the proposed Specific Plan, the Project also includes redevelopment of the site in three phases.

The Project proposes to demolish the existing shopping center and related infrastructure and provide a mixed-use development with (i) up to 3,750 multi-family residential units; (ii) up to 350,000 sf of commercial uses; (iii) a hotel with up to 250 rooms; (iv) a senior living/continuum of care use with up to 200 units; and (v) approximately 13.1 acres of parks, pedestrian paseos and common open space. The Project would result in a Floor Area Ratio (FAR) of 2.7 and density of 92 du/ac. Parking would be provided by above- and below-ground parking structures providing shared parking as well as ground level parking. The proposed development would occur over three phases. The proposed project includes an active transportation – mobility component which includes offsite bike lane improvements to provide a Class I bike lane on Bristol Street and Class II bike lanes on MacArthur Boulevard and Sunflower Avenue.

The proposed project is located north of the City of Costa Mesa boundary; specifically, at the northwest corner of the intersection of Sunflower Avenue and Bristol Street Intersection. After the review of the NOP, the City of Costa Mesa has the following comments regarding the

scope and content of the environmental documentation pursuant to the California Environmental Quality Act (CEQA):

Comment 1

Transportation/Traffic

The City requests the impact analysis include both Vehicle Miles Travel (VMT) Analysis and Level of Service (LOS) Analysis, and identify appropriate mitigation measures. Consistent with State law, Costa Mesa continues to use LOS as the performance metric for circulation planning, and also supports policies that would reduce VMTs, primarily through the implementation of a transportation demand management and active transportation and transit strategies.

The City requests that the Transportation/Traffic Impact Analysis include LOS analysis to ensure that improvements to the circulation systems are in place to accommodate the proposed project. Prior to initiating the Transportation/Traffic Impact Analysis (TIA), please coordinate with City Transportation staff to define the scope of the TIA. Ms. Jennifer Rosales, Transportation Manager, can be reached at jrosales@costamesaca.gov or (714) 754 - 5180.

- The traffic analysis should address potential operational impacts that could result from the addition of project traffic to the local circulation system. The traffic study area needs to include at a minimum, but is not limited to, all signalized intersections with 50 or more project peak hour trips (including both trips to and from the proposed project).
- The City of Costa Mesa General Plan Circulation Element includes a Master Plan of Streets and Highways (MPSH) which defines the existing and future roadway system in the City. Sunflower Avenue and Bristol Street are classified as Major Arterials in the MPSH. The City of Costa Mesa also plans Class II bike lanes along both sides of Sunflower Avenue and identifies the intersection of Bristol Street and Sunflower Avenue as a pedestrian opportunity zone. The proposed project includes an updated circulation plan and anticipates off-site circulation improvements. Within the transition areas where each cities' circulation facilities meet, the roadways, intersections, bike lanes, and pedestrian facility improvements should be designed in a coordinated manner to facilitate high quality connected corridors, and satisfactory operations and safety performance.
- A discussion of on- and off-site circulation should be included in this section complete with descriptions of the proposed access points, line of sight at driveways, turn prohibitions, number of lanes proposed, proposed bus stop locations, deceleration or acceleration lanes provided, turn pocket requirements, vehicle storage length requirements, and circulation, and any other applicable circulation issues.

Comment 2

Public Services and Utilities

The City requests that the public services analysis identify impacts associated with the provision of a coordinated police and fire response, as applicable. In addition, any impacts to utility infrastructure which may require infrastructure improvements or upgrades across jurisdictional lines should also be identified and coordinated.

Comment 3

Visual Impacts

The City requests that the aesthetics analysis include visual simulations/line of sight analyses from key vantage points within Costa Mesa and should also evaluate the compatibility of proposed building heights with the surrounding area.

The City looks forward to coordinating regarding the abovementioned issues and receiving the draft EIR once the document is available for review. If you have any questions, please contact me at 714-754-5611 or at phayvanh@costamesaca.gov.

Sincerely,

Phayvanh Nanthavongdouangsy,
Principal Planner

California Environmental Quality Act
SCOPING MEETING COMMENT CARD
The Related Bristol Specific Plan Project

The City of Santa Ana Invites Your Comments on Environmental Issues.

A Notice of Preparation (NOP) pursuant to the California Environmental Quality Act (CEQA) has been released for a 30-day comment period, from **Friday, March 17, 2023 through Monday, April 17, 2023**. The purpose of the NOP and this Scoping Meeting is to solicit input from individuals, organizations, and public agencies on environmental issues that should be addressed in the Supplemental Environmental Impact Report (SEIR) being prepared for the proposed mixed-use project.

The NOP identified the following potentially significant environmental issues to be addressed in the EIR:

- Aesthetics
- Air Quality
- Agriculture and Forestry
- Biological Resources
- Cultural Resources
- Energy
- Geology and Soils
- Greenhouse Gas Emissions
- Hazardous Materials
- Hydrology and Water Quality
- Land Use and Planning
- Mineral Resources
- Noise
- Population and Housing
- Public Services and Recreation
- Transportation
- Tribal Cultural Resources
- Utilities and Service Systems
- Wildfire
- Project Alternatives

Please use the space below to record your comments related to environmental issues of concern relevant to the proposed project, adding additional sheets if necessary. **Comments should be submitted in writing by 5 p.m. on Monday, April 17, 2023 to:**

① I am concerned about overall environment impact of adding 3,750 resident units in addition to hotel & resident senior care. That could be adding 10,000 people using water, electricity & sewer, plus the cars needed to get them there. We already have issues with sufficient electricity during hot weather.

② I am not opposed to redevelopment. I do think, however, that even though this plan proposes less than allowable as per the DC-5, it is still such a high density in population that the negative impact to the area would be significant.

③ Even though So Coast Plaza is in Costa Mesa, traffic will be impacted on surrounding streets. Especially rush hours, seasonal & weekend shopping traffic.

From: [dMack](#)

Subject: David Mackler Comments re Related Bristol
Date: Sunday, April 16, 2023 2:42:29 PM

Dear Phil and Ali,

Following my recent conversation with Phil, I understand I have until end of day Monday, April 17, 2023 to provide my comments re the EIR that is in process. I attended the previous “sunshine” meetings and made these comments, however, I was not aware of the recent meeting and missed it.

I have been on the City’s website, however I am so far unable to find the link/actual location. In lieu of that, I am sending this info to you both in the hopes you can add these comments to the appropriate place.

I am both excited as well as concerned re the Bristol/Related Development project. There appears to be a lot of good thought and design that went into this project, and it would certainly seem to be a great business boom for the community.

However, I am concerned regarding the impact of the increased population density and activity of the project, and the ability of the existing utilities, public services, transportation systems, sewerage and other infrastructure to accommodate that increased usage and density. I am certain these facilities must be amended in order to facilitate successful operation and to mitigate the problems the density surcharge will create. I am hoping we as the public will be provided with the existing and proposed metrics as much as possible in order to analyze the impact of the project.

1. What is the existing vs anticipated daily population and increased density as proposed?
2. Traffic counts and Infrastructure Impact
3. What are the anticipated street improvements that can accommodate this substantial traffic and population surcharge? At present it is difficult to even enter MacArthur at peak traffic times from our gate. This will certainly require a traffic light in addition to other measures. How will the existing transportation system be amended to accommodate this increased amount of activity?
4. When do you anticipate the Environmental Impact Report per CEQA and Transportation Studies to be completed and available for neighborhood review?
5. What are the proposed Zoning and Planning modifications requested to achieve the proposed development?
6. Has the ability of the existing sewer system been determined and how will that system be amended to handle this increased demand?
7. Utilities – How will the impact and ability of the existing utilities, power, water, etc. be determined and how will the developer ensure that they will be sufficient in these times of drought and energy conservation?
8. What are the proposed Santa Ana Residential Unit fees?
9. Anticipated date for DP (Development Project) Review and Environmental Document finalization?
10. Can you please share any staff input to date?

Thank you,
David Mackler, AIA

Re: Earthjustice Comments on the Notice of Preparation of a Draft Supplemental Environmental Impact Report for Related Bristol Specific Plan Project

Earthjustice appreciates the opportunity to comment on the Notice of Preparation of a Draft Supplemental Environmental Impact Report (“DEIR”) for the Related Bristol Specific Plan Project (“Project”), which contemplates a mixed-use development with up to 3,750 multi-family residential units, as well as commercial real estate, a hotel, a senior living facility, and associated open spaces. Our initial comments focus on the importance of incorporating building electrification requirements into the Project. New construction that relies on burning gas for end uses such as cooking and space and water heating has significant greenhouse gas (“GHG”), energy, and health impacts under the California Environmental Quality Act (“CEQA”). All-electric buildings avoid these impacts. Moreover, all-electric buildings are typically less costly to construct due to avoided costs of gas infrastructure. With the California Public Utilities Commission (“CPUC”) now ending subsidies for gas lines to new development, cost savings from all-electric construction will further increase. Accordingly, to comply with CEQA’s obligation to adopt all feasible mitigation to reduce significant environmental impacts, the City must require an all-electric Project design that is not connected to the gas system.

I. Projects Connecting to the Gas System Have Significant GHG, Energy and Public Health Impacts.

A. The GHG Impacts of Projects Connecting to the Gas System Are Significant.

CEQA requires a DEIR to identify all the significant impacts of a proposed project, including impacts from the project’s GHG emissions.¹ One option to determine the significance of the Project’s GHG impacts is to apply a net-zero emissions threshold. In addition to being CEQA-compliant, a net-zero threshold is also consistent with the severity of the climate crisis and the recognition that any increase in GHG emissions exacerbates the cumulative impacts of climate change.

¹ CEQA Guidelines § 15126.2; Appendix F.

Another option is to apply the approach recently adopted by the Bay Area Quality Management District (“BAAQMD”). In determining the significance of project impacts, a lead agency “must ensure that CEQA analysis stays in step with evolving scientific knowledge and state regulatory schemes.” *Cleveland National Forest Foundation v. San Diego Assn. of Gov’ts* (2017) 3 Cal.5th 497, 519. To stay in step with evolving scientific knowledge and state policy, the Bay Area Quality Management District (“BAAQMD”) updated its previous CEQA GHG guidance for buildings this year to require all new projects to be built without natural gas and with no inefficient or wasteful energy usage in order to receive a finding of no significant impact.² BAAQMD’s previous 1,100 MT GHG significance threshold was derived from Assembly Bill (“AB”) 32’s 2020 GHG reduction targets, but did not reflect later developments, such as Senate Bill (“SB”) 32’s requirement to reduce GHGs to 40 percent below 1990 levels by 2030, nor Executive Order B-55-18’s requirement to achieve carbon neutrality by 2045.³ As BAAQMD properly noted in its justifications for its updated GHG threshold, “[f]or California to successfully eliminate natural gas usage by 2045, it will need to focus available resources on retrofitting existing natural gas infrastructure. This task will become virtually impossible if we continue to build more natural gas infrastructure that will also need to be retrofit within the next few years.”⁴

Even outside of BAAQMD’s jurisdiction, the analysis supporting its zero-gas threshold provides substantial evidence to support an EIR’s finding of significance, particularly where, as here, GHGs are a globally dispersed pollutant. Indeed, state agencies have made similar findings regarding the incompatibility of gas in new construction with achievement of state climate requirements. As the California Energy Commission (“CEC”) determined in its 2018 Integrated Energy Policy Report (“IEPR”) Update:

New construction projects, retrofitting existing buildings, and replacing appliances and other energy-consuming equipment essentially lock in energy system infrastructure for many years. As a result, each new opportunity for truly impactful investment in energy efficiency and fuel choice is precious. If the decisions made for new buildings result in new and continued fossil fuel use, it will be that much more difficult for California to meet its GHG emission reduction goals. Parties planning new construction have

² See BAAQMD, *Justification Report: CEQA Thresholds for Evaluating the Significance of Climate Impacts from Land Use Projects and Plans*, at 11 (Apr. 2022) (“BAAQMD 2022 Update”), <https://www.baaqmd.gov/~media/files/planning-and-research/ceqa/ceqa-thresholds-2022/justification-report-pdf.pdf?la=en>.

³ See BAAQMD, *CEQA Guidelines Update, Proposed Thresholds of Significance* at 10-22 (Dec 7, 2009), <http://www.baaqmd.gov/~media/files/planning-and-research/ceqa/proposed-thresholds-of-significance-dec-7-09.pdf?la=en> (explaining methodology for previous project-level GHG threshold).

⁴ Justification Report at 12.

the opportunity instead to lock in a zero- or low-carbon emission outcome that will persist for decades.⁵

Consistent with the CEC’s findings, the California Public Utilities Commission (“CPUC”) recently adopted a Decision that would end gas line extension allowances, finding that “gas line subsidies encourage gas use by providing incentives to builders to install more gas appliances, perpetuating a continued reliance on the gas system both now and over the life of the appliance, and offsetting if not reversing any GHG emission reduction benefits secured through other decarbonization measures.”⁶ Accordingly, the CPUC found, subsidies for these new gas connections “work against today’s climate goals and conflict[] with SB 32 and 1477.”⁷ This reflects the growing consensus that aggressive electrification will be needed to achieve the state’s climate goals. Indeed, the 2022 Title 24 update already requires heat pumps as a baseline for either space or water heating in single-family homes, as well as a heat pump space heating standard for new multi-family homes and businesses.⁸ In addition, any new mixed-fuel single-family homes must already be electric-ready so they can “easily convert from natural gas to electric in the future.”⁹

Earthjustice strongly cautions against using approaches to determine the significance of Project GHG impacts that involve comparisons against “business-as-usual” emissions or a per capita emissions metric. In *Center for Biological Diversity v. Cal. Dept of Fish & Wildlife* (2015) 62 Cal.4th 204, the California Supreme Court held that determining the significance of project GHG impacts by comparing project emissions with emissions under a business-as-usual scenario derived from statewide emissions reduction goals under AB 32 lacked substantial evidence. For similar reasons, use of statewide per capita emissions metrics to determine the significance of project emissions has also been rejected for the purpose of determining project GHG impacts under CEQA. As the court held in *Golden Door Properties LLC*, “using a statewide criterion requires substantial evidence and reasoned explanation to close the analytical gap left by the assumption that the ‘level of effort required in one [statewide] context . . . will suffice in the other, a specific land use development.’” *Golden Door Properties LLC v. County of San Diego* (2018) 27 Cal.App.5th 892, 904 (quoting *Center for Biological Diversity*, 62 Cal.4th at 227). While use of a statewide per capita metric to determine the significance of GHG impacts may be useful for a General Plan, which examines collective community emissions of

⁹ *Id.*

existing and proposed new development, it is not appropriate for projects that only govern new development.

B. The Energy Impacts of Projects Connecting to the Gas System are Significant.

A key purpose of the evaluation of project energy impacts under CEQA is “decreasing reliance on fossil fuels, such as coal, natural gas and oil.”¹⁰ Addressing energy impacts of proposed projects requires more than mere compliance with Title 24 Building Energy Efficiency Standards.¹¹ Including gas hook-ups in new projects, and thereby perpetuating reliance on fossil fuels, is contrary to California’s energy objectives and should be considered a significant impact under CEQA.

In addition to the lock-in effect discussed above and its perpetuation of reliance on fossil fuel infrastructure, gas appliances are also inherently wasteful because they are significantly less efficient than their electric alternatives. Heat pumps for space and water heating are substantially more efficient than their gas counterparts. Because heat pumps use electricity to move heat around rather than creating heat, their efficiency is far greater than 100 percent (energy services delivered are much greater than energy input). For example, gas water heaters advertised by Rheem, a major water heating manufacturer, have uniform efficiency factor (“UEF”) of 0.58 – 0.83.¹² In contrast, Rheem’s heat pump water heaters have UEFs between 3.7 and 4.0, making them roughly four to seven times more efficient than gas alternatives.¹³ As recognized by the CEC, “[u]sing heat pumps for space and water heating, as well as other uses, is cost-effective in the long run simply because electrification technologies can be significantly more efficient than natural gas technologies.”¹⁴ Given the low inherent efficiencies of gas space and water heating as compared to heat pump options, homes that continue to rely on gas cannot be reasonably construed as “the wise and efficient use of energy” and therefore result in significant energy impacts under CEQA.

C. The Health/Air Quality Impacts of Projects Connecting to the Gas System are Significant.

CEQA also requires consideration of “health and safety problems” that may result from a project’s emissions.¹⁵ Indeed, Section III.(d) of Appendix G of the CEQA Guidelines

¹⁵ CEQA Guidelines § 15126.2; see also *Sierra Club v. County of Fresno* (2018) 6 Cal. 5th 502, 520 (requiring an EIR to not only discuss air quality impacts and human health impacts separately, but to draw a connection between the two segments of information, to “meet CEQA’s requirements.”).

specifically asks a lead agency to evaluate if the project would “[e]xpose sensitive receptors to substantial pollutant concentrations.”¹⁶ The health and safety hazards of gas-burning appliances in buildings are well-documented by the California Air Resources Board (“CARB”), the CEC, and numerous peer-reviewed academic studies. In a Board-adopted resolution, CARB determined that that “cooking emissions, especially from gas stoves, are associated with increased respiratory disease.”¹⁷ Children in homes with gas stoves are particularly at risk. A meta-analysis examining the association between gas stoves and childhood asthma found that “children in homes with gas stoves have a 42 percent increased risk of experiencing asthma symptoms (current asthma)” and “a 24 percent increased risk of ever being diagnosed with asthma by a doctor (lifetime asthma).”¹⁸ Other health effects observed in children from exposure to nitrogen dioxide (“NO_x”), which is a byproduct of gas combustion, include cardiovascular effects, increased susceptibility to allergens and lung infections, irritated airways and other aggravated respiratory symptoms, and learning deficits.¹⁹ As found repeatedly by peer-reviewed studies, combustion of gas in household appliances produces harmful indoor air pollution, including carbon monoxide, nitric oxide and nitrogen dioxide, formaldehyde, acetaldehyde, and ultrafine particles, often in excess of the levels set out by the California Ambient Air Quality Standards and the National Ambient Air Quality Standards.²⁰ CARB has therefore recognized “the conclusion of recent studies that 100 percent electrification of natural gas appliances in

²⁰ See, e.g., Jennifer M. Logue et al., *Pollutant Exposures from Natural Gas Cooking Burners: A Simulation-Based Assessment for Southern California*, 122 *Env’t Health Perspectives* 43, 43–50 (2014), <http://dx.doi.org/10.1289/ehp.1306673> (modeling exposure rates for gas stove pollutants and finding that “62%, 9%, and 53% of occupants are routinely exposed to NO₂, CO, and HCHO levels that exceed acute health-based standards and guidelines” and that “reducing pollutant exposures from [gas stoves] should be a public health priority.”); John Manuel, *A Healthy Home Environment?*, 107 *Env’tl. Health Perspectives* 352, 352–57 (1999), <https://doi.org/10.1289/ehp.99107a352> (finding that gas furnaces and other gas appliances can be sources of unsafe indoor carbon monoxide concentrations); Nasim A. Mullen et al., *Impact of Natural Gas Appliances on Pollutant Levels in California Homes*, Lawrence Berkeley Nat’l Lab’y (Dec. 2012), https://eta-publications.lbl.gov/sites/default/files/impact_of_natural_gas_appliances.pdf (finding that concentrations of NO₂, NO_x, and carbon monoxide were associated with use of gas appliances); Dr. Zhu et al., *Effects of Residential Gas Appliances on Indoor and Outdoor Air Quality and Public Health in California*, UCLA Fielding School of Pub. Health, (Apr. 2020), <https://ucla.app.box.com/s/xyzt8jclixnetiv0269qe704wu0ihif7> (finding that gas combustion appliances are associated with higher concentrations of NO₂, NO_x, CO, fine particulate matter, and formaldehyde in indoor air, and discussing the health impacts of acute and chronic exposure to each pollutant).

California would result in significant health benefits.”²¹ Accordingly, projects that permit gas appliances such as stoves have significant air quality impacts under CEQA.

Gas appliances contribute to indoor air pollution even when they are not turned on. A recent study sampling the gas supply to home appliances also found additional harmful pollutants present, including the Hazardous Air Pollutants benzene and hexane in 95% and 98% of samples, respectively, among others.²² These pollutants have serious health impacts, particularly given that residential appliances can last for upwards of ten years, and residents may be repeatedly exposed to their pollution multiple times daily. For example, in addition to being a known carcinogen, non-cancer long-term health effects of exposure to benzene include “harmful effects on the bone marrow,” “excessive bleeding,” and can compromise the immune system.²³ Similarly, “[c]hronic inhalation exposure to hexane is associated with sensorimotor polyneuropathy in humans, with numbness in the extremities, muscular weakness, blurred vision, headache, and fatigue,” and animal studies have shown “pulmonary lesions” as well as damage to reproductive organs following chronic inhalation exposure.²⁴ These pollutants were present in the gas supplied to home appliances prior to combustion, and a 2022 study also found that most gas stoves leak supply gas “continuously” even while turned off.²⁵

II. Building Electrification is Feasible and Effective Mitigation to Reduce Project GHG, Energy, and Health Impacts.

A lead agency may not lawfully approve a project where “there are feasible alternatives or feasible mitigation measures available which would substantially lessen [its] significant environmental effects.”²⁶ Only when feasible mitigation measures have been exhausted may an agency find that overriding considerations exist that outweigh the significant environmental effects.²⁷ This mandate—to avoid, minimize and mitigate significant adverse effects where feasible—has been described as the “most important” provision of the law.²⁸

²⁸ *Sierra Club v. Gilroy City Council*, 222 Cal. App. 3d 30, 41 (1990).

Eliminating natural gas use in new buildings is feasible mitigation that will substantially lessen the Project’s GHG, energy, and air quality/health impacts. For example, in *Residential Building Electrification in California*, Energy and Environmental Economics (“E3”) determined that “electrification is found to reduce total greenhouse gas emissions in single family homes by approximately 30 to 60 percent in 2020, relative to a natural gas-fueled home.”²⁹ Moreover, “[a]s the carbon intensity of the grid decreases over time, these savings are estimated to increase to approximately 80 to 90 percent by 2050, including the impacts of upstream methane leakage and refrigerant gas leakage from air conditioners and heat pumps.”³⁰ As shown in the graph below, the GHG savings from heat pumps are substantial today and will only increase as California continues to decarbonize its grid as required under SB 100.

Source: Author’s calculations

31

In contrast, because gas appliances will generate the same level of pollution over their lifetime, their emissions relative to electric alternatives will increase over time and increasingly interfere with achievement of California’s climate objectives.

Numerous local jurisdictions have also adopted all-electric building policies for a variety of building types, demonstrating the feasibility of all-electric new construction. For example, San Francisco adopted an ordinance effective June 2021 prohibiting gas in new construction for

²⁹ E3, *Residential Building Electrification in California*, at iv (Apr. 2019), https://www.ethree.com/wp-content/uploads/2019/04/E3_Residential_Building_Electrification_in_California_April_2019.pdf.

all building types, with narrow exceptions.³² Several other California municipalities have adopted similar legislation, including Berkeley, San Luis Obispo, Half Moon Bay, and the City of Los Angeles.³³

All-electric new construction is also a feasible mitigation measure to avoid the health impacts of gas, particularly the indoor air pollution impacts in residential buildings. For example, Marin Clean Energy developed its Low-Income Families and Tenants (“LIFT”) Pilot Program to reduce energy burdens and improve quality of life for residents in income-qualified multifamily properties through energy efficiency, electrification, and health, safety, and comfort upgrades.³⁴ An evaluation of the LIFT Pilot found that on a per dwelling basis, participants who received heat pump replacements for gas or propane heating equipment saw reductions of greenhouse gases by over one ton of CO₂ per dwelling, NO_x reductions of close to 1 pound, and carbon monoxide reductions of more than 2 pounds.³⁵ Notably, because the national health and safety limit for carbon monoxide is 1 pound annually, residents had been living with unsafe carbon monoxide levels. Heat pump installation virtually eliminated this pollution source.³⁶ In addition to direct health benefits from reduced pollution, tenants reported increased comfort, with “indoor air temperature being just right even on very hot days,” better air quality and reduced noise.³⁷ Electrifying gas end uses in buildings demonstrably mitigates not only building emissions but their associated health and safety impacts.

All-electric building design is also economically feasible under CEQA. When considering economic feasibility of alternatives under CEQA, courts consider “whether the marginal costs of the alternative as compared to the cost of the proposed project are so great that

a reasonably prudent [person] would not proceed with the [altered project].”³⁸ That is, even if an alternative is *more* expensive than the original plan, “[t]he fact that an alternative may be more expensive or less profitable is not sufficient to show that the alternative is financially infeasible.”³⁹

All-electric building design for new construction is financially feasible because it is now cheaper than mixed-fuel construction.⁴⁰ The CEC has found that capital costs for all-electric single family homes are “several thousand dollars less expensive than mixed-fuel homes.”⁴¹ For mid-rise multi-family homes, “[a]n average reduction of \$3,300 per unit was found” by avoiding the costs of gas piping, venting, and trenching to connect to the gas system.⁴² Indeed, as noted in Redwood Energy’s A Zero Emissions All-Electric Multifamily Construction Guide, “[i]n the downtown of a city like Los Angeles, just trenching and piping gas to an apartment building in a busy street can cost \$140,000.”⁴³ Moreover, there are additional embedded savings from faster build-out (related to not having to install gas plumbing and piping inside of the home), and by installing one heat pump instead of a separate furnace and air conditioning. As the CPUC is eliminating gas line extension allowances for all customer classes starting in July 2023, the infrastructure buildout to support gas hookups will raise costs of projects connecting to the gas system even more than before, when line extensions were subsidized.⁴⁴ Additionally, as discussed above, the 2022 update to the Title 24 Building Code already requires heat pumps as a baseline for space or water heating, and requires panel upgrades and other space modifications in any new mixed-fuel homes to ensure they are electric-ready when they inevitably convert to all-

electric.⁴⁵ As a result, mixed-fuel design in new construction is likely *less* financially feasible than all-electric design, in addition to imposing significant GHG, energy, and health impacts.

Now is the critical window for the City to jump-start this transition away from gas to clean energy buildings. CEQA is an essential vehicle to take all feasible action to reduce GHGs and limit further expansion of gas infrastructure. To comply with CEQA, we urge incorporation of all-electric building design into the Project.

Please contact Rebecca Barker at rbarker@earthjustice.org, and Matt Vespa at mvespa@earthjustice.org with any questions or concerns, and please include each of us in future notifications on the Project's development.

California Environmental Quality Act
SCOPING MEETING COMMENT CARD
The Related Bristol Specific Plan Project

The City of Santa Ana Invites Your Comments on Environmental Issues.

A Notice of Preparation (NOP) pursuant to the California Environmental Quality Act (CEQA) has been released for a 30-day comment period, from **Friday, March 17, 2023 through Monday, April 17, 2023**. The purpose of the NOP and this Scoping Meeting is to solicit input from individuals, organizations, and public agencies on environmental issues that should be addressed in the Supplemental Environmental Impact Report (SEIR) being prepared for the proposed mixed-use project.

The NOP identified the following potentially significant environmental issues to be addressed in the EIR:

- Aesthetics
- Air Quality
- Agriculture and Forestry
- Biological Resources
- Cultural Resources
- Energy
- Geology and Soils
- Greenhouse Gas Emissions
- Hazardous Materials
- Hydrology and Water Quality
- Land Use and Planning
- Mineral Resources
- Noise
- Population and Housing
- Public Services and Recreation
- Transportation
- Tribal Cultural Resources
- Utilities and Service Systems
- Wildfire
- Project Alternatives

Please use the space below to record your comments related to environmental issues of concern relevant to the proposed project, adding additional sheets if necessary. **Comments should be submitted in writing by 5 p.m. on Monday, April 17, 2023 to:**

Hi Ali, my name is Lorena Vidaurri
I live at 2331 S. Pacific Ave in Republic Homes in Ward 4. I am also the Vice
President of our association. I work closing with Kathy Freeman.

I have concerns with 1.3 parking spots for apartment unit.
We all have concerns we are going to lose Vons
I'm concerned about our traffic. We neighborhood has two exits and they are both
hard to get our of.

Thank you,
Lorena

SCOPING MEETING COMMENT CARD
The Related Bristol Specific Plan Project**

The City of Santa Ana Invites Your Comments on Environmental Issues.

A Notice of Preparation (NOP) pursuant to the California Environmental Quality Act (CEQA) has been released for a 30-day comment period, from **Friday, March 17, 2023 through Monday, April 17, 2023**. The purpose of the NOP and this Scoping Meeting is to solicit input from individuals, organizations, and public agencies on environmental issues that should be addressed in the Supplemental Environmental Impact Report (SEIR) being prepared for the proposed mixed-use project.

The NOP identified the following potentially significant environmental issues to be addressed in the EIR:

- Aesthetics
- ✓ Air Quality
- Agriculture and Forestry
- ✓ Biological Resources
- Cultural Resources
- ✓ Energy
- Geology and Soils
- ✓ Greenhouse Gas Emissions
- ✓ Hazardous Materials
- ✓ Hydrology and Water Quality
- Land Use and Planning
- Mineral Resources
- ✓ Noise
- Population and Housing
- ✓ Public Services and Recreation
- ✓ Transportation
- Tribal Cultural Resources
- ✓ Utilities and Service Systems
- ✓ Wildfire
- ✓ Project Alternatives

Please use the space below to record your comments related to environmental issues of concern relevant to the proposed project, adding additional sheets if necessary. **Comments should be submitted in writing by 5 p.m. on Monday, April 17, 2023 to:**

Does the EIR Guidelines and reports include the impact on neighborhoods within 5-10 miles of the project? Air quality, resources such as water, noise levels and our access to services and energy supply.
Also, Police presence and safety on site.
This is a huge revenue project for Santa Ana, how does that benefit current residents? To benefit from this gain to our city our homes and services must also be protected and better for future generations.

• I have severe allergies. I am very concerned about the impact of the demolition phase of the toxic air from the Bldgs as they are torn down. What will be done to mitigate the dirt/dust/fumes
• Our TRACT is within walking distance of the project & we will be highly impacted in every way possible. Trucks, Noise, crowding & eventually over ~~the~~ 10,000 people squished into our corner. This is a daunting thought for our total radius living so very close to us. Reduce the residents from 3,750 to LESS! T.J.

I'm writing this emailed Scoping Meeting Comment Card to inform you of three main concerns. First, the area where the Related Bristol Project is going to be placed consists of sandy soil. In the 1970's my father, a pipelayer, worked around the area and his company discovered the unstable

soil. In 2013 or about that time, while constructing Christ Our Savior, the base had to be reinforced and it cost us as parishioners more money to construct. Lastly, the sidewalks are uneven in most of that area known as Sandpoint. As well as some homes having cracks on the ceilings.

The second concern I have has to do with the population. As of today, many homes and apartments are multifamily because of the expensive rents and mortgages. Any psychology student can provide research on how densely populated areas result in behavioral disfunctions. Crime has also increased in our area as a result of an increase in population with financial insecurity. We need more police involvement.

The third concern I have noticed is the increase of traffic. This issue is the greatest during the morning and afternoon when people are going and coming home from work. At Christmas time, it's very difficult to drive around the area due to the stoppers at South Coast Plaza. In the last six months or so, we have a severe problem with street racers. They used to go out at night but now they can be heard and seen during the day as well. They go at maximum speeds without obeying any laws. Also, I have witnessed a few deaths because of drunk drivers.

These are just my main concerns. I would appreciate it if they are taken into consideration by the city and developers.

NATIVE AMERICAN HERITAGE COMMISSION

Governor's Office of Planning & Research

March 14, 2023

March 17 2023

Ali Pezeshkpour
City of Santa Ana
P.O. Box 1988 (M-20)
Santa Ana, CA 92702

STATE CLEARING HOUSE

Re: 2020029087, Related Bristol Specific Plan Project, Orange County

Dear Mr. Pezeshkpour:

The Native American Heritage Commission (NAHC) has received the Notice of Preparation (NOP), Draft Environmental Impact Report (DEIR) or Early Consultation for the project referenced above. The California Environmental Quality Act (CEQA) (Pub. Resources Code §21000 et seq.), specifically Public Resources Code §21084.1, states that a project that may cause a substantial adverse change in the significance of a historical resource, is a project that may have a significant effect on the environment. (Pub. Resources Code § 21084.1; Cal. Code Regs., tit.14, §15064.5 (b) (CEQA Guidelines §15064.5 (b))). If there is substantial evidence, in light of the whole record before a lead agency, that a project may have a significant effect on the environment, an Environmental Impact Report (EIR) shall be prepared. (Pub. Resources Code §21080 (d); Cal. Code Regs., tit. 14, § 5064 subd.(a)(1) (CEQA Guidelines §15064 (a)(1))). In order to determine whether a project will cause a substantial adverse change in the significance of a historical resource, a lead agency will need to determine whether there are historical resources within the area of potential effect (APE).

CEQA was amended significantly in 2014. Assembly Bill 52 (Gatto, Chapter 532, Statutes of 2014) (AB 52) amended CEQA to create a separate category of cultural resources, "tribal cultural resources" (Pub. Resources Code §21074) and provides that a project with an effect that may cause a substantial adverse change in the significance of a tribal cultural resource is a project that may have a significant effect on the environment. (Pub. Resources Code §21084.2). Public agencies shall, when feasible, avoid damaging effects to any tribal cultural resource. (Pub. Resources Code §21084.3 (a)). **AB 52 applies to any project for which a notice of preparation, a notice of negative declaration, or a mitigated negative declaration is filed on or after July 1, 2015.** If your project involves the adoption of or amendment to a general plan or a specific plan, or the designation or proposed designation of open space, on or after March 1, 2005, it may also be subject to Senate Bill 18 (Burton, Chapter 905, Statutes of 2004) (SB 18). **Both SB 18 and AB 52 have tribal consultation requirements.** If your project is also subject to the federal National Environmental Policy Act (42 U.S.C. § 4321 et seq.) (NEPA), the tribal consultation requirements of Section 106 of the National Historic Preservation Act of 1966 (154 U.S.C. 300101, 36 C.F.R. §800 et seq.) may also apply.

The NAHC recommends consultation with California Native American tribes that are traditionally and culturally affiliated with the geographic area of your proposed project as early as possible in order to avoid inadvertent discoveries of Native American human remains and best protect tribal cultural resources. Below is a brief summary of portions of AB 52 and SB 18 as well as the NAHC's recommendations for conducting cultural resources assessments.

Consult your legal counsel about compliance with AB 52 and SB 18 as well as compliance with any other applicable laws.

AB 52 has added to CEQA the additional requirements listed below, along with many other requirements:

1. Fourteen Day Period to Provide Notice of Completion of an Application/Decision to Undertake a Project:

Within fourteen (14) days of determining that an application for a project is complete or of a decision by a public agency to undertake a project, a lead agency shall provide formal notification to a designated contact of, or tribal representative of, traditionally and culturally affiliated California Native American tribes that have requested notice, to be accomplished by at least one written notice that includes:

- a. A brief description of the project.
- b. The lead agency contact information.
- c. Notification that the California Native American tribe has 30 days to request consultation. (Pub. Resources Code §21080.3.1 (d)).
- d. A "California Native American tribe" is defined as a Native American tribe located in California that is on the contact list maintained by the NAHC for the purposes of Chapter 905 of Statutes of 2004 (SB 18). (Pub. Resources Code §21073).

2. Begin Consultation Within 30 Days of Receiving a Tribe's Request for Consultation and Before Releasing a Negative Declaration, Mitigated Negative Declaration, or Environmental Impact Report: A lead agency shall begin the consultation process within 30 days of receiving a request for consultation from a California Native American tribe that is traditionally and culturally affiliated with the geographic area of the proposed project. (Pub. Resources Code §21080.3.1, subs. (d) and (e)) and prior to the release of a negative declaration, mitigated negative declaration or Environmental Impact Report. (Pub. Resources Code §21080.3.1 (b)).

- a. For purposes of AB 52, "consultation shall have the same meaning as provided in Gov. Code §65352.4 (SB 18). (Pub. Resources Code §21080.3.1 (b)).

3. Mandatory Topics of Consultation If Requested by a Tribe: The following topics of consultation, if a tribe requests to discuss them, are mandatory topics of consultation:

- a. Alternatives to the project.
- b. Recommended mitigation measures.
- c. Significant effects. (Pub. Resources Code §21080.3.2 (a)).

4. Discretionary Topics of Consultation: The following topics are discretionary topics of consultation:

- a. Type of environmental review necessary.
- b. Significance of the tribal cultural resources.
- c. Significance of the project's impacts on tribal cultural resources.
- d. If necessary, project alternatives or appropriate measures for preservation or mitigation that the tribe may recommend to the lead agency. (Pub. Resources Code §21080.3.2 (a)).

5. Confidentiality of Information Submitted by a Tribe During the Environmental Review Process: With some exceptions, any information, including but not limited to, the location, description, and use of tribal cultural resources submitted by a California Native American tribe during the environmental review process shall not be included in the environmental document or otherwise disclosed by the lead agency or any other public agency to the public, consistent with Government Code §6254 (r) and §6254.10. Any information submitted by a California Native American tribe during the consultation or environmental review process shall be published in a confidential appendix to the environmental document unless the tribe that provided the information consents, in writing, to the disclosure of some or all of the information to the public. (Pub. Resources Code §21082.3 (c)(1)).

6. Discussion of Impacts to Tribal Cultural Resources in the Environmental Document: If a project may have a significant impact on a tribal cultural resource, the lead agency's environmental document shall discuss both of the following:

- a. Whether the proposed project has a significant impact on an identified tribal cultural resource.
- b. Whether feasible alternatives or mitigation measures, including those measures that may be agreed to pursuant to Public Resources Code §21082.3, subdivision (a), avoid or substantially lessen the impact on the identified tribal cultural resource. (Pub. Resources Code §21082.3 (b)).

- 7. Conclusion of Consultation:** Consultation with a tribe shall be considered concluded when either of the following occurs:
- a.** The parties agree to measures to mitigate or avoid a significant effect, if a significant effect exists, on a tribal cultural resource; or
 - b.** A party, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached. (Pub. Resources Code §21080.3.2 (b)).
- 8. Recommending Mitigation Measures Agreed Upon in Consultation in the Environmental Document:** Any mitigation measures agreed upon in the consultation conducted pursuant to Public Resources Code §21080.3.2 shall be recommended for inclusion in the environmental document and in an adopted mitigation monitoring and reporting program, if determined to avoid or lessen the impact pursuant to Public Resources Code §21082.3, subdivision (b), paragraph 2, and shall be fully enforceable. (Pub. Resources Code §21082.3 (a)).
- 9. Required Consideration of Feasible Mitigation:** If mitigation measures recommended by the staff of the lead agency as a result of the consultation process are not included in the environmental document or if there are no agreed upon mitigation measures at the conclusion of consultation, or if consultation does not occur, and if substantial evidence demonstrates that a project will cause a significant effect to a tribal cultural resource, the lead agency shall consider feasible mitigation pursuant to Public Resources Code §21084.3 (b). (Pub. Resources Code §21082.3 (e)).
- 10. Examples of Mitigation Measures That, If Feasible, May Be Considered to Avoid or Minimize Significant Adverse Impacts to Tribal Cultural Resources:**
- a.** Avoidance and preservation of the resources in place, including, but not limited to:
 - i.** Planning and construction to avoid the resources and protect the cultural and natural context.
 - ii.** Planning greenspace, parks, or other open space, to incorporate the resources with culturally appropriate protection and management criteria.
 - b.** Treating the resource with culturally appropriate dignity, taking into account the tribal cultural values and meaning of the resource, including, but not limited to, the following:
 - i.** Protecting the cultural character and integrity of the resource.
 - ii.** Protecting the traditional use of the resource.
 - iii.** Protecting the confidentiality of the resource.
 - c.** Permanent conservation easements or other interests in real property, with culturally appropriate management criteria for the purposes of preserving or utilizing the resources or places.
 - d.** Protecting the resource. (Pub. Resource Code §21084.3 (b)).
 - e.** Please note that a federally recognized California Native American tribe or a non-federally recognized California Native American tribe that is on the contact list maintained by the NAHC to protect a California prehistoric, archaeological, cultural, spiritual, or ceremonial place may acquire and hold conservation easements if the conservation easement is voluntarily conveyed. (Civ. Code §815.3 (c)).
 - f.** Please note that it is the policy of the state that Native American remains and associated grave artifacts shall be repatriated. (Pub. Resources Code §5097.991).
- 11. Prerequisites for Certifying an Environmental Impact Report or Adopting a Mitigated Negative Declaration or Negative Declaration with a Significant Impact on an Identified Tribal Cultural Resource:** An Environmental Impact Report may not be certified, nor may a mitigated negative declaration or a negative declaration be adopted unless one of the following occurs:
- a.** The consultation process between the tribes and the lead agency has occurred as provided in Public Resources Code §21080.3.1 and §21080.3.2 and concluded pursuant to Public Resources Code §21080.3.2.
 - b.** The tribe that requested consultation failed to provide comments to the lead agency or otherwise failed to engage in the consultation process.
 - c.** The lead agency provided notice of the project to the tribe in compliance with Public Resources Code §21080.3.1 (d) and the tribe failed to request consultation within 30 days. (Pub. Resources Code §21082.3 (d)).

The NAHC's PowerPoint presentation titled, "Tribal Consultation Under AB 52: Requirements and Best Practices" may be found online at: http://nahc.ca.gov/wp-content/uploads/2015/10/AB52TribalConsultation_CalEPAPDF.pdf

SB 18

SB 18 applies to local governments and requires local governments to contact, provide notice to, refer plans to, and consult with tribes prior to the adoption or amendment of a general plan or a specific plan, or the designation of open space. (Gov. Code §65352.3). Local governments should consult the Governor's Office of Planning and Research's "Tribal Consultation Guidelines," which can be found online at: https://www.opr.ca.gov/docs/09_14_05_Updated_Guidelines_922.pdf.

Some of SB 18's provisions include:

1. **Tribal Consultation**: If a local government considers a proposal to adopt or amend a general plan or a specific plan, or to designate open space it is required to contact the appropriate tribes identified by the NAHC by requesting a "Tribal Consultation List." If a tribe, once contacted, requests consultation the local government must consult with the tribe on the plan proposal. **A tribe has 90 days from the date of receipt of notification to request consultation unless a shorter timeframe has been agreed to by the tribe.** (Gov. Code §65352.3 (a)(2)).
2. **No Statutory Time Limit on SB 18 Tribal Consultation**. There is no statutory time limit on SB 18 tribal consultation.
3. **Confidentiality**: Consistent with the guidelines developed and adopted by the Office of Planning and Research pursuant to Gov. Code §65040.2, the city or county shall protect the confidentiality of the information concerning the specific identity, location, character, and use of places, features and objects described in Public Resources Code §5097.9 and §5097.993 that are within the city's or county's jurisdiction. (Gov. Code §65352.3 (b)).
4. **Conclusion of SB 18 Tribal Consultation**: Consultation should be concluded at the point in which:
 - a. The parties to the consultation come to a mutual agreement concerning the appropriate measures for preservation or mitigation; or
 - b. Either the local government or the tribe, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached concerning the appropriate measures of preservation or mitigation. (Tribal Consultation Guidelines, Governor's Office of Planning and Research (2005) at p. 18).

Agencies should be aware that neither AB 52 nor SB 18 precludes agencies from initiating tribal consultation with tribes that are traditionally and culturally affiliated with their jurisdictions before the timeframes provided in AB 52 and SB 18. For that reason, we urge you to continue to request Native American Tribal Contact Lists and "Sacred Lands File" searches from the NAHC. The request forms can be found online at: <http://nahc.ca.gov/resources/forms/>.

NAHC Recommendations for Cultural Resources Assessments

To adequately assess the existence and significance of tribal cultural resources and plan for avoidance, preservation in place, or barring both, mitigation of project-related impacts to tribal cultural resources, the NAHC recommends the following actions:

1. Contact the appropriate regional California Historical Research Information System (CHRIS) Center (https://ohp.parks.ca.gov/?page_id=30331) for an archaeological records search. The records search will determine:
 - a. If part or all of the APE has been previously surveyed for cultural resources.
 - b. If any known cultural resources have already been recorded on or adjacent to the APE.
 - c. If the probability is low, moderate, or high that cultural resources are located in the APE.
 - d. If a survey is required to determine whether previously unrecorded cultural resources are present.
2. If an archaeological inventory survey is required, the final stage is the preparation of a professional report detailing the findings and recommendations of the records search and field survey.
 - a. The final report containing site forms, site significance, and mitigation measures should be submitted immediately to the planning department. All information regarding site locations, Native American human remains, and associated funerary objects should be in a separate confidential addendum and not be made available for public disclosure.
 - b. The final written report should be submitted within 3 months after work has been completed to the appropriate regional CHRIS center.

- 3.** Contact the NAHC for:
 - a.** A Sacred Lands File search. Remember that tribes do not always record their sacred sites in the Sacred Lands File, nor are they required to do so. A Sacred Lands File search is not a substitute for consultation with tribes that are traditionally and culturally affiliated with the geographic area of the project's APE.
 - b.** A Native American Tribal Consultation List of appropriate tribes for consultation concerning the project site and to assist in planning for avoidance, preservation in place, or, failing both, mitigation measures.
- 4.** Remember that the lack of surface evidence of archaeological resources (including tribal cultural resources) does not preclude their subsurface existence.
 - a.** Lead agencies should include in their mitigation and monitoring reporting program plan provisions for the identification and evaluation of inadvertently discovered archaeological resources per Cal. Code Regs., tit. 14, § 15064.5(f) (CEQA Guidelines § 15064.5(f)). In areas of identified archaeological sensitivity, a certified archaeologist and a culturally affiliated Native American with knowledge of cultural resources should monitor all ground-disturbing activities.
 - b.** Lead agencies should include in their mitigation and monitoring reporting program plan provisions for the disposition of recovered cultural items that are not burial associated in consultation with culturally affiliated Native Americans.
 - c.** Lead agencies should include in their mitigation and monitoring reporting program plan provisions for the treatment and disposition of inadvertently discovered Native American human remains. Health and Safety Code §7050.5, Public Resources Code §5097.98, and Cal. Code Regs., tit. 14, § 15064.5, subdivisions (d) and (e) (CEQA Guidelines § 15064.5, subds. (d) and (e)) address the processes to be followed in the event of an inadvertent discovery of any Native American human remains and associated grave goods in a location other than a dedicated cemetery.

If you have any questions or need additional information, please contact me at my email address:

SUBJECT: Notice of Preparation of a Supplemental Environmental Impact Report and Public Scoping Meeting for the Related Bristol Specific Plan Project

Thank you for providing the Notice of Preparation of a Supplemental Environmental Impact Report and Public Scoping Meeting for the Related Bristol Specific Plan Project. The proposed Specific Plan Project is located at 3600 South Bristol Street. Orange County Sanitation District (OC San) has reviewed the proposed project and would like to bring to your attention OC San's concerns and requirements.

There are potential capacity issues caused by the proposed project for the OC San sewer line, which is dependent on the points of connections. Thus, prior to making connections, please contact OC San to seek approval/acceptance of proposed points of connections and hydraulic routing. You can do this by contacting the OC San Engineering Planning division for trunk connection permit(s) requirements and hydraulic capacity verification.

The proposed project also includes an above and below parking structure. Please be advised that the OC San does not allow parking structure drains to be connected to the sewer per ordinance. OC San realizes the connection may be made to a City of Santa Ana sewer; however, City sewers eventually connect to OC San sewers, that lead to the reclamation plant in Fountain Valley.

If you have any questions regarding this letter, please contact Kevin Hadden at 714 593-7462, or khadden@ocsan.gov.

Subject: Notice of Preparation (NOP) of a Supplemental Environmental Impact Report Regarding the Related Bristol Specific Plan

Dear Mr. Pezeshkpour:

Thank you for providing the Orange County Transportation Authority (OCTA) with the Notice of Preparation of a Supplemental Environmental Impact Report for the Related Bristol Specific Plan. The following comments are provided for your consideration:

- OC Bus routes serving the proposed development are: 55, 57, 76, 86, 150, and Bravo! Route 553. The proposed project area serves as a critical layover and transfer hub for these OC Bus routes. In addition, there are also stops located on all sides of the proposed development.
- OCTA has the potential for future expansion of bus service in the area and would appreciate being included in the development of the site plans.
- Once available, please provide the street improvement site plans which include the Signing and Striping Plans for review.
- Regarding the westbound Sunflower Ave./Bristol St., this bus stop is a major layover location for OCTA. As part of long-term development plans, this bus stop is proposed to increase the layover zone to 360 feet long, an additional 180 feet from the current layover zone, to accommodate the level of bus service (Routes 86, 150, 553) and ridership.
- Please consider investing in bike parking and connectivity to surrounding bicycle infrastructure. There are a series of bikeways nearby (located directly adjacent to the Bristol Street bike lanes, about 700 feet away from the Flower Side Path, and about 2 miles away from the Santa Ana River Trail). With the number of units and commercial space proposed, please study and incorporate multimodal solutions into your project design.

Mr. Ali Pezeshkpour
April 17, 2023
Page 2

Given the magnitude of the proposed development, OCTA would appreciate continued coordination with the City of Santa Ana to ensure that robust transit is provided in the project area as Bristol Street is a high-quality transit corridor. If you have any questions or comments, please contact me at (714) 560-5907 or at dphu@octa.net.

Sincerely,

A handwritten signature in black ink, appearing to read 'Dan Phu', with a stylized flourish at the end.

Subject: scope meeting
Date: Thursday, March 30, 2023 8:15:22 PM

Thank you for stopping and chatting.

One of the things that strikes about this project is the complete lack of information on traffic issues. RELATED (and the City) has obviously a huge investment in the project already. No doubt people have been working on it for a long time. Drawings and concepts, layout, anticipated volume and ROI, etc.

But no one will talk about any preliminary or conceptual traffic volumes, patterns, and mitigation. But SOMEONE obviously has thought about it. It is inconceivable that nothing has at least been sketched; but no one will talk. I would submit that if the City hasn't at least discussed an outline, then there is a serious deficiency in the process.

But if there have been some thoughts, either at RELATED or the City, then the current residents (that already struggle with traffic issues) should have that information, however minimal. We should have had it at the first (and subsequent) meeting(s). There are many people that are very disappointed in the lack of information.

On a different note, here are some thoughts on the project; conceptually to enhance the "walkability" and hopefully reduce the traffic potential. I don't think these were in any of the other notes, but if they were, my apologies.

Residential properties would benefit from a dedicated office area, anticipating the continued trend to more remote working / employment activities. This would be more conducive to home productivity. This would encourage more home office participation, and in turn reduce the reliance on commuting. Less commuting is less congestion and pollution. Think a United Kingdom "box room" that could be used as a small in-home office, maybe a nursery for newborn / small infant, or as storage for bicycles, sports equipment, business / financial / personal / tax records, crafting or hobbies. Having an out of the way space for bicycles would encourage people to acquire and use them. Santa Ana has been expanding trails and bicycle friendly streets.

Dedicated small storage areas (in the parking garage?). Again, bicycles, sports equipment, boxes, financial / business records and supplies, etc. Could be rented separately, or an added amenity. Contents are readily available, avoids trips to an offsite storage unit.

Residential (rental) properties could benefit from a "community room" with work spaces, something out of the actual living space. Think library carrels or mini-offices; similar to a "work share" business. These spaces could be rented separately; perhaps hourly / daily / weekly / monthly. Conference rooms available for meetings. Or partner with a "work share" company in the building / complex for this amenity. These approaches will continue to increase in demand in years to come.

RE: SCAG Comments on the Notice of Preparation of a Supplemental Environmental Impact Report for the Related Bristol Specific Plan [SCAG NO. IGR10848]

Dear Ali Pezeshkpour,

Thank you for submitting the Notice of Preparation of a Supplemental Environmental Impact Report for the Related Bristol Specific Plan ("proposed project") to the Southern California Association of Governments (SCAG) for review and comment. SCAG is responsible for providing informational resources to regionally significant plans, projects, and programs per the California Environmental Quality Act (CEQA) to facilitate the consistency of these projects with SCAG's adopted regional plans, to be determined by the lead agencies.¹

Pursuant to Senate Bill (SB) 375, SCAG is the designated Regional Transportation Planning Agency under state law and is responsible for preparation of the Regional Transportation Plan (RTP) including the Sustainable Communities Strategy (SCS). SCAG's feedback is intended to assist local jurisdictions and project proponents to implement projects that have the potential to contribute to attainment of Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) goals and align with RTP/SCS policies. Finally, SCAG is the authorized regional agency for Intergovernmental Review (IGR) of programs proposed for Federal financial assistance and direct Federal development activities, pursuant to Presidential Executive Order 12372.

SCAG staff has reviewed the Notice of Preparation of a Supplemental Environmental Impact Report for the Related Bristol Specific Plan in Orange County. The proposed project includes the demolition of existing buildings and the construction of up to 3,750 multi-family residential units, up to 350,000 square feet of commercial space, hotel with up to 250 rooms, senior housing up to 200 units, and 13.1 acres of open space on a 41.1-acre site.

When available, please email environmental documentation to IGR@scag.ca.gov providing, at a minimum, the full public comment period for review.

If you have any questions regarding the attached comments, please contact the Intergovernmental Review (IGR) Program, attn.: Annaleigh Ekman, Senior Regional Planner, at (213) 630-1427 or IGR@scag.ca.gov. Thank you.

Sincerely,

Frank Wen, Ph.D.
Manager, Planning Strategy Department

¹ Lead agencies such as local jurisdictions have the sole discretion in determining a local project's consistency with the 2020 RTP/SCS (Connect SoCal) for the purpose of determining consistency for CEQA.

**COMMENTS ON THE NOTICE OF PREPARATION OF A
SUPPLEMENTAL ENVIRONMENTAL IMPACT REPORT FOR THE
RELATED BRISTOL SPECIFIC PLAN [SCAG NO. IGR10848]**

CONSISTENCY WITH CONNECT SOCIAL

SCAG provides informational resources to facilitate the consistency of the proposed project with the adopted 2020-2045 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS or Connect SoCal). For the purpose of determining consistency with CEQA, lead agencies such as local jurisdictions have the sole discretion in determining a local project’s consistency with Connect SoCal.

CONNECT SOCIAL GOALS

The SCAG Regional Council fully adopted [Connect SoCal](#) in September 2020. Connect SoCal, also known as the 2020 – 2045 RTP/SCS, builds upon and expands land use and transportation strategies established over several planning cycles to increase mobility options and achieve a more sustainable growth pattern. The long-range visioning plan balances future mobility and housing needs with goals for the environment, the regional economy, social equity and environmental justice, and public health. The goals included in Connect SoCal may be pertinent to the proposed project. These goals are meant to provide guidance for considering the proposed project. Among the relevant goals of Connect SoCal are the following:

SCAG CONNECT SOCIAL GOALS	
Goal #1:	<i>Encourage regional economic prosperity and global competitiveness</i>
Goal #2:	<i>Improve mobility, accessibility, reliability and travel safety for people and goods</i>
Goal #3:	<i>Enhance the preservation, security, and resilience of the regional transportation system</i>
Goal #4:	<i>Increase person and goods movement and travel choices within the transportation system</i>
Goal #5:	<i>Reduce greenhouse gas emissions and improve air quality</i>
Goal #6:	<i>Support healthy and equitable communities</i>
Goal #7:	<i>Adapt to a changing climate and support an integrated regional development pattern and transportation network</i>
Goal #8:	<i>Leverage new transportation technologies and data-driven solutions that result in more efficient travel</i>
Goal #9:	<i>Encourage development of diverse housing types in areas that are supported by multiple transportation options</i>
Goal #10:	<i>Promote conservation of natural and agricultural lands and restoration of habitats</i>

For ease of review, we encourage the use of a side-by-side comparison of SCAG goals with discussions of the consistency, non-consistency or non-applicability of the goals and supportive analysis in a table format. Suggested format is as follows:

SCAG CONNECT SOCIAL GOALS	
Goal	Analysis
Goal #1: <i>Encourage regional economic prosperity and global competitiveness</i>	<i>Consistent: Statement as to why; Not-Consistent: Statement as to why; Or Not Applicable: Statement as to why; DEIR page number reference</i>
Goal #2: <i>Improve mobility, accessibility, reliability and travel safety for people and goods</i>	<i>Consistent: Statement as to why; Not-Consistent: Statement as to why; Or Not Applicable: Statement as to why; DEIR page number reference</i>
etc.	etc.

Connect SoCal Strategies

To achieve the goals of Connect SoCal, a wide range of land use and transportation strategies are included in the accompanying twenty (20) technical reports. Of particular note are multiple strategies included in Chapter 3 of Connect SoCal intended to support implementation of the regional Sustainable Communities Strategy (SCS) framed within the context of focusing growth near destinations and mobility options; promoting diverse housing choices; leveraging technology innovations; supporting implementation of sustainability policies; and promoting a Green Region. To view Connect SoCal and the accompanying technical reports, please visit the [Connect SoCal webpage](#). Connect SoCal builds upon the progress from previous RTP/SCS cycles and continues to focus on integrated, coordinated, and balanced planning for land use and transportation that helps the SCAG region strive towards a more sustainable region, while meeting statutory requirements pertinent to RTP/SCSs. These strategies within the regional context are provided as guidance for lead agencies such as local jurisdictions when the proposed project is under consideration.

DEMOGRAPHICS AND GROWTH FORECASTS

A key, formative step in projecting future population, households, and employment through 2045 for Connect SoCal was the generation of a forecast of regional and county level growth in collaboration with expert demographers and economists on Southern California. From there, jurisdictional level forecasts were ground-truthed by subregions and local agencies, which helped SCAG identify opportunities and barriers to future development. This forecast helps the region understand, in a very general sense, where we are expected to grow, and allows SCAG to focus attention on areas that are experiencing change and may have increased transportation needs. After a year-long engagement effort with all 197 jurisdictions one-on-one, 82 percent of SCAG’s 197 jurisdictions provided feedback on the forecast of future growth for Connect SoCal. SCAG also sought feedback on potential sustainable growth strategies from a broad range of stakeholder groups – including local jurisdictions, county transportation commissions, other partner agencies, industry groups, community-based organizations, and the general public. Connect SoCal utilizes a bottom-up approach in that total projected growth for each jurisdiction reflects feedback received from jurisdiction staff, including city managers, community development/planning directors, and local staff. Growth at the neighborhood level (i.e., transportation analysis zone (TAZ) reflects entitled projects and adheres to current general and specific plan maximum densities as conveyed by jurisdictions (except in cases where entitled projects and development agreements exceed these capacities as calculated by SCAG). Neighborhood level growth projections also feature strategies that help to reduce greenhouse gas emissions (GHG) from automobiles and light trucks to achieve Southern California’s GHG reduction target, approved by the California Air Resources Board (CARB) in accordance with state planning law. Connect SoCal’s Forecasted Development Pattern is utilized for long range modeling purposes and does not supersede actions taken by elected bodies on future development, including entitlements and development agreements. SCAG does not have the authority to implement the plan -- neither through decisions about what type of development is built where, nor what transportation projects are ultimately built, as Connect

SoCal is adopted at the jurisdictional level. Achieving a sustained regional outcome depends upon informed and intentional local action. To access jurisdictional level growth estimates and forecasts for years 2016 and 2045, please refer to the [Connect SoCal Demographics and Growth Forecast Technical Report](#). The growth forecasts for the region and applicable jurisdictions are below.

	Adopted SCAG Region Wide Forecasts				Adopted City of Santa Ana Forecasts			
	Year 2020	Year 2030	Year 2035	Year 2045	Year 2020	Year 2030	Year 2035	Year 2045
Population	19,517,731	20,821,171	21,443,006	22,503,899	348,975	362,591	363,032	360,077
Households	6,333,458	6,902,821	7,170,110	7,633,451	77,159	79,637	79,742	80,133
Employment	8,695,427	9,303,627	9,566,384	10,048,822	165,242	168,470	169,775	172,398

MITIGATION MEASURES

SCAG staff recommends that you review the [Final Program Environmental Impact Report](#) (Final PEIR) for Connect SoCal for guidance, as appropriate. SCAG’s Regional Council certified the PEIR and adopted the associated Findings of Fact and a Statement of Overriding Considerations (FOF/SOC) and Mitigation Monitoring and Reporting Program (MMRP) on May 7, 2020 and also adopted a PEIR Addendum and amended the MMRP on September 3, 2020 (please see the [PEIR webpage](#) and scroll to the bottom of the page for the PEIR Addendum). The PEIR includes a list of project-level performance standards-based mitigation measures that may be considered for adoption and implementation by lead, responsible, or trustee agencies in the region, as applicable and feasible. Project-level mitigation measures are within responsibility, authority, and/or jurisdiction of project-implementing agency or other public agency serving as lead agency under CEQA in subsequent project- and site- specific design, CEQA review, and decision-making processes, to meet the performance standards for each of the CEQA resource categories.

South Coast Air Quality Management District

Ali Pezeshkpour, AICP, Planning Manager
City of Santa Ana
Planning Division
20 Civic Center Plaza, M-20
Santa Ana, California 92701

Notice of Preparation of a Supplemental Environmental Impact Report and Public Scoping meeting for the Related Bristol Specific Plan Project (Proposed Project)

South Coast Air Quality Management District (South Coast AQMD) staff appreciates the opportunity to comment on the above-mentioned document. Our comments are recommendations on the analysis of potential air quality impacts from the Proposed Project that should be included in the Environmental Impact Report (EIR). Please send a copy of the EIR upon its completion and public release directly to South Coast AQMD as copies of the EIR submitted to the State Clearinghouse are not forwarded. **In addition, please send all appendices and technical documents related to the air quality, health risk, and greenhouse gas analyses and electronic versions of all emission calculation spreadsheets, and air quality modeling and health risk assessment input and output files (not PDF files). Any delays in providing all supporting documentation for our review will require additional review time beyond the end of the comment period.**

CEQA Air Quality Analysis

Staff recommends that the Lead Agency use South Coast AQMD's CEQA Air Quality Handbook and website¹ as guidance when preparing the air quality and greenhouse gas analyses. It is also recommended that the Lead Agency use the CalEEMod² land use emissions software, which can estimate pollutant emissions from typical land use development and is the only software model maintained by the California Air Pollution Control Officers Association.

South Coast AQMD has developed both regional and localized significance thresholds. South Coast AQMD staff recommends that the Lead Agency quantify criteria pollutant emissions and compare the emissions to South Coast AQMD's CEQA regional pollutant emissions significance thresholds³ and localized significance thresholds (LSTs)⁴ to determine the Proposed Project's air quality impacts. The localized analysis can be conducted by either using the LST screening tables or performing dispersion modeling.

The Lead Agency should identify any potential adverse air quality impacts that could occur from all phases of the Proposed Project and all air pollutant sources related to the Proposed Project. Air quality impacts from both construction (including demolition, if any) and operations should be calculated. Construction-related air quality impacts typically include, but are not limited to, emissions from the use of

¹ South Coast AQMD's CEQA Handbook and other resources for preparing air quality analyses can be found at: <http://www.aqmd.gov/home/rules-compliance/ceqa/air-quality-analysis-handbook>.

² CalEEMod is available free of charge at: www.caleemod.com.

³ South Coast AQMD's CEQA regional pollutant emissions significance thresholds can be found at: <http://www.aqmd.gov/docs/default-source/ceqa/handbook/scaqmd-air-quality-significance-thresholds.pdf>.

⁴ South Coast AQMD's guidance for performing a localized air quality analysis can be found at: <http://www.aqmd.gov/home/regulations/ceqa/air-quality-analysis-handbook/localized-significance-thresholds>.

heavy-duty equipment from grading, earth-loading/unloading, paving, architectural coatings, off-road mobile sources (e.g., heavy-duty construction equipment) and on-road mobile sources (e.g., construction worker vehicle trips, material transport trips, and hauling trips). Operation-related air quality impacts may include, but are not limited to, emissions from stationary sources (e.g., boilers and air pollution control devices), area sources (e.g., solvents and coatings), and vehicular trips (e.g., on- and off-road tailpipe emissions and entrained dust). Air quality impacts from indirect sources, such as sources that generate or attract vehicular trips, should be included in the analysis. Furthermore, emissions from the overlapping construction and operational activities should be combined and compared to South Coast AQMD's regional air quality CEQA *operational* thresholds to determine the level of significance.

If the Proposed Project generates diesel emissions from long-term construction or attracts diesel-fueled vehicular trips, especially heavy-duty diesel-fueled vehicles, it is recommended that the Lead Agency perform a mobile source health risk assessment⁵.

In the event that implementation of the Proposed Project requires a permit from South Coast AQMD, South Coast AQMD should be identified as a Responsible Agency for the Proposed Project in the EIR. The assumptions in the air quality analysis in the EIR will be the basis for evaluating the permit under CEQA and imposing permit conditions and limits. Questions on permits should be directed to South Coast AQMD's Engineering and Permitting staff at (909) 396-3385.

The California Air Resources Board's (CARB) *Air Quality and Land Use Handbook: A Community Health Perspective*⁶ is a general reference guide for evaluating and reducing air pollution impacts associated with new projects that go through the land use decision-making process with additional guidance on strategies to reduce air pollution exposure near high-volume roadways available in CARB's technical advisory⁷.

The South Coast AQMD's *Guidance Document for Addressing Air Quality Issues in General Plans and Local Planning*⁸ includes suggested policies that local governments can use in their General Plans or through local planning to prevent or reduce potential air pollution impacts and protect public health. It is recommended that the Lead Agency review this Guidance Document as a tool when making local planning and land use decisions.

Mitigation Measures

In the event that the Proposed Project results in significant adverse air quality impacts, CEQA requires that all feasible mitigation measures that go beyond what is required by law be utilized to minimize these impacts. Any impacts resulting from mitigation measures must also be analyzed. Several resources to assist the Lead Agency with identifying potential mitigation measures for the Proposed Project include South Coast AQMD's CEQA Air Quality Handbook,⁹ South Coast AQMD's Mitigation Monitoring and Reporting Plan for the 2022 Air Quality Management Plan,¹⁰ and Southern California Association of

⁵ South Coast AQMD's guidance for performing a mobile source health risk assessment can be found at: <http://www.aqmd.gov/home/regulations/ceqa/air-quality-analysis-handbook/mobile-source-toxics-analysis>.

⁸ South Coast AQMD. 2005. *Guidance Document for Addressing Air Quality Issues in General Plans and Local Planning*. Available at: <http://www.aqmd.gov/docs/default-source/planning/air-quality-guidance/complete-guidance-document.pdf>.

⁹ <https://www.aqmd.gov/home/rules-compliance/ceqa/air-quality-analysis-handbook>

¹⁰ South Coast AQMD's 2022 Air Quality Management Plan can be found at: <http://www.aqmd.gov/home/air-quality/clean-air-plans/air-quality-mgt-plan> (Chapter 4 - Control Strategy and Implementation).

Government's Mitigation Monitoring and Reporting Plan for the 2020-2045 Regional Transportation Plan/Sustainable Communities Strategy.¹¹.

Mitigation measures for operational air quality impacts from other area sources that the Lead Agency should consider in the EIR may include the following:

- Maximize use of solar energy by installing solar energy arrays.
- Use light colored paving and roofing materials.
- Utilize only Energy Star heating, cooling, and lighting devices, and appliances.
- Use of water-based or low VOC cleaning products that go beyond the requirements of South Coast AQMD Rule 1113.

South Coast AQMD staff is available to work with the Lead Agency to ensure that air quality, greenhouse gas, and health risk impacts from the Proposed Project are accurately evaluated and mitigated where feasible. If you have any questions regarding this letter, please contact me at swang1@aqmd.gov.

Sincerely,

Sam Wang

RE: City of Santa Ana's Related Bristol Specific Plan Project.

Dear Ali Pezeshkpour,

On behalf of the Southwest Mountain States Regional Council of Carpenters (“**Southwest Carpenters**” or “**SWMSRCC**”), my Office is submitting these comments for the City of Santa Ana’s (“**City**”) March 30, 2023, Scoping Meeting for the Related Bristol Specific Plan (“**Project**”).

The Southwest Carpenters is a labor union representing over 63,000 union carpenters in 10 states, including California, and has a strong interest in well-ordered land use planning and in addressing the environmental impacts of development projects.

Individual members of the Southwest Carpenters live, work, and recreate in the City and surrounding communities and would be directly affected by the Project’s environmental impacts.

The Southwest Carpenters expressly reserves the right to supplement these comments at or prior to hearings on the Project, and at any later hearing and proceeding related to this Project. Gov. Code, § 65009, subd. (b); Pub. Res. Code, § 21177, subd. (a); see *Bakersfield Citizens for Local Control v. Bakersfield* (2004) 124 Cal.App.4th 1184, 1199-1203; see also *Galante Vineyards v. Monterey Water Dist.* (1997) 60 Cal.App.4th 1109, 1121.

The Southwest Carpenters incorporates by reference all comments raising issues regarding the Environmental Impact Report (EIR) submitted prior to certification of the EIR for the Project. See *Citizens for Clean Energy v City of Woodland* (2014) 225

Cal.App.4th 173, 191 (finding that any party who has objected to the project’s environmental documentation may assert any issue timely raised by other parties).

Moreover, the Southwest Carpenters requests that the City provide notice for any and all notices referring or related to the Project issued under the California Environmental Quality Act (**CEQA**) (Pub. Res. Code, § 21000 *et seq.*), and the California Planning and Zoning Law (“**Planning and Zoning Law**”) (Gov. Code, §§ 65000–65010). California Public Resources Code Sections 21092.2, and 21167(f) and California Government Code Section 65092 require agencies to mail such notices to any person who has filed a written request for them with the clerk of the agency’s governing body.

I. THE CITY SHOULD REQUIRE THE USE OF A LOCAL WORKFORCE TO BENEFIT THE COMMUNITY’S ECONOMIC DEVELOPMENT AND ENVIRONMENT

The City should require the Project to be built using a local workers who have graduated from a Joint Labor-Management Apprenticeship Program approved by the State of California, have at least as many hours of on-the-job experience in the applicable craft which would be required to graduate from such a state-approved apprenticeship training program, or who are registered apprentices in a state-approved apprenticeship training program.

Community benefits such as local hire can also be helpful to reduce environmental impacts and improve the positive economic impact of the Project. Local hire provisions requiring that a certain percentage of workers reside within 10 miles or less of the Project site can reduce the length of vendor trips, reduce greenhouse gas emissions, and provide localized economic benefits. As environmental consultants Matt Hagemann and Paul E. Rosenfeld note:

[A]ny local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

March 8, 2021 SWAPE Letter to Mitchell M. Tsai re Local Hire Requirements and Considerations for Greenhouse Gas Modeling.

Workforce requirements promote the development of skilled trades that yield sustainable economic development. As the California Workforce Development Board and the University of California, Berkeley Center for Labor Research and Education concluded:

[L]abor should be considered an investment rather than a cost—and investments in growing, diversifying, and upskilling California’s workforce can positively affect returns on climate mitigation efforts. In other words, well-trained workers are key to delivering emissions reductions and moving California closer to its climate targets.¹

Furthermore, workforce policies have significant environmental benefits given that they improve an area’s jobs-housing balance, decreasing the amount and length of job commutes and the associated greenhouse gas (GHG) emissions. In fact, on May 7, 2021, the South Coast Air Quality Management District found that that the “[u]se of a local state-certified apprenticeship program” can result in air pollutant reductions.²

Locating jobs closer to residential areas can have significant environmental benefits. As the California Planning Roundtable noted in 2008:

People who live and work in the same jurisdiction would be more likely to take transit, walk, or bicycle to work than residents of less balanced communities and their vehicle trips would be shorter. Benefits would include potential reductions in both vehicle miles traveled and vehicle hours traveled.³

Moreover, local hire mandates and skill-training are critical facets of a strategy to reduce vehicle miles traveled (VMT). As planning experts Robert Cervero and

¹ California Workforce Development Board (2020) Putting California on the High Road: A Jobs and Climate Action Plan for 2030 at p. ii, *available at* <https://laborcenter.berkeley.edu/wp-content/uploads/2020/09/Putting-California-on-the-High-Road.pdf>.

² South Coast Air Quality Management District (May 7, 2021) Certify Final Environmental Assessment and Adopt Proposed Rule 2305 – Warehouse Indirect Source Rule – Warehouse Actions and Investments to Reduce Emissions Program, and Proposed Rule 316 – Fees for Rule 2305, Submit Rule 2305 for Inclusion Into the SIP, and Approve Supporting Budget Actions, *available at* <http://www.aqmd.gov/docs/default-source/Agendas/Governing-Board/2021/2021-May7-027.pdf?sfvrsn=10>.

³ California Planning Roundtable (2008) Deconstructing Jobs-Housing Balance at p. 6, *available at* <https://cproundtable.org/static/media/uploads/publications/cpr-jobs-housing.pdf>

Michael Duncan have noted, simply placing jobs near housing stock is insufficient to achieve VMT reductions given that the skill requirements of available local jobs must match those held by local residents.⁴ Some municipalities have even tied local hire and other workforce policies to local development permits to address transportation issues. Cervero and Duncan note that:

In nearly built-out Berkeley, CA, the approach to balancing jobs and housing is to create local jobs rather than to develop new housing. The city's First Source program encourages businesses to hire local residents, especially for entry- and intermediate-level jobs, and sponsors vocational training to ensure residents are employment-ready. While the program is voluntary, some 300 businesses have used it to date, placing more than 3,000 city residents in local jobs since it was launched in 1986. When needed, these carrots are matched by sticks, since the city is not shy about negotiating corporate participation in First Source as a condition of approval for development permits.

Recently, the State of California verified its commitment towards workforce development through the Affordable Housing and High Road Jobs Act of 2022, otherwise known as Assembly Bill No. 2011 (“**AB2011**”). AB2011 amended the Planning and Zoning Law to allow ministerial, by-right approval for projects being built alongside commercial corridors that meet affordability and labor requirements.

The City should consider utilizing local workforce policies and requirements to benefit the local area economically and to mitigate greenhouse gas, improve air quality, and reduce transportation impacts.

II. THE CITY SHOULD IMPOSE TRAINING REQUIREMENTS FOR THE PROJECT'S CONSTRUCTION ACTIVITIES TO PREVENT COMMUNITY SPREAD OF COVID-19 AND OTHER INFECTIOUS DISEASES

Construction work has been defined as a Lower to High-risk activity for COVID-19 spread by the Occupational Safety and Health Administration. Recently, several

⁴ Cervero, Robert and Duncan, Michael (2006) Which Reduces Vehicle Travel More: Jobs-Housing Balance or Retail-Housing Mixing? Journal of the American Planning Association 72 (4), 475-490, 482, available at <http://reconnectingamerica.org/assets/Uploads/UTCT-825.pdf>.

construction sites have been identified as sources of community spread of COVID-19.⁵

Southwest Carpenters recommend that the Lead Agency adopt additional requirements to mitigate public health risks from the Project's construction activities. Southwest Carpenters requests that the Lead Agency require safe on-site construction work practices as well as training and certification for any construction workers on the Project Site.

In particular, based upon Southwest Carpenters' experience with safe construction site work practices, Southwest Carpenters recommends that the Lead Agency require that while construction activities are being conducted at the Project Site:

Construction Site Design:

- The Project Site will be limited to two controlled entry points.
- Entry points will have temperature screening technicians taking temperature readings when the entry point is open.
- The Temperature Screening Site Plan shows details regarding access to the Project Site and Project Site logistics for conducting temperature screening.
- A 48-hour advance notice will be provided to all trades prior to the first day of temperature screening.
- The perimeter fence directly adjacent to the entry points will be clearly marked indicating the appropriate 6-foot social distancing position for when you approach the screening area. Please reference the Apex temperature screening site map for additional details.
- There will be clear signage posted at the project site directing you through temperature screening.

⁵ Santa Clara County Public Health (June 12, 2020) COVID-19 CASES AT CONSTRUCTION SITES HIGHLIGHT NEED FOR CONTINUED VIGILANCE IN SECTORS THAT HAVE REOPENED, available at <https://www.sccgov.org/sites/covid19/Pages/press-release-06-12-2020-cases-at-construction-sites.aspx>.

- Provide hand washing stations throughout the construction site.

Testing Procedures:

- The temperature screening being used are non-contact devices.
- Temperature readings will not be recorded.
- Personnel will be screened upon entering the testing center and should only take 1-2 seconds per individual.
- Hard hats, head coverings, sweat, dirt, sunscreen or any other cosmetics must be removed on the forehead before temperature screening.
- Anyone who refuses to submit to a temperature screening or does not answer the health screening questions will be refused access to the Project Site.
- Screening will be performed at both entrances from 5:30 am to 7:30 am.; main gate [ZONE 1] and personnel gate [ZONE 2]
- After 7:30 am only the main gate entrance [ZONE 1] will continue to be used for temperature testing for anybody gaining entry to the project site such as returning personnel, deliveries, and visitors.
- If the digital thermometer displays a temperature reading above 100.0 degrees Fahrenheit, a second reading will be taken to verify an accurate reading.
- If the second reading confirms an elevated temperature, DHS will instruct the individual that he/she will not be allowed to enter the Project Site. DHS will also instruct the individual to promptly notify his/her supervisor and his/her human resources (HR) representative and provide them with a copy of Annex A.

Planning

- Require the development of an Infectious Disease Preparedness and Response Plan that will include basic infection prevention measures (requiring the use of personal protection equipment), policies and procedures for prompt identification and isolation of sick individuals, social distancing (prohibiting gatherings of no more than 10 people including all-hands meetings and all-hands lunches) communication and training and workplace controls that meet standards that may be promulgated by the Center for Disease Control, Occupational Safety and Health Administration, Cal/OSHA, California Department of Public Health or applicable local public health agencies.⁶

The United Brotherhood of Carpenters and Carpenters International Training Fund has developed COVID-19 Training and Certification to ensure that Carpenter union members and apprentices conduct safe work practices. The Agency should require that all construction workers undergo COVID-19 Training and Certification before being allowed to conduct construction activities at the Project Site.

Southwest Carpenters has also developed a rigorous Infection Control Risk Assessment (“**ICRA**”) training program to ensure it delivers a workforce that understands how to identify and control infection risks by implementing protocols to protect themselves and all others during renovation and construction projects in healthcare environments.⁷

ICRA protocols are intended to contain pathogens, control airflow, and protect patients during the construction, maintenance and renovation of healthcare facilities. ICRA protocols prevent cross contamination, minimizing the risk of secondary infections in patients at hospital facilities.

⁶ See also The Center for Construction Research and Training, North America’s Building Trades Unions (April 27 2020) NABTU and CPWR COVID-19 Standards for U.S. Construction Sites, available at https://www.cpwr.com/sites/default/files/NABTU_CPWR_Standards_COVID-19.pdf; Los Angeles County Department of Public Works (2020) Guidelines for Construction Sites During COVID-19 Pandemic, available at https://dpw.lacounty.gov/building-and-safety/docs/pw_guidelines-construction-sites.pdf.

⁷ For details concerning Southwest Carpenters’s ICRA training program, see <https://icrahealthcare.com/>.

The City should require the Project to be built using a workforce trained in ICRA protocols.

Sincerely,

Subject: Local Hire Requirements and Considerations for Greenhouse Gas Modeling

Dear Mr. Tsai,

Soil Water Air Protection Enterprise (“SWAPE”) is pleased to provide the following draft technical report explaining the significance of worker trips required for construction of land use development projects with respect to the estimation of greenhouse gas (“GHG”) emissions. The report will also discuss the potential for local hire requirements to reduce the length of worker trips, and consequently, reduced or mitigate the potential GHG impacts.

Worker Trips and Greenhouse Gas Calculations

The California Emissions Estimator Model (“CalEEMod”) is a “statewide land use emissions computer model designed to provide a uniform platform for government agencies, land use planners, and environmental professionals to quantify potential criteria pollutant and greenhouse gas (GHG) emissions associated with both construction and operations from a variety of land use projects.”¹ CalEEMod quantifies construction-related emissions associated with land use projects resulting from off-road construction equipment; on-road mobile equipment associated with workers, vendors, and hauling; fugitive dust associated with grading, demolition, truck loading, and on-road vehicles traveling along paved and unpaved roads; and architectural coating activities; and paving.²

The number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.³

¹ “California Emissions Estimator Model.” CAPCOA, 2017, available at: <http://www.aqmd.gov/caleemod/home>.

² “California Emissions Estimator Model.” CAPCOA, 2017, available at: <http://www.aqmd.gov/caleemod/home>.

³ “CalEEMod User’s Guide.” CAPCOA, November 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

Specifically, the number and length of vehicle trips is utilized to estimate the vehicle miles travelled (“VMT”) associated with construction. Then, utilizing vehicle-class specific EMFAC 2014 emission factors, CalEEMod calculates the vehicle exhaust, evaporative, and dust emissions resulting from construction-related VMT, including personal vehicles for worker commuting.⁴

Specifically, in order to calculate VMT, CalEEMod multiplies the average daily trip rate by the average overall trip length (see excerpt below):

$$\text{“VMT}_d = \Sigma(\text{Average Daily Trip Rate}_i * \text{Average Overall Trip Length}_i)_n$$

Where:

n = Number of land uses being modeled.”⁵

Furthermore, to calculate the on-road emissions associated with worker trips, CalEEMod utilizes the following equation (see excerpt below):

$$\text{“Emissions}_{\text{pollutant}} = \text{VMT} * \text{EF}_{\text{running,pollutant}}$$

Where:

$\text{Emissions}_{\text{pollutant}}$ = emissions from vehicle running for each pollutant

VMT = vehicle miles traveled

$\text{EF}_{\text{running,pollutant}}$ = emission factor for running emissions.”⁶

Thus, there is a direct relationship between trip length and VMT, as well as a direct relationship between VMT and vehicle running emissions. In other words, when the trip length is increased, the VMT and vehicle running emissions increase as a result. Thus, vehicle running emissions can be reduced by decreasing the average overall trip length, by way of a local hire requirement or otherwise.

Default Worker Trip Parameters and Potential Local Hire Requirements

As previously discussed, the number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.⁷ In order to understand how local hire requirements and associated worker trip length reductions impact GHG emissions calculations, it is important to consider the CalEEMod default worker trip parameters. CalEEMod provides recommended default values based on site-specific information, such as land use type, meteorological data, total lot acreage, project type and typical equipment associated with project type. If more specific project information is known, the user can change the default values and input project-specific values, but the California Environmental Quality Act (“CEQA”) requires that such changes be justified by substantial evidence.⁸ The default number of construction-related worker trips is calculated by multiplying the

⁵ “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 23.

⁶ “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 15.

⁷ “CalEEMod User’s Guide.” CAPCOA, November 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

⁸ CalEEMod User Guide, available at: <http://www.caleemod.com/>, p. 1, 9.

number of pieces of equipment for all phases by 1.25, with the exception of worker trips required for the building construction and architectural coating phases.⁹ Furthermore, the worker trip vehicle class is a 50/25/25 percent mix of light duty autos, light duty truck class 1 and light duty truck class 2, respectively.”¹⁰ Finally, the default worker trip length is consistent with the length of the operational home-to-work vehicle trips.¹¹ The operational home-to-work vehicle trip lengths are:

“[B]ased on the *location* and *urbanization* selected on the project characteristic screen. These values were *supplied by the air districts or use a default average for the state*. Each district (or county) also assigns trip lengths for urban and rural settings” (emphasis added).¹²

Thus, the default worker trip length is based on the location and urbanization level selected by the User when modeling emissions. The below table shows the CalEEMod default rural and urban worker trip lengths by air basin (see excerpt below and Attachment A).¹³

Worker Trip Length by Air Basin		
Air Basin	Rural (miles)	Urban (miles)
Great Basin Valleys	16.8	10.8
Lake County	16.8	10.8
Lake Tahoe	16.8	10.8
Mojave Desert	16.8	10.8
Mountain Counties	16.8	10.8
North Central Coast	17.1	12.3
North Coast	16.8	10.8
Northeast Plateau	16.8	10.8
Sacramento Valley	16.8	10.8
Salton Sea	14.6	11
San Diego	16.8	10.8
San Francisco Bay Area	10.8	10.8
San Joaquin Valley	16.8	10.8
South Central Coast	16.8	10.8
South Coast	19.8	14.7
Average	16.47	11.17
Minimum	10.80	10.80
Maximum	19.80	14.70
Range	9.00	3.90

⁹ “CalEEMod User’s Guide.” CAPCOA, November 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

¹⁰ “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 15.

¹¹ “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 14.

¹² “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 21.

¹³ “Appendix D Default Data Tables.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4, p. D-84 – D-86.

As demonstrated above, default rural worker trip lengths for air basins in California vary from 10.8- to 19.8- miles, with an average of 16.47 miles. Furthermore, default urban worker trip lengths vary from 10.8- to 14.7- miles, with an average of 11.17 miles. Thus, while default worker trip lengths vary by location, default urban worker trip lengths tend to be shorter in length. Based on these trends evident in the CalEEMod default worker trip lengths, we can reasonably assume that the efficacy of a local hire requirement is especially dependent upon the urbanization of the project site, as well as the project location.

Practical Application of a Local Hire Requirement and Associated Impact

To provide an example of the potential impact of a local hire provision on construction-related GHG emissions, we estimated the significance of a local hire provision for the Village South Specific Plan (“Project”) located in the City of Claremont (“City”). The Project proposed to construct 1,000 residential units, 100,000-SF of retail space, 45,000-SF of office space, as well as a 50-room hotel, on the 24-acre site. The Project location is classified as Urban and lies within the Los Angeles-South Coast County. As a result, the Project has a default worker trip length of 14.7 miles.¹⁴ In an effort to evaluate the potential for a local hire provision to reduce the Project’s construction-related GHG emissions, we prepared an updated model, reducing all worker trip lengths to 10 miles (see Attachment B). Our analysis estimates that if a local hire provision with a 10-mile radius were to be implemented, the GHG emissions associated with Project construction would decrease by approximately 17% (see table below and Attachment C).

Local Hire Provision Net Change	
Without Local Hire Provision	
Total Construction GHG Emissions (MT CO ₂ e)	3,623
Amortized Construction GHG Emissions (MT CO ₂ e/year)	120.77
With Local Hire Provision	
Total Construction GHG Emissions (MT CO ₂ e)	3,024
Amortized Construction GHG Emissions (MT CO ₂ e/year)	100.80
% Decrease in Construction-related GHG Emissions	17%

As demonstrated above, by implementing a local hire provision requiring 10 mile worker trip lengths, the Project could reduce potential GHG emissions associated with construction worker trips. More broadly, any local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

This serves as an example of the potential impacts of local hire requirements on estimated project-level GHG emissions, though it does not indicate that local hire requirements would result in reduced construction-related GHG emission for all projects. As previously described, the significance of a local hire requirement depends on the worker trip length enforced and the default worker trip length for the project’s urbanization level and location.

¹⁴ “Appendix D Default Data Tables.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4, p. D-85.

Village South Specific Plan (Proposed)
Los Angeles-South Coast County, Annual

1.0 Project Characteristics**1.1 Land Usage**

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	45.00	1000sqft	1.03	45,000.00	0
High Turnover (Sit Down Restaurant)	36.00	1000sqft	0.83	36,000.00	0
Hotel	50.00	Room	1.67	72,600.00	0
Quality Restaurant	8.00	1000sqft	0.18	8,000.00	0
Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	CH4 Intensity (lb/MWhr)	0.029	N2O Intensity (lb/MWhr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

User Defined Equipment

Equipment Type	Number
----------------	--------

11.0 Vegetation

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Village South Specific Plan (Proposed)
Los Angeles-South Coast County, Winter

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	45.00	1000sqft	1.03	45,000.00	0
High Turnover (Sit Down Restaurant)	36.00	1000sqft	0.83	36,000.00	0
Hotel	50.00	Room	1.67	72,600.00	0
Quality Restaurant	8.00	1000sqft	0.18	8,000.00	0
Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

Amortized (MT CO2e/year)	100.80
<i>% Decrease in Construction-related GHG Emissions</i>	17%

EXHIBIT B

Paul Rosenfeld, Ph.D.

Principal Environmental Chemist

Chemical Fate and Transport & Air Dispersion Modeling

Risk Assessment & Remediation Specialist

Education

Ph.D. Soil Chemistry, University of Washington, 1999. Dissertation on volatile organic compound filtration.

M.S. Environmental Science, U.C. Berkeley, 1995. Thesis on organic waste economics.

B.A. Environmental Studies, U.C. Santa Barbara, 1991. Thesis on wastewater treatment.

Professional Experience

Dr. Rosenfeld has over 25 years' experience conducting environmental investigations and risk assessments for evaluating impacts to human health, property, and ecological receptors. His expertise focuses on the fate and transport of environmental contaminants, human health risk, exposure assessment, and ecological restoration. Dr. Rosenfeld has evaluated and modeled emissions from unconventional oil drilling operations, oil spills, landfills, boilers and incinerators, process stacks, storage tanks, confined animal feeding operations, and many other industrial and agricultural sources. His project experience ranges from monitoring and modeling of pollution sources to evaluating impacts of pollution on workers at industrial facilities and residents in surrounding communities.

Dr. Rosenfeld has investigated and designed remediation programs and risk assessments for contaminated sites containing lead, heavy metals, mold, bacteria, particulate matter, petroleum hydrocarbons, chlorinated solvents, pesticides, radioactive waste, dioxins and furans, semi- and volatile organic compounds, PCBs, PAHs, perchlorate, asbestos, per- and poly-fluoroalkyl substances (PFOA/PFOS), unusual polymers, fuel oxygenates (MTBE), among other pollutants. Dr. Rosenfeld also has experience evaluating greenhouse gas emissions from various projects and is an expert on the assessment of odors from industrial and agricultural sites, as well as the evaluation of odor nuisance impacts and technologies for abatement of odorous emissions. As a principal scientist at SWAPE, Dr. Rosenfeld directs air dispersion modeling and exposure assessments. He has served as an expert witness and testified about pollution sources causing nuisance and/or personal injury at dozens of sites and has testified as an expert witness on more than ten cases involving exposure to air contaminants from industrial sources.

Professional History:

Soil Water Air Protection Enterprise (SWAPE); 2003 to present; Principal and Founding Partner
UCLA School of Public Health; 2007 to 2011; Lecturer (Assistant Researcher)
UCLA School of Public Health; 2003 to 2006; Adjunct Professor
UCLA Environmental Science and Engineering Program; 2002-2004; Doctoral Intern Coordinator
UCLA Institute of the Environment, 2001-2002; Research Associate
Komex H₂O Science, 2001 to 2003; Senior Remediation Scientist
National Groundwater Association, 2002-2004; Lecturer
San Diego State University, 1999-2001; Adjunct Professor
Anteon Corp., San Diego, 2000-2001; Remediation Project Manager
Ogden (now Amec), San Diego, 2000-2000; Remediation Project Manager
Bechtel, San Diego, California, 1999 – 2000; Risk Assessor
King County, Seattle, 1996 – 1999; Scientist
James River Corp., Washington, 1995-96; Scientist
Big Creek Lumber, Davenport, California, 1995; Scientist
Plumas Corp., California and USFS, Tahoe 1993-1995; Scientist
Peace Corps and World Wildlife Fund, St. Kitts, West Indies, 1991-1993; Scientist

Rosenfeld, P.E., C.L. Henry. (1998). Characterization, Quantification, and Control of Odor Emissions from Biosolids Application To Forest Soil. *Biofest*. Lecture conducted from Lake Chelan, Washington.

Rosenfeld, P.E., C.L. Henry, R. Harrison. (1998). Oat and Grass Seed Germination and Nitrogen and Sulfur Emissions Following Biosolids Incorporation With High-Carbon Wood-Ash. Water Environment Federation 12th Annual Residuals and Biosolids Management Conference Proceedings. Lecture conducted from Bellevue Washington.

Rosenfeld, P.E., C.L. Henry, R. B. Harrison, and R. Dills. (1997). Comparison of Odor Emissions From Three Different Biosolids Applied to Forest Soil. *Soil Science Society of America*. Lecture conducted from Anaheim California.

Teaching Experience:

UCLA Department of Environmental Health (Summer 2003 through 20010) Taught Environmental Health Science 100 to students, including undergrad, medical doctors, public health professionals and nurses. Course focused on the health effects of environmental contaminants.

National Ground Water Association, Successful Remediation Technologies. Custom Course in Sante Fe, New Mexico. May 21, 2002. Focused on fate and transport of fuel contaminants associated with underground storage tanks.

National Ground Water Association; Successful Remediation Technologies Course in Chicago Illinois. April 1, 2002. Focused on fate and transport of contaminants associated with Superfund and RCRA sites.

California Integrated Waste Management Board, April and May, 2001. Alternative Landfill Caps Seminar in San Diego, Ventura, and San Francisco. Focused on both prescriptive and innovative landfill cover design.

UCLA Department of Environmental Engineering, February 5, 2002. Seminar on Successful Remediation Technologies focusing on Groundwater Remediation.

University Of Washington, Soil Science Program, Teaching Assistant for several courses including: Soil Chemistry, Organic Soil Amendments, and Soil Stability.

U.C. Berkeley, Environmental Science Program Teaching Assistant for Environmental Science 10.

Academic Grants Awarded:

California Integrated Waste Management Board. \$41,000 grant awarded to UCLA Institute of the Environment. Goal: To investigate effect of high carbon wood ash on volatile organic emissions from compost. 2001.

Synagro Technologies, Corona California: \$10,000 grant awarded to San Diego State University. Goal: investigate effect of biosolids for restoration and remediation of degraded coastal sage soils. 2000.

King County, Department of Research and Technology, Washington State. \$100,000 grant awarded to University of Washington: Goal: To investigate odor emissions from biosolids application and the effect of polymers and ash on VOC emissions. 1998.

Northwest Biosolids Management Association, Washington State. \$20,000 grant awarded to investigate effect of polymers and ash on VOC emissions from biosolids. 1997.

James River Corporation, Oregon: \$10,000 grant was awarded to investigate the success of genetically engineered Poplar trees with resistance to round-up. 1996.

United State Forest Service, Tahoe National Forest: \$15,000 grant was awarded to investigating fire ecology of the Tahoe National Forest. 1995.

Kellogg Foundation, Washington D.C. \$500 grant was awarded to construct a large anaerobic digester on St. Kitts in West Indies. 1993

Deposition and/or Trial Testimony:

- In the United States District Court For The District of New Jersey
Duarte et al, *Plaintiffs*, vs. United States Metals Refining Company et. al. *Defendant*.
Case No.: 2:17-cv-01624-ES-SCM
Rosenfeld Deposition. 6-7-2019
- In the United States District Court of Southern District of Texas Galveston Division
M/T Carla Maersk, *Plaintiffs*, vs. Conti 168., Schiffahrts-GMBH & Co. Bulker KG MS “Conti Perdido”
Defendant.
Case No.: 3:15-CV-00106 consolidated with 3:15-CV-00237
Rosenfeld Deposition. 5-9-2019
- In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica
Carole-Taddeo-Bates et al., vs. Ifran Khan et al., Defendants
Case No.: No. BC615636
Rosenfeld Deposition, 1-26-2019
- In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica
The San Gabriel Valley Council of Governments et al. vs El Adobe Apts. Inc. et al., Defendants
Case No.: No. BC646857
Rosenfeld Deposition, 10-6-2018; Trial 3-7-19
- In United States District Court For The District of Colorado
Bells et al. Plaintiff vs. The 3M Company et al., Defendants
Case: No 1:16-cv-02531-RBJ
Rosenfeld Deposition, 3-15-2018 and 4-3-2018
- In The District Court Of Regan County, Texas, 112th Judicial District
Phillip Bales et al., Plaintiff vs. Dow Agrosiences, LLC, et al., Defendants
Cause No 1923
Rosenfeld Deposition, 11-17-2017
- In The Superior Court of the State of California In And For The County Of Contra Costa
Simons et al., Plaintiffs vs. Chevron Corporation, et al., Defendants
Cause No C12-01481
Rosenfeld Deposition, 11-20-2017
- In The Circuit Court Of The Twentieth Judicial Circuit, St Clair County, Illinois
Martha Custer et al., Plaintiff vs. Cerro Flow Products, Inc., Defendants
Case No.: No. 0i9-L-2295
Rosenfeld Deposition, 8-23-2017
- In The Superior Court of the State of California, For The County of Los Angeles
Warrn Gilbert and Penny Gilber, Plaintiff vs. BMW of North America LLC
Case No.: LC102019 (c/w BC582154)
Rosenfeld Deposition, 8-16-2017, Trail 8-28-2018
- In the Northern District Court of Mississippi, Greenville Division
Brenda J. Cooper, et al., *Plaintiffs*, vs. Meritor Inc., et al., *Defendants*
Case Number: 4:16-cv-52-DMB-JVM
Rosenfeld Deposition: July 2017

In The Superior Court of the State of Washington, County of Snohomish
Michael Davis and Julie Davis et al., Plaintiff vs. Cedar Grove Composting Inc., Defendants
Case No.: No. 13-2-03987-5
Rosenfeld Deposition, February 2017
Trial, March 2017

In The Superior Court of the State of California, County of Alameda
Charles Spain., Plaintiff vs. Thermo Fisher Scientific, et al., Defendants
Case No.: RG14711115
Rosenfeld Deposition, September 2015

In The Iowa District Court In And For Poweshiek County
Russell D. Winburn, et al., Plaintiffs vs. Doug Hoksbergen, et al., Defendants
Case No.: LALA002187
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Jerry Dovico, et al., Plaintiffs vs. Valley View Sine LLC, et al., Defendants
Law No.: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Doug Pauls, et al., et al., Plaintiffs vs. Richard Warren, et al., Defendants
Law No.: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Circuit Court of Ohio County, West Virginia
Robert Andrews, et al. v. Antero, et al.
Civil Action NO. 14-C-30000
Rosenfeld Deposition, June 2015

In The Third Judicial District County of Dona Ana, New Mexico
Betty Gonzalez, et al. Plaintiffs vs. Del Oro Dairy, Del Oro Real Estate LLC, Jerry Settles and Deward
DeRuyter, Defendants
Rosenfeld Deposition: July 2015

In The Iowa District Court For Muscatine County
Laurie Freeman et. al. Plaintiffs vs. Grain Processing Corporation, Defendant
Case No 4980
Rosenfeld Deposition: May 2015

In the Circuit Court of the 17th Judicial Circuit, in and For Broward County, Florida
Walter Hinton, et. al. Plaintiff, vs. City of Fort Lauderdale, Florida, a Municipality, Defendant.
Case Number CACE07030358 (26)
Rosenfeld Deposition: December 2014

In the United States District Court Western District of Oklahoma
Tommy McCarty, et al., Plaintiffs, v. Oklahoma City Landfill, LLC d/b/a Southeast Oklahoma City
Landfill, et al. Defendants.
Case No. 5:12-cv-01152-C
Rosenfeld Deposition: July 2014

In the County Court of Dallas County Texas
Lisa Parr et al, *Plaintiff*, vs. Aruba et al, *Defendant*.
Case Number cc-11-01650-E
Rosenfeld Deposition: March and September 2013
Rosenfeld Trial: April 2014

In the Court of Common Pleas of Tuscarawas County Ohio
John Michael Abicht, et al., *Plaintiffs*, vs. Republic Services, Inc., et al., *Defendants*
Case Number: 2008 CT 10 0741 (Cons. w/ 2009 CV 10 0987)
Rosenfeld Deposition: October 2012

In the United States District Court of Southern District of Texas Galveston Division
Kyle Cannon, Eugene Donovan, Genaro Ramirez, Carol Sassler, and Harvey Walton, each Individually and on behalf of those similarly situated, *Plaintiffs*, vs. BP Products North America, Inc., *Defendant*.
Case 3:10-cv-00622
Rosenfeld Deposition: February 2012
Rosenfeld Trial: April 2013

In the Circuit Court of Baltimore County Maryland
Philip E. Cvach, II et al., *Plaintiffs* vs. Two Farms, Inc. d/b/a Royal Farms, Defendants
Case Number: 03-C-12-012487 OT
Rosenfeld Deposition: September 2013

Matthew F. Hagemann, P.G., C.Hg., QSD, QSP

**Geologic and Hydrogeologic Characterization
Industrial Stormwater Compliance
Investigation and Remediation Strategies
Litigation Support and Testifying Expert
CEQA Review**

Education:

M.S. Degree, Geology, California State University Los Angeles, Los Angeles, CA, 1984.

B.A. Degree, Geology, Humboldt State University, Arcata, CA, 1982.

Professional Certifications:

California Professional Geologist

California Certified Hydrogeologist

Qualified SWPPP Developer and Practitioner

Professional Experience:

Matt has 25 years of experience in environmental policy, assessment and remediation. He spent nine years with the U.S. EPA in the RCRA and Superfund programs and served as EPA's Senior Science Policy Advisor in the Western Regional Office where he identified emerging threats to groundwater from perchlorate and MTBE. While with EPA, Matt also served as a Senior Hydrogeologist in the oversight of the assessment of seven major military facilities undergoing base closure. He led numerous enforcement actions under provisions of the Resource Conservation and Recovery Act (RCRA) while also working with permit holders to improve hydrogeologic characterization and water quality monitoring.

Matt has worked closely with U.S. EPA legal counsel and the technical staff of several states in the application and enforcement of RCRA, Safe Drinking Water Act and Clean Water Act regulations. Matt has trained the technical staff in the States of California, Hawaii, Nevada, Arizona and the Territory of Guam in the conduct of investigations, groundwater fundamentals, and sampling techniques.

Positions Matt has held include:

- Founding Partner, Soil/Water/Air Protection Enterprise (SWAPE) (2003 – present);
- Geology Instructor, Golden West College, 2010 – 2014;
- Senior Environmental Analyst, Komex H2O Science, Inc. (2000 -- 2003);

- Executive Director, Orange Coast Watch (2001 – 2004);
- Senior Science Policy Advisor and Hydrogeologist, U.S. Environmental Protection Agency (1989–1998);
- Hydrogeologist, National Park Service, Water Resources Division (1998 – 2000);
- Adjunct Faculty Member, San Francisco State University, Department of Geosciences (1993 – 1998);
- Instructor, College of Marin, Department of Science (1990 – 1995);
- Geologist, U.S. Forest Service (1986 – 1998); and
- Geologist, Dames & Moore (1984 – 1986).

Senior Regulatory and Litigation Support Analyst:

With SWAPE, Matt’s responsibilities have included:

- Lead analyst and testifying expert in the review of over 100 environmental impact reports since 2003 under CEQA that identify significant issues with regard to hazardous waste, water resources, water quality, air quality, Valley Fever, greenhouse gas emissions, and geologic hazards. Make recommendations for additional mitigation measures to lead agencies at the local and county level to include additional characterization of health risks and implementation of protective measures to reduce worker exposure to hazards from toxins and Valley Fever.
- Stormwater analysis, sampling and best management practice evaluation at industrial facilities.
- Manager of a project to provide technical assistance to a community adjacent to a former Naval shipyard under a grant from the U.S. EPA.
- Technical assistance and litigation support for vapor intrusion concerns.
- Lead analyst and testifying expert in the review of environmental issues in license applications for large solar power plants before the California Energy Commission.
- Manager of a project to evaluate numerous formerly used military sites in the western U.S.
- Manager of a comprehensive evaluation of potential sources of perchlorate contamination in Southern California drinking water wells.
- Manager and designated expert for litigation support under provisions of Proposition 65 in the review of releases of gasoline to sources drinking water at major refineries and hundreds of gas stations throughout California.
- Expert witness on two cases involving MTBE litigation.
- Expert witness and litigation support on the impact of air toxins and hazards at a school.
- Expert witness in litigation at a former plywood plant.

With Komex H2O Science Inc., Matt’s duties included the following:

- Senior author of a report on the extent of perchlorate contamination that was used in testimony by the former U.S. EPA Administrator and General Counsel.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of MTBE use, research, and regulation.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of perchlorate use, research, and regulation.
- Senior researcher in a study that estimates nationwide costs for MTBE remediation and drinking water treatment, results of which were published in newspapers nationwide and in testimony against provisions of an energy bill that would limit liability for oil companies.
- Research to support litigation to restore drinking water supplies that have been contaminated by MTBE in California and New York.

- Expert witness testimony in a case of oil production-related contamination in Mississippi.
- Lead author for a multi-volume remedial investigation report for an operating school in Los Angeles that met strict regulatory requirements and rigorous deadlines.

- Development of strategic approaches for cleanup of contaminated sites in consultation with clients and regulators.

Executive Director:

As Executive Director with Orange Coast Watch, Matt led efforts to restore water quality at Orange County beaches from multiple sources of contamination including urban runoff and the discharge of wastewater. In reporting to a Board of Directors that included representatives from leading Orange County universities and businesses, Matt prepared issue papers in the areas of treatment and disinfection of wastewater and control of the discharge of grease to sewer systems. Matt actively participated in the development of countywide water quality permits for the control of urban runoff and permits for the discharge of wastewater. Matt worked with other nonprofits to protect and restore water quality, including Surfrider, Natural Resources Defense Council and Orange County CoastKeeper as well as with business institutions including the Orange County Business Council.

Hydrogeology:

As a Senior Hydrogeologist with the U.S. Environmental Protection Agency, Matt led investigations to characterize and cleanup closing military bases, including Mare Island Naval Shipyard, Hunters Point Naval Shipyard, Treasure Island Naval Station, Alameda Naval Station, Moffett Field, Mather Army Airfield, and Sacramento Army Depot. Specific activities were as follows:

- Led efforts to model groundwater flow and contaminant transport, ensured adequacy of monitoring networks, and assessed cleanup alternatives for contaminated sediment, soil, and groundwater.
- Initiated a regional program for evaluation of groundwater sampling practices and laboratory analysis at military bases.
- Identified emerging issues, wrote technical guidance, and assisted in policy and regulation development through work on four national U.S. EPA workgroups, including the Superfund Groundwater Technical Forum and the Federal Facilities Forum.

At the request of the State of Hawaii, Matt developed a methodology to determine the vulnerability of groundwater to contamination on the islands of Maui and Oahu. He used analytical models and a GIS to show zones of vulnerability, and the results were adopted and published by the State of Hawaii and County of Maui.

As a hydrogeologist with the EPA Groundwater Protection Section, Matt worked with provisions of the Safe Drinking Water Act and NEPA to prevent drinking water contamination. Specific activities included the following:

- Received an EPA Bronze Medal for his contribution to the development of national guidance for the protection of drinking water.
- Managed the Sole Source Aquifer Program and protected the drinking water of two communities through designation under the Safe Drinking Water Act. He prepared geologic reports, conducted public hearings, and responded to public comments from residents who were very concerned about the impact of designation.

- Reviewed a number of Environmental Impact Statements for planned major developments, including large hazardous and solid waste disposal facilities, mine reclamation, and water transfer.

Matt served as a hydrogeologist with the RCRA Hazardous Waste program. Duties were as follows:

- Supervised the hydrogeologic investigation of hazardous waste sites to determine compliance with Subtitle C requirements.
- Reviewed and wrote "part B" permits for the disposal of hazardous waste.
- Conducted RCRA Corrective Action investigations of waste sites and led inspections that formed the basis for significant enforcement actions that were developed in close coordination with U.S. EPA legal counsel.
- Wrote contract specifications and supervised contractor's investigations of waste sites.

With the National Park Service, Matt directed service-wide investigations of contaminant sources to prevent degradation of water quality, including the following tasks:

- Applied pertinent laws and regulations including CERCLA, RCRA, NEPA, NRDA, and the Clean Water Act to control military, mining, and landfill contaminants.
- Conducted watershed-scale investigations of contaminants at parks, including Yellowstone and Olympic National Park.
- Identified high-levels of perchlorate in soil adjacent to a national park in New Mexico and advised park superintendent on appropriate response actions under CERCLA.
- Served as a Park Service representative on the Interagency Perchlorate Steering Committee, a national workgroup.
- Developed a program to conduct environmental compliance audits of all National Parks while serving on a national workgroup.
- Co-authored two papers on the potential for water contamination from the operation of personal watercraft and snowmobiles, these papers serving as the basis for the development of nation-wide policy on the use of these vehicles in National Parks.
- Contributed to the Federal Multi-Agency Source Water Agreement under the Clean Water Action Plan.

Policy:

Served senior management as the Senior Science Policy Advisor with the U.S. Environmental Protection Agency, Region 9. Activities included the following:

- Advised the Regional Administrator and senior management on emerging issues such as the potential for the gasoline additive MTBE and ammonium perchlorate to contaminate drinking water supplies.
- Shaped EPA's national response to these threats by serving on workgroups and by contributing to guidance, including the Office of Research and Development publication, *Oxygenates in Water: Critical Information and Research Needs*.
- Improved the technical training of EPA's scientific and engineering staff.
- Earned an EPA Bronze Medal for representing the region's 300 scientists and engineers in negotiations with the Administrator and senior management to better integrate scientific principles into the policy-making process.
- Established national protocol for the peer review of scientific documents.

Geology:

With the U.S. Forest Service, Matt led investigations to determine hillslope stability of areas proposed for timber harvest in the central Oregon Coast Range. Specific activities were as follows:

- Mapped geology in the field, and used aerial photographic interpretation and mathematical models to determine slope stability.
- Coordinated his research with community members who were concerned with natural resource protection.
- Characterized the geology of an aquifer that serves as the sole source of drinking water for the city of Medford, Oregon.

As a consultant with Dames and Moore, Matt led geologic investigations of two contaminated sites (later listed on the Superfund NPL) in the Portland, Oregon, area and a large hazardous waste site in eastern Oregon. Duties included the following:

- Supervised year-long effort for soil and groundwater sampling.
- Conducted aquifer tests.
- Investigated active faults beneath sites proposed for hazardous waste disposal.

Teaching:

From 1990 to 1998, Matt taught at least one course per semester at the community college and university levels:

- At San Francisco State University, held an adjunct faculty position and taught courses in environmental geology, oceanography (lab and lecture), hydrogeology, and groundwater contamination.
- Served as a committee member for graduate and undergraduate students.
- Taught courses in environmental geology and oceanography at the College of Marin.

Matt taught physical geology (lecture and lab and introductory geology at Golden West College in Huntington Beach, California from 2010 to 2014.

Invited Testimony, Reports, Papers and Presentations:

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Presentation to the Public Environmental Law Conference, Eugene, Oregon.

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Invited presentation to U.S. EPA Region 9, San Francisco, California.

Hagemann, M.F., 2005. Use of Electronic Databases in Environmental Regulation, Policy Making and Public Participation. Brownfields 2005, Denver, Colorado.

Hagemann, M.F., 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Nevada and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Las Vegas, NV (served on conference organizing committee).

Hagemann, M.F., 2004. Invited testimony to a California Senate committee hearing on air toxins at schools in Southern California, Los Angeles.

Brown, A., Farrow, J., Gray, A. and **Hagemann, M.**, 2004. An Estimate of Costs to Address MTBE Releases from Underground Storage Tanks and the Resulting Impact to Drinking Water Wells. Presentation to the Ground Water and Environmental Law Conference, National Groundwater Association.

Hagemann, M.F., 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Arizona and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Phoenix, AZ (served on conference organizing committee).

Hagemann, M.F., 2003. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in the Southwestern U.S. Invited presentation to a special committee meeting of the National Academy of Sciences, Irvine, CA.

Hagemann, M.F., 2003. Perchlorate Contamination of the Colorado River. Invited presentation to a tribal EPA meeting, Pechanga, CA.

Hagemann, M.F., 2003. Perchlorate Contamination of the Colorado River. Invited presentation to a meeting of tribal representatives, Parker, AZ.

Hagemann, M.F., 2003. Impact of Perchlorate on the Colorado River and Associated Drinking Water Supplies. Invited presentation to the Inter-Tribal Meeting, Torres Martinez Tribe.

Hagemann, M.F., 2003. The Emergence of Perchlorate as a Widespread Drinking Water Contaminant. Invited presentation to the U.S. EPA Region 9.

Hagemann, M.F., 2003. A Deductive Approach to the Assessment of Perchlorate Contamination. Invited presentation to the California Assembly Natural Resources Committee.

Hagemann, M.F., 2003. Perchlorate: A Cold War Legacy in Drinking Water. Presentation to a meeting of the National Groundwater Association.

Hagemann, M.F., 2002. From Tank to Tap: A Chronology of MTBE in Groundwater. Presentation to a meeting of the National Groundwater Association.

Subject: Scoping meeting Comment Card
Date: Saturday, April 1, 2023 2:25:50 PM

Good Afternoon and thank you for speaking with our neighbors on Thursday, March 30, 2023 at MIT.

My concerns are the following:

- Aesthetics-above ground utility (e.g., electrical, phone) poles and wires not be considered but rather underground utility wires. Consider least reflective outside materials so as not to obscure the vision of drivers in the area.
- Air quality- with the number of heavy equipment being utilized to tear down existing structures, dig foundations and underground parking as well as the pollution (e.g., dust, concrete dust) created from the destruction of buildings. The increase of traffic created by the increase in inhabitants in the multi-story structures.
- Noise- the increase in noise in the nearby neighborhoods in both Costa Mesa and Santa Ana due to construction and increased traffic when construction is completed. .
- Earth movement- cracks in homes due to the digging and the large earth moving construction vehicles as the excavate the 41 acres.
- Geology and soil-probability of liquefaction occurring during an earthquake due to soil composition
- Security- in underground parking-how will this be handles
- Environmental concerns/hydrology-recapture of rainwater. The large amounts of water required by residents (e.g., laundry, bathing, sanitation)
- Energy- with rolling blackouts due to high summer temperatures, how will these buildings be more energy efficient?
- Trash/recycling- how will the amounts of trash generated by these extra residences utilize recycling.
-
- Transportation- this area is being touted as pedestrian and bike friendly, however some individuals cannot walk or ride bicycles now. How will these individuals be afforded equal access? Small circular bus transport? ADA compliance with walkways. Consider over passes to South Coast Plaza or small bus/shuttle service.

- Parking-insufficient parking is planned. Residents and visitors may use surrounding neighborhoods (Costa Mesa, Santa Ana as supplemental parking lots, as we have seen in the past. Percentage of underground currently under consideration.
- Collaboration-sister city collaboration with neighboring cities to ensure there is adequate and timely input.
- Recreation-what types of recreation will be made available (e.g., built in checker/chess boards). Utilization of roof tops for recreation and gardens.
- Meeting/community room- access to meeting room or covered area
- Fire and safety- with three multistory structures (up to 25 stories) collaboration with fire and police departments in sister cities is critical.
- Low-income housing-what portion is reserved for low income?
- Architecture- reflect Santa Ana historical architecture
- Grocery store- maintain a similar grocery store (e.g., Vons, Stater Bros, Ralphs) during construction.
- Education- work with the local schools to determine/provide transportation to elementary, middle, and high schools. Consider an on-site credentialed school for residents' preschool children.

Respectfully,

Susan Grasse, PhD

Thornton Park NA

RELATED BRISTOL MITIGATION

1. Rainwater capture: minimizes runoff. Use for irrigation, sidewalk. Conserve resource. Compatible enhancement for LEED.

2) PV is required on new builds. (compatible with LEED and CA mandates). Also utilize vertical axis / no motion) coaxial wind generation. Require more than minimal mandated.

Discussion:

We have an electrical shortage issue, and it will only get worse. (electric cars, less residential use of natural gas, low reservoir levels reduce hydroelectric, transmission issues etc.) Installation of PV in excess of current requirements minimizes impact on existing grid. Plan for the future. Wind generation complements PV.

Typically, more productive in conditions that reduce PV effectiveness.

Effective at night; especially with battery systems, and with night charging of vehicles.

Effective in PM, especially with thermal mass on buildings facing S – SW- W.

Effective in late PM when we get our sea breeze; also peak demand period.

Placed high, benefits from chimney effect of thermal mass.

Inherently less dangerous to birds, window washers, etc. (v. “propeller” types like on the way to Palm Springs).

Aesthetically more pleasing, can be better integrated architecturally.

Can be independent of grid; “back up” for critical items.

Widely used in “off grid” applications

<https://www.youtube.com/watch?v=l3sSCwi4VJA> (not a specific recommendation, just one example of many)

3) The existing homes on the West side of the development should have the sun shadow mitigated. 25 stories will significantly impact the residents to the West. The height of the buildings on the Western portion of the development(s) should be tiered lower than units built medially on the lot; thus reducing the (morning) sun shadow. The Eastern portion of the afternoon sun shadow would fall primarily on the existing Callen property (the parking garage?) and Bristol. This structural arrangement is also compatible with optimizing wind power generation, and peak period PV.

3a) The reflection off the windows should be mitigated. What has been done to analyze the foci and timing of the reflections? It would be expected that at various times and seasons, significant reflections would be experienced on homes to the West and East. Currently, the homes in this area are already experiencing annoying sunlight reflections from buildings near the Arts center, forcing additional window blinds and the inability to open them at certain times. The reflections should be mitigated.

4) Incorporate “state of the art” trash / recycling processes. Multiple disposal options;(perhaps on each floor?) consistent with “planning for the long term”; e.g. “zero waste” similar to systems in use in other areas. (see <https://www.kcet.org/shows/island-diaries/episodes/taiwan> begin about 5:30 into the program) Also contains cost increases for future.

5) Dedicated spots for ride share, delivery to minimize traffic interruption. (Uber, Lyft, Insta Cart, Amazon, et al). Enhances traffic throughput, mitigates deliveries blocking access. Delivery and rideshare drivers can be incredibly casual about their parking in red zones, etc.

6) Provide transportation for all elementary and intermediate school attendance. RELATED could use their own shuttles (used in conjunction with 8). This would be safer and more efficient as the demographics change. More efficient use of shuttles for RELATED. Additional amenity / enticement for residents.

7) ALL the infrastructure issues paid for by the developer. (water / sewer / runoff / school / expansion and connection, short run transportation, modification / update / replacement of traffic signals / triggers/ controllers / firmware, addition or modification of medians / turn lanes etc.) Nothing from public monies. (Similar to Mello-Roos fees pay for all infrastructure development, only the developer / owner pays). NO CITY MONEY (like the \$13M for Mike Harrah's project.) This property will be rentals, no Santa Ana residents will be purchasing homes here. EVERYTHING REQUIRED TO IMPLEMENT THIS PROJECT.

8) People mover from S. Bristol to SCP, Performing Arts Center, museum, and SNA. Reduce traffic, facilitate recreation and shopping. Partner with CM / Segerstrom / Weston? Reduce rental cars from SNA? Handle frequent flyer commuters. Perhaps an airport style "monorail" and or a combination of airport style moving elevated sidewalks; scheduled jitneys. South Coast Plaza already has pedestrian overpasses to the Arts Center and "Crystal Court". Expansion on this concept would reduce traffic, facilitate recreation and shopping. Think of airports, substitute prams and shopping for luggage. Despite the expansion of the 55 and 405, there is currently pent up demand. The development East of the 405 in Irvine, and South of the 55 will consume the expansion. The 405 – Bristol interchange is often gridlocked now. Bristol past Macarthur will be terrible. Macarthur is already overcrowded, and is a surrogate for the 405. Significant traffic mitigation is essential.

8a) A series of development based scheduled and "on demand" electric jitneys from the developments to SNA, SCP, Arts Center.

9) Convert flood control channel between Sunflower and the RR tracks from dirt excavate to concrete lined. Anti-graffiti coated. Facilitates runoff. Encampment deterrent. Frees space for additional traffic on Flower from Sunflower to Macarthur. Mitigation of Bristol – 405 entry and egress traffic increase. Frees space for traffic from Macarthur to Alton for Macarthur Fundamental, facilitating student transport, reducing bottlenecks and residential interruption. Partner with OCFC, OCTA, Santa Ana, SAUSD, Related, and Segerstrom for shared burden.

10) Parking structure roof top basketball for all comers. Coordinate with Santa Ana Parks and Recreation.

11) Bike trail expansion, improvements, and ongoing maintenance. Promotion of bike / alternate transportation. (Tram / trolley for the existing railroad tracts) Parallel transport for students to Saddleback, Segerstrom, Thorpe, Macarthur. (Compatible with Trolley use on existing rail right of way).

COMMENT: It is felt that the current bike trails are underutilized v. the cost of implementation, maintenance, and camping / drug / homeless issues that come with them.

12) Lost business / quality of life interruption compensation. Think Downtown Trolley.

13) Work out a Joint Use Agreement with UPRR to use the railroad tracks for a trolley. Not a downtown trolley, but use existing tracks.

Discussion:

Theoretically, it could go from Home Depot on Macarthur (almost at Harbor, easy access to bus stops at Harbor and Macarthur, then parallel Alton) to Segerstrom HS, Saddleback HS, etc. and then North (East of Standard) all the way to Chestnut before needing to address issues with the main line. A stop at Alton and Bristol would be walking distance to RELATED; even South Coast Plaza and the Performing Arts Center. (Add a shuttle(s) for events / peak commute. Consider land lease or buying this UPRR spur line. It is rarely used, and probably is not commercially viable now. Stretch at Home Depot is already under remediation. Could then be used for transportation, and much of the adjacent land could be developed as strip parks, recreation, and with only light trolley use, even affordable housing.(Power easement?) Being adjacent to the line would be an advantage; and certainly no worse than being downtown and adjacent to the trolley.

Utilization of the UPRR property could allow for expansion of Alton between Bristol and Fairview. This could relieve Macarthur and facilitate student transport for Segerstrom High and Thorpe Middle schools. It could also transfer some traffic from Bristol to Fairview. The Bristol onramp to the 405 N is problematic; not only is it very busy, but to avoid being forced off at South Coast / Fairview one must migrate left, while people trying to exit on South Coast Drive / Fairview / Susan / Harbor are trying to migrate right. Problematic for optimum traffic flow. Consider impact sharing with OCTA, Segerstrom, Related; perhaps SAUSD as they would benefit from busing reduction.

14) Access to retail (grocery, Hans, etc.) should not be restricted by limited access parking. Limited access parking discriminates against the neighborhood, and promotes an us (the renters in the development) v. them (anyone not in the Related buildings). Divisive.

15) Traffic signal (Spruce and Segerstrom?)

16) Security. Police substation in the development

Discussion:

SAPD is already maxed out, and cannot seem to increase the number of street officers. The developer has indicated that they would be amenable to a SAPD "substation."

COMMENT: This would certainly benefit the developer (on site SAPD; doesn't CMPD have facilities in South Coast Plaza? Doesn't SAPD already respond often to issues in that area?) and the neighborhood. (decrease response times, hopefully an increase in area presence). This would enhance the security of the development, and be an additional salient point, but would it really benefit the community? Certainly this would mean the development could reduce / eliminate any private security component dedicated to its residents.

17) Community room: Developer indicated that they would be amenable to some type of "community room."

Discussion:

This could possibly be similar to the current Police room downtown that is used for community events. (Neighborhood Association meetings, Connect to Council, election debates, etc.) As this would be private property, a carefully worded Joint Use Agreement or Memorandum of Understanding would need to be executed concurrently with any project approvals.

COMMENT: Given that the community has access to SAUSD facilities, parks, the Hospital conference room (and others?) is this really a priority item ?

14) Provisions for school impact

Discussion:

Taft Elementary would not be a good option; it rates 3 / 10 <https://www.greatschools.org/california/santa-ana/4055-Taft-Elementary-School/>. Walking from this area to Taft would be problematic. Students would need to walk Macarthur or Sunflower, crossing Bristol and Flower. This is not practical for elementary age; so, more car trips. Thorpe is 5/10; and across Macarthur, Bear, and must pass the traffic of Greenville and Segerstrom HS. Traffic on Macarthur for Greenville and Thorpe already consumes lanes of traffic on both sides. McFadden is across Macarthur, Bear, Segerstrom, and railroad tracks. It is doubtful that Related's residents would find this acceptable. (Greenville, as a magnet school, would not absorb them) Macarthur Fundamental has traffic, distance, and application issues. All of these options present traffic, safety, and congestion issues. At a minimum, the developer should include some daily transport for these vulnerable ones. To be more efficient, and reduce the traffic and parking demand, (electric) jitneys could be used for a regular school run in the AM and PM. Solicitation of an on – property day care / elementary / Montessori type school might also mitigate this issue.

15) Parking and access as currently presented is totally inadequate.

16) Pedestrian overpass (similar to the overpass from South Coast Plaza to the East side of Bristol at Westin / Arts center.) for the NE corner of the property (approximately where the bank is at Macarthur and Bristol) to the SE corner of the intersection (where Chick-fil-a is) and to the NW corner of the intersection (approximately where the dental practice is). Public safety and mitigation of pedestrian / vehicle conflict.

17) Relocation of bus stops to ensure safety and traffic disruptions. It is anticipated that many employees of the development will need to take public transportation to and from work. There simply will not be enough parking, and the available parking will be prioritized to customers and residents.

Ali

I would like to see the analysis compare the proposed density and limited parking impact versus a reduced density and at least 2.0 parking spaces per unit.

It is my belief the current proposal will put a severe strain on the surrounding area.

Please ensure this is included in the Related at Bristol Notice of Preparation comments.

Thanks,
Dale Helvig
Resident, Santa Ana

From: [Marisela Guzman](#)

Subject: Fwd: Related Project
Date: Tuesday, April 18, 2023 10:47:13 PM

Hello All,

I am writing this email regarding the proposed project, 'Related'. I've been a ward 4, Santa Ana resident for almost 40 years. I have several children and I am concerned for them, their children and all residents. I am emailing you all today as I am trying to do my best to fight for a better Santa Ana. I am concerned for this project for numerous reasons, but I also understand that Santa Ana has a housing shortage particularly, affordable housing. I understand that the city is trying to solve that issue with the plan for Bristol from Sunflower to Warner. My thoughts/concerns are as follows.....

- 1) The intersection of Bristol and Sunflower will be a huge traffic issue with the additional units proposed not only by Related but the city's plan for that whole area. Why is this an issue? Not only will there be traffic but along with that come concerns of pollution with the gas emissions, and traffic will wear down our streets. Potholes are an issue now imagine with 4k(+) more vehicles?!
- 2) Air quality is already bad adding more gas emissions will make things worse, so much more for our future residents and that includes my children.
- 3) Energy- how is this being addressed? Our electricity, and gas is already expensive adding so many more units will only require more resources in this area. In recent years we've been having to "save" our energy in the summer due to potential black outs, this will increase those odds even more for current residents.
- 4) Land Use - I am 100% opposed to the hotel. Also, opposed to the shopping area being reduced to 350k square feet and the parking being underground. I know a lot of people who's Dr.'s, Dentist, optometrist, grocery stores and banks are located within this particular current shopping center; including my parents, my kids and mine. From my conversations in the Saddleback sunshine meeting, all parking was underground, this is particularly dangerous when I think of my elderly parents walking to their vehicle after shopping for groceries.
- 5) Public Services - having worked at Michaels for several years now. I have seen an increase of homelessness, addicts roaming the streets shooting up in broad daylights and shoplifters in the area. So I'm concerned for the lack of police officers in our city let alone in that area. I also think that a number of my fellow ward 4 members do rely on our supermarket VONS for our everyday grocery shopping. A good reliable fully stocked grocery store is part of our public services needed for our area. ***** If this project proceeds in such a large scale please make sure that the affordable units are affordable to OUR residents and not invite surrounding cities residents to move in on a service that OUR residents need. Afterall the affordable housing shortage is affecting OUR residents.
- 6) Water, we have a drought that's been going on for years, hence "brown is the new green" for our lawns. So how is 3700 more people using water in this area going to help save water. How will the city ensure existing residents won't be affected and forced to "conserve" more

water?!

7) Parking - this is an ongoing issue for Santa Ana in which the Joint committee meetings have been discussing for a long while how does 1.3 parking spaces per unit going to alleviate our parking issue. Who has 1.3 cars?

8) What other project alternatives does the city propose for residents. I would love to keep the current shopping centers, who not only generate sales tax for our city, but provide essential services to ward 4 and all of santa ana residents. Maybe a scaled back version of the proposed units and where the shopping center area(sq. ft.) is expanded and include the banks, Dr. Offices, grocery store and the restaurants like; Baja Fish, Sankai, Bella Cuba, Inka Grill, Shared Tea, Hawaiian BBQ, the Café and Hans Ice Cream all have a place.

Please, I urge you to rethink this project and have our children's future in mind, when deciding to add such big projects to our city. i appreciate you all.

Regards,

Marisela Guzman

RE: EIR NOTICE OF PREPARATION COMMENTS ON THE BRISTOL SPECIFIC PLAN

Dear Ali Pezeshkpour:

On behalf of UNITE HERE Local 11 (“**Local 11**”), this office respectfully provides the following comments to the City of Santa Ana (“**City**”)¹ in response to the Notice of Preparation (“**NOP**”)² involving the proposed Related Bristol Specific Plan (“**Specific Plan**”) for the redevelopment of the 41-acre site located at 3600 South Bristol Street currently occupied predominately with retail and restaurant uses, as well as some medical office, financial, and fitness uses (“**Site**”). Under the Specific Plan, the Site would be redeveloped in three phases and include up to 3,750 residential units, 250 hotel rooms, 200 units of senior continuum care, and 350,000 square feet of retail and restaurant uses (“**Project**”).

For purposes of the Project’s review under the California Environmental Quality Act (“**CEQA**”), the City intends to prepare a Supplemental Environmental Impact Report (“**SEIR**”) to the City’s General Plan Final Recirculated Program EIR (SCH # 2020029087) (“**PEIR**”) for the City’s 2021-2029 General Plan “**Housing Element**” update. (See NOP, p. 1.) In addition to certification of the SEIR, the Project includes various local approvals, including: (i) adoption of the Specific Plan; (ii) Zoning Map Amendment to change the zoning of the Site; (iii) a Tentative Tract Map to delineate parcel boundaries and public rights-of-way; (iv) John Wayne Airport Land Use Commission review; and (v) a development agreement detailing development rights and public benefits pursuant Government Code Section 65864 et seq. (collectively “**Entitlements**”). (Id., at p. 6.)

Local 11 provides the following NOP comments with respect to the forthcoming SEIR and Entitlements (collectively “**Project Approvals**”). *First, the City should circulate the SEIR and full Final PEIR for a 65-day comment period.* Under CEQA, a supplemental EIR must be circulated for public review and comment in the same manner as a draft EIR and can be circulated with the previous draft or final EIRs. (See CEQA Guidelines § 15163(c) & (d).) Additionally, when approving a project, the decision-making body shall consider the previous EIR as revised by the supplemental EIR. (Id., subd. (e).) Here, according to documents retrieved from the Office of Public Resources (“**OPR**”), the original 3-volume, 2,505-page Draft PEIR was circulated for 65 days starting August 3,

¹ Herein, page citations are either the stated pagination (i.e., “p. #”) or PDF-page location (i.e., “PDF p. #”)

² See NOP, https://files.ceqanet.opr.ca.gov/259509-9/attachment/wEIF21frWV03Jr8jcgHhBLRz33XJW30Me6_EuAdGAPx07pzLQjQL4o3Djviw9YOWvcVBLzi92XF-WCn0.

2020.³ Roughly one year later (in response to City Planning Commission concerns), the City recirculated for a 45-day public review another 3-volume, 2,229-page Draft PEIR that incorporated the original Draft PEIR by reference.⁴ A Final PEIR was certified in April 2022, which was subsequently subject to a June 2022 PEIR “**Addendum**” to reflect changes associated with the Housing Element.⁵

Given that the PEIR is already thousands of pages contained in numerous volumes,⁶ Local 11 requests that the City provide a 65-day public comment review of the forthcoming SEIR – just as before. This is appropriate given the prior Draft PEIR received a similar comment period length and is necessary for the public and the City decision-making body to consider the SEIR in context of the previously adopted PEIR and Addendum.

Second, the SEIR should consider the Project’s consistency with greenhouse gas (“GHG”) and vehicle miles traveled (“VMT”) assumptions under the PEIR, as well as newer applicable plans. For example, the PEIR found the Housing Element would not have a significant VMT impact, in part, because it was projected to generate 22.0 VMTs per service population. (PEIR,⁶ pp. 5.16-36.) Similarly, the PEIR found some GHG impacts to be less than significant because the development would achieve 3.5 MTCO₂e per service population. (See PEIR,⁶ pp. 5.7-33.) The SEIR should analyze whether the Project will achieve these levels of VMT/GHG performance throughout the build out of the Specific Plan.

Furthermore, the PEIR assumed the City would update its 2015 Climate Action Plan (“CAP”) to substantially lessen significant GHG impacts. (See PEIR, pp. 5.7-37 – 5.7-40.) However, it does not appear that the City has updated its 2015 CAP, which undermines the City’s reliance on a supplemental EIR in lieu of a subsequent, project-specific EIR. The lack of an updated CAP must be adequately addressed.

Third, the SEIR should consider new applicable plans affecting air quality and GHG emissions. The PEIR’s air quality and GHG analysis relied on various plans prepared by the California Air Resources Board (“CARB”), South Coast Air Quality Management District (“SCAQMD”), and the Southern California Association of Governments (“SCAG”). (Id., 5.7-9, 5.7-12, 5.7-35 [referencing CARB’s 2017 Scoping Plan, SCAG’s 2020 RTP/SCS]; see also PEIR,⁶ pp. 5.2-10 [referencing SCAQMD’s 2016 AQMP].) However, these and other relevant plans have been and/or in the process

³ See OPR, Santa Ana General Plan Draft Program Environmental Impact Report, <https://ceqanet.opr.ca.gov/2020029087/3>; see also Notice of Availability (“NOA”) (8/3/2020), p. 1, <https://files.ceqanet.opr.ca.gov/259509-3/attachment/rPOG9KVMv9FuVohMGyOWRhQDMDTtUcCC4nTHY9qqeIBGjOiLN4Pz0vfvfQtWWvUngNq0wQFgvjVoyAxIx0>; see also NOA, infra fn. 4.

⁴ See OPR, Santa Ana General Plan Update Recirculated Draft Program Environmental Impact Report, <https://ceqanet.opr.ca.gov/2020029087/4>; see also NOA (8/6/2021), pp. 2-3, https://files.ceqanet.opr.ca.gov/259509-4/attachment/fNQOqJLxL0mSQZH5neSMgZYCOdYbN4PJGdJ-y7RuvLjVx9HeHfbjFA97yIb4I4ogL7vBtFNIB0RQRI6_0.

⁵ See Notice of Determination (signed 4/20/2022), <https://files.ceqanet.opr.ca.gov/259509-5/attachment/RNYUqT0DtWU4xw77Vn0SIZXi0OGosufGgy0NdJtapVxro2L4ehNyXmHGuarrRe023jbfQG3MPJLvTSYQ0>; see also Addendum (Jun. 2022), p. 1, https://storage.googleapis.com/proudcity/santaanaca/uploads/2022/07/Santa-Ana-Housing-Element_Addendum_June_2022.pdf.

⁶ <https://www.santa-ana.org/general-plan-environmental-documents/>.

of being updated, such as: CARB's 2022 Scoping Plan;⁷ SCAG's 2024 RTP/SCS;⁸ SCAQMD's 2022 AQMP;⁹ and SCAQMD's updated "Air Quality Analysis Guidance Handbook" ("**Handbook**") to replace the 1993 Handbook.¹⁰ To the extent feasible, the SEIR's air/GHG impact analysis should be consistent with current methodologies discussed in these new documents.

Fourth, the SEIR should consider all feasible mitigation measures for significant impacts and explain with substantial evidence why any measures are not considered. The Final PEIR determined the Housing Element would result in significant and unavoidable impacts to air quality, cultural resources, GHG emissions, noise, recreation, population and housing. (See Final PEIR,¹¹ Tbl. 1-5.) The City should explore all feasible measures to minimize these impacts, as well as new impacts created by this Project. Local 11 urges the City to consider those measures and project design features that reduce mobile emissions and increase renewable energy sources, such as those urged by the State Office of Policy and Research ("**OPR**"), the California Air Pollution Control Officers Association ("**CAPCOA**"), SCAG, and CARB.¹² The SEIR should explore all of these options and explain with substantial evidence why any specific measures were not considered for those impacts that remain significant and purportedly unavoidable.

Fifth, the City should consider more than just compliance with the Santa Ana Municipal Code ("**SAMC**" or "**Code**") for biological/tree impacts. For example, the PEIR relied on compliance with established tree removal regulations and focused solely on parcels designated as open space. (PEIR,¹³ pp. 5.3-3, 5.3-18 – 5.3-19; see also SAMC § 33-181 et seq.) Neither the PEIR nor the Code address the loss of urban tree canopies—particularly as they relate to the general public (loss of shade) or bird populations (loss of habitat). Code compliance alone may not reduce impacts to less than significance.¹⁴ The SEIR should consider additional mitigation measures and alternatives that minimize tree removal (e.g., relocating/redesigning proposed structures, detailed construction plans that minimize the need for grading and clearing) and promote native landscaping (e.g., relocating existing trees, tree replacement rate greater than Code requirements).

¹³ Supra fn. 6.

¹⁴ See *Californians for Alternatives to Toxics v. Department of Food and Agriculture* (2005) 136 Cal.App.4th 1, 17 (“[c]ompliance with the law is not enough to support a finding of no significant impact under the CEQA.”).

Sixth, the City should also consider hotel-specific recycling and traffic demand management (“TDM”) programs to further reduce the environmental impacts associated with a hotel operation. For example, the City should consider hotel-specific recycling programs that promote recycled paper and other products like soap.¹⁵ Additionally, hotels can include a robust traffic demand management (“TDM”) program that includes full transit subsidies, participation in guaranteed ride programs, employee carpool/vanpool access to preferential parking spaces and/or hotel valet service, and dedicated shuttle service for hotel patrons towards nearby destinations.¹⁶

Seventh, to the extent the City considers approving a Project that will result in significant unavoidable impacts, the City must adopt a “statement of overriding considerations” finding that the project’s benefits outweigh its environmental harm. (See e.g., CEQA Guidelines § 15043; Pub. Res. Code § 21081(b).¹⁷) Pub. Res. Code § 21081 makes clear that overriding considerations can include:

“Specific economic, legal, social, technological, or other considerations, including considerations for the provision of employment opportunities for highly trained workers, [which] make infeasible the mitigation measures or alternatives identified in the environmental impact report.” (Id., subd. (a)(3).)

In closing, thank you for this opportunity to provide these NOP comments. Local 11 looks forward to participating in the CEQA review process and working cooperatively with the City to ensure the Project is environmentally responsible and provides adequate public benefits. This office requests all notices concerning any CEQA/land use actions involving the Specific Plan, Project, and Project Approvals as required under applicable law. (See e.g., Pub. Res. Code §§ 21092.2, 21167(f); Gov. Code § 65092.) We also ask that the City place this office on the notification list for the Project and Project Approvals. Please send notice by electronic and regular mail and inform us of any fees associated with this request.

Thank you for consideration of these comments. We ask that this letter be placed in the Project’s administrative record.

Sincerely,

LAW OFFICE OF GIDEON KRACOV

Jordan R. Sisson
Attorney for UNITE HERE Local 11
