Street Improvements

Civic Center to Washington

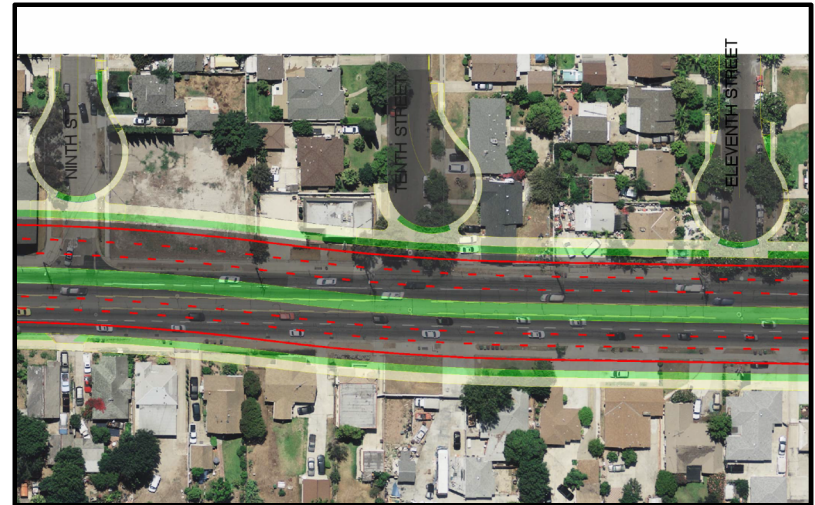

- Project includes one additional through lane and a buffered bike lane for both northbound and southbound traffic
- Infrastructure and safety improvements include new pavement, raised medians, raised buffers for bike lanes, traffic signal improvements, water improvements, and street lighting
- Aesthetic improvements include irrigation and landscaping enhancements in the raised medians and raised buffers as well as sound wall installation

Temporary Construction Easements

Civic Center to Washington

- What is a Temporary Construction Easement (TCE)?
 - Allows public agencies access to a portion of private property for a temporary period to construct improvements onsite to ensure the new improvements join with existing
- TCE's have been identified on 9th Street and 11th Street
- Work in these areas includes modifying existing driveways, sidewalk, and curb and gutter to accommodate new cul-de-sacs

Bristol Utility Undergrounding

Civic Center to Washington

- Southern California Edison (SCE)
 - Power poles will be removed
 - Infrastructure will be relocated underground
- Telecommunication Companies
 - Crown Castle, Verizon, and Charter are current tenants on poles
 - Infrastructure will be relocated underground
- SCE and Telecommunication companies are going through the City's permitting process
- Community will be notified when construction begins

What's Next?

Civic Center to Washington

- Utility undergrounding anticipated starting in late 2023/early 2024
- Construction award for City's improvements anticipated by the 2nd Quarter of 2024 and work will start following substantial completion of undergrounding work
- Community will be notified when construction will begin
- First items of work will be construction of sound walls and work in TCE areas

Thank you for your time!
