*** MODELOPTs: RegDFAULT CONC ELEV URBAN ADJ_U*

*** MODEL SETUP OPTIONS SUMMARY ***

** Model Options Selected:
* Model Uses Regulatory DEFAULT Options
* Model Is Setup For Calculation of Average CONCentration Values.
* NO GAS DEPOSITION Data Provided.
* NO PARTICLE DEPOSITION Data Provided.
* Model Uses NO DRY DEPLETION. DDPLETE = F
* Model Uses NO WET DEPLETION. WETDPLT = F
* Stack-tip Downwash.
* Model Accounts for ELEVated Terrain Effects.
* Use Calms Processing Routine.
* Use Missing Data Processing Routine.
* No Exponential Decay.
* Model Uses URBAN Dispersion Algorithm for the SBL for 1 Source(s),
for Total of 1 Urban Area(s):
Urban Population = 3010232.0 ; Urban Roughness Length = 1.000 m
* Urban Roughness Length of 1.0 Meter Used.
* ADJ_U* - Use ADJ_U* option for SBL in AERMET
* CCVR_Sub - Meteorological data includes CCVR substitutions
* TEMP_Sub - Meteorological data includes TEMP substitutions
* Model Assumes No FLAGPOLE Receptor Heights.
* The User Specified a Pollutant Type of: OTHER

**Model Calculates 1 Short Term Average(s) of: 1-HR
and Calculates PERIOD Averages

**This Run Includes: 1 Source(s); 1 Source Group(s); and 5512 Receptor(s)

with: 0 POINT(s), including
0 POINTCAP(s) and 0 POINTHOR(s)
and: 0 VOLUME source(s)
and: 1 AREA type source(s)
and: 0 LINE source(s)
and: 0 RLINE/RLINEXT source(s)
and: 0 OPENPIT source(s)
and: 0 BUOYANT LINE source(s) with a total of 0 line(s)
and: 0 SWPOINT source(s)

**Model Set To Continue RUNning After the Setup Testing.

**The AERMET Input Meteorological Data Version Date: 16216

**Output Options Selected:
Model Outputs Tables of PERIOD Averages by Receptor
Model Outputs Tables of Highest Short Term Values by Receptor (RECTABLE Keyword)
Model Outputs External File(s) of High Values for Plotting (PLOTFILE Keyword)
Model Outputs Separate Summary File of High Ranked Values (SUMMFILE Keyword)

```
**NOTE:  The Following Flags May Appear Following CONC Values:  c for Calm Hours
                                                                m for Missing Hours
                                                                b for Both Calm and Missing Hours

**Misc. Inputs:  Base Elev. for Pot. Temp. Profile (m MSL) =    17.00 ;  Decay Coef. =    0.000     ;  Rot. Angle =     0.0
                 Emission Units = GRAMS/SEC                                 ;  Emission Rate Unit Factor =   0.10000E+07
                 Output Units   = MICROGRAMS/M**3

**Approximate Storage Requirements of Model =      4.1 MB of RAM.

**Input Runstream File:          aermod.inp
**Output Print File:             aermod.out

**Detailed Error/Message File:   Construction.err
**File for Summary of Results:   Construction.sum

Subject: **Geotechnical Site Evaluation and Storm Water Infiltration Test Report, Proposed 3 Story, Self-Storage Building, Extra Space Storage # 1536, 1030 East 4th Street, Santa Ana, California 92701**

1. INTRODUCTION

The following report contains the results of our geotechnical site evaluation for design and construction of a three story, self-storage building as well as storm water infiltration testing at the existing Extra Space Storage Facility #1536 at 1030 East 4th Street in Santa Ana, California (see Plate 1). The planned 93,633 gross square foot building will be constructed at the northern end of the site as an above grade building with parking and drives adjacent the building. Foundations and on grade slabs are anticipated to be of conventional design. Subterranean construction is not anticipated at this time. Construction of the new building will require demolition or modification of existing onsite one-story buildings.

Geotechnical borings were used to obtain data on the alluvial soils underlying the site that are capped by a thin layer of fill soils. Additional borings were drill in which stormwater infiltration testing was performed at the locations shown on Plate 2. The field exploration was supplemented with laboratory testing to determine mechanical properties of the encountered soils. In addition, research was performed that indicated the site is not within Earthquake Fault, Liquefaction, or Landslide Zones (CGS, *Earthquake Zones of Required Investigation* website). Based on our site evaluation, the site is suitable for the proposed construction from a geotechnical standpoint provided recommendations presented herein are implemented in the project design and construction. Descriptions of the site and geologic units along with our conclusions and recommendations are presented within the text of this report.

2. PROPOSED DEVELOPMENT

The planned project will consist of a 93,633 gross square foot 3-story self-storage building in the northern portion of the Extra Space Storage Facility #1525 at Extra Space Storage Facility #1536 at 1030 East 4th Street in Santa Ana, California. Construction of the building will include demolition or modification of the existing self-storage buildings. In addition, the office will be moved to the new building. The site is relatively flat and therefore no significant grade changes are anticipated to the site except to provide a flat building pad and possibly for drainage adjacent the completed building. The overall configuration of the

site will remain roughly as currently laid out with the driveway off 4th Street remaining at the current location as shown on Plate 1.

The building is anticipated to be supported on continuous footings, with individual storage units possibly supported on a slab on grade within the interior of the structure. Continuous footings at the perimeter and at the interior are anticipated to be loaded to 7 to 10 kips per linear foot. Steel stud walls spaced on 10-foot centers could be loaded to approximately 5 kips per linear foot and could be supported directly on a thickened interior slab typical of this type of structure. The storage live loads are anticipated to be 125 pounds per square foot.

3. SCOPE OF SERVICES

This office, under the direction of a State registered Geotechnical Engineer, performed the geotechnical site evaluation outlined herein in general accordance with the *Scope of Services* presented in our proposal of August 26, 2022 (Proposal Number: 7241-10). Our scope of services included the following:

3.1. ARCHIVAL REVIEW

Pertinent site geotechnical and geologic information in our files was reviewed and incorporated into the site evaluation.

3.2. SUBSURFACE EXPLORATION

Three geotechnical borings (8-inch diameter) were drilled utilizing a subcontractor supplied and operated truck-mounted CME 75 hollow-stem auger drill rig equipped with an automatic hammer weighing 140 pounds with a 30-inch drop. The approximate locations of the boring are shown on Plate 2. The borings varied in depth from 46 feet (B-1 and B-3) to 20 feet (B-2) below the existing ground surface (bgs). Two infiltration tests borings (IB-1 and IB-2) were drilled to a total depth of 15 feet 2 inches below the existing ground surface. The field exploration activities described above were observed by a geologist from this office, who logged the underlying materials and from the borings obtained both bulk and relatively undisturbed drive soil samples for laboratory analyses.

At the conclusion of logging and sampling, the boring excavations (B-1 through B-3) were backfilled with the cuttings and tamped. However, the backfill may settle over time and the site representative should fill any depression that may occur, as necessary.

3.3. STORMWATER INFILTRATION TESTING

Two auger borings (IB-1 and IB-2) were excavated in the proposed development area as shown on Plate 2 to a depth of 15 feet 2 inches and was tested for stormwater infiltration. At the conclusion of logging and soil sampling, the borings were converted into infiltration rate test wells. Per the County of Orange guidelines for percolation testing, 2 inches of #3 sand was placed on the bottom of the boring, then a 2-inch diameter PVC pipe was placed in the borings; with the lower 10 to 15 feet of pipe being slotted (0.02). The annular space between the slotted pipe and the wall of the excavation was backfilled using #3 sand. The upper portion of the annular space was backfilled with soil cuttings from the borings.

The test zone was pre-soaked by filling to the top of the casing with water. The water was twice allowed to drain out for 25 minutes prior to conducting 10-minute readings for a minimum of 1 hour. The pipe was refilled with water to the top of the casing after each reading. Measurements of the water level drop were obtained at 10-minute intervals, as required in sandy soils. The rate of water infiltrated over a period of time was then calculated. At the conclusion of testing, the pipes were backfilled with soil and topped with rapid set concrete.

3.4. LABORATORY TESTING

A program of laboratory testing was performed to evaluate geotechnical properties of selected soil samples obtained during the subsurface exploration. The following tests were conducted for this site evaluation:

- Moisture and Density Testing of Undisturbed Soil Samples
- Maximum Density-Optimum Moisture Relationships
- Direct Shear Testing
- Consolidation Testing
- Expansion Index Testing
- Corrosion Testing

3.5. GEOTECHNICAL ENGINEERING ANALYSES AND REPORT PREPARATION

The results of our archival research, field exploration, storm water infiltration, laboratory testing, and engineering analyses were used to provide geotechnical recommendations for design and construction of the storage building, as well to provide an infiltration rate for design and construction of the stormwater BMP for the facility. The findings are provided in this report, which include:

a) A description of subsurface conditions as encountered in the exploratory excavations including Logs of Subsurface Data (Appendix A) and a Boring Location Map (Plate 2) showing the approximate excavation locations.

b) A description of the laboratory testing programs, including tests results (Appendix B).

c) Discussion and recommendations regarding:

   i) Geologic hazards including seismic setting of the site and faulting,

   ii) Seismic design criteria;

   iii) Soil collapse and expansion potential;

   iv) Site preparation and remedial grading;

   v) Conventional foundation design recommendations;

   vi) Estimated settlements;

   vii) Pavement and hardscape design recommendations;

   viii) Soil chemistry analysis, by subcontract;

   ix) Recommended infiltration rates.

4. SITE DESCRIPTION

The area of the proposed building is in the northern leg of the fully developed self-storage facility at 1030 East Fourth Street in Santa Ana in Orange County, California. The irregular shaped property and surrounding area are relatively flat. It is bounded by East Fourth Street to the north, commercial buildings to the east and residential and commercial buildings to the west. A landscape strip separates the southern end from East 1st Steet. The facility is developed with single-story storge units surrounded by concrete parking and drive areas. Drainage of the site is by sheet flow to area storm drain inlet structures.

5. SITE GEOLOGY

The site is underlain at depth by Quaternary-age alluvium mantled with artificial fill deposits. Based on the *Seismic Hazard Zone Report* for the Tustin 7.5-minute Quadrangle, the alluvial deposits are dense to very dense. Descriptions of these units are presented below and in the attached Logs of Subsurface Data (Appendix A).

5.1. ALLUVIUM

Quaternary-age alluvium underlies the site to the maximum depth explored, 46 feet (B-1 and B-3) below the existing ground surface. As encountered, the alluvium generally consists of yellowish brown to dark yellowish brown clayey silt to silty to sandy clay in a moist to wet and stiff to very stiff condition interstratified with yellowish brown to light yellowish brown clayey to silty fine to fine to coarse sand in a damp to very moist and medium dense to very dense condition. Some of the sandy units are friable.

5.2. ARTIFICIAL FILL

Artificial fill typically mantles the underlying alluvium and varies in thickness from approximately 1.5 feet (IB-1) to 4 feet (B-1). As encountered, the artificial fill generally consists of brown sandy clay in a moist and very stiff condition. These artificial fill soils are typically mottled and locally contain some brick to concrete debris which interfered with the sampling in the upper portion of B-1.

The existing concrete covered parking and drive areas was observed to vary in thickness from 5 inches (IB-1) to 6.5 inches (B-3).

5.3. GROUNDWATER

Groundwater was not encountered to the maximum depth explored, 46 feet (B-1 and B-3) below the existing ground surface. Based on the *Seismic Hazard Zone Report* for the Tustin 7.5-minute Quadrangle, historic groundwater is estimated at greater than 40 feet below the site. As in any groundwater situation, groundwater levels can fluctuate and groundwater (or perched zones) may be encountered at higher elevations than previously observed in the general area.

5.4. FAULTING AND SEISMICITY

The storage facility, like any other development in the greater Southern California area, is in a seismically active region prone to occasional damaging earthquakes. The destructive power of earthquakes can be grouped into fault-rupture, ground shaking (strong motion), and secondary effects of ground shaking such as tsunami, liquefaction, settlement, landslides, etc.

The hazard of fault-rupture is generally thought to be associated with a relatively narrow zone along well-defined pre-existing active faults. No doubt there is and will be exceptions to this, because it is not possible to predict the precise location of a new fault where none existed before (CDMG, 1975). Holocene-active faults are not known to cross the site nor is the project site currently within an Alquist-Priolo (A-P) Earthquake Fault Zone as defined by the State Geologist (CGS 2018). The closest active mapped faults are the El Modeno and 445 Faults, approximately 5.7 miles to the northeast, 440 and 439 Faults, approximately 8.6 miles to the southwest. The Whittier Fault is roughly 12 miles to the northeast. Potential for onsite surface ground rupture due to faulting onsite during the project lifetime is considered remote.

Although no active or potentially active faults are known to exist within or adjacent the site, the area will be subject to strong ground motion from occasional earthquakes in the region. Significant earthquakes have occurred within a 40-mile radius of the Site within the last 50 years. Additional earthquakes will likely occur in this area within the life of the project and it will experience strong ground shaking from these events.

Probabilistic seismic hazard analyses (PSHA) predict the Design Basis Earthquake having a 2% probability of exceedance in 50 years (2,475-year return period will have a peak ground acceleration estimated to be 0.64g based on a seismic event with a mean magnitude of 6.67 (Mw) at a mean distance of 15.27 km from the site. This is based on the U.S. Geological Survey (USGS) interactive web application, Unified Hazard Tool https://earthquake.usgs.gov/hazards/interactive/ for the D class site.

Secondary effects of strong ground motion include tsunami, seiche, liquefaction, settlement, earthquake triggered landslides, and flooding from dam failures. Tsunamis are impulsively generated water waves that can cause damage to shoreline areas. A seiche is an oscillation wave within an enclosed body of water. The site is not near the ocean or adjacent a body of water and, therefore, is not subject to tsunami and seiche hazards. Furthermore, the site is not prone to earthquake triggered landslides due to the relatively low relief in the area and preponderance of development covered land, nor is the site in the vicinity of any dam failure inundation zone. The site is not within a State designated seismic hazard zone for liquefaction potential (CGS, *Earthquake Zones of Required Investigation* website). See Figure 1, the Seismic Hazards Zone Map.

5.5. HYDROCONSOLIDATION

Hydroconsolidation occurs when the soil structure collapses due to soil wetting resulting in consolidation of the soil column. Due to the dense well consolidated nature of the underlying soils, the potential for hydroconsolidation is negligible.

6. CONCLUSIONS AND RECOMMENDATIONS

6.1. GENERAL

The site was evaluated from a geotechnical standpoint for construction of a self-storage facility described herein. Differential settlement should be negligible based on the bearing capacities provided herein. The project may be developed as described earlier in this report provided recommendations presented herein are followed and incorporated into the project design and construction.

6.2. NATIVE SOILS

As previously noted, the site is underlain by Quaternary-age alluvial soils. These soils are considered suitable for the support of the proposed self-storage building. The thin layer of existing fill soils over the alluvium should be removed and recompacted as recommended later herein.

6.3. STORMWATER INFILTRATION

Based on our test results and field exploration observations, soils in the northern portion of the site as shown on Plate 2 were found to be suitable for construction of a stormwater infiltration system (greater than 0.3 inches/hour). A design infiltration rate of 2.7 inches/hour may be used for design purposes using a factor of safety of 2. The test results can be found in Appendix C.

The sizing of the infiltration system or field construction should be specified by the project design civil engineer. Input should be solicited from and data provided to the civil engineer, structural engineer and geotechnical engineer to optimize the design while minimizing the potential detrimental effects the addition of water could have on the site or adjacent sites. Plans and specifications should be provided to our office for review. Depending on actual design depth(s) and location(s) additional infiltration rate testing may be warranted.

6.4. SITE PREPARATION AND GRADING

6.4.1. General

The following site preparation and grading recommendations are for preparation of the building area. Soil removal and recompaction will be necessary for building support as described in the following sections. Grading including site preparation, grading, and fill placement should be per applicable building codes, or these recommendations, whichever is more conservative.

6.4.2. Site Clearing
Prior to starting earthwork, trash, debris, and remnants of demolition within all areas of construction should be stripped and removed from the site. Utilities within the area of proposed grading should be identified and removed or protected prior to grading.

6.4.3. Demolition
Presently, the area is covered by paving and facilities related to the current use of the property that are planned for demolition. Utilities to remain should be protected in place.

6.4.4. Soil Removals
Soil removals, as a minimum, should extend below soils disturbed during the site clearing. Also, the existing fill (estimated at 1.5 to 4 feet thick) should be removed to the underlying alluvial soils. For areas supporting continuous and isolated footings, as well as those supporting structural fill, the soil removals should extend to firm previously placed compacted fill, anticipated for be directly below the disturbed soil zone. Due to the presence of the existing fill, the entire building pad should be undercut to the depth of the encountered fill, which based on the borings is approximately 4 feet thick.

Soil removal and recompaction should be performed as necessary within all areas of at-grade construction requiring compacted engineered fill. The removals should extend a minimum of five feet outside the footings or area of fill placement. Removal may be stopped at property lines and adjacent buildings. This office should evaluate removals adjacent existing structures prior to excavation. When the removals are completed and prior to in-place processing, this office should observe the bottom of the removal areas.

6.4.5. Soil Compaction
Fill soil or in-place compaction should be completed to a minimum 90 percent relative compaction. Relative compaction is the ratio of the in-place dry soil density to the maximum dry soil density as determined in general accordance with ASTM laboratory standard D-1557.

6.4.6. In-Place Soil Processing
Once the soil removals are complete and prior to placing fill, the bottom of the removal area should be processed. Processing consists of scarifying the exposed surface to a depth of roughly 6 to 8 inches, conditioning the scarified soil to above the optimum moisture content, and compacting the scarified soil. Processed soil should be compacted to 90 percent relative compaction.

6.4.7. Fill Placement
Soils generated from the removal areas should be suitable for reuse as fill. Fill soils should be free of significant vegetation, rocks greater than 6 inches in maximum linear dimension, and other deleterious materials. In addition, fill soils should be mixed and blended. Fill soils should be placed in lifts not exceeding 8 inches in maximum loose thickness, moisture conditioned to slightly over optimum moisture content, and compacted to at least 90 percent relative compaction.

6.4.8. Temporary Slopes
Temporary slopes, if required, should be at a gradient of 1(horizontal):1(vertical) or flatter to a maximum depth of 4 feet. Due to the sandy nature of the soils, vertical trench cuts should not be made within the site. Sloped excavations can be evaluated when the proposed location and depth are known.

During construction, the contractor is responsible for excavation and maintenance of safe and stable slope angles considering the subsurface conditions and the methods of operations. Temporary excavations should be made per the applicable requirements of the current Cal/OSHA excavation regulations. Surcharge loads should be setback from the top of temporary excavations a minimum horizontal distance of 10 feet.

6.5. SOIL EXPANSIVENESS

An expansion test conducted on the upper soils within the site indicate the soils are non-expansive (0-20 soil expansion range). Expansive soils contain clay particles that change in volume (shrink or swell) due to a change in the soil moisture content. The amount of volume change depends upon the soil swell potential (amount of expansive clay in the soil), availability of water to the soil, and the soil confining pressure. Swelling occurs when soils containing clay become wet due to excessive water from poor surface drainage, over-irrigation of lawns and planters, and sprinkler or plumbing leaks. Swelling clay soils can cause distress to structures, walks, drains, and patio slabs.

6.6. GEOTECHNICAL SEISMIC DESIGN

As previously discussed, no active faults identified by the State are in close vicinity to the site nor is the site within an Alquist-Priolo Earthquake Fault Zone. Nevertheless, the site is within a seismically active region prone to occasional damaging earthquakes.

Structures within the site may be designed using procedures for seismic design presented in ASCE/SEI 7-16. Mapped acceleration parameters are initially determined for sites having a shear wave velocity of 2,500 feet per second (Section C11.4.4). The S_s and S_1 values are adjusted to obtain the maximum considered earthquake (MCE) spectral acceleration values for the site based on its site class of D. The seismic design parameters for the site's coordinates (latitude 33.7474 N and longitude 117.8561 W) were obtained from the web based ASCE 7 Hazard Tool https://asce7hazardtool.online/ The parameters are presented on the following page (the full report is presented in Appendix D). Also, provided in Appendix C is the ASCE 7 Hazards Report for ASCE/SEI 7-22.

SEISMIC PARAMETER	VALUE PER CBC
Short Period Mapped Acceleration (S_s)	1.287g
Long Period Mapped Acceleration (S_1)	0.459g
Site Class Definition	D
Site Coefficient (F_a)	1.0
Site Coefficient (F_v)	1.7*
$S_{MS} = F_aS_s$	1.287g
$S_{M1} = F_vS_1$	0.78g*
$S_{DS} = 2/3S_{MS}$	0.858g
$S_{D1} = 2/3S_{M1}$	0.52g*
PGA_M	0.595

**Based on proposed development meeting requirements of the exemption for Site Class D sites in Section 11.4.8 of ASCE 7-16. Further analysis may be required once the Response Modification Factor and Period of the proposed development are known.*

The purpose of the building code earthquake provisions is primarily to safeguard against major structural failures and loss of life, not to limit damage nor maintain function. Therefore, values provided in the building code should be considered minimum design values and should be used with the understanding site acceleration could be higher than addressed by code-based parameters. Cracking of walls and possible structural damage should be anticipated in a significant seismic event.

6.7. FOUNDATION DESIGN

6.7.1. Design Data

The structure may be supported on continuous or isolated footings underlain by engineered compacted soils and in-place alluvial soils as addressed above and may be designed for an allowable bearing pres-

sure of 3,000 pounds per square foot (psf). The allowable net bearing pressure may be increased by one-third when considering wind or seismic loads. The weight of concrete below grade may be excluded from the footing load.

Continuous and isolated footings should have minimum widths of 18 inches and 24 inches, respectively. The footings should be embedded a minimum of 24 inches for interior and exterior footings. The embedment should be measured from the lowest adjacent grade (lowest grade at the time of excavation or after). Interior footings may be embedded a minimum of 24 inches below the interior slab. Steel reinforcement should be per the structural engineers' recommendations. However, minimum continuous footing reinforcement should consist of two number five bars in the top and bottom (total of 4 bars). In addition, interior slabs are suggested to be tied to the footings with number 4 bars at 24-inch centers bent 3-feet into the slab and extended to within 3 inches of the bottom of the footing. Perimeter isolated footings should be tied together with a grade beam extending 24 inches deep below the lowest adjacent grade.

6.7.2. Mat Slab Design Data

An allowable soil bearing pressure of 1,500 pounds per square foot may be used in the design of a reinforced concrete slab or mat slab for point or wall loads. A modulus of subgrade reaction "K" of 200 pounds per cubic inch (pci) may be used for overall design of a slab. The provided bearing capacity and modulus of subgrade reaction are for a slab underlain by a 6-inch-thick layer of ½ inch or larger clean aggregate (or per applicable building codes, whichever is the more restrictive) placed directly on the surface of a properly prepared building pad. The project structural engineer should determine the steel reinforcement and concrete compressive strength. An interior slab should be placed on a moisture retarder, however, an exception would be if the slab is used to resist lateral movement and a moisture retarder layer cannot be used below the slab. In this case, it may be necessary to seal the surface of the slab.

6.7.3. Lateral Resistance

Lateral forces on foundations may be resisted by passive earth pressure and base friction. Lateral passive earth pressure may be considered equal to a fluid weighing 300 pcf. The lateral passive pressure may be increased to a maximum of 2500 psf. Base friction may be computed at 0.4 times the normal load. Base friction and passive earth pressure may be combined without reduction.

6.7.4. Estimated Settlements

Static settlement of footings should be evaluated once building footing locations and structural loads are known. However, footing settlement for static loading is anticipated on the order of 1/2 inch or less, with a maximum differential settlement of 1/2± inch over a span of approximately 30 feet or between adjacent individual footings. This is provided building construction is started directly after footing excavation, footings are cast soon after the footing excavation, and construction is completed in a timely manner. Settlements due to static loading are expected to occur rapidly as the loads are applied.

All structures settle during construction and some minor settlement of structures can occur after construction during the life of the project. Minor wall cracking could occur within the structure associated with expansion and contraction of the structural members. In addition, wall or slab cracking may be associated with settlement or expansive soil movement. Additional settlement/soil movement could occur if the soils dry or become saturated due to excessive water infiltration generally caused by excessive irrigation, poor drainage, etc.

6.7.5. Footing Excavations

Footings should be poured soon after footing excavation is complete. This office should observe the footing excavations prior to placing reinforcing steel. Footings should be cut square and level and cleaned of loose soils. Soil excavated from the footing and utility trenches should not be spread over any areas of construction unless properly compacted. Soils silted into the footing excavations should be

removed to the required depth prior to casting the concrete. The footings should be cast as soon as possible to avoid deep desiccation of the footing subsoils.

6.7.6. Premoistening
Footing subsoils should be premoistened to 3% over the optimum moisture content for a depth of 18 inches below the bottom of the footing. Saturated soils or soils silted into the footing excavations should be removed prior to concrete placement.

6.8. SLABS-ON-GRADE

6.8.1. Site Preparation
The subgrade for slabs-on-grade, if disturbed during foundation and utility construction, should be conditioned prior to placement of an aggregate materials. Loose soils should be removed to firm in-place material, the exposed subgrade processed, and the material replaced as engineered compacted fill or aggregate material.

6.8.2. Slab-on-Grade Design Data
Interior concrete slabs on-grade not used for structural support should be 5 inches thick and underlain by a 6-inch-thick layer of ½ inch or larger clean aggregate or per applicable building codes, whichever is the more restrictive. The slab should be reinforced with a minimum of number 4 bars at 18-inch centers in each direction. The reinforcement should be placed and kept at slab mid-depth.

Exterior concrete slabs-on-grade (non-auto traffic) and walkways should be a minimum of 4 inches thick and underlain by a minimum of 4 inches of sand. In areas of heavy loading for truck traffic (including trash pickup areas and loading docks) the slab thickness should be increased to a minimum of 7 inches thick over 6 inches of aggregate base. Exterior slabs should be reinforced with a minimum of No. 3 bars on 24-inch centers in each direction. The reinforcement should be placed at mid-depth of the slab. Sidewalks may be constructed of non-reinforced concrete provided the sidewalks are cut into square panels (i.e., 4-foot wide walks should be cut into 4 foot by 4 foot squares).

6.8.3. Premoistening
Soils under lightly loaded slabs on-grade should be premoistened to 3% over the optimum moisture content for a depth of 18 inches.

6.8.4. Concrete Placement and Cracking
Minor cracking of concrete slabs is common and is generally the result of concrete shrinkage continuing after construction. Concrete shrinks as it cures resulting in shrinkage tension within the concrete mass. Since concrete is weak in tension, development of tension results in cracks within the concrete. Therefore, the concrete should be placed using procedures to minimize the cracking within the slab. Shrinkage cracks can become excessive if water is added to the concrete above the allowable limit and proper finishing and curing practices are not followed. Concrete mixing, placement, finishing, and curing should be performed per the American Concrete Institute Guide for Concrete Floor and Slab Construction (ACI 302.1R). Concrete slump during concrete placement should not exceed the design slump specified by the structural engineer. Concrete slabs on grade should be provided with tooled crack control joints at 10-15 foot centers or as specified by the structural engineer.

6.8.5. Moisture Vapor Barrier
Moisture migrates from high to low moisture zones. Therefore, concrete slabs on grade within the building interiors should be considered sensitive to moisture. Therefore, an appropriate moisture vapor retarder layer should be installed and maintained below concrete slabs-on-grade.

The exception to a moisture retarder below the slab would be if the slab is used to resist lateral movement and a moisture retarder layer could not be used below the slab. In this case, it may be necessary to seal the surface of the slab.

The water vapor retarder should be one specifically designed as a vapor retarder and consist of a minimum 15 mil extruded polyolefin plastic and complying with Class A requirements under ASTM E1745 (*Standard Specification for Plastic Water Vapor Retarders Used in Contact with Soil or Granular Fill under Concrete Slabs*). The vapor retarder should be installed in accordance with ASTM E1643. The water vapor retarder should be installed in direct contact with the concrete slab along with a concrete mix design to control bleeding, shrinkage, and curling (ACI 302.2R). The vapor retarder shall be installed over a minimum 6-inch-thick layer of ½ inch or larger clean aggregate or per applicable building codes, whichever is the more restrictive. The vapor retarder should be placed per ASTM E1643-98(2005) *Standard Practice for Installation of Water Vapor Retarders Used in Contact with Earth or Granular Fill Under Concrete Slabs*. In addition, various trades and the concrete contractor should be required to protect the moisture retarder during construction.

All joints should be lapped and sealed. Perforations through the moisture vapor retarder such as at pipes, conduits, columns, grade beams, and wall footing penetrations should be sealed per the manufacture's specifications or ASTM E1643. Proper construction practices should be followed during construction of slabs on-grade. Repair and seal tears or punctures in the moisture barrier resulting from the construction process prior to concrete placement.

Minimizing shrinkage cracks in the slab on-grade can further minimize moisture vapor emissions. A properly cured slab utilizing low-slump concrete will reduce the risk of shrinkage cracks in the slab as described herein.

The concrete contractor should make the necessary changes in the concrete placement and curing for concrete placed directly over the retarder. Placing the concrete directly on top of the moisture vapor retarder layer allows the layer to be observed for damage directly prior to concrete placement.

The slabs should be tested for moisture content prior to the selection of the flooring and adhesives. Moisture in the slabs should not exceed the flooring manufacture's specifications. The concrete surface should be sealed per the manufacture's specifications if the moisture readings are excessive. It may be necessary to select floor coverings applicable to high moisture conditions.

6.9. SOIL CORROSIVITY

The results of the analytical laboratory testing to evaluate the potential for corrosion of materials in contact with the onsite soils are presented in Appendix B. The testing was performed on a soil sample considered to represent the onsite soils. From ACI Table 19.3.1.1 the evaluated soil is categorized as Class S0. The required concrete design requirements for this exposure class can be obtained from ACI Table 19.3.2.1. The potential for corrosion of metals in contact with the site soils is severely corrosive as determined from Table 1 in Appendix B. For specific recommendations, a corrosion engineer should be consulted.

6.10. SITE DRAINAGE AND LANDSCAPING

Positive drainage should be continuously provided and maintained away from the structure during and after construction in accordance with applicable building codes and/or the approved grading plan. Regarding landscaping, planters adjacent a structure should be constructed so that irrigation water will not saturate the soils underlying the building footings and slabs. Trees should not be planted adjacent a structure where roots could grow under the foundations or slabs.

6.11. GUTTERS AND DOWNSPOUTS

Gutters and downspouts should be installed on the buildings to collect roof water and direct the water away from the structure.

6.12. PAVEMENT DESIGN

The anticipated structural section would be 3 inches of asphaltic concrete over 6 inches of aggregate base for parking areas. The structural section should be increased to be 3 inches of asphaltic concrete over 10 inches of aggregate base for drive areas. The final structural sections should be confirmed at the conclusion of grading. The upper 6 inches of subgrade and the base materials should be compacted to at least 90% and 95% of the maximum dry density, respectively.

Planter areas should be graded so excess water drains onto and not beneath the adjacent AC pavement and curbs. Also, adjacent the planters, consideration should be given to deepening the curbs so that water is not allowed to saturate the pavement subgrade.

6.13. PLAN REVIEW(S)

As the development process continues and final detailed grading and site/foundation plans and specifications are developed, they should be reviewed by Gorian and Associates, Inc. Additional geotechnical recommendations may be warranted at that time.

7. CLOSURE

This report was prepared under the direction of State registered geotechnical engineer for the addressee and design consultants solely for design and construction of the project as described herein. No warranty, express or implied, is made as to conclusions and professional advice included in this report. Gorian and Associates, Inc. disclaim any and all responsibility and liability for problems that may occur if the recommendations presented in this report are not followed.

This report may not contain sufficient information for other uses or the purposes of other parties. Recommendations should not be extrapolated to other areas or used for other facilities without consulting Gorian and Associates, Inc. Services of this office should not be construed to relieve the owner or contractors of their responsibilities or liabilities.

The scope of the services provided by Gorian and Associates, Inc. and its staff, excludes responsibility and/or liability for work conducted by others. Such work includes, but is not limited to, means and methods of work performance, quality control of the work, superintendence, sequencing of construction and safety in, on, or about the jobsite.

The recommendations are based on interpretations of the subsurface conditions concluded from information gained from subsurface explorations and a surficial site reconnaissance. The interpretations may differ from actual subsurface conditions, which can vary horizontally and vertically across the site. Due to possible subsurface variations, this office should observe all aspects of field construction addressed in this report. Individuals using this report for bidding or construction purposes should perform such independent investigations as they deem necessary.

oOo

Please contact our office if you have questions regarding the information and recommendations contained in this report, or require additional consultation.

Respectfully submitted,

Gorian and Associates, Inc.

By: Jerome J. Blunck, GE 151
Principal Geotechnical Engineer

APPENDIX B
LABORATORY TESTING

General

Laboratory test results on selected samples are presented below. Test were performed to evaluate the physical and engineering properties of the encountered earth materials, including in-situ moisture content and dry density, optimum moisture-maximum dry density relationships, expansion potential, consolidation characteristics, and shear strength parameters. Soil corrosivity testing was performed under subcontract by a corrosion engineer.

Density and Moisture Tests

In situ dry density and moisture content were determined for each undisturbed soil sample. The results are presented on the Logs of Subsurface Data (Appendix A).

Maximum Density-Optimum Moisture

Maximum density/optimum moisture test (compaction characteristics) was performed on two selected bulk samples of the soils encountered. The test was performed in general accordance with ASTM D 1557. The results are as follows:

Boring Number	Depth (feet)	Visual Classification	Maximum Dry Density – pcf	Optimum Moisture Content - %
B-2	4.0	Dark yellowish brown sandy clay	124.4	10.7
B-3	4.0	Yellowish brown silty fine sand	129.2	9.3

Soil Expansiveness

An expansion index test was performed on a soil sample obtained from the borings to evaluate expansion potential of the subgrade soils in general accordance with the Expansion Index Test method (ASTM test method D4829-08a). The results are as follows:

Boring Number	Depth (feet)	Expansion Index	Expansion Range
B-2	4.0	31	0-20

Direct Shear Test

Direct shear tests were performed on two relatively undisturbed samples and two remolded samples to evaluate soil shear strength parameters. The sample sets were sheared under normal pressures ranging from 1000 to 4000 pounds per square foot. The results are graphically presented herein.

Consolidation Test

Consolidation (confined compression) testing was performed on four selected samples of the soils below anticipated foundation depths to evaluate compressibility characteristics. The sample was loaded in increments to a maximum of 8,000 pounds per square foot and then rebounded. The samples was inundated at the indicated overburden pressure to evaluate the effect of moisture infiltration on compression behavior. The load-consolidation curves are presented herein as a graphic summaries.

Soil Corrosivity

The results of the analytical laboratory testing to evaluate the potential for corrosion of materials in contact with the onsite soils are presented in this appendix. The testing was performed on a soil sample considered to represent the onsite soils. From ACI Table 19.3.1.1 the evaluated soil is categorized as Class S0. The required concrete design requirements for this exposure class can be obtained from ACI Table 19.3.2.1. The potential for corrosion of metals in contact with the site soils is severely corrosive as

determined from Table 1 below. For specific recommendations, a corrosion engineer should be consulted.

ACI Table 19.3.1.1 – Exposure Categories and Classes

Category	Class	Water-soluble sulfate (SO_4^{2-}) in soil, percent by mass	Dissolved sulfate (SO_4^{2-}) in water, ppm[1]
Sulfate (S)	S0	$SO_4^{2-} < 0.10$	$SO_4^{2-} < 150$
	S1	$0.10 \le SO_4^{2-} < 0.20$	$150 \le SO_4^{2-} < 1500$ or seawater
	S2	$0.20 \le SO_4^{2-} < 2.00$	$1500 \le SO_4^{2-} < 10,000$
	S3	$SO_4^{2-} > 2.00$	$SO_4^{2-} > 10,000$

1 ppm (parts per million) = milligrams per kilogram mg/kg of dry soil weight

ACI Table 19.3.2.1 – Requirements for Concrete by Exposure Class

Exposure Class	Maximum *w/cm*	Minimum f_c', psi	Cementitious materials - Types			Calcium chloride admixture
			ASTM C150	ASTM C595	ASTM C1157	
S0	N/A	2500	No type restriction	No type restriction	No type restriction	No restriction
S1	0.50	4000	II	Types IP, IS, or IT with (MS) designation	MS	No restriction
S2	0.45	4500	V	Types IP, IS, or IT with (MS) designation	HS	Not permitted
S3	0.45	4500	V plus pozzolan or slag cement	Types IP, IS, or IT with (MS) designation plus pozzolan or slag cement	HS plus pozzolan or slab cement	Not permitted

ACI Tables 19.3.1.1 and 19.3.2.1 - ACI 318-14 Building Code Requirements for Structural Concrete

Table 1. Relationship Between Soil Resistivity and Soil Corrosivity

Soil Resistivity, ohm-cm	Classification of Soil Corrosiveness
0 to 900	Very severe corrosion
900 to 2,300	Severely corrosive
2,300 to 5,000	Moderately corrosive
5,000 to 10,000	Mildly corrosive
10,000 to >10,000	Very mildly corrosive

Project Owner's Certification			
Planning Application No. (If applicable)		Grading Permit No.	
Tract/Parcel Map and Lot(s) No.		Building Permit No.	TBD
Address of Project Site and APN (If no address, specify Tract/Parcel Map and Lot Numbers)			1030 E 4th Street, APN:398-461-18

This Water Quality Management Plan (WQMP) has been prepared for Extra Space Storage by Strand Engineering Inc.. The WQMP is intended to comply with the requirements of the County of Orange NPDES Stormwater Program requiring the preparation of the plan.

The undersigned, while it owns the subject property, is responsible for the implementation of the provisions of this plan , including the ongoing operation and maintenance of all best management practices (BMPs), and will ensure that this plan is amended as appropriate to reflect up-to-date conditions on the site consistent with the current Orange County Drainage Area Management Plan (DAMP) and the intent of the non-point source NPDES Permit for Waste Discharge Requirements for the County of Orange, Orange County Flood Control District and the incorporated Cities of Orange County within the Santa Ana Region. Once the undersigned transfers its interest in the property, its successors-in-interest shall bear the aforementioned responsibility to implement and amend the WQMP. An appropriate number of approved and signed copies of this document shall be available on the subject site in perpetuity.

Representation on the Authority of Parties/Signatories. Each person signing this Agreement represents and warrants that he or she is duly authorized and has legal capacity to execute and deliver this Agreement. Each party represents and warrants to the other that the execution and delivery of the Agreement and the performance of such party's obligations hereunder have been duly authorized and that the Agreement is a valid and legal agreement binding on such party and enforceable in accordance with its terms. This agreement is binding on any successors in interest, designees or transferees. Attach proof of authority to execute this agreement.

Owner: John Bennett			
Title	Sr. Construction Manager		
Company	Extra Space Storage

Section I Permit(s) and Water Quality Conditions of Approval or Issuance

Provide discretionary or grading/building permit information and water quality conditions of approval, or permit issuance, applied to the project. If conditions are unknown, please request applicable conditions from staff. *Refer to Section 2.1 in the Technical Guidance Document (TGD) available on the OC Planning website (ocplanning.net).*

Project Infomation			
Permit/Application No. (If applicable)		Grading or Building Permit No. (If applicable)	
Address of Project Site (or Tract Map and Lot Number if no address) and APN	1030 E. 4th Street		
Water Quality Conditions of Approval or Issuance			
Water Quality Conditions of Approval or Issuance applied to this project. (Please list verbatim.)			
Conceptual WQMP			
Was a Conceptual Water Quality Management Plan previously approved for this project?			

Watershed-Based Plan Conditions	
Provide applicable conditions from watershed - based plans including WIHMPs and TMDLS.	Newport Bay TMDLs -Sediment -Nutrient -Toxics -Fecal Coliform

Section II Project Description

II.1 Project Description

Provide a detailed project description including:

- Project areas; 1.23 Acres (Total Site Area 3.48 Acres)
- Land uses; commercial (self-storage)
- Land cover; building, paving, landscaping
- Design elements; maximize landscape areas, maintain existing drainage patterns
- A general description not broken down by drainage management areas (DMAs). The site drains to the southwest corner of the site and the south property line (2 points of discharge) via a series of valley gutters.

Include attributes relevant to determining applicable source controls. *Refer to Section 2.2 in the Technical Guidance Document (TGD) for information that must be included in the project description.*

Description of Proposed Project				
Development Category (From Model WQMP, Table 7.11-2; or -3):	8. All significant redevelopment projects, where redevelopment is defined as the addition or replacement of 5,000 or more square feet of impervious surface on an already developed site.			
Project Area (ft^2): 34,412	Number of Dwelling Units: 0		SIC Code: 52103	
Project Area	Pervious		Impervious	
	Area (acres or sq ft)	Percentage	Area (acres or sq ft)	Percentage
Pre-Project Conditions	15,484	29%	38,099	71%
Post-Project Conditions	5,914	11%	47,669	89%
Drainage Patterns/Connections	Under existing conditions, the project site is fully developed. Runoff from the site drains to the southwest corner of the site and the south property line (2 points of discharge) via a series of valley gutters. Point of Discharge #1 (southwest corner) discharges via a sidewalk culvert to the gutter on N. Standard Avenue and eventually drain west in the north curb and gutter of E. 2nd Street before entering the City's storm drainage system. Point of Discharge #2 (south property line) discharges to a gutter which drains to the storm drain system in E. 1st Street.			

	flows southeast via a series of valley gutters to an existing sidewalk culvert which discharges through the curb face on Sullivan Street.
Narrative Project Description: (Use as much space as necessary.)	Runoff will be conveyed in a similar manner to existing conditions. Under proposed conditions, a trench drain will be constructed adjacent to the existing concrete valley gutter at the eastern edge of the project area to capture runoff from the proposed improvements. Additionally downspouts from the proposed building will be piped to the new storm drainage system and drain inlets will be installed on the north and west side of the proposed building. Runoff will be directed to a new underground retention basin for infiltration. The remainder of the site will continue to drain via existing valley gutters to the two existing points of discharge.

II.2 Potential Stormwater Pollutants

Determine and list expected stormwater pollutants based on land uses and site activities. *Refer to Section 2.2.2 and Table 2.1 in the Technical Guidance Document (TGD) for guidance.*

Pollutants of Concern			
Pollutant	Check One for each: E=Expected to be of concern N=Not Expected to be of concern		Additional Information and Comments
Suspended-Solid/ Sediment	E ☒	N ☐	Site Landscaping
Nutrients	E ☒	N ☐	Site Landscaping
Heavy Metals	E ☐	N ☒	
Pathogens (Bacteria/Virus)	E ☐	N ☒	
Pesticides	E ☒	N ☐	Site Landscaping
Oil and Grease	E ☒	N ☐	Commercial Development
Toxic Organic Compounds	E ☒	N ☐	Commercial Development
Trash and Debris	E ☒	N ☐	Commercial Development

II.3 Hydrologic Conditions of Concern

Determine if streams located downstream from the project area are potentially susceptible to hydromodification impacts. *Refer to Section 2.2.3.1 in the Technical Guidance Document (TGD) for North Orange County or Section 2.2.3.2 for South Orange County.*

☐ No – Show map

☒ Yes – Describe applicable hydrologic conditions of concern below. *Refer to Section 2.2.3 in the Technical Guidance Document (TGD).*

Per Figure 4 (Orange County Watershed Master Planning) the site is shown as "Potential Areas of Erosion, Habitat, & Physical Structure Susceptibility)

II.4 Post Development Drainage Characteristics

Describe post development drainage characteristics. *Refer to Section 2.2.4 in the Technical Guidance Document (TGD).*

Under proposed conditions, runoff will be conveyed in a similar manner to existing conditions. Runoff from the two proposed buildings will be captured via roof drains and routed to two underground retention basins for infiltration.

II.5 Property Ownership/Management

Describe property ownership/management. *Refer to Section 2.2.5 in the Technical Guidance Document (TGD).*

The property is owned and managed by Extra Space Storage. The owner will be responsible for the long-term inspection and maintenance of the project's stormwater BMP's.

Section III Site Description

III.1 Physical Setting

Fill out table with relevant information. *Refer to Section 2.3.1 in the Technical Guidance Document (TGD).*

Name of Planned Community/Planning Area (if applicable)	West Santa Ana Blvd Focus Area
Location/Address	2602 W. 5th Street/280 N. Sullivan Street
General Plan Land Use Designation	Flex, Industrial Flex 1.5
Zoning	M-1 Light Industrial
Acreage of Project Site	1.23
Predominant Soil Type	B

III.2 Site Characteristics

Fill out table with relevant information and include information regarding BMP sizing, suitability, and feasibility, as applicable. *Refer to Section 2.3.2 in the Technical Guidance Document (TGD).*

Site Characteristics	
Precipitation Zone	0.75 IN (85th Percentile)
Topography	The site is relatively flat and drains to the southeast at approximately 0.3%.

Drainage Patterns/Connections	Under existing conditions, the project site is fully developed and 100% impervious. Runoff from the site flows south via a series of valley gutters to the southwest corner of the site and the south property line (2 points of discharge) where if enters the City's storm drainage system (Delhi Channel) where it ultimately discharges to Newport Bay and the Pacific Ocean.
Soil Type, Geology, and Infiltration Properties	Based on Orange County Hydrology Manual Hydrologic Classification of Soils Plate B (Soils Map) the soils are HSG Soils Type B. Map included in Appendix A.
Hydrogeologic (Groundwater) Conditions	Per the site Geotechnical Report groundwater was not encountered to a depth of 46 feet. Per TGM Figure XVI-2f (North Orange County Groundwater Protection Areas) the site is not in a groundwater protection area.
Geotechnical Conditions (relevant to infiltration)	Infiltration rate = 1.8 in/hr (SF=3.0, Worksheet H)
Off-Site Drainage	Off-Site Drainage does not enter the project.
Utility and Infrastructure Information	Wet and dry utilities will be supplied from existing infrastructure in the surrounding right-of-ways.

III.3 Watershed Description

Fill out table with relevant information and include information regarding BMP sizing, suitability, and feasibility, as applicable. *Refer to Section 2.3.3 in the Technical Guidance Document (TGD).*

Receiving Waters	Upper Newport Bay
303(d) Listed Impairments	Sediment, Nutrients, PCB's, Toxicity, Indicator Bacteria, Chlordane, DDT, Copper, Malathion
Applicable TMDLs	Sediment, Nutrients, PCB's, Indicator Bacteria, Chlordane, DDT
Pollutants of Concern for the Project	Suspended Solids/Sediments, Nutrients, Pesticides, Oil & Grease, Trash & Debris

Environmentally Sensitive and Special Biological Significant Areas	Upper Newport Bay

Section IV Best Management Practices (BMPs)

IV. 1 Project Performance Criteria

Describe project performance criteria. Several steps must be followed in order to determine what performance criteria will apply to a project. These steps include:

- If the project has an approved WIHMP or equivalent, then any watershed specific criteria must be used and the project can evaluate participation in the approved regional or sub-regional opportunities. (Please ask your assigned planner or plan checker regarding whether your project is part of an approved WIHMP or equivalent.)
- Determine applicable hydromodification control performance criteria. *Refer to Section 7.II-2.4.2.2 of the Model WQMP.*
- Determine applicable LID performance criteria. *Refer to Section 7.II-2.4.3 of the Model WQMP.*
- Determine applicable treatment control BMP performance criteria. *Refer to Section 7.II-*3.2.2 *of the Model WQMP.*
- Calculate the LID design storm capture volume for the project. *Refer to Section 7.II-2.4.3 of the Model WQMP.*

(NOC Permit Area only) Is there an approved WIHMP or equivalent for the project area that includes more stringent LID feasibility criteria or if there are opportunities identified for implementing LID on regional or sub-regional basis?	YES ☐	NO ☒
If yes, describe WIHMP feasibility criteria or regional/sub-regional LID opportunities.		

Project Performance Criteria	
If HCOC exists, list applicable hydromodification control performance criteria (Section 7.II-2.4.2.2 in MWQMP)	2-YR Post Development Volume < 2-YR Pre Development (See HCOC Calculations)
List applicable LID performance criteria (Section 7.II-2.4.3 from MWQMP)	Infiltrate 85th percentile, 24-hr storm (0.75 IN)
List applicable treatment control BMP performance criteria (Section 7.II-3.2.2 from MWQMP)	
Calculate LID design storm capture volume for Project.	DCV (Sub-Basin P-1) = C x A x d x 43,560 sf/ac x 1/12 in/ft Where C = (.75 x imp + 0.15) = .75 x 0.89 + 0.15 = 0.82 A = 1.23 acres D = 0.75 (Figure XVI-1) DCV = 0.82 x 1.23 x 0.75 x 43,560 x 1/12 = 2,746 CF

IV.2. Site Design and Drainage

Describe site design and drainage including

- A narrative of site design practices utilized or rationale for not using practices;
- A narrative of how site is designed to allow BMPs to be incorporated to the MEP
- A table of DMA characteristics and list of LID BMPs proposed in each DMA.
- Reference to the WQMP "BMP Exhibit."
- Calculation of Design Capture Volume (DCV) for each drainage area.
- A listing of GIS coordinates for LID and Treatment Control BMPs.

Refer to Section 2.4.2 in the Technical Guidance Document (TGD).

Existing drainage patterns and time of concentration have been preserved.

Landscaping has been added to the maximum extent practicable.

Runoff from all of the proposed area to be improved will be infiltrated.

IV.3 LID BMP Selection and Project Conformance Analysis

Each sub-section below documents that the proposed design features conform to the applicable project performance criteria via check boxes, tables, calculations, narratives, and/or references to worksheets. *Refer to Section 2.4.2.3 in the Technical Guidance Document (TGD) for selecting LID BMPs and Section 2.4.3 in the Technical Guidance Document (TGD) for conducting conformance analysis with project performance criteria.*

IV.3.1 Hydrologic Source Controls (HSCs)

If required HSCs are included, fill out applicable check box forms. If the retention criteria are otherwise met with other LID BMPs, include a statement indicating HSCs not required.

Name	Included?
Localized on-lot infiltration	☐
Impervious area dispersion (e.g. roof top disconnection)	☐
Street trees (canopy interception)	☐
Residential rain barrels (not actively managed)	☐
Green roofs/Brown roofs	☐
Blue roofs	☐
Impervious area reduction (e.g. permeable pavers, site design)	☐
Other:	☐
Other:	☐
Other:	☐
Other:	☐
Other:	☐
Other:	☐
Other:	☐
Other:	☐

HSCs Not Required

IV.3.2 Infiltration BMPs

Identify infiltration BMPs to be used in project. If design volume cannot be met, state why.

Name	Included?
Bioretention without underdrains	☐
Rain gardens	☐
Porous landscaping	☐
Infiltration planters	☐
Retention swales	☐
Infiltration trenches	☐
Infiltration basins	☐
Drywells	☐
Subsurface infiltration galleries	☒
French drains	☐
Permeable asphalt	☐
Permeable concrete	☐
Permeable concrete pavers	☐
Other:	☐
Other:	☐

Show calculations below to demonstrate if the LID Design Strom Capture Volume can be met with infiltration BMPs. If not, document how much can be met with infiltration and document why it is not feasible to meet the full volume with infiltration BMPs.

Sub-basin P-1 Underground Retention Basin Sizing

DCV = 2,746 CF

Retention Basin (Stormtech MC-3500 Chambers, 175 CF/chamber) = 2,746/175 = 16 chambers

Amin (Worksheet B) = 766 SF

Kdesign (Worksheet H) = 1.8 in/hr

Drawdown Time – Vol/Infiltration Rate = 2,746 CF/ (766 SF * 1.8 IN/HR/12 IN) = 24 HR

IV.3.3 Evapotranspiration, Rainwater Harvesting BMPs

If the full Design Storm Capture Volume cannot be met with infiltration BMPs, describe any evapotranspiration and/or rainwater harvesting BMPs included.

Name	Included?
All HSCs; *See Section IV.3.1*	☐
Surface-based infiltration BMPs	☐
Biotreatment BMPs	☐
Above-ground cisterns and basins	☐
Underground detention	☐
Other:	☐
Other:	☐
Other:	☐

Show calculations below to demonstrate if the LID Design Storm Capture Volume can be met with evapotranspiration and/or rainwater harvesting BMPs in combination with infiltration BMPs. If not, document below how much can be met with either infiltration BMPs, evapotranspiration, rainwater harvesting BMPs, or a combination, and document why it is not feasible to meet the full volume with these BMP categories.

N/A

IV.3.4 Biotreatment BMPs

If the full Design Storm Capture Volume cannot be met with infiltration BMPs, and/or evapotranspiration and rainwater harvesting BMPs, describe biotreatment BMPs included. Include sections for selection, suitability, sizing, and infeasibility, as applicable.

Name	Included?
Bioretention with underdrains	☐
Stormwater planter boxes with underdrains	☐
Rain gardens with underdrains	☐
Constructed wetlands	☐
Vegetated swales	☐
Vegetated filter strips	☐
Proprietary vegetated biotreatment systems	☐
Wet extended detention basin	☐
Dry extended detention basins	☐
Other:	☐
Other:	☐

Show calculations below to demonstrate if the LID Design Storm Capture Volume can be met with infiltration, evapotranspiration, rainwater harvesting and/or biotreatment BMPs. If not, document how much can be met with either infiltration BMPs, evapotranspiration, rainwater harvesting BMPs, or a combination, and document why it is not feasible to meet the full volume with these BMP categories.

N/A

IV.3.5 Hydromodification Control BMPs

Describe hydromodification control BMPs. *See Section 5 of the Technical Guidance Document (TGD).* Include sections for selection, suitability, sizing, and infeasibility, as applicable. Detail compliance with Prior Conditions of Approval (if applicable).

Hydromodification Control BMPs	
BMP Name	**BMP Description**

IV.3.6 Regional/Sub-Regional LID BMPs

Describe regional/sub-regional LID BMPs in which the project will participate. *Refer to Section 7.II-2.4.3.2 of the Model WQMP*.

Regional/Sub-Regional LID BMPs
Not applicable. On-Site Infiltration will be utilized for water quality treatment.

IV.3.7 Treatment Control BMPs

Treatment control BMPs can only be considered if the project conformance analysis indicates that it is not feasible to retain the full design capture volume with LID BMPs. Describe treatment control BMPs including sections for selection, sizing, and infeasibility, as applicable.

Treatment Control BMPs	
BMP Name	**BMP Description**

IV.3.8 Non-structural Source Control BMPs

Fill out non-structural source control check box forms or provide a brief narrative explaining if non-structural source controls were not used.

Non-Structural Source Control BMPs				
Identifier	**Name**	**Check One**		**If not applicable, state brief reason**
		Included	**Not Applicable**	
N1	Education for Property Owners, Tenants and Occupants	☒	☐	
N2	Activity Restrictions	☒	☐	
N3	Common Area Landscape Management	☒	☐	
N4	BMP Maintenance	☒	☐	
N5	Title 22 CCR Compliance (How development will comply)	☐	☒	No hazardous materials
N6	Local Industrial Permit Compliance	☐	☒	Not an industrial facility
N7	Spill Contingency Plan	☐	☒	No hazardous materials
N8	Underground Storage Tank Compliance	☐	☒	No underground storage tank
N9	Hazardous Materials Disclosure Compliance	☐	☒	No hazardous materials
N10	Uniform Fire Code Implementation	☐	☒	No hazardous materials
N11	Common Area Litter Control	☒	☐	
N12	Employee Training	☒	☐	
N13	Housekeeping of Loading Docks	☐	☒	No loading docks
N14	Common Area Catch Basin Inspection	☒	☐	
N15	Street Sweeping Private Streets and Parking Lots	☒	☐	
N16	Retail Gasoline Outlets	☐	☒	No retail gasoline

IV.3.9 Structural Source Control BMPs

Fill out structural source control check box forms or provide a brief narrative explaining if structural source controls were not used.

Structural Source Control BMPs				
Identifier	**Name**	**Check One**		**If not applicable, state brief reason**
		Included	**Not Applicable**	
S1	Provide storm drain system stenciling and signage	☒	☐	
S2	Design and construct outdoor material storage areas to reduce pollution introduction	☐	☒	No outdoor storage areas are proposed
S3	Design and construct trash and waste storage areas to reduce pollution introduction	☒	☐	
S4	Use efficient irrigation systems & landscape design, water conservation, smart controllers, and source control	☒	☐	
S5	Protect slopes and channels and provide energy dissipation	☐	☒	There are no slopes or channels on the site
	Incorporate requirements applicable to individual priority project categories (from SDRWQCB NPDES Permit)	☐	☐	
S6	Dock areas	☐	☒	No dock areas proposed
S7	Maintenance bays	☐	☒	No maintenance bays proposed
S8	Vehicle wash areas	☐	☒	No vehicle wash areas proposed
S9	Outdoor processing areas	☐	☒	No outdoor processing areas proposed
S10	Equipment wash areas	☐	☒	No equipment wash areas proposed
S11	Fueling areas	☐	☒	No Fueling areas proposed
S12	Hillside landscaping	☐	☒	There are no hillsides on the site
S13	Wash water control for food preparation areas	☐	☒	No proposed food prep areas
S14	Community car wash racks	☐	☒	No proposed car washes

IV.4 Alternative Compliance Plan (If Applicable)

Describe an alternative compliance plan (if applicable). Include alternative compliance obligations (i.e., gallons, pounds) and describe proposed alternative compliance measures. *Refer to Section 7.II 3.0 in the WQMP.*

IV.4.1 Water Quality Credits

Determine if water quality credits are applicable for the project. *Refer to Section 3.1 of the Model WQMP for description of credits and Appendix VI of the Technical Guidance Document (TGD) for calculation methods for applying water quality credits.*

<table>
<tr><th colspan="5">Description of Proposed Project</th></tr>
<tr><td colspan="5">Project Types that Qualify for Water Quality Credits (Select all that apply):</td></tr>
<tr><td colspan="2">☐Redevelopment projects that reduce the overall impervious footprint of the project site.</td><td colspan="2">☐Brownfield redevelopment, meaning redevelopment, expansion, or reuse of real property which may be complicated by the presence or potential presence of hazardous substances, pollutants or contaminants, and which have the potential to contribute to adverse ground or surface WQ if not redeveloped.</td><td>☐ Higher density development projects which include two distinct categories (credits can only be taken for one category): those with more than seven units per acre of development (lower credit allowance); vertical density developments, for example, those with a Floor to Area Ratio (FAR) of 2 or those having more than 18 units per acre (greater credit allowance).</td></tr>
<tr><td colspan="2">☐ Mixed use development, such as a combination of residential, commercial, industrial, office, institutional, or other land uses which incorporate design principles that can demonstrate environmental benefits that would not be realized through single use projects (e.g. reduced vehicle trip traffic with the potential to reduce sources of water or air pollution).</td><td colspan="2">☐ Transit-oriented developments, such as a mixed use residential or commercial area designed to maximize access to public transportation; similar to above criterion, but where the development center is within one half mile of a mass transit center (e.g. bus, rail, light rail or commuter train station). Such projects would not be able to take credit for both categories, but may have greater credit assigned</td><td>☐ Redevelopment projects in an established historic district, historic preservation area, or similar significant city area including core City Center areas (to be defined through mapping).</td></tr>
<tr><td>☐Developments with dedication of undeveloped portions to parks, preservation areas and other pervious uses.</td><td>☐ Developments in a city center area.</td><td>☐ Developments in historic districts or historic preservation areas.</td><td>☐ Live-work developments, a variety of developments designed to support residential and vocational needs together – similar to criteria to mixed use development; would not be able to take credit for both categories.</td><td>☐In-fill projects, the conversion of empty lots and other underused spaces into more beneficially used spaces, such as residential or commercial areas.</td></tr>
</table>

Calculation of Water Quality Credits (if applicable)	Not applicable. Water quality credits will not be applied for the project. LID BMPs will be utilized for water quality treatment on-site in accordance with the MS4 Permit hierarchy identified at the beginning of this Section.

IV.4.2 Alternative Compliance Plan Information

Describe an alternative compliance plan (if applicable). Include alternative compliance obligations (i.e., gallons, pounds) and describe proposed alternative compliance measures. *Refer to Section 7.II 3.0 in the Model WQMP.*

Not Applicable. LID BMPs (infiltration) will be utilized for water quality treatment on-site in accordance with the MS4 Permit hierarchy identified at the beginning of this Section.

Section V Inspection/Maintenance Responsibility for BMPs

Fill out information in table below. Prepare and attach an Operation and Maintenance Plan. Identify the funding mechanism through which BMPs will be maintained. Inspection and maintenance records must be kept for a minimum of five years for inspection by the regulatory agencies. *Refer to Section 7.II 4.0 in the Model WQMP.*

BMP Inspection/Maintenance			
BMP	**Reponsible Party(s)**	**Inspection/ Maintenance Activities Required**	**Minimum Frequency of Activities**
INF-7 Underground Retention Basin 1	Owner	The system shall be inspected at a minimum of once every six months, prior to the start of the rainy season (October 1) each year, and after major storm events.	Inspected twice per year and maintained as needed
CDS UNIT	Owner	The system shall be inspected at a minimum of once every six months, prior to the start of the rainy season (October 1) each year, and after major storm events.	Inspected twice per year and maintained as needed

Section VI BMP Exhibit (Site Plan)

VI.1 BMP Exhibit (Site Plan)

Include a BMP Exhibit (Site Plan), at a size no less than 24" by 36," which includes the following minimum information:

- Insert in the title block (lower right hand corner) of BMP Exhibit: the WQMP Number (assigned by staff) and the grading/building or Planning Application permit numbers
- Project location (address, tract/lot number(s), etc.)
- Site boundary
- Land uses and land covers, as applicable
- Suitability/feasibility constraints
- Structural BMP locations
- Drainage delineations and flow information
- Delineate the area being treated by each structural BMP
- GIS coordinates for LID and Treatment Control BMPs
- Drainage connections
- BMP details
- Preparer name and stamp

Please do not include any areas outside of the project area or any information not related to drainage or water quality. The approved BMP Exhibit (Site Plan) shall be submitted as a plan sheet on all grading and building plan sets submitted for plan check review and approval. The BMP Exhibit shall be at the same size as the rest of the plan sheets in the submittal and shall have an approval stamp and signature prior to plan check submittal.

VI.2 Submittal and Recordation of Water Quality Management Plan

Following approval of the Final Project-Specific WQMP, three copies of the approved WQMP (including BMP Exhibit, Operations and Maintenance (O&M) Plan, and Appendices) shall be submitted. In addition, these documents shall be submitted in a PDF format.

Each approved WQMP (including BMP Exhibit, Operations and Maintenance (O&M) Plan, and Appendices) shall be recorded in the Orange County Clerk-Recorder's Office, prior to close-out of grading and/or building permit. Educational Materials are not required to be included.

Section VII Educational Materials

Refer to the Orange County Stormwater Program (ocwatersheds.com) for a library of materials available. Please only attach the educational materials specifically applicable to this project. Other materials specific to the project may be included as well and must be attached.

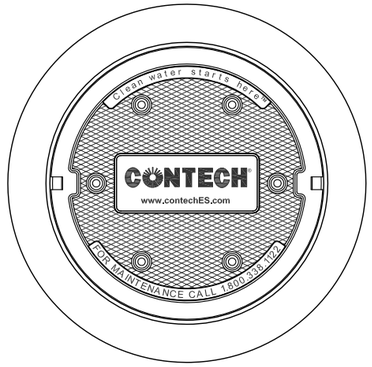
CDS2015-4-C DESIGN NOTES

THE STANDARD CDS2015-4-C CONFIGURATION IS SHOWN. ALTERNATE CONFIGURATIONS ARE AVAILABLE AND ARE LISTED BELOW. SOME CONFIGURATIONS MAY BE COMBINED TO SUIT SITE REQUIREMENTS.

CONFIGURATION DESCRIPTION
GRATED INLET ONLY (NO INLET PIPE)
GRATED INLET WITH INLET PIPE OR PIPES
CURB INLET ONLY (NO INLET PIPE)
CURB INLET WITH INLET PIPE OR PIPES
SEPARATE OIL BAFFLE (SINGLE INLET PIPE REQUIRED FOR THIS CONFIGURATION)
SEDIMENT WEIR FOR NJDEP / NJCAT CONFORMING UNITS



FRAME AND COVER
(DIAMETER VARIES)
N.T.S.

SITE SPECIFIC DATA REQUIREMENTS

STRUCTURE ID	
WATER QUALITY FLOW RATE (CFS OR L/s)	*
PEAK FLOW RATE (CFS OR L/s)	*
RETURN PERIOD OF PEAK FLOW (YRS)	*
SCREEN APERTURE (2400 OR 4700)	*

PIPE DATA:	I.E.	MATERIAL	DIAMETER
INLET PIPE 1	*	*	*
INLET PIPE 2	*	*	*
OUTLET PIPE	*	*	*

RIM ELEVATION	*

ANTI-FLOTATION BALLAST	WIDTH	HEIGHT
	*	*

NOTES/SPECIAL REQUIREMENTS:

* PER ENGINEER OF RECORD

GENERAL NOTES
1. CONTECH TO PROVIDE ALL MATERIALS UNLESS NOTED OTHERWISE.
2. DIMENSIONS MARKED WITH ( ) ARE REFERENCE DIMENSIONS. ACTUAL DIMENSIONS MAY VARY.
3. FOR FABRICATION DRAWINGS WITH DETAILED STRUCTURE DIMENSIONS AND WEIGHTS, PLEASE CONTACT YOUR CONTECH ENGINEERED SOLUTIONS LLC REPRESENTATIVE. www.contechES.com
4. CDS WATER QUALITY STRUCTURE SHALL BE IN ACCORDANCE WITH ALL DESIGN DATA AND INFORMATION CONTAINED IN THIS DRAWING.
5. STRUCTURE SHALL MEET AASHTO HS20 AND CASTINGS SHALL MEET HS20 (AASHTO M 306) LOAD RATING, ASSUMING GROUNDWATER ELEVATION AT, OR BELOW, THE OUTLET PIPE INVERT ELEVATION. ENGINEER OF RECORD TO CONFIRM ACTUAL GROUNDWATER ELEVATION.
6. PVC HYDRAULIC SHEAR PLATE IS PLACED ON SHELF AT BOTTOM OF SCREEN CYLINDER. REMOVE AND REPLACE AS NECESSARY DURING MAINTENANCE CLEANING.

INSTALLATION NOTES
A. ANY SUB-BASE, BACKFILL DEPTH, AND/OR ANTI-FLOTATION PROVISIONS ARE SITE-SPECIFIC DESIGN CONSIDERATIONS AND SHALL BE SPECIFIED BY ENGINEER OF RECORD.
B. CONTRACTOR TO PROVIDE EQUIPMENT WITH SUFFICIENT LIFTING AND REACH CAPACITY TO LIFT AND SET THE CDS MANHOLE STRUCTURE (LIFTING CLUTCHES PROVIDED).
C. CONTRACTOR TO ADD JOINT SEALANT BETWEEN ALL STRUCTURE SECTIONS, AND ASSEMBLE STRUCTURE.
D. CONTRACTOR TO PROVIDE, INSTALL, AND GROUT PIPES. MATCH PIPE INVERTS WITH ELEVATIONS SHOWN.
E. CONTRACTOR TO TAKE APPROPRIATE MEASURES TO ASSURE UNIT IS WATER TIGHT, HOLDING WATER TO FLOWLINE INVERT MINIMUM. IT IS SUGGESTED THAT ALL JOINTS BELOW PIPE INVERTS ARE GROUTED.

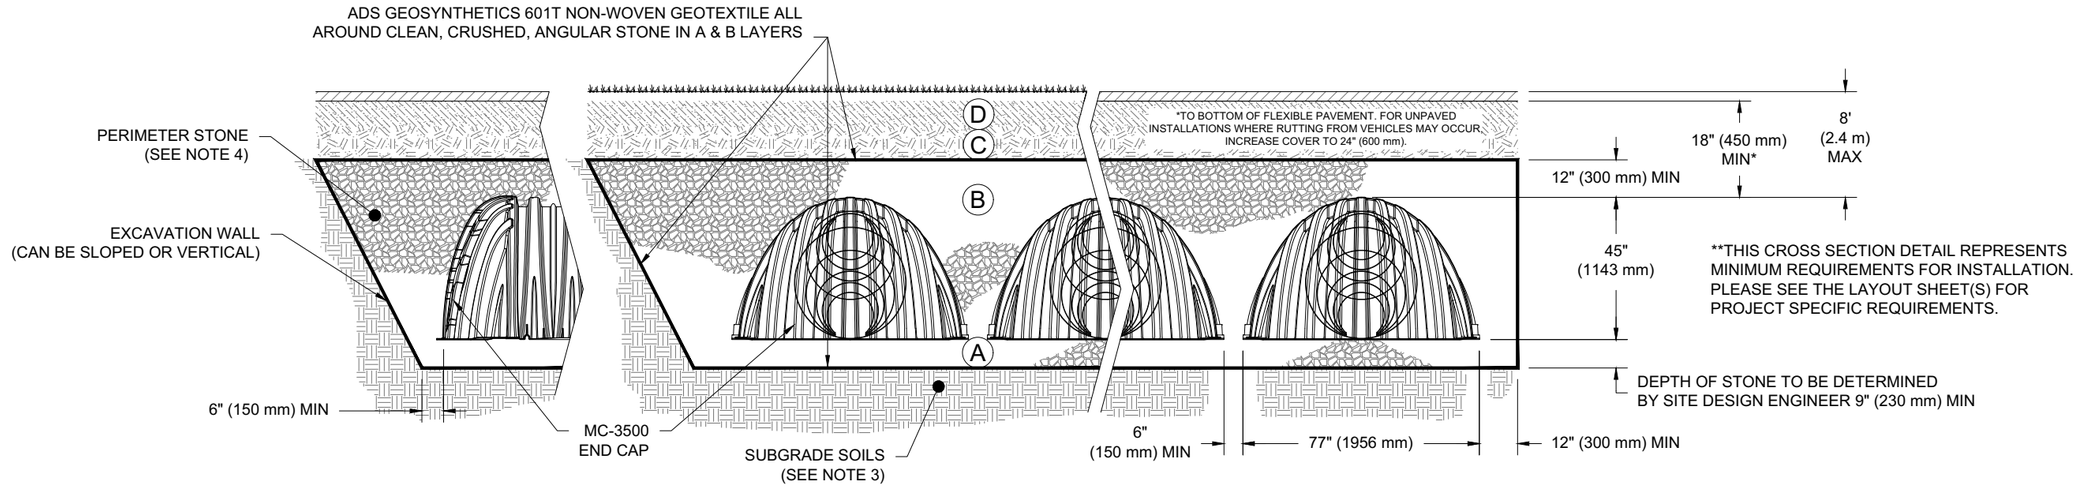
ACCEPTABLE FILL MATERIALS: STORMTECH MC-3500 CHAMBER SYSTEMS

MATERIAL LOCATION		DESCRIPTION	AASHTO MATERIAL CLASSIFICATIONS	COMPACTION / DENSITY REQUIREMENT
D	**FINAL FILL:** FILL MATERIAL FOR LAYER 'D' STARTS FROM THE TOP OF THE 'C' LAYER TO THE BOTTOM OF FLEXIBLE PAVEMENT OR UNPAVED FINISHED GRADE ABOVE. NOTE THAT PAVEMENT SUBBASE MAY BE PART OF THE 'D' LAYER	ANY SOIL/ROCK MATERIALS, NATIVE SOILS, OR PER ENGINEER'S PLANS. CHECK PLANS FOR PAVEMENT SUBGRADE REQUIREMENTS.	N/A	PREPARE PER SITE DESIGN ENGINEER'S PLANS. PAVED INSTALLATIONS MAY HAVE STRINGENT MATERIAL AND PREPARATION REQUIREMENTS.
C	**INITIAL FILL:** FILL MATERIAL FOR LAYER 'C' STARTS FROM THE TOP OF THE EMBEDMENT STONE ('B' LAYER) TO 18" (450 mm) ABOVE THE TOP OF THE CHAMBER. NOTE THAT PAVEMENT SUBBASE MAY BE A PART OF THE 'C' LAYER.	GRANULAR WELL-GRADED SOIL/AGGREGATE MIXTURES, <35% FINES OR PROCESSED AGGREGATE. MOST PAVEMENT SUBBASE MATERIALS CAN BE USED IN LIEU OF THIS LAYER.	AASHTO M145[1] A-1, A-2-4, A-3 OR AASHTO M43[1] 3, 357, 4, 467, 5, 56, 57, 6, 67, 68, 7, 78, 8, 89, 9, 10	BEGIN COMPACTIONS AFTER 18" (450 mm) OF MATERIAL OVER THE CHAMBERS IS REACHED. COMPACT ADDITIONAL LAYERS IN 12" (300 mm) MAX LIFTS TO A MIN. 95% PROCTOR DENSITY FOR WELL GRADED MATERIAL AND 95% RELATIVE DENSITY FOR PROCESSED AGGREGATE MATERIALS.
B	**EMBEDMENT STONE:** FILL SURROUNDING THE CHAMBERS FROM THE FOUNDATION STONE ('A' LAYER) TO THE 'C' LAYER ABOVE.	CLEAN, CRUSHED, ANGULAR STONE OR RECYCLED CONCRETE[5]	AASHTO M43[1] 3, 357, 4, 467, 5, 56, 57	NO COMPACTION REQUIRED.
A	**FOUNDATION STONE:** FILL BELOW CHAMBERS FROM THE SUBGRADE UP TO THE FOOT (BOTTOM) OF THE CHAMBER.	CLEAN, CRUSHED, ANGULAR STONE OR RECYCLED CONCRETE[5]	AASHTO M43[1] 3, 357, 4, 467, 5, 56, 57	PLATE COMPACT OR ROLL TO ACHIEVE A FLAT SURFACE.[2,3]

PLEASE NOTE:
1. THE LISTED AASHTO DESIGNATIONS ARE FOR GRADATIONS ONLY. THE STONE MUST ALSO BE CLEAN, CRUSHED, ANGULAR. FOR EXAMPLE, A SPECIFICATION FOR #4 STONE WOULD STATE: "CLEAN, CRUSHED, ANGULAR NO. 4 (AASHTO M43) STONE".
2. STORMTECH COMPACTION REQUIREMENTS ARE MET FOR 'A' LOCATION MATERIALS WHEN PLACED AND COMPACTED IN 9" (230 mm) (MAX) LIFTS USING TWO FULL COVERAGES WITH A VIBRATORY COMPACTOR.
3. WHERE INFILTRATION SURFACES MAY BE COMPROMISED BY COMPACTION, FOR STANDARD DESIGN LOAD CONDITIONS, A FLAT SURFACE MAY BE ACHIEVED BY RAKING OR DRAGGING WITHOUT COMPACTION EQUIPMENT. FOR SPECIAL LOAD DESIGNS, CONTACT STORMTECH FOR COMPACTION REQUIREMENTS.
4. ONCE LAYER 'C' IS PLACED, ANY SOIL/MATERIAL CAN BE PLACED IN LAYER 'D' UP TO THE FINISHED GRADE. MOST PAVEMENT SUBBASE SOILS CAN BE USED TO REPLACE THE MATERIAL REQUIREMENTS OF LAYER 'C' OR 'D' AT THE SITE DESIGN ENGINEER'S DISCRETION.
5. WHERE RECYCLED CONCRETE AGGREGATE IS USED IN LAYERS 'A' OR 'B' THE MATERIAL SHOULD ALSO MEET THE ACCEPTABILITY CRITERIA OUTLINED IN TECHNICAL NOTE 6.20 "RECYCLED CONCRETE STRUCTURAL BACKFILL".



NOTES:

1. CHAMBERS SHALL MEET THE REQUIREMENTS OF ASTM F2418, "STANDARD SPECIFICATION FOR POLYPROPYLENE (PP) CORRUGATED WALL STORMWATER COLLECTION CHAMBERS" CHAMBER CLASSIFICATION 45x76 DESIGNATION SS.
2. MC-3500 CHAMBERS SHALL BE DESIGNED IN ACCORDANCE WITH ASTM F2787 "STANDARD PRACTICE FOR STRUCTURAL DESIGN OF THERMOPLASTIC CORRUGATED WALL STORMWATER COLLECTION CHAMBERS".
3. THE SITE DESIGN ENGINEER IS RESPONSIBLE FOR ASSESSING THE BEARING RESISTANCE (ALLOWABLE BEARING CAPACITY) OF THE SUBGRADE SOILS AND THE DEPTH OF FOUNDATION STONE WITH CONSIDERATION FOR THE RANGE OF EXPECTED SOIL MOISTURE CONDITIONS.
4. PERIMETER STONE MUST BE EXTENDED HORIZONTALLY TO THE EXCAVATION WALL FOR BOTH VERTICAL AND SLOPED EXCAVATION WALLS.
5. REQUIREMENTS FOR HANDLING AND INSTALLATION:
   - TO MAINTAIN THE WIDTH OF CHAMBERS DURING SHIPPING AND HANDLING, CHAMBERS SHALL HAVE INTEGRAL, INTERLOCKING STACKING LUGS.
   - TO ENSURE A SECURE JOINT DURING INSTALLATION AND BACKFILL, THE HEIGHT OF THE CHAMBER JOINT SHALL NOT BE LESS THAN 3".
   - TO ENSURE THE INTEGRITY OF THE ARCH SHAPE DURING INSTALLATION, a) THE ARCH STIFFNESS CONSTANT AS DEFINED IN SECTION 6.2.8 OF ASTM F2418 SHALL BE GREATER THAN OR EQUAL TO 500 LBS/FT/%. AND b) TO RESIST CHAMBER DEFORMATION DURING INSTALLATION AT ELEVATED TEMPERATURES (ABOVE 73° F / 23° C), CHAMBERS SHALL BE PRODUCED FROM REFLECTIVE GOLD OR YELLOW COLORS.

PLATE B

Worksheet B: Simple Design Capture Volume Sizing Method

Step 1: Determine the design capture storm depth used for calculating volume				
1	Enter design capture storm depth from Figure III.1, *d* (inches)	d=	0.75	inches
2	Enter the effect of provided HSCs, d_{HSC} (inches) (Worksheet A)	d_{HSC}=	0	inches
3	Calculate the remainder of the design capture storm depth, $d_{remainder}$ (inches) (Line 1 – Line 2)	$d_{remainder}$=	0.75	inches
Step 2: Calculate the DCV				
1	Enter Project area tributary to BMP (s), *A* (acres)	A=	1.23	acres
2	Enter Project Imperviousness, *imp* (unitless)	imp=	0.89	
3	Calculate runoff coefficient, *C= (0.75 x imp) + 0.15*	C=	0.82	
4	Calculate runoff volume, V_{design}= *(C x* $d_{remainder}$ *x A x 43560 x (1/12))*	V_{design}=	2,746	cu-ft
Step 3: Design BMPs to ensure full retention of the DCV				
Step 3a: Determine design infiltration rate				
1	Enter measured infiltration rate, $K_{observed}$[1] (in/hr) (**Appendix VII**)	$K_{observed}$=	5.3	In/hr
2	Enter combined safety factor from Worksheet H, S_{total} (unitless)	S_{total}=	3.0	
3	Calculate design infiltration rate, $K_{design} = K_{observed} / S_{total}$	K_{design}=	1.8	In/hr
Step 3b: Determine minimum BMP footprint				
4	Enter drawdown time, *T* (max 48 hours)	T=	24	Hours
5	Calculate max retention depth that can be drawn down within the drawdown time (feet), $D_{max} = K_{design} \times T \times (1/12)$	D_{max}=	3.6	feet
6	Calculate minimum area required for BMP (sq-ft), $A_{min} = V_{design} / d_{max}$	A_{min}=	763	sq-ft

[1] $K_{observed}$ is the vertical infiltration measured in the field, before applying a factor of safety. If field testing measures a rate that is different than the vertical infiltration rate (for example, three-dimensional borehole percolation rate), then this rate must be adjusted by an acceptable method (for example, Porchet method) to yield the field estimate of vertical infiltration rate, $K_{observed}$. See Appendix VII.

Worksheet H: Factor of Safety and Design Infiltration Rate and Worksheet

Factor Category		Factor Description	Assigned Weight (w)	Factor Value (v)	Product (p) p = w x v
A	Suitability Assessment	Soil assessment methods	0.25	2	0.5
		Predominant soil texture	0.25	2	0.5
		Site soil variability	0.25	1	0.25
		Depth to groundwater / impervious layer	0.25	1	0.25
		Suitability Assessment Safety Factor, $S_A = \Sigma p$			1.5
B	Design	Tributary area size	0.25	1	0.25
		Level of pretreatment/ expected sediment loads	0.25	1	0.25
		Redundancy	0.25	3	0.75
		Compaction during construction	0.25	1	0.25
		Design Safety Factor, $S_B = \Sigma p$			1.5
Combined Safety Factor, $S_{TOT} = S_A \times S_B$					3.0
Measured Infiltration Rate, inch/hr, K_M (corrected for test-specific bias)					5.3
Design Infiltration Rate, in/hr, $K_{DESIGN} = S_{TOT} \times K_M$					1.8

Supporting Data

Briefly describe infiltration test and provide reference to test forms:

TWO 8" DIAMETER INFILTRATION TEST HOLES WERE DRILLED AND TESTED BY THE GEOTECHNICAL ENGINEER (SEE GEOTECHNICAL REPORT FOR TEST DATA)

Note: The minimum combined adjustment factor shall not be less than 2.0 and the maximum combined adjustment factor shall not exceed 9.0.

Worksheet 1: Infiltration Feasibility Categorization

Categorization of Infiltration Feasibility Condition			*Page 1 of 5*
Part 1: Physical Limitations of Infiltration Based on the criteria for physical limitations of infiltration described in Section 4.2.2.2, what level of physical feasibility of infiltration is the maximum that the BMP location will support?			
	Physical Infiltration Feasibility Category	**Mark applicable category**	**Next step**
1	Full Infiltration of the DCV	X	Continue to Part 2
	Biotreatment with Partial Infiltration		Continue to Part 3
	Biotreatment with No Infiltration		Select and Utilize Biotreatment without Infiltration
Provide summary of basis: Summarize findings of studies, provide reference to studies, calculations, maps, data sources, etc. Provide narrative discussion of study/data source applicability.			

Categorization of Infiltration Feasibility Condition		***Page 2 of 5***	
Part 2: Risks Limiting Full Infiltration of the DCV –*Would infiltration of the full DCV introduce risks of undesirable consequences that cannot reasonably be mitigated?*		***Yes***	***No***
2	**Would infiltration of the DCV pose significant risk for groundwater related concerns?** Use criteria described in Section 4.2.2.3 and results from **Worksheet 2** (Appendix C) to describe groundwater-related infiltration feasibility criteria.		X
Provide basis: Historic groundwater depth 40 feet. Summarize findings of studies provide reference to studies, calculations, maps, data sources, etc. Provide narrative discussion of study/data source applicability.			
3	**Would infiltration of the full DCV pose significant risk of increasing risk of geotechnical hazards that cannot be mitigated to an acceptable level**? Use criteria described in Section 4.2.2.4.		X
Provide basis: No associated risks with infiltration of stormwater for site. Summarize findings of studies provide reference to studies, calculations, maps, data sources, etc. Provide narrative discussion of study/data source applicability.			
4	Would infiltration of the DCV cause an increase in groundwater flow or decrease in surface runoff over predevelopment conditions that would cause **impairment to downstream beneficial uses, such as change of seasonality of ephemeral washes or increased discharge of contaminated groundwater to surface waters?** Use criteria in Section 4.2.2.5		X
Provide basis: Historic Groundwater is 40 feet, there are no adjacent streams. Summarize findings of studies provide reference to studies, calculations, maps, data sources, etc. Provide narrative discussion of study/data source applicability.			

Categorization of Infiltration Feasibility Condition		*Page 3 of 5*	
***Part 2 (continued): Risks Limiting Full Infiltration of the DCV –** Would infiltration of the full DCV introduce risks of undesirable consequences that cannot reasonably be mitigated?*		***Yes***	***No***
5	Is there substantial evidence that infiltration of the DCV would **result in a significant increase in I&I to the sanitary sewer** that cannot be sufficiently mitigated?		X
Provide basis: The nearest sewer main is 350 feet north of the proposed underground infiltration basin. Summarize findings of studies provide reference to studies, calculations, maps, data sources, etc. Provide narrative discussion of study/data source applicability.			
6	Would infiltration of the DCV **violate downstream water rights**?		X
Provide basis: No water rights are associated with the property. Summarize findings of studies provide reference to studies, calculations, maps, data sources, etc. Provide narrative discussion of study/data source applicability.			
Part 2 Result	If the answer to all questions 2-6 are “No”, then the DMA is categorized as “Full Infiltration” for the purposes of LID BMP type selection. Describe finding. At the Preliminary/Conceptual WQMP phase, describe the additional design-phase testing required to confirm this determination and identify contingencies for final design. At the Final Project WQMP phase, identify any required construction-phase testing and identify the design contingencies that should result based on construction-phase testing. If the answer to any of questions 2-6 is “Yes” then the site cannot be categorized as “Full Infiltration”. Continue to Part 3: Partial Infiltration Feasibility	Full Infiltration – Infiltration testing included in geotechnical report.	

Categorization of Infiltration Feasibility Condition		***Page 4 of 5***	
Part 3: Partial Infiltration Feasibility Criteria –*Would infiltration of any appreciable volume of stormwater result in risks of undesirable consequences that cannot reasonably be mitigated?*		***Yes***	***No***
8	**Would use of biotreatment BMPs with partial infiltration pose significant risk for groundwater related concerns?** Refer to criteria in Section 4.2.2.3 and Worksheet 1 (Appendix C) for guidance on groundwater-related infiltration feasibility criteria.		
Provide basis: Summarize findings of studies provide reference to studies, calculations, maps, data sources, etc. Provide narrative discussion of study/data source applicability.			
9	**Would the use of biotreatment BMPs with partial infiltration pose elevated risks of geotechnical hazards that cannot be mitigated to an acceptable level**? Refer to Section 4.2.2.4.		
Provide basis: Summarize findings of studies provide reference to studies, calculations, maps, data sources, etc. Provide narrative discussion of study/data source applicability.			
10	**Would the use of biotreatment BMPs with partial infiltration elevate risks or introduced conflicts related to groundwater balance, inflow and infiltration, or water rights?** Refer to Section 4.2.2.5. Note: this is uncommon and must be supported by site-specific analysis if it is used as a basis to reject biotreatment with partial infiltration.		
Provide basis: Summarize findings of studies provide reference to studies, calculations, maps, data sources, etc. Provide narrative discussion of study/data source applicability.			

Categorization of Infiltration Feasibility Condition		*Page 5 of 5*
Part 3 Result	If the answer to all questions 8-10 are “No”, then the DMA is categorized as “Biotreatment with Partial Infiltration” for the purposes of LID BMP type selection. If the answer to any of questions 8-10 is “Yes” then the site is categorized as “Biotreatment with No Infiltration” for the purposes of LID BMP type selection.	

STRAND ENGINEERING, INC.

Date:	06.20.2024		
Project Name:	ESS Santa Ana – 1030 E. 4th Street	Project #:	1047
Staff:	WFS	Project Mgr:	WFS
Subject:	**HCOC Calculations**		

HCOC Calculation

2-Yr (24 HR) Depth $d2 = 2.05"$ $(OCHM\ Table\ B.1)$
Drainage Area $A = 53{,}583\ sf = 1.23\ acres$

Existing Imperviousness 38,099/53,583 = 71%
Proposed Imperviousness $47{,}669/53{,}583 = 89\ \%$

Runoff Factor (Existing) $C = (0.75 * imp + 0.15) = 0.68$
Runoff Factor (Proposed) $C = (0.75 * imp + 0.15) = 0.82$

$V2 = C \times A \times d/12$

$V2(Exsiting) = 0.68 \times 1.23 \times 2.05/12 \times 43{,}560 = 6{,}224$ cf
$V2(Proposed) = 0.89 \times 1.23 \times 2.05/12 \times 43{,}560 = 8{,}146$ cf

V(Retention Basin) = 2,746 cf

V2(Proposed) – V(Retention Basin) = 8,146-2,746 = 5,400 cf <V2(Existing)

ATTACHMENT A
EDUCATIONAL MATERIALS

The Ocean Begins at Your Front Door

Follow these simple steps to help reduce water pollution:

Household Activities

- Do not rinse spills with water. Use dry cleanup methods such as applying cat litter or another absorbent material, sweep and dispose of in the trash. Take items such as used or excess batteries, oven cleaners, automotive fluids, painting products and cathode ray tubes, like TVs and computer monitors, to a Household Hazardous Waste Collection Center (HHWCC).
- For a HHWCC near you call (714) 834-6752 or visit www.oclandfills.com.
- Do not hose down your driveway, sidewalk or patio to the street, gutter or storm drain. Sweep up debris and dispose of it in the trash.

Automotive

- Take your vehicle to a commercial car wash whenever possible. If you wash your vehicle at home, choose soaps, cleaners, or detergents labeled non-toxic, phosphate- free or biodegradable. Vegetable and citrus-based products are typically safest for the environment.
- Do not allow washwater from vehicle washing to drain into the street, gutter or storm drain. Excess washwater should be disposed of in the sanitary sewer (through a sink or toilet) or onto an absorbent surface like your lawn.
- Monitor your vehicles for leaks and place a pan under leaks. Keep your vehicles well maintained to stop and prevent leaks.
- Never pour oil or antifreeze in the street, gutter or storm drain. Recycle these substances at a service station, a waste oil collection center or used oil recycling center. For the nearest Used Oil Collection Center call 1-800-CLEANUP or visit www.1800cleanup.org.

Pool Maintenance

- Pool and spa water must be dechlorinated and free of excess acid, alkali or color to be allowed in the street, gutter or storm drain.
- When it is not raining, drain dechlorinated pool and spa water directly into the sanitary sewer.
- Some cities may have ordinances that do not allow pool water to be disposed of in the storm drain. Check with your city.

Landscape and Gardening

- Do not over-water. Water your lawn and garden by hand to control the amount of water you use or set irrigation systems to reflect seasonal water needs. If water flows off your yard onto your driveway or sidewalk, your system is over-watering. Periodically inspect and fix leaks and misdirected sprinklers.
- Do not rake or blow leaves, clippings or pruning waste into the street, gutter or storm drain. Instead, dispose of waste by composting, hauling it to a permitted landfill, or as green waste through your city's recycling program.
- Follow directions on pesticides and fertilizer, (measure, do not estimate amounts) and do not use if rain is predicted within 48 hours.
- Take unwanted pesticides to a HHWCC to be recycled. For locations and hours of HHWCC, call (714) 834-6752 or visit www.oclandfills.com.

Trash

- Place trash and litter that cannot be recycled in securely covered trash cans.
- Whenever possible, buy recycled products.
- Remember: Reduce, Reuse, Recycle.

Pet Care

- Always pick up after your pet. Flush waste down the toilet or dispose of it in the trash. Pet waste, if left outdoors, can wash into the street, gutter or storm drain.
- If possible, bathe your pets indoors. If you must bathe your pet outside, wash it on your lawn or another absorbent/permeable surface to keep the washwater from entering the street, gutter or storm drain.
- Follow directions for use of pet care products and dispose of any unused products at a HHWCC.

Common Pollutants

Home Maintenance

- Detergents, cleaners and solvents
- Oil and latex paint
- Swimming pool chemicals
- Outdoor trash and litter

Lawn and Garden

- Pet and animal waste
- Pesticides
- Clippings, leaves and soil
- Fertilizer

Automobile

- Oil and grease
- Radiator fluids and antifreeze
- Cleaning chemicals
- Brake pad dust

The Ocean Begins at Your Front Door

Never allow pollutants to enter the street, gutter or storm drain!

Did You Know?

- Most people believe that the largest source of water pollution in urban areas comes from specific sources such as factories and sewage treatment plants. In fact, the largest source of water pollution comes from city streets, neighborhoods, construction sites and parking lots. This type of pollution is sometimes called “non-point source” pollution.
- There are two types of non-point source pollution: stormwater and urban runoff pollution.
- Stormwater runoff results from rainfall. When rainstorms cause large volumes of water to rinse the urban landscape, picking up pollutants along the way.
- Urban runoff can happen any time of the year when excessive water use from irrigation, vehicle washing and other sources carries trash, lawn clippings and other urban pollutants into storm drains.

Where Does It Go?

- Anything we use outside homes, vehicles and businesses – like motor oil, paint, pesticides, fertilizers and cleaners – can be blown or washed into storm drains.
- A little water from a garden hose or rain can also send materials into storm drains.
- Storm drains are separate from our sanitary sewer systems; unlike water in sanitary sewers (from sinks or toilets), water in storm drains is not treated before entering our waterways.

Sources of Non-Point Source Pollution

- Automotive leaks and spills.
- Improper disposal of used oil and other engine fluids.
- Metals found in vehicle exhaust, weathered paint, rust, metal plating and tires.
- Pesticides and fertilizers from lawns, gardens and farms.
- Improper disposal of cleaners, paint and paint removers.
- Soil erosion and dust debris from landscape and construction activities.
- Litter, lawn clippings, animal waste, and other organic matter.
- Oil stains on parking lots and paved surfaces.

The Effect on the Ocean

Non-point source pollution can have a serious impact on water quality in Orange County. Pollutants from the storm drain system can harm marine life as well as coastal and wetland habitats. They can also degrade recreation areas such as beaches, harbors and bays.

Stormwater quality management programs have been developed throughout Orange County to educate and encourage the public to protect water quality, monitor runoff in the storm drain system, investigate illegal dumping and maintain storm drains.

Support from Orange County residents and businesses is needed to improve water quality and reduce urban runoff pollution. Proper use and disposal of materials will help stop pollution before it reaches the storm drain and the ocean.

Printed on Recycled Paper

Clean beaches and healthy creeks, rivers, bays and ocean are important to Orange County. However, many common activities such as pest control can lead to water pollution if you're not careful. Pesticide treatments must be planned and applied properly to ensure that pesticides do not enter the street, gutter or storm drain. Unlike water in sanitary sewers (from sinks and toilets), water in storm drains is not treated before entering our waterways.

You would never dump pesticides into the ocean, so don't let it enter the storm drains. Pesticides can cause significant damage to our environment if used improperly. If you are thinking of using a pesticide to control a pest, there are some important things to consider.

For more information,
please call
University of California Cooperative
Extension Master Gardeners at

Help Prevent Ocean Pollution:

Responsible Pest Control

Tips for Pest Control

Key Steps to Follow:

Step 1: Correctly identify the pest (insect, weed, rodent, or disease) and verify that it is actually causing the problem.

Three life stages of the common lady beetle, a beneficial insect.

This is important because beneficial insects are often mistaken for pests and sprayed with pesticides needlessly.

Consult with a Certified Nursery Professional at a local nursery or garden center or send a sample of the pest to the Orange County Agricultural Commissioner's Office.

Determine if the pest is still present – even though you see damage, the pest may have left.

Step 2: Determine how many pests are present and causing damage.

Small pest populations may be controlled more safely using non-pesticide techniques. These include removing food sources, washing off leaves with a strong stream of water, blocking entry into the home using caulking and replacing problem plants with ones less susceptible to pests.

Integrated Pest Management (IPM) usually combines several least toxic pest control methods for long-term prevention and management of pest problems without harming you, your family, or the environment.

Step 3: If a pesticide must be used, choose the least toxic chemical.

Obtain information on the least toxic pesticides that are effective at controlling the target pest from the UC Statewide Integrated Pest Management (IPM) Program's Web site at www.ipm.ucdavis.edu.

Seek out the assistance of a Certified Nursery Professional at a local nursery or garden center when selecting a pesticide. Purchase the smallest amount of pesticide available.

Apply the pesticide to the pest during its most vulnerable life stage. This information can be found on the pesticide label.

Step 4: Wear appropriate protective clothing.

Follow pesticide labels regarding specific types of protective equipment you should wear. Protective clothing should always be washed separately from other clothing.

Step 5: Continuously monitor external conditions when applying pesticides such as weather, irrigation, and the presence of children and animals.

Never apply pesticides when rain is predicted within the next 48 hours. Also, do not water after applying pesticides unless the directions say it is necessary.

Apply pesticides when the air is still; breezy conditions may cause the spray or dust to drift away from your targeted area.

In case of an emergency call 911 and/or the regional poison control number at (714) 634-5988 or (800) 544-4404 (CA only).

For general questions you may also visit www.calpoison.org.

Step 6: In the event of accidental spills, sweep up or use an absorbent agent to remove any excess pesticides. Avoid the use of water.

Be prepared. Have a broom, dust pan, or dry absorbent material, such as cat litter, newspapers or paper towels, ready to assist in cleaning up spills.

Contain and clean up the spill right away. Place contaminated materials in a doubled plastic bag. All materials used to clean up the spill should be properly disposed of according to your local Household Hazardous Waste Disposal site.

Step 7: Properly store and dispose of unused pesticides.

Purchase Ready-To-Use (RTU) products to avoid storing large concentrated quantities of pesticides.

Store unused chemicals in a locked cabinet.

Unused pesticide chemicals may be disposed of at a Household Hazardous Waste Collection Center.

Empty pesticide containers should be triple rinsed prior to disposing of them in the trash.

Household Hazardous Waste Collection Center

PROJECT Pollution PREVENTION

Sewage Spill Regulatory Requirements

Allowing sewage to discharge to a gutter or storm drain may subject you to penalties and/or out-of-pocket costs to reimburse cities or public agencies for clean-up efforts.

Here are the pertinent codes, fines, and agency contact information that apply.

Orange County Stormwater Program

24 Hour Water Pollution Reporting Hotline

1-877-89-SPILL (1-877-897-7455)

- County and city water quality ordinances prohibit discharges containing pollutants.

Orange County Health Care Agency Environmental Health

(714) 433-6419

California Health and Safety Code, Sections 5410-5416

- No person shall discharge raw or treated sewage or other waste in a manner that results in contamination, pollution or a nuisance.
- Any person who causes or permits a sewage discharge to any state waters:
  - must immediately notify the local health agency of the discharge.
  - shall reimburse the local health agency for services that protect the public's health and safety (water-contact receiving waters).
  - who fails to provide the required notice to the local health agency is guilty of a misdemeanor and shall be punished by a fine (between $500–$1,000) and/or imprisonment for less than one year.

Regional Water Quality Control Board

Santa Ana Region (951) 782-4130

San Diego Region (858) 467-2952

- Requires the prevention, mitigation, response to and reporting of sewage spills.

California Office of Emergency Services

(800) 852-7550

California Water Code, Article 4, Chapter 4, Sections 13268-13271
California Code of Regulations, Title 23, Division 3, Chapter 9.2, Article 2, Sections 2250-2260

- Any person who causes or permits sewage in excess of 1,000 gallons to be discharged to state waters **shall immediately notify the Office of Emergency Services.**
- Any person who fails to provide the notice required by this section is **guilty of a misdemeanor** and shall be punished by a fine (less than $20,000) and/or imprisonment for not more than one year.

What is a Sewage Spill?

Sewage spills occur when the wastewater being transported via underground pipes overflows through a manhole, cleanout or broken pipe. Sewage spills can cause health hazards, damage to homes and businesses, and threaten the environment, local waterways and beaches.

Common Causes of Sewage Spills

Grease builds up inside and eventually blocks sewer pipes. Grease gets into the sewer from food establishments, household drains, as well as from poorly maintained commercial grease traps and interceptors.

Structure problems caused by tree roots in the lines, broken/cracked pipes, missing or broken cleanout caps or undersized sewers can cause blockages.

Infiltration and inflow (I/I) impacts pipe capacity and is caused when groundwater or rainwater enters the sewer system through pipe defects and illegal connections.

You Are Responsible for a Sewage Spill Caused by a Blockage or Break in Your Sewer Lines!

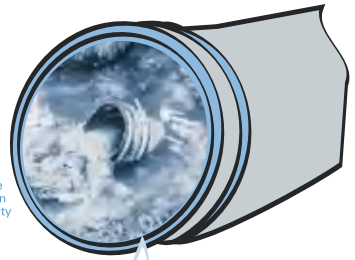
Time is of the essence in dealing with sewage spills. You are required to **immediately**:

Control and minimize the spill. Keep spills contained on private property and out of gutters, storm drains and public waterways by shutting off or not using the water.

Use sandbags, dirt and/or plastic sheeting to prevent sewage from entering the storm drain system.

Clear the sewer blockage. Always wear gloves and wash your hands. It is recommended that a plumbing professional be called for clearing blockages and making necessary repairs.

Always notify your city sewer/public works department or public sewer district of sewage spills. If the spill enters the storm drains also notify the Health Care Agency. In addition, if it exceeds 1,000 gallons notify the Office of Emergency Services. Refer to the numbers listed in this brochure.



Overflowing cleanout pipe located on private property

You Could Be Liable

Allowing sewage from your home, business or property to discharge to a gutter or storm drain may subject you to penalties and/or out-of-pocket costs to reimburse cities or public agencies for clean-up and enforcement efforts. See Regulatory Codes & Fines section for pertinent codes and fines that apply.

What to Look For

Sewage spills can be a very noticeable gushing of water from a manhole or a slow water leak that may take time to be noticed. Don't dismiss unaccounted-for wet areas.

Look for:

- Drain backups inside the building.
- Wet ground and water leaking around manhole lids onto your street.
- Leaking water from cleanouts or outside drains.
- Unusual odorous wet areas: sidewalks, external walls or ground/landscape around a building.

Caution

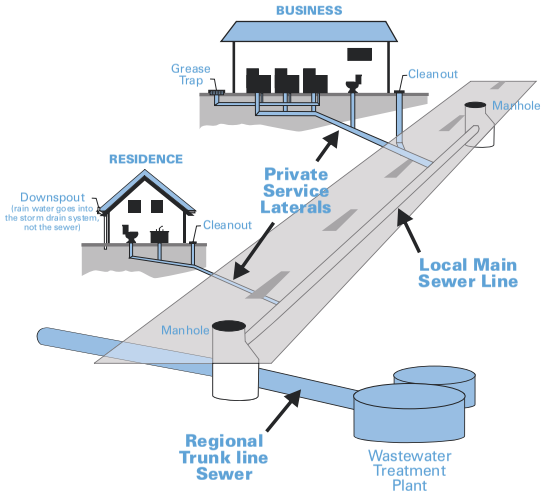
Keep people and pets away from the affected area. Untreated sewage has high levels of disease-causing viruses and bacteria. Call your local health care agency listed on the back for more information.

If You See a Sewage Spill Occurring, Notify Your City Sewer/Public Works Department or Public Sewer District IMMEDIATELY!

How a Sewer System Works

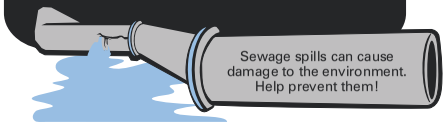
A property owner's sewer pipes are called service laterals and are connected to larger local main and regional trunk lines. Service laterals run from the connection at the home to the connection with the public sewer (including the area under the street). These laterals are the responsibility of the property owner and must be maintained by the property owner. Many city agencies have adopted ordinances requiring maintenance of service laterals. Check with your city sewer/local public works department for more information.

Operation and maintenance of **local and regional sewer lines** are the responsibility of the city sewer/public works departments and public sewer districts.



How You Can Prevent Sewage Spills

1. **Never put grease down garbage disposals, drains or toilets.**
2. **Perform periodic cleaning to eliminate grease, debris and roots in your service laterals.**
3. **Repair any structural problems in your sewer system and eliminate any rainwater infiltration/inflow leaks into your service laterals.**



Preventing Grease Blockages

The drain is not a dump! Recycle or dispose of grease properly and never pour grease down the drain.

Homeowners should mix fats, oils and grease with absorbent waste materials such as paper, coffee grounds, or kitty litter and place it in the trash. Wipe food scraps from plates and pans and dump them in the trash.

Restaurants and commercial food service establishments should always use "Kitchen Best Management Practices." These include:

- Collecting all cooking grease and liquid oil from pots, pans and fryers in covered grease containers for recycling.
- Scraping or dry-wiping excess food and grease from dishes, pots, pans and fryers into the trash.
- Installing drain screens on all kitchen drains.
- Having spill kits readily available for cleaning up spills.
- Properly maintaining grease traps or interceptors by having them serviced regularly. Check your local city codes.

Orange County Agency Responsibilites

- **City Sewer/Public Works Departments—** Responsible for protecting city property and streets, the local storm drain system, sewage collection system and other public areas.
- **Public Sewer/Sanitation District—** Responsible for collecting, treating and disposing of wastewater.
- **County of Orange Health Care Agency—** Responsible for protecting public health by closing ocean/bay waters and may close food-service businesses if a spill poses a threat to public health.
- **Regional Water Quality Control Boards—** Responsible for protecting State waters.
- **Orange County Stormwater Program—** Responsible for preventing harmful pollutants from being discharged or washed by stormwater runoff into the municipal storm drain system, creeks, bays and the ocean.

You Could Be Liable for Not Protecting the Environment

Local and state agencies have legal jurisdiction and enforcement authority to ensure that sewage spills are remedied.

They may respond and assist with containment, relieving pipe blockages, and/or clean-up of the sewage spill, especially if the spill is flowing into storm drains or onto public property.

A property owner may be charged for costs incurred by these agencies responding to spills from private properties.

Clean beaches and healthy creeks, rivers, bays and ocean are important to Orange County. However, many common activities can lead to water pollution if you're not careful. Fertilizers, pesticides and other chemicals that are left on yards or driveways can be blown or washed into storm drains that flow to the ocean. Overwatering lawns can also send materials into storm drains. Unlike water in sanitary sewers (from sinks and toilets), water in storm drains is not treated before entering our waterways.

You would never pour gardening products into the ocean, so don't let them enter the storm drains. Follow these easy tips to help prevent water pollution.

Help Prevent Ocean Pollution:

Tips for Landscape & Gardening

Tips for Landscape & Gardening

Never allow gardening products or polluted water to enter the street, gutter or storm drain.

General Landscaping Tips

- Protect stockpiles and materials from wind and rain by storing them under tarps or secured plastic sheeting.
- Prevent erosion of slopes by planting fast-growing, dense ground covering plants. These will shield and bind the soil.
- Plant native vegetation to reduce the amount of water, fertilizers, and pesticide applied to the landscape.

- Never apply pesticides or fertilizers when rain is predicted within the next 48 hours.

Garden & Lawn Maintenance

- Do not overwater. Use irrigation practices such as drip irrigation, soaker hoses or micro spray systems. Periodically inspect and fix leaks and misdirected sprinklers.
- Do not rake or blow leaves, clippings or pruning waste into the street, gutter or storm drain. Instead, dispose of green waste by composting, hauling it to a permitted landfill, or recycling it through your city's program.

- Use slow-release fertilizers to minimize leaching, and use organic fertilizers.
- Read labels and use only as directed. Do not over-apply pesticides or fertilizers. Apply to spots as needed, rather than blanketing an entire area.
- Store pesticides, fertilizers and other chemicals in a dry covered area to prevent exposure that may result in the deterioration of containers and packaging.

- Rinse empty pesticide containers and re-use rinse water as you would use the product. Do not dump rinse water down storm drains. Dispose of empty containers in the trash.
- When available, use non-toxic alternatives to traditional pesticides, and use pesticides specifically designed to control the pest you are targeting. For more information, visit **www.ipm.ucdavis.edu**.
- If fertilizer is spilled, sweep up the spill before irrigating. If the spill is liquid, apply an absorbent material such as cat litter, and then sweep it up and dispose of it in the trash.
- Take unwanted pesticides to a Household Hazardous Waste Collection Center to be recycled. Locations are provided below.

Household Hazardous Waste Collection Centers

Anaheim:	1071 N. Blue Gum St.
Huntington Beach:	17121 Nichols St.
Irvine:	6411 Oak Canyon
San Juan Capistrano:	32250 La Pata Ave.

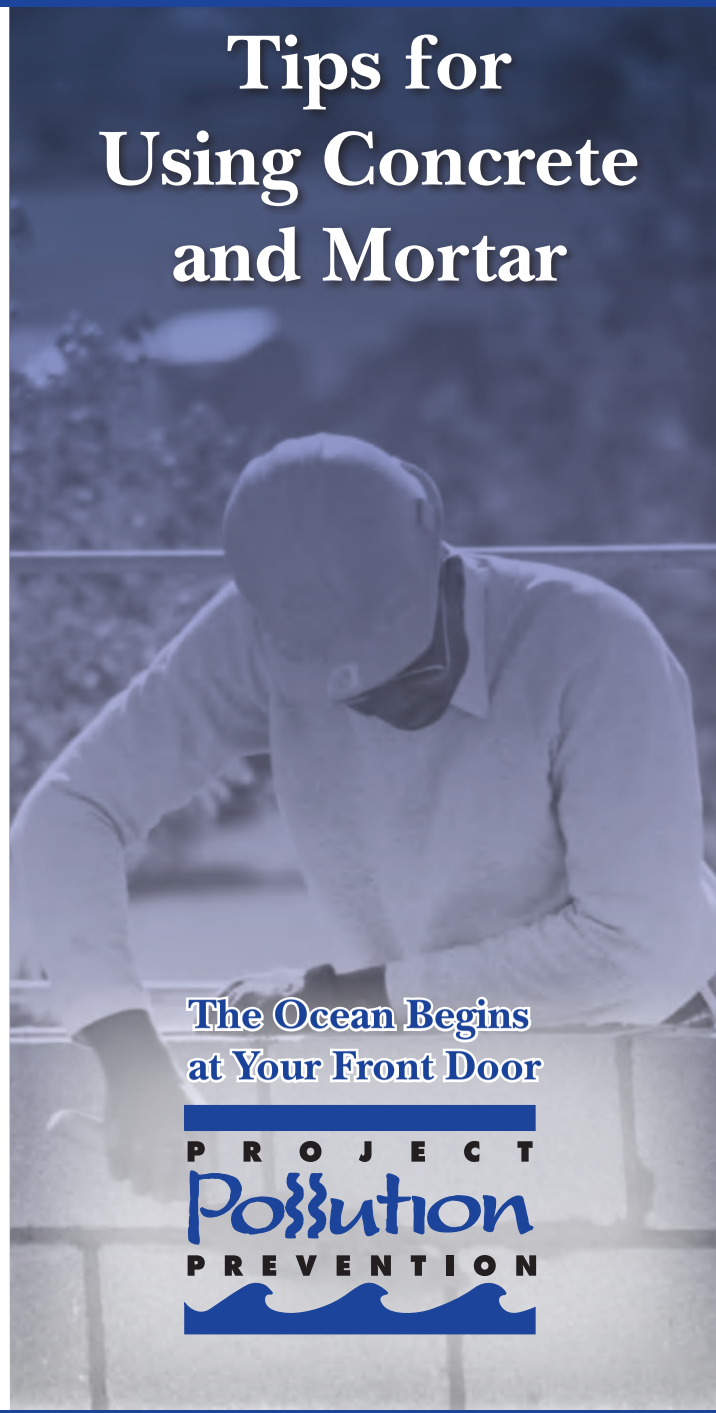
For emergencies, dial 911.

The Tips contained in this brochure provide useful information about how you can keep materials and washwater from entering the storm drain system. If you have other suggestions for how water and materials may be contained, please contact your city's stormwater representative or call the Orange County Stormwater Program.

Tips for Using Concrete and Mortar



The Ocean Begins at Your Front Door

PROJECT Pollution PREVENTION

Tips for Using Concrete and Mortar

Never allow materials or washwater to enter the street or storm drain.

Before the Project

- Schedule projects for dry weather.
- Store materials under cover, with temporary roofs or plastic sheets, to eliminate or reduce the possibility that the materials can be carried from the project site to streets, storm drains or adjacent properties via rainfall, runoff or wind.
- Minimize waste by ordering only the amount of materials needed to complete the job.
- Take measures to block nearby storm drain inlets.

During the Project

- Set up and operate small mixers on tarps or heavy drop cloths.
- Do not mix more fresh concrete or cement than is needed for the job.

- When breaking up pavement, pick up all chunks and pieces and recycle them at a local construction and demolition recycling company. (See information to the right)
- When making saw cuts in pavement, protect nearby storm drain inlets during the saw-cutting operation and contain the slurry. Collect the slurry residue from the pavement or gutter and remove from the site.

Clean-Up

- Dispose of small amounts of dry concrete, grout or mortar in the trash.
- Never hose materials from exposed aggregate concrete, asphalt or similar treatments into a street, gutter, parking lot, or storm drain.
- Wash concrete mixers and equipment in designated washout areas where the water can flow into a containment area or onto dirt. Small amounts of dried material can be disposed of in the trash. Large amounts should be recycled at a local construction and demolition recycling company. (See information below)

- Recycle cement wash water by pumping it back into cement mixers for reuse.

Spills

- Never hose down pavement or impermeable surfaces where fluids have spilled. Use an absorbent material such as cat litter to soak up a spill, then sweep and dispose in the trash.
- Clean spills on dirt areas by digging up and properly disposing of contaminated dry soil in trash.
- Immediately report significant spills to the County's 24-Hour Water Pollution Problem Reporting Hotline at 714-567-6363 or log onto the County's website at www.ocwatersheds.com and fill out an incident reporting form.

For a list of construction and demolition recycling locations in your area visit www.ciwmb.ca.gov/Recycle/.

For additional information on how to control, prevent, remove, and reduce pollution refer to the Stormwater Best Management Practice Handbook, available on-line at www.cabmphandbooks.com.

Preventing water pollution at your commercial/industrial site

Clean beaches and healthy creeks, rivers, bays and ocean are important to Orange County. However, many landscape and building maintenance activities can lead to water pollution if you're not careful. Paint, chemicals, plant clippings and other materials can be blown or washed into storm drains that flow to the ocean. Unlike water in sanitary sewers (from sinks and toilets), water in storm drains is not treated before entering our waterways.

You would never pour soap or fertilizers into the ocean, so why would you let them enter the storm drains? Follow these easy tips to help prevent water pollution.

Some types of industrial facilities are required to obtain coverage under the State General Industrial Permit. For more information visit: **www.swrcb.ca.gov/stormwater/industrial.html**

For more information, please call the **Orange County Stormwater Program** at **1-877-89-SPILL** (1-877-897-7455) or visit **www.ocwatersheds.com**

To report a spill, call the **Orange County 24-Hour Water Pollution Problem Reporting Hotline** at **1-877-89-SPILL** (1-877-897-7455).

For emergencies, dial 911.

Help Prevent Ocean Pollution:

Proper Maintenance Practices for Your Business

The Ocean Begins at Your Front Door

PROJECT Pollution PREVENTION

Proper Maintenance Practices for your Business

Landscape Maintenance

- Compost grass clippings, leaves, sticks and other vegetation, or dispose of it at a permitted landfill or in green waste containers. Do not dispose of these materials in the street, gutter or storm drain.
- Irrigate slowly and inspect the system for leaks, overspraying and runoff. Adjust automatic timers to avoid overwatering.
- Follow label directions for the use and disposal of fertilizers and pesticides.
- Do not apply pesticides or fertilizers if rain is expected within 48 hours or if wind speeds are above 5 mph.
- Do not spray pesticides within 100 feet of waterways.
- Fertilizers should be worked into the soil rather than dumped onto the surface.
- If fertilizer is spilled on the pavement or sidewalk, sweep it up immediately and place it back in the container.

Building Maintenance

- Never allow washwater, sweepings or sediment to enter the storm drain.
- Sweep up dry spills and use cat litter, towels or similar materials to absorb wet spills. Dispose of it in the trash.
- If you wash your building, sidewalk or parking lot, you **must** contain the water. Use a shop vac to collect the water and contact your city or sanitation agency for proper disposal information. Do not let water enter the street, gutter or storm drain.
- Use drop cloths underneath outdoor painting, scraping, and sandblasting work, and properly dispose of materials in the trash.
- Use a ground cloth or oversized tub for mixing paint and cleaning tools.
- Use a damp mop or broom to clean floors.
- Cover dumpsters to keep insects, animals, rainwater and sand from entering. Keep the area around the dumpster clear of trash and debris. Do not overfill the dumpster.
- Call your trash hauler to replace leaking dumpsters.
- Do not dump any toxic substance or liquid waste on the pavement, the ground, or near a storm drain. Even materials that seem harmless such as latex paint or biodegradable cleaners can damage the environment.

NEVER DISPOSE OF ANYTHING IN THE STORM DRAIN.

- Recycle paints, solvents and other materials. For more information about recycling and collection centers, visit **www.oclandfills.com**.
- Store materials indoors or under cover and away from storm drains.
- Use a construction and demolition recycling company to recycle lumber, paper, cardboard, metals, masonry, carpet, plastic, pipes, drywall, rocks, dirt, and green waste. For a listing of construction and demolition recycling locations in your area, visit **www.ciwmb.ca.gov/recycle.**
- Properly label materials. Familiarize employees with Material Safety Data Sheets.

PROJECT Pollution PREVENTION

Inspection and maintenance records shall be kept for a minimum of five years and be made available for inspection by the City staff.

BMP Inspection/Maintenance			
BMP	**Reponsible Party(s)**	**Inspection/ Maintenance Activities Required**	**Minimum Frequency of Activities**
N1 Education for Property Owners, Tenants and Occupants	Owner	To educate employees on stormwater pollution.	Ongoing
N3 Common Area Landscape Management	Owner	Clear of trash, debris, and any accumulated sediment.	Weekly
N4 BMP Maintenance	Owner	See BMP maintenance at the end of this table.	Ongoing
N11 Common Area Litter Control	Owner	Clear of trash and debris.	Daily
N12 Employee Training	Owner	To educate employees on stormwater pollution.	Annually and within 2 weeks of being hired.
N14 Common Area Catch Basin Inspection	Owner	Clear of trash, debris, and any accumulated sediment.	Minimum of once a year prior to rainy season

N15 Street Sweeping Private Streets and Parking Lots	Owner	Drive aisles and parking areas will be swept clean every two weeks and once within five days prior to Oct 15th. It is prohibited for street sweepers to sweep debris into storm drain inlets.	Bi-weekly

BMP Inspection/Maintenance			
BMP	**Reponsible Party(s)**	**Inspection/ Maintenance Activities Required**	**Minimum Frequency of Activities**
S1 Provide storm drain system stencilling and signage	Owner	Visual inspection and replace or repaint as necessary.	Annually
S3 Design and construct trash an waste storage areas to reduce pollution introduction	Owner	Trash storage areas are covered and enclosed to prevent introduction of trash and debris to site runoff.	Ongoing
S4 Use efficient irrigation systems & landscape design, water conservation, smart controllers, and source control	Owner	The irrigation system will include devices to prevent low head drainage, overspray and run-off through the use of pressure regulating devices, check valves, flow sensors, proper spacing, low precipitation emission devices and ET or weather based controllers.	Inspect monthly and maintained as needed

		minimum of once every six months, prior to the start of the rainy season (October 1) each year, and after major storm events.	
PRE-2 Contech CDS 2015-4-C	Owner	The Contech CDS 2015-4-C unit shall be maintained in accordance with manufacturer's specifications. The system shall be inspected at a minimum of once every six months, prior to the start of the rainy season (October 1) each year, and after major storm events.	Inspected twice per year and maintained as needed

CONTECH®
ENGINEERED SOLUTIONS

CDS® Inspection and Maintenance Guide

CDS TECHNOLOGIES

Maintenance

The CDS system should be inspected at regular intervals and maintained when necessary to ensure optimum performance. The rate at which the system collects pollutants will depend more heavily on site activities than the size of the unit. For example, unstable soils or heavy winter sanding will cause the grit chamber to fill more quickly but regular sweeping of paved surfaces will slow accumulation.

Inspection

Inspection is the key to effective maintenance and is easily performed. Pollutant transport and deposition may vary from year to year and regular inspections will help ensure that the system is cleaned out at the appropriate time. At a minimum, inspections should be performed twice per year (e.g. spring and fall) however more frequent inspections may be necessary in climates where winter sanding operations may lead to rapid accumulations, or in equipment washdown areas. Installations should also be inspected more frequently where excessive amounts of trash are expected.

The visual inspection should ascertain that the system components are in working order and that there are no blockages or obstructions in the inlet and separation screen. The inspection should also quantify the accumulation of hydrocarbons, trash, and sediment in the system. Measuring pollutant accumulation can be done with a calibrated dipstick, tape measure or other measuring instrument. If absorbent material is used for enhanced removal of hydrocarbons, the level of discoloration of the sorbent material should also be identified during inspection. It is useful and often required as part of an operating permit to keep a record of each inspection. A simple form for doing so is provided.

Access to the CDS unit is typically achieved through two manhole access covers. One opening allows for inspection and cleanout of the separation chamber (cylinder and screen) and isolated sump. The other allows for inspection and cleanout of sediment captured and retained outside the screen. For deep units, a single manhole access point would allows both sump cleanout and access outside the screen.

The CDS system should be cleaned when the level of sediment has reached 75% of capacity in the isolated sump or when an appreciable level of hydrocarbons and trash has accumulated. If absorbent material is used, it should be replaced when significant discoloration has occurred. Performance will not be impacted until 100% of the sump capacity is exceeded however it is recommended that the system be cleaned prior to that for easier removal of sediment. The level of sediment is easily determined by measuring from finished grade down to the top of the sediment pile. To avoid underestimating the level of sediment in the chamber, the measuring device must be lowered to the top of the sediment pile carefully. Particles at the top of the pile typically offer less resistance to the end of the rod than consolidated particles toward the bottom of the pile. Once this measurement is recorded, it should be compared to the as-built drawing for the unit to determine weather the height of the sediment pile off the bottom of the sump floor exceeds 75% of the total height of isolated sump.

Cleaning

Cleaning of a CDS systems should be done during dry weather conditions when no flow is entering the system. The use of a vacuum truck is generally the most effective and convenient method of removing pollutants from the system. Simply remove the manhole covers and insert the vacuum hose into the sump. The system should be completely drained down and the sump fully evacuated of sediment. The area outside the screen should also be cleaned out if pollutant build-up exists in this area.

In installations where the risk of petroleum spills is small, liquid contaminants may not accumulate as quickly as sediment. However, the system should be cleaned out immediately in the event of an oil or gasoline spill should be cleaned out immediately. Motor oil and other hydrocarbons that accumulate on a more routine basis should be removed when an appreciable layer has been captured. To remove these pollutants, it may be preferable to use absorbent pads since they are usually less expensive to dispose than the oil/water emulsion that may be created by vacuuming the oily layer. Trash and debris can be netted out to separate it from the other pollutants. The screen should be power washed to ensure it is free of trash and debris.

Manhole covers should be securely seated following cleaning activities to prevent leakage of runoff into the system from above and also to ensure that proper safety precautions have been followed. Confined space entry procedures need to be followed if physical access is required. Disposal of all material removed from the CDS system should be done in accordance with local regulations. In many jurisdictions, disposal of the sediments may be handled in the same manner as the disposal of sediments removed from catch basins or deep sump manholes.

CDS Inspection & Maintenance Log

CDS Model: _____ Location: _____

Date	Water depth to sediment[1]	Floatable Layer Thickness[2]	Describe Maintenance Performed	Maintenance Personnel	Comments

1. The water depth to sediment is determined by taking two measurements with a stadia rod: one measurement from the manhole opening to the top of the sediment pile and the other from the manhole opening to the water surface. If the difference between these measurements is less than the values listed in table 1 the system should be cleaned out. **Note: to avoid underestimating the volume of sediment in the chamber, the measuring device must be carefully lowered to the top of the sediment pile.**

2. For optimum performance, the system should be cleaned out when the floating hydrocarbon layer accumulates to an appreciable thickness. In the event of an oil spill, the system should be cleaned immediately.

Isolator® Row Plus
O&M Manual

ADS StormTech™

The Isolator® Row Plus

Introduction

An important component of any Stormwater Pollution Prevention Plan is inspection and maintenance. The StormTech Isolator Row Plus is a technique to inexpensively enhance Total Suspended Solids (TSS), Total Phosphorus (TP), Total Petroluem Hydrocarbons (TPH) and Total Nitrogen (TN) removal with easy access for inspection and maintenance.

The Isolator Row Plus

The Isolator Row Plus is a row of StormTech chambers, either SC-160, SC-310, SC-310-3, SC-740, DC-780, SC-800, MC-3500, MC-4500 or MC-7200 models, are lined with filter fabric and connected to a closely located manhole for easy access. The fabric lined chambers provide for sediment settling and filtration as stormwater rises in the Isolator Row Plus and passes through the filter fabric. The open bottom chambers allow stormwater to flow vertically out of the chambers. Sediments are captured in the Isolator Row Plus protecting the adjacent stone and chambers storage areas from sediment accumulation.

ADS Isolator Row and Plus fabric are placed between the stone and the Isolator Row Plus chambers. The woven geotextile provides a media for stormwater filtration, a durable surface for maintenance, prevents scour of the underlying stone and remains intact during high pressure jetting.

The Isolator Row Plus is designed to capture the “first flush” runoff and offers the versatility to be sized on a volume basis or a flow-rate basis. An upstream manhole provides access to the Isolator Row Plus and includes a high/low concept such that stormwater flow rates or volumes that exceed the capacity of the Isolator Row Plus bypass through a manifold to the other chambers. This is achieved with an elevated bypass manifold or a high-flow weir. This creates a differential between the Isolator Row Plus row of chambers and the manifold to the rest of the system, thus allowing for settlement time in the Isolator Row Plus. After Stormwater flows through the Isolator Row Plus and into the rest of the chamber system it is either exfiltrated into the soils below or passed at a controlled rate through an outlet manifold and outlet control structure.

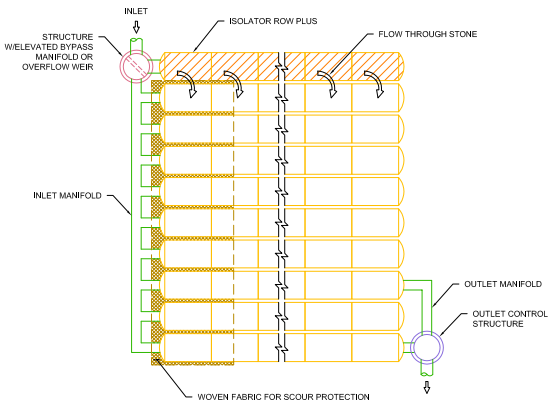
The Isolator Row Plus Flamp™ is a flared end ramp apparatus attached to the inlet pipe on the inside of the chamber end cap. The FLAMP provides a smooth transition from pipe invert to fabric bottom. It is configured to improve chamber function performance by enhancing outflow of solid debris that would otherwise collect at the chamber's end, or more difficult to remove and require confined space entry into the chamber area. It also serves to improve the fluid and solid flow into the access pipe during maintenance and cleaning and to guide cleaning and inspection equipment back into the inlet pipe when complete.

The Isolator Row Plus may be part of a treatment train system. The treatment train design and pretreatment device selection by the design engineer is often driven by regulatory requirements. Whether pretreatment is used or not, StormTech recommend using the Isolator Row Plus to minimize maintenance requirements and maintenance costs.

Note: *See the StormTech Design Manual for detailed information on designing inlets for a StormTech system, including the Isolator Row Plus.*

Looking down the Isolator Row Plus from the manhole opening, ADS Plus Fabric is shown between the chamber and stone base.

StormTech Isolator Row Plus with Overflow Structure (not to scale)



Isolator Row Plus Inspection/Maintenance

Inspection

The frequency of inspection and maintenance varies by location. A routine inspection schedule needs to be established for each individual location based upon site specific variables. The type of land use (i.e. industrial, commercial, residential), anticipated pollutant load, percent imperviousness, climate, etc. all play a critical role in determining the actual frequency of inspection and maintenance practices.

At a minimum, StormTech recommends annual inspections. Initially, the Isolator Row Plus should be inspected every 6 months for the first year of operation. For subsequent years, the inspection should be adjusted based upon previous observation of sediment deposition.

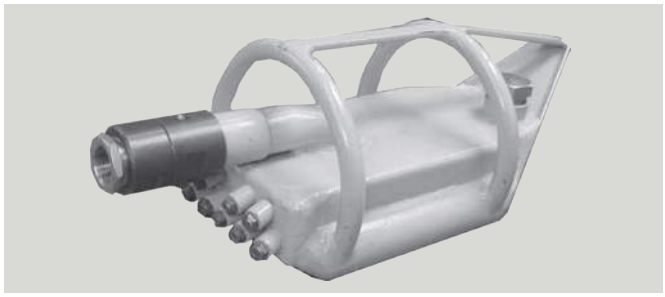
The Isolator Row Plus incorporates a combination of standard manhole(s) and strategically located inspection ports (as needed). The inspection ports allow for easy access to the system from the surface, eliminating the need to perform a confined space entry for inspection purposes.

If upon visual inspection it is found that sediment has accumulated, a stadia rod should be inserted to determine the depth of sediment. When the average depth of sediment exceeds 3" (75 mm) throughout the length of the Isolator Row Plus, clean-out should be performed.

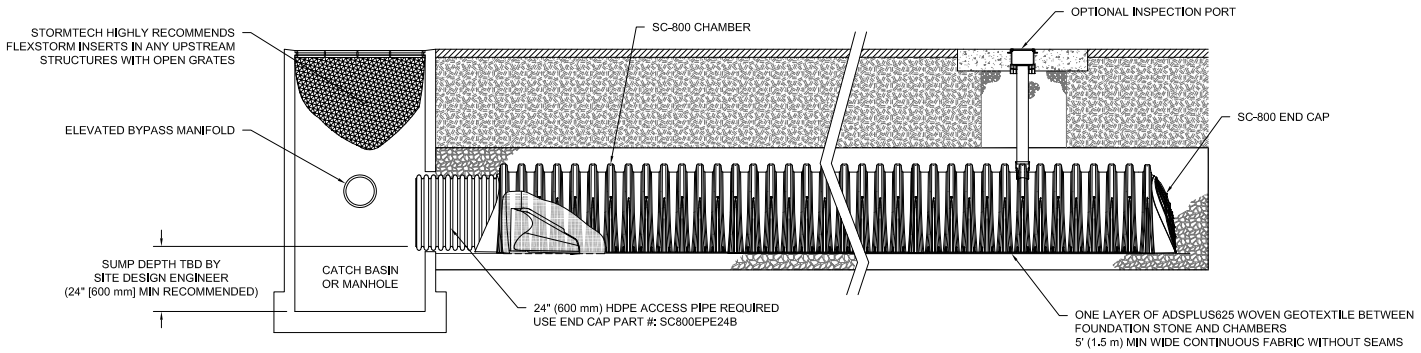
Maintenance

The Isolator Row Plus was designed to reduce the cost of periodic maintenance. By “isolating” sediments to just one row, costs are dramatically reduced by eliminating the need to clean out each row of the entire storage bed. If inspection indicates the potential need for maintenance, access is provided via a manhole(s) located on the end(s) of the row for cleanout. If entry into the manhole is required, please follow local and OSHA rules for a confined space entry.

Maintenance is accomplished with the JetVac process. The JetVac process utilizes a high pressure water nozzle to propel itself down the Isolator Row Plus while scouring and suspending sediments. As the nozzle is retrieved, the captured pollutants are flushed back into the manhole for vacuuming. Most sewer and pipe maintenance companies have vacuum/JetVac combination vehicles. Selection of an appropriate JetVac nozzle will improve maintenance efficiency. Fixed nozzles designed for culverts or large diameter pipe cleaning are preferable. Rear facing jets with an effective spread of at least 45” are best. StormTech recommends a maximum nozzle pressure of 2000 psi be utilized during cleaning. JetVac reels can vary in length. For ease of maintenance, ADS recommends Isolator Row Plus lengths up to 200' (61 m). **The JetVac process shall only be performed on StormTech Isolator Row Plus that have ADS Plus Fabric (as specified by StormTech) over their angular base stone.**



StormTech Isolator Row Plus (*not to scale*)



Isolator Row Plus Step By Step Maintenance Procedures

Step 1

Inspect Isolator Row Plus for sediment.

A) Inspection ports (if present)
- i. Remove lid from floor box frame
- ii. Remove cap from inspection riser
- iii. Using a flashlight and stadia rod,measure depth of sediment and record results on maintenance log.
- iv. If sediment is at or above 3 inch depth, proceed to Step 2. If not, proceed to Step 3.

B) All Isolator Row Plus
- i. Remove cover from manhole at upstream end of Isolator Row Plus
- ii. Using a flashlight, inspect down Isolator Row Plus through outlet pipe
  1. Mirrors on poles or cameras may be used to avoid a confined space entry
  2. Follow OSHA regulations for confined space entry if entering manhole
- iii. If sediment is at or above the lower row of sidewall holes (approximately 3 inches), proceed to Step 2.
  If not, proceed to Step 3.

Step 2

Clean out Isolator Row Plus using the JetVac process.

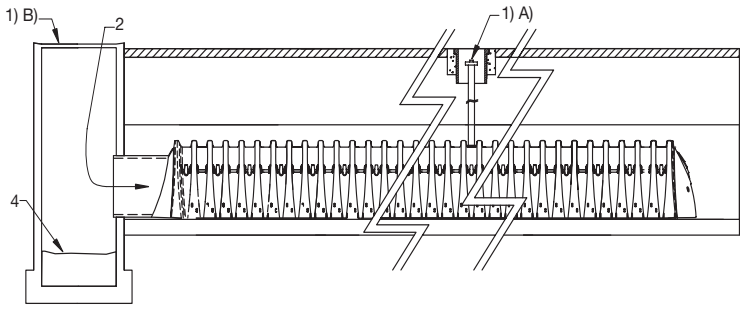
A) A fixed floor cleaning nozzle with rear facing nozzle spread of 45 inches or more is preferable
B) Apply multiple passes of JetVac until backflush water is clean
C) Vacuum manhole sump as required

Step 3

Replace all caps, lids and covers, record observations and actions.

Step 4

Inspect & clean catch basins and manholes upstream of the StormTech system.



Sample Maintenance Log

Date	Stadia Rod Readings		Sediment Depth (1)–(2)	Observations/Actions	Inspector
	Fixed point to chamber bottom (1)	Fixed point to top of sediment (2)			
3/15/11	6.3 ft	none		New installation. Fixed point is CI frame at grade	DJM
9/24/11		6.2	0.1 ft	Some grit felt	SM
6/20/13		5.8	0.5 ft	Mucky feel, debris visible in manhole and in Isolator Row Plus, maintenance due	NV
7/7/13	6.3 ft		0	System jetted and vacuumed	DJM

RE: Phase I Environmental Site Assessment
Extra Space Storage #1536
1030 East 4th Street
Santa Ana, California 92701
VERTEX Proj. No. 32668

Dear Ms. McNeal:

The Vertex Companies, Inc. (VERTEX) is pleased to submit this Phase I Environmental Site Assessment (ESA) report for the above referenced property (the site). The purpose of this assessment was to identify Recognized Environmental Conditions (RECs) in connection with the site. A REC is defined as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." It does not include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Our work was conducted in conformance with proposal P.0386.15, executed by Ms. Gwyn Goodson McNeal on March 4, 2015, and in accordance with the provisions of the E 1527-13 American Society for Testing and Materials (ASTM) document entitled "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" for commercial real estate, as well as the U.S. Environmental Protection Agency's (USEPA) All Appropriate Inquires (AAI) Final Rule of November 1, 2005, as amended December 30, 2013. To the best of our knowledge, this Phase I ESA report is true and accurate.

VERTEX also assessed the site for the potential presence of asbestos-containing materials (ACMs) and lead-based paint (LBP).

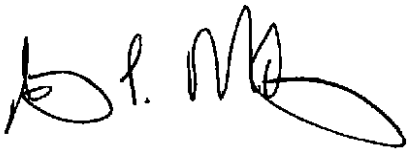
We declare that, to the best of our professional knowledge and belief, we meet the definition of an Environmental Professional as defined in 40 CFR § 312.10. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Please do not hesitate to contact us at your convenience should you have any questions or comments regarding this report or our recommendations. It has been a pleasure working with you on this project.

Sincerely,

The Vertex Companies, Inc.

Mark Jirgal, P.G.
Senior Project Manager



Stephen P. McCarthy
Vice President - Due Diligence

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Extra Space Storage #1536
1030 East 4th Street
Santa Ana, California 92701
VERTEX Proj. No. 32668

1.0 SUMMARY

On March 4, 2015, The Vertex Companies, Inc. (VERTEX) was retained by Extra Space Storage, LLC to conduct a Phase I Environmental Site Assessment (ESA) of the Extra Space Storage facility located at 1030 East 4th Street, Santa Ana, California (the site). According to the Orange County Clerk, the approximately 3.3-acre site parcel is identified as Parcel Number 398-461-18 and is addressed as 1030 East 4th Street. The site is developed with a single-story office building with a retail area and manager's apartment and seven single-story self-storage buildings that were constructed in 1995. Additional improvements consist of asphalt and concrete-paved parking and driveway areas, security gates, and landscaped areas. The site is owned by Extra Space Properties Two LLC.

The purpose of this assessment was to identify Recognized Environmental Conditions (RECs) in connection with the site.

ASTM Findings

- Based on a review of historical information, the site was used for residential purposes from at least 1885 until approximately 1906, when it was developed as a railway station with associated railroad tracks. Other areas of the site were further improved in 1949 with section housing and, in 1969, with a planing mill. The former site improvements were removed in the early 1990s and the site was redeveloped with the current improvements (self-storage facilities) in 1995.

- To further assess the historical use of the site for rail operations as part of a prior assessment, in 2013 VERTEX conducted a Limited Subsurface Investigation (LSI), which included the advancement of four test borings and the laboratory analysis of select soil samples. The soil borings were advanced to a depth of approximately 30 feet below ground surface (bgs). Groundwater was not encountered during the drilling activities. Based on documentation reviewed for off-site regulatory listings, groundwater is anticipated to be approximately 76 feet bgs. Select soil samples from each of the four test borings were submitted for analysis of volatile organic compounds (VOCs), polynuclear aromatic hydrocarbons (PAHs), total petroleum hydrocarbons – diesel range organics (TPH DRO), Resource Conservation and Recovery Act (RCRA) 8 metals, and polychlorinated biphenyls (PCBs). None of these constituents were detected at concentrations above the California Regional Water Quality Board (RWQCB) Environmental Screening Levels (ESLs; Deep Soil Screening Levels) for Commercial/Industrial Land Use or the California Human Health Screening Levels for Commercial/Industrial Land Use (CHHSL), except for arsenic. However, the arsenic concentrations identified were within background arsenic levels found throughout the region, and therefore, no further action is warranted. Based on the findings from the Phase II LSI, no RECs were identified with respect to the past use of the site.

- The site is located in a commercial and industrial area. The area surrounding the site has been developed since circa 1895 including railroad tracks and associated facilities and residential, commercial, and industrial facilities. No RECs in connection with the site were identified with respect to the adjacent property use.

- VERTEX conducted a regulatory review that included a search of state and federal regulatory databases to identify environmental concerns for the site and surrounding properties. Several additional facilities were identified within the ASTM search distances of the site. Based on the apparent gradient relationship, regulatory status, depth to groundwater and other facility-specific characteristics, no RECs to the site were identified with respect to these facilities.

Non-ASTM Additional Services

In accordance with the proposed scope of work, VERTEX conducted additional services as discussed in Section 9.0 of this report, including the assessment of asbestos-containing materials (ACMs) and lead-based paint (LBP), which did not reveal business environmental risks associated with the site.

Conclusions

VERTEX has performed a Phase I ESA in conformance with the scope and limitations of ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, of the Extra Space Storage facility located at 1030 East 4th Street, Santa Ana, California. Exceptions to, or deletions from, this practice are described in Section 8.0 of this report. This assessment has revealed no evidence of RECs in connection with the site. Therefore, no additional investigation is recommended at this time.

2.0 SITE AND VICINITY CHARACTERISTICS

2.1 Site Description

The site is located at 1030 East 4th Street, Santa Ana, California (the site). According to the Orange County Clerk, the approximately 3.3-acre site parcel is identified as Parcel Number 398-461-18. The site is located south of East 4th Street, north of East 1st Street, and east of North Standard Avenue and Breeden Street. The site location is shown on Figure 1 - Site Locus Map.

2.2 Site Improvements

The site is developed with a single-story office building with a retail area and manager's apartment and seven single-story self-storage buildings that were constructed in 1995. Additional improvements consist of asphalt and concrete-paved parking and driveway areas, security gates, and landscaped areas. The seven single-story buildings house 444 storage units. The buildings are constructed with slab-on-grade foundations with concrete block walls and steel frames with metal roofing. The office/apartment building is one-story stucco building with the interior finished with tile flooring and painted drywall walls and ceilings. The storage units are constructed of corrugated steel wall dividers, corrugate steel ceiling, and concrete flooring. The manager's apartment was not accessible at the time of the site visit.

Exterior areas on-site consist of concrete-paved parking lots and drives with limited landscaping.

For a layout of the site, please refer to Figure 2 - Site Plan. Photographic documentation of the site and surrounding areas is presented in Appendix A.

2.3 Tenant Operations

The site currently operates as a self-storage facility. Hazardous materials observed at the site were limited to small quantities of household-grade janitorial and cleaning supplies and paints which were stored in a designated self-storage unit near the manager's office. The containers

appeared to be appropriately stored and no evidence of staining or a release was observed. According to the site contact, no operations using hazardous materials, apart from minor cleaning of the site maintenance equipment, are performed on-site. Therefore, the current on-site operations are not considered an environmental concern.

2.4 Current Uses of Adjoining Properties

The site was observed to be located in a commercial and industrial area. Adjoining properties were observed (from the site or from public access areas) for signs of RECs and their potential to pose an environmental concern to the site. The uses and features of adjoining properties are described in the following table. The locations of these properties relative to the site are depicted on Figure 2 – Site Plan.

NEARBY/ADJOINING PROPERTY SUMMARY		
DIRECTION	**PROPERTY USE**	**CONCERNS**
North	East 4th Street beyond which are Taqueria de Anda restaurant (1029 East 4th Street) and Madison Materials (1035 East 4th Street).	None
West/South	Breeden Street and north Standard Avenue, beyond which is Tom Truck Center (936 East 3rd Street and 1008 East 4th Street). Various automotive facilities (115 and 117 North Standard Avenue) occupy the property which adjoins the site to the south and west.	None
South	East 1st Street beyond which is California Tool & Welding Supply (1004 North Standard Road)	None
East	Spec Formliners (1038 East 4th Street)	None

2.5 Physical Setting Source(s)

Physical setting sources specified in Section 12.0 of this report were reviewed to provide information about the geology and hydrogeology of the site.

2.5.1 Topography

A review of the 1981 USGS Topographic Quadrangle Map of Tustin, California indicates that the surface elevation of the site is approximately 131 feet above mean sea level (amsl). The topography of the site and site area is generally flat with a gentle slope to the southwest.

2.5.2 Surface Water

No naturally-occurring surface water bodies were observed on-site or in the vicinity of the site.

2.5.3 Geologic Conditions

According to the United States Department of Agriculture (USDA) soils at the site consist of the Mocho Soil. The Mocho Soil consists of loam that is well drained, and has moderate infiltration rates. Based on a subsurface investigation of the site performed by VERTEX in June 2013, lithology encountered at the site generally consisted of brown loamy soils at depths less than 20 feet bgs, and brown loamy clays at depths of 20 to 30 feet bgs.

2.5.4 Groundwater

Information from a leaking underground storage tank (LUST) case file for G&M Oil Company Station No. 49, located approximately ¼ mile east-northeast of the site, was obtained from the State of California's GeoTracker database. According to groundwater elevation measurements collected during 2009 for the G&M Oil Company No. 49 LUST case, groundwater in the area flows to the south-southeast. Depth to groundwater at this location was measured at 76 feet below ground surface (bgs). VERTEX notes that depth to groundwater may fluctuate depending upon seasonal rainfall amounts. Actual flow direction may be influenced by differential weathering and fracturing of underlying bedrock or other factors including underground structures, and production wells, seasonal precipitation or nearby waterway fluctuations, none of which were considered during this study.

3.0 USER-PROVIDED INFORMATION

VERTEX requested the following information regarding the site from Extra Space Storage, LLC (User):

- An evaluation of the presence of environmental cleanup liens for the site;
- Activity and use limitations (AULs) such as engineering controls (e.g., slurry walls, caps) and land use restrictions or institutional controls (e.g., deed restrictions, covenants) that may be in place for the site;
- Specialized knowledge that includes personal knowledge or experience related to the site or nearby properties based on professional experience or knowledge of the site;
- Fair market value (FMV) to evaluate whether the purchase price of any parcel was significantly below FMV;
- Obvious indicators that involve past or present spills, stains, releases, cleanups on or near the site;
- Common knowledge about use of specific chemicals, possible contamination, or past use of the site and surrounding area; and
- Reason for performing the ESA.

Ms. McNeal stated that the work was being conducted in support of a mortgage transaction. Refer to Section 5.3 for a summary of a prior reports prepared for the site. Extra Space Storage LLC had no specialized knowledge regarding the history of the site or nearby properties. No other information regarding the site was provided by the User.

4.0 INTERVIEWS

VERTEX conducted an interview regarding site history and the current on-site operations with the following individuals:

INTERVIEWS		
NAME/ COMPANY	**TITLE/POSITION**	**INFORMATION PROVIDED**
Ms. Sandra Victoria	Store Manager	Provided information regarding site history and operations
Municipal Officials	Various	Provided municipal information

Information obtained from these interviews is discussed in relevant sections of this report. Please refer to Section 6.3 for a summary of information obtained from municipal inquiries.

5.0 HISTORICAL RECORDS REVIEW

Past land uses for the site and adjoining properties were assessed to identify historical practices or conditions that may have impacted the site. This was accomplished by reviewing historical information from several sources including but not limited to an interview with a site representative, review of available previous environmental reports and ownership records, and review of historical information obtained from regulatory sources, aerial photographs, city directories, and maps.

5.1 Historical Site Use Summary

Based on a review of historical information, the site was used for residential purposes from at least 1885 until approximately 1906, when it was developed as a railway station with associated railroad tracks. Other areas of the site were further improved in 1949 with section housing and, in 1969, with a planing mill. The former site improvements were removed in the early 1990s and the site was redeveloped with the current improvements in 1995.

5.2 Historical Adjoining Properties Use Summary

The site is located in a commercial and industrial area. The properties to the north, east, and south contained railroad tracks and railroad facilities dating back to at least 1895. At that time, a creamery was located north of the site and a cannery was located to the south. The property west of the site consisted of vacant land and dwellings. Additional commercial and industrial structures appeared during the 1930s and 1940s to the south and west including lumber sheds and lumber piles west of the site. During the 1960s, additional commercial and industrial structures were developed north, west, and south of the site and most of those structures are currently present. By 1994/95, the railroad tracks and facilities had been removed from the adjoining property to the east. By 2005, a large commercial building had been built east of the site. No environmental concerns were identified with respect to the past uses of adjoining properties.

5.3 Previous Environmental Reports

VERTEX was provided with and reviewed the following previous environmental reports regarding the site:

Report of Foundation Investigation, prepared by Law/Crandall, Inc. (LCI) for Rail Pacific, Inc., dated August 4, 1992.

LCI conducted a foundation investigation in 1992, prior to the development of the current improvements. LCI drilled seven borings to depths ranging from 6 to 21 feet bgs and determined that soils below the site consisted mostly of silty sand, silt, and sand. Fill soils were encountered in one of the borings composed of silty gravel. LCI gathered samples and conducted compressibility tests to determine if the soils were suitable for development. It was concluded that the existing natural soils at the site were moderately firm, but would lose strength when wetted and therefore were not suitable for construction. LCI recommended two feet of the upper natural soils be removed and replaced with properly compacted fill.

Phase I Environmental Site Assessment Report, prepared by Secor International Incorporated (Secor) for GE Real Estate and North American Debt, dated July 11, 2005.

Secor conducted an environmental site assessment in 2005, when the site consisted of 2.92 acres developed as All Aboard Mini Storage. The site consisted of seven single-story self-storage structures and one single-story office/manager's apartment unit. Secor determined that the site was formerly developed as a residential property, a train depot, and a railroad yard prior to the development of the current improvements. Secor reviewed a prior Phase I Site Assessment conducted by LCI in 1992. LCI observed surface soil staining along the former railroad tracks that was determined to be diesel fuel from the rail spurs or parked cars. According to a representative of Hyrail Partners II LP, the site was graded to a depth of approximately six feet bgs in 1993. The staining was determined to be *de minimis* based on the observed soil. Secor identified several adjoining facilities on regulatory databases, but did not identify any RECs in connection with the site and recommended no further assessment for the site.

Phase I Environmental Site Assessment and Phase II Limited Subsurface Investigation (LSI), prepared by VERTEX Environmental Services, Inc. for Extra Space Storage LLC, dated June 28, 2013.

The purpose of the VERTEX's 2013 Phase I ESA was to identify RECs in connection with the site. To further assess the historical use of the site for rail operations, VERTEX conducted a LSI, which consisted of a ground-penetrating radar (GPR) survey, four test borings, and laboratory analysis of select soil samples. The GPR survey was utilized to pre-clear all soil borings of potential subsurface utilities. No subsurface anomalies were identified during the GPR survey.

VERTEX advanced four test borings (VB-1 through VB-4) on the site on June 18, 2013. Soil borings were advanced to a depth of approximately 30 feet bgs using direct-push drilling techniques. Groundwater was not encountered during the drilling activities. No visual or olfactory evidence of contamination was detected in the soil borings. Field screening of soil samples using a photoionization detector (PID) did not identify total volatile organic compounds (TVOCs) concentrations above 1 part-per million by volume (ppmv).

Select soil samples from each of the four test borings were submitted for analysis of volatile organic compounds (VOCs), polynuclear aromatic hydrocarbons (PAHs), total petroleum hydrocarbons – diesel range organics (TPH DRO), Resource Conservation and Recovery Act (RCRA) 8 metals, and polychlorinated biphenyls (PCBs).

Detectable concentrations of these chemical constituents were compared to applicable screening levels including California Regional Water Quality Board (RWQCB) Environmental Screening Levels (ESLs; Deep Soil Screening Levels) for Commercial/Industrial Land Use and California Human Health Screening Levels for Commercial/Industrial Land Use (CHHSL). PAHs and PCBs were not detected in any sample analyzed. TPH DRO in the C10-C22 Hydrocarbons Range was detected in one soil sample at a concentration of 1.0 milligrams per kilogram (mg/kg), well below the RWQCB ESL of 530 mg/kg. Acetone, benzene and toluene were detected in samples collected from 2 of the 4 borings at maximum concentrations of 0.011, 0.001 and 0.00076 mg/kg, respectively, well below RWQCB ESLs of 0.5, 0.044 and 2.9 mg/kg,

respectively. Several metals were detected at concentrations well below RWQCB ESLs and CHHSLs with the exception of arsenic. Arsenic was detected at concentrations as high as 6.4 mg/kg, exceeding the applicable CHHSL of 0.24 mg/kg and the RWQCB ESL of 0.96 mg/kg. However, according to the Determination of a Southern California Regional Background Arsenic Concentration in Soil, G. Chernoff, W.Bosan and D. Oudiz, Department of Toxic Substances Control DTSC website dated March 2008, the DTSC findings suggested that, in Southern California, 12 mg/kg may be a useful screening number for evaluating arsenic as a chemical of potential concern. Therefore, the arsenic concentrations identified are considered to be similar to background arsenic levels found throughout the region, and no regulatory reporting of these concentrations is required. Additionally, since the site is paved or covered by buildings there is no exposure to site soils.

VERTEX indicated that their 2013 assessment revealed no evidence of RECs in connection with the site. Therefore, no additional work was recommended at that time.

Refer to Appendix B for a copy of select portions (text, figures, and photos) of the above-referenced reports.

5.4 Prior Ownership

VERTEX obtained site ownership information from the Orange County Assessor and Recorder Offices. The site currently is owned by Extra Space Properties Two LLC. Previous ownership information obtained by VERTEX is summarized as follows:

DEED RECORDS REVIEW				
GRANTOR	**GRANTEE**	**DOCUMENT TYPE**	**DOCUMENT NO.**	**DATE**
Santa Ana Hyrail III LLC	Extra Space Properties Two LLC	Grant Deed	2013000510939	08/23/2013
Hyrail Partners V LLC	Santa Ana Hyrail III LLC	Grant Deed	2005000688797	08/16/2005

No environmental liens or AULs were noted through review of ownership records. Prior owners of the site were not available to be interviewed.

5.5 City Directories

VERTEX reviewed historical city directory information for the site and adjoining properties through EDR. Refer to Appendix B for the EDR City Directory report. A summary of listings is presented below.

CITY DIRECTORY REVIEW			
Year	**Summary (on-site)**	**Summary (off-site)**	**Concerns**

2012	*1030 East 4th Street:* All Aboard Mini Storage	*East 3rd Street* 936: Reindeer Inc, Tom's Truck Center, Iveco Diesel, Suzuki Depot Parts Department *East 4th Street* 1008: Tom's Truck Center 1029: Taqueria de Anda 1038: Joe Kunz Co. Inc.	None, see below

A review of the above-referenced historical city directories revealed that the site was developed with railroad tracks and a railway station beginning in 1936. A summary of previous site investigation activities in response to the former use of the site as a railway station is presented in Section 5.3. No additional on-site concerns were noted from review of city directories. No RECs were identified in connection with the site based on the off-site city directories listings summarized above.

5.6 Aerial Photography

VERTEX reviewed aerial photographs including the site and adjoining properties. Copies of the aerial photographs are included in Appendix C. A summary of information obtained from the review is provided in the table below.

AERIAL PHOTOGRAPHY REVIEW			
Year	**Summary (on-site)**	**Summary (off-site)**	**Concerns**
1938	The site appears to consist of railroad tracks, undeveloped land, and structure on the northern portion of the site. The remaining area on-site is undeveloped land.	East 4th Street is visible north of the site, beyond which railroad tracks and several structures are visible. Railroad tracks and a structure are visible east of the site. East 1st Street is visible south of the site, beyond which are vacant land and several structures. Three structures are visible southwest of the site. North Standard Avenue is visible west of the site, beyond which, several large structures are visible. Two structures and Breeden Street are visible adjoining west of the site. Beyond Breeden Street, several structures are visible.	None, see below
1947	The site appears similar to the 1938 aerial photograph.	The structures west of the site, beyond Breeden Street, appear to have been further developed.	None, see below
1953	A structure has been developed on the southern portion of the site.	The structures south of the site, beyond East 1st Street appear to have been further developed.	None, see below
1960	The site appears similar to the 1953 aerial photograph.	A structure has been developed north of the site, beyond East 4th Street.	None, see below
1968	A structure has been developed on the western portion of the site. The structure on the southern portion of the site is no longer visible.	No structures are visible north of the site, beyond East 4th Street. One of the structures adjoining east of the site is no longer visible. The structures southwest of the site have been redeveloped.	None, see below
1977	The structure on the northern portion of the site is no longer visible. Several structures have been developed towards the central portion of the site. The southern portion of the site appears to be used as vehicle storage.	Several structures have been developed south of the site, beyond East 1st Street.	None, see below
1990	The southern portion of the site no longer appears to contain vehicle storage.	One of the structures east of the site is no longer visible.	None, see below
1994,1995 Composite	The site appears to consist of vacant land.	The property adjoining east of the site appears to consist of vacant land. The property south of the site, beyond East 1st Street, appears to consist of vacant land. The property adjoining west of the site appears to consist of vacant land.	None
2005	The site appears to be developed with the current improvements.	A structure has been developed north of the site, beyond East 4th Street. A large structure has been developed adjoining east of the site. The property south of the site, beyond East 1st street has been redeveloped.	None
2009	The site appears similar to the 2005 aerial photograph.	Surrounding areas appear similar to the 2005 aerial photograph.	None
2010	The site appears similar to the 2009 aerial photograph.	Surrounding areas appear similar to the 2009 aerial photograph.	None
2012	The site appears similar to the 2010 aerial photograph.	The surrounding areas appear similar to the 2010 aerial photograph.	None

A review of the above-referenced historical aerial photographs revealed that the site was developed with railroad tracks and a railway station from beginning in 1938. The site was further developed with section housing and a planing mill prior to 1968. The site consisted of vacant land in 1994 and was developed with the current improvements prior to 2005. A summary of previous site investigation activities to assess the former use of the site as a railway station is presented in Section 5.3. The review of historical aerial photographs did not identify additional specific concerns or RECs.

5.7 Topographic Maps

VERTEX reviewed historical topographic maps including the site and surrounding areas. Copies of the topographic maps are included in Appendix D. A summary of information obtained from the review is provided in the table below.

TOPOGRAPHIC MAP REVIEW			
Year	**Summary (on-site)**	**Summary (off-site)**	**Concerns**
1901 1902 1935	Due to the scale of the map, the exact use and location of the site could not be determined.	Due to the scale of the map, the exact use and location of surrounding areas could not be determined.	None
1942	The site is depicted as a built up area. Train tracks are depicted crossing the site.	East 4th Street is depicted adjoining north of the site. Train tracks are depicted adjoining east of the site. East 1st Street is depicted adjoining south of the site. Breeden Street and North Standard Avenue are depicted adjoining west of the site.	None, see below
1948	The site is depicted with additional train tracks.	Additional train tracks are depicted adjoining east of the site.	None, see below
1965	A train station structure is depicted on the northern portion of the site.	A train station structure is depicted east of the site.	None, see below
1972	The site appears similar to the 1965 topographic map.	Surrounding areas appear similar to the 1965 topographic map.	None, see below
1981	The site appears similar to the 1972 topographic map.	Surrounding areas appear similar to the 1972 topographic map.	None, see below

A review of the above-referenced historical aerial topographic maps revealed that the site was developed with railroad tracks and a railway station from beginning in 1942. A summary of

previous site investigation activities to assess the former use of the site as a railway station is presented in Section 5.3. The review of historical topographic maps did not identify additional specific concerns or RECs.

5.8 Sanborn Fire Insurance Maps

VERTEX reviewed historical Sanborn Fire Insurance (Sanborn) map coverage for the site the site and surrounding areas. Copies of the Sanborn maps are included in Appendix E. A summary of the information reviewed is presented below:

SANBORN REVIEW			
Year	**Summary (on-site)**	**Summary (off-site)**	**Concerns**
1885	A dwelling and a barn yard are depicted on the northern portion of the site. The remainder of the site is not depicted.	*North:* East 4th Street, beyond which, S.H. Pendleton Lumber Yard is depicted. *South:* The area south of the site is not depicted. *East:* Railroad tracks and Southern California (Sante Fe) Depot are depicted. *West:* A dwelling is depicted.	None
1906	Southern Pacific Railroad Depot is depicted on the northern portion of the site. Railroad tracks are depicted across the site.	*North:* East 4th Street, beyond which Southern Chill Creamery & Ice Co. is depicted. *South:* The area is not depicted. *Southwest:* East 2nd Street and Cal Fruit Canners Association are depicted. *East:* Railroad tracks and AT&SF Railroad Depot are depicted. *West:* North Evergreen Street, Breeden Street, and vacant land are depicted.	None, see below
1949	Southern Pacific Railroad Depot is depicted on the northern portion of the site. Section Housing is	*North:* East 4th Street, beyond which railroad tracks are depicted. *South:* The area is not depicted.	None, see below

SANBORN REVIEW			
Year	**Summary (on-site)**	**Summary (off-site)**	**Concerns**
	depicted on the southern portion of the site. A lumber shed is depicted on the western portion of the site. Railroad tracks are depicted across the site.	*Southwest:* East Second Street, two vacant buildings and railroad tracks are depicted. *East:* AT&SF Railroad Depot and railroad tracks are depicted. *West:* North Evergreen Street, Breeden Street, and lumber sheds are depicted.	
1963	Southern Pacific Railroad Depot is depicted on the northern portion of the site. Section Housing is depicted on the southern portion of the site. A lumber shed is depicted on the western portion of the site. Railroad tracks are depicted across the site.	*North:* East 4th Street, beyond which railroad tracks are depicted. *South:* The area is not depicted. *Southwest:* Railroad tracks and vacant land are depicted. *East:* AT&SF Railroad Depot and railroad tracks are depicted. *West:* North Evergreen Street, Breeden Street, and lumber sheds are depicted.	None, see below
1969	Southern Pacific Railroad Depot is depicted on the northern portion of the site. Section Housing is depicted on the southern portion of the site. A planing mill and an office are depicted on the western portion of the site. Railroad tracks are depicted across the site.	*North:* East 4th Street, beyond which railroad tracks are depicted. *South:* The area is not depicted. *East:* AT&SF Railroad Depot and railroad tracks are depicted. *Southwest:* Two concrete structures and East 2nd Street are depicted. *West:* Taylor Street is depicted, beyond which is a parking lot.	None, see below

A review of the above-referenced historical Sanborn maps revealed that the site was developed with railroad tracks and a railway station from beginning in 1906. A summary of previous site investigation activities to assess the former use of the site as a railway station is presented in Section 5.3. The review of Sanborn maps did not identify additional specific concerns or RECs.

6.0 REGULATORY RECORDS REVIEW

VERTEX obtained a regulatory database report as specified in Section 12.0. Review of databases and files from federal, state, and local environmental regulatory agencies was used to identify use, generation, storage, treatment, or disposal of hazardous materials and chemicals, or release incidents of such materials that might have impacted the site. The databases discussed in the following sections address ASTM requirements. Additional federal and state databases may have also been reviewed, and if so, are listed in the table below. A copy of the database report is included in Appendix F.

VERTEX's review of these listings assessed the potential for soil, groundwater, and soil vapor impacts to the subject site from on-site listings or listings at surrounding facilities, taking into account such factors as the assumed groundwater depth and flow direction, regulatory status, distance from the site, and other information reported by the regulatory database(s) and other sources.

A summary of the database information is provided in the following table.

REGULATORY DATABASE SUMMARY			
DATABASE	**ASTM RADIUS**	**TARGET PROPERTY**	**SURROUNDING FACILITIES**
National Priorities List (NPL)/Proposed NPL/De-listed NPL	1 Mile	-	0
Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Sites	½ Mile	-	1
CERCLIS No Further Remedial Action Planned (CERC-NFRAP) Sites	½ Mile	-	0
Corrective Action Report (CORRACTS)	1 Mile	-	1
Resource Conservation and Recovery Act Treatment, Storage, and Disposal Facilities (RCRA-TSDF)	½ Mile	-	0
RCRA Hazardous Waste Generators (RCRA-LQG)	¼ Mile	-	0
RCRA Hazardous Waste Generators (RCRA-SQG)	¼ Mile	-	30
RCRA Former Hazardous Waste Generators/No Longer Regulated Sites (RCRA NonGen/NLR)	¼ Mile	-	1
Facility Index System (FINDS)	Target Property	-	-

REGULATORY DATABASE SUMMARY			
DATABASE	**ASTM RADIUS**	**TARGET PROPERTY**	**SURROUNDING FACILITIES**
Emergency Response Notification System (ERNS)	Target Property	-	-
Federal Institutional Controls/Engineering Controls (US ENG CONTROLS)	½ Mile	-	0
RESPONSE	1 Mile	-	0
ENVIROSTOR	1 Mile	-	20
State and tribal voluntary cleanup sites (VCP)	1 Mile	-	1
HAULERS	Target Property	1	-
Solid Waste Facilities/Landfills (CA SWF/LF)	½ Mile	-	2
Leaking Storage Tank Lists (CA LUST)	½ Mile	-	38
Spills, Leaks, Investigations & Cleanups	½ Mile	-	1
Underground Storage Tank (UST)	¼ Mile	-	3
Aboveground Storage Tank (AST)	¼ Mile	-	2
CA FID UST	¼ Mile	-	5
HIST UST	¼ Mile	-	11
SWEEPS UST	¼ Mile	-	11
Drycleaners	¼ Mile	-	0
US BROWNFIELDS	½ Mile	-	0
CA HIST CORTESE	½ Mile	-	15
CA Bond Exp. Plan	1 Mile	-	1
CA Notify 65	¼ Mile	-	3
San Bernardino Co. Permit	¼ Mile	-	3
CA PROC	½ Mile	-	1
CA HWT	¼ Mile	-	1
CA HWP	1Mile	-	1
HAZNET	Target Property	-	-

REGULATORY DATABASE SUMMARY			
DATABASE	**ASTM RADIUS**	**TARGET PROPERTY**	**SURROUNDING FACILITIES**
EMI	Target Property	-	-
EDR MGP	1 Mile	-	2
EDR Historical Auto Stations	¼ Mile	-	59
EDR Historical Cleaners	¼ Mile	-	13

The EDR database report includes an orphan summary. This summary identifies facilities that are listed on one of the above-referenced databases or lists but do not include complete or accurate geographic data. Consequently, EDR was unable to map the facilities in relation to the site. Review of the EDR report revealed two Orphan listings (SWF/LF & ENVIROSTOR/VCP); however, these facilities are not located within 0.50 miles of the site.

6.1 On-Site Listings

The site was identified on one database reviewed. The site was identified on the HAULERS (Registered Waste Tire Haulers Listing) as Allis Tires, 1030 East 4th Street as a generator, small quantity. No permit record for this business was reported. No additional relevant information was provided. This listing likely resulted from the hauling of waste tires away from the facility and does not pose an environmental concern with respect to the site.

6.2 Off-Site Listings

A review of state and federal regulatory records revealed several facilities within ASTM-specified search radii of the site. Five of the facilities identified on the database listings are located in close proximity to the site and are summarized as follows:

OFF-SITE STATE AND FEDERAL LISTINGS			
FACILITY	**DISTANCE AND DIRECTION/ GRADIENT**	**REGULATORY STATUS**	**CONCERNS**
Berlin Auto Center 115 North Standard Avenue	Adjacent southwest/ Cross-gradient	**RCRA-SQG:** Generates more than 100 and less than 1000 kg of hazardous waste during any calendar month. **EDR US Hist Auto Stat:** Listed under multiple auto service, auto painting, and autobody centers from 1999 to 2012. No violations or releases were reported at this facility.	None
Joes Transmission 117 North Standard Avenue	Adjacent southwest/ Cross-gradient	**RCRA-SQG:** Generates more than 100 and less than 1000 kg of hazardous waste during any calendar month. No violations or releases were reported at this facility.	None
Tom's Truck Center 936 East 3rd Street	70-feet west/Cross-gradient	**RCRA-SQG:** Generates more than 100 and less than 1000 kg of hazardous waste during any calendar month. No violations or releases were reported at this facility.	None
Tom's Truck Center 1008 East 4th Street	70-feet west/Up-gradient	**HIST UST:** Identified for one, 7,600 gallon gasoline UST. **SWEEPS UST:** Identified for one, 7,500 gallon gasoline UST No releases were reported at this facility.	None
Madison Materials 1035 East 4th Street.	80-feet north/ Cross-gradient	**SWF/LF:** Listed as a large volume transfer/processing facility of construction/demolition debris, green materials, inert, and metals. **AST:** Listed for one, 1,320 gallon AST. Contents not reported. **RCRA-SQG:** Generating ignitable hazardous wastes, corrosive hazardous wastes, wastewaters, process residuals, preservative drips, and spent solvent formulations from wood preserving processes, and bottom sediment sludge from the treatment of wastewaters from wood preserving processes. No violations have been reported related to this facility **FINDS:** Pointing to other sources of information **NPDES:** Active National Pollutant Discharge Elimination System permit as of 09/03/2013. **HAZNET:** Generator of other inorganic solid waste, organic liquids (non-solvents) with halogens, storage, bulking, and/or transfer off site--No Treatment/Recovery. No releases were reported at this facility.	None

No violations or releases were reported at the five facilities located in close proximity to the site. Numerous facilities were identified on state and federal regulatory databases that are located within the vicinity of the site and up-gradient. Based on the number of industrial uses listed in

regulatory databases that are located within the vicinity of the site, groundwater quality in the area may be degraded. However, review of select records on file on GeoTracker did not identify upgradient releases cases that represent an environmental concern to the site. Additionally, based on the depth to groundwater (greater than 70 feet bgs) and the findings from the 2013 VERTEX Phase II LSI which did not identify constituents of concern in soil above applicable RWQCB ESLs, , we conclude that the off-site releases do not represent a risk of vapor intrusion. The remaining database listings are not considered an environmental concern to the site based on distance, regulatory status, and apparent groundwater gradient.

6.3 Additional Environmental Record Sources

VERTEX contacted local agencies to request information relevant to the site and vicinity. A summary of the agencies contacted and the information obtained is included in the following table.

LOCAL RESEARCH SUMMARY		
OFFICE	**INFORMATION OBTAINED**	**CONCERNS**
Orange County Assessor's Office	VERTEX obtained detailed property information for the subject site.	None
Orange County Recorder's Office	VERTEX obtained deed records for the subject site.	None
Orange County Fire Authority	VERTEX requested records pertaining to USTs and hazardous materials. A response is pending.	None
Orange County Health Care Agency	VERTEX requested records pertaining to USTs and hazardous materials. A response is pending.	None
City of Santa Ana Planning Department	VERTEX reviewed available permits for the site. The current site buildings were permitted in 1994.	None
City of Santa Ana Municipal Utility Service	VERTEX was informed water and sewer for the site is provided by the City of Santa. An initial connection date was not available.	NA
Regional Water Quality Control Board (RWQCB)	No records were found for the site. VERTEX reviewed records for nearby surrounding properties on the RWQCB's GeoTracker website.	None

7.0 SITE RECONNAISSANCE

VERTEX representative Mark Jirgal, Senior Project Manager, conducted a site visit on March 11, 2015 between 9:20 a.m. and 10:20 a.m. Ms. Sandra Victoria, Store Manager with Extra Space Storage, escorted VERTEX during the site visit and answered questions regarding site operations.

During the site visit, the weather was overcast with a temperature of approximately 69^{o} Fahrenheit. The site visit consisted of a walk-through of the site and visual reconnaissance of neighboring properties from curbside. Photographic documentation of the site visit is included in Appendix A.

7.1 Access Restrictions

VERTEX visually and physically observed accessible areas of the site. At the time of VERTEX's visit, Ms. Victoria did not have the keys to the apartment; therefore, the interior of the on-site manager's apartment was not observed. Representative interior and exterior areas of the site buildings were observed. No limitations imposed by physical obstructions or other limiting conditions were observed, except for access to the on-site manager's apartment and leased storage units.

7.2 Site Observations

Observations of site conditions were made during the site reconnaissance and are summarized in the table below. Issues of concern are discussed in greater detail following the table.

SITE OBSERVATIONS		
DESCRIPTION	**REPORTED/ OBSERVED ON-SITE Y/N**	**COMMENTS**
Significant Quantities of Hazardous Substances and Petroleum Products	N	The site currently utilizes small quantities of janitorial cleaning chemicals and maintenance supplies stored in a dedicated storage unit. No environmental concerns were noted.
UST(s)	N	VERTEX did not observe fill pipes, vent pipes, or other evidence of UST(s). VERTEX did not observe operations or equipment that are typically associated with significant fuel or chemical storage that typically utilizes USTs.
AST(s)	N	VERTEX did not observe evidence of AST(s). VERTEX did not observe operations or equipment that are typically associated with significant fuel or chemical storage that typically utilizes ASTs.
Strong, Pungent, or Noxious Odors	N	Not identified during the site visit.
Pools of Liquid	N	Not identified during the site visit.
Drums	N	Not identified during the site visit.
Unidentified Substance Containers	N	None
Polychlorinated Biphenyls (PCB)-containing Equipment	N	No transformers were noted on-site.
Utilities (Electricity/ Natural Gas)	Y	Electricity – supplied by Southern California Edison Natural gas – supplied by the Gas Company
Hydraulic Equipment	N	Not identified during the site visit.
Water Supply	Y	Water is supplied to the site by the City of Santa Ana Municipal Utility Service. A connection date was not available.
Wells	N	On-site water extraction or groundwater monitoring wells were not identified or reported.
Wastewater	Y	Wastewater discharges from the site are limited to domestic discharges with no indicated process/industrial type discharges. Sewer service is provided to the site by the City of Santa Ana Municipal Utility Service. A connection date was not available.
Septic	N	Not identified during the site visit.
Stormwater	Y	Stormwater at the site is generally diverted to the south and flows off the site onto North Standard Avenue to the southwest and to an off-site culvert located just south of the site. No storm drains were observed on site.
Flood Plain	N	According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM), the site is not located within the 100- or 500-year flood zones.
Pits, Ponds, Lagoons	N	Not identified during the site visit.

SITE OBSERVATIONS		
DESCRIPTION	**REPORTED/ OBSERVED ON-SITE Y/N**	**COMMENTS**
Stained Soil, Stained Pavement, Corrosion to Pavement	N	Not identified during the site visit.
Stressed Vegetation	N	Not identified during the site visit.
Solid Waste	Y	The site currently maintains one solid waste dumpster that is serviced by Waste Management. Additional waste streams were not identified. The dumpster sits on concrete pavement within a locked enclosure. No evidence of staining was observed in the vicinity of the dumpster.
Hazardous Waste Management	N	None
Heating/Cooling	Y	The apartment and office building are heated and cooled by natural gas and electric powered systems.
Drains, Sumps, Oil/Water Separators/Sand Traps	N	VERTEX did not observe drains, sumps, or oil/water separators at the site.
Vapor Intrusion	N	As part of this assessment, VERTEX assessed the potential for impacts to the site from potential on- and off-site sources of vapor intrusion. The potential for impacts from off-site properties included a review of current off-site operations (see Section 2.4), a review of historical operations (see Section 5.2), and a review of regulatory database records (see Section 6.2). Potential sources of on- or off-site vapor intrusion were not identified.

8.0 DATA GAPS

At the time of VERTEX's visit the interior of the on-site manager's apartment was not observed due to lack of access; however, given the age of the site buildings and because typical observations within on-site manager's apartments typically are not necessary to identifying RECs at a site, VERTEX does not consider this to be a significant data gap. Significant data gaps that would affect VERTEX's ability to identify RECs at the site were not encountered during this assessment. No deviations or deletions from the scope of work defined by ASTM E 1527-13 were intentionally made.

Our conclusions regarding the potential environmental impact of nearby, off-site facilities on the site are based on readily available information from the environmental databases and the assumed groundwater flow direction as inferred from the topography of the site and surrounding area. A detailed file review of each facility was beyond the scope of work. VERTEX reviewed select records available on GeoTracker for off-site release cases.

9.0 ADDITIONAL SERVICES

The following additional (non-ASTM) services were performed as part of this assessment.

9.1 Asbestos-Containing Materials (ACMs)

Based on the date of construction (1995), ACMs are not expected to be located at the site. However, ACMs may still be found in some non-friable materials and if discovered during work that will disturb these materials, must be handled in accordance with the National Emission Standard for Hazardous Air Pollutants (NESHAP) and other applicable local, state, and federal regulations.

9.2 Lead-Based Paint (LBP)

Based on the date of construction (1995), and the fact that LBP was not used in the construction of buildings during the mid-1990s, it is unlikely that LBP is present at the site. LBP therefore is not considered a concern to this investigation.

10.0 CONCLUSIONS AND RECOMMENDATIONS

VERTEX has performed a Phase I ESA in conformance with the scope and limitations of ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, of the Extra Space Storage facility located at 1030 East 4th Street, Santa Ana, California. Exceptions to, or deletions from, this practice are described in Section 8.0 of this report. This assessment has revealed no evidence of RECs in connection with the site. Therefore, no additional investigation is recommended at this time.

11.0 SCOPE AND LIMITATIONS

11.1 Purpose

The primary purpose of this assessment is to identify, to the extent feasible pursuant to the processes prescribed in ASTM E 1527-13, RECs in connection with the site. As defined in ASTM E 1527-13, a REC is "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." It does not include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A "historical REC" is defined in ASTM E 1527-13 as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)." ASTM E 1527-13 defines the term "controlled REC" as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

In conducting this assessment, VERTEX followed ASTM E 1527-13, as well as the U.S. Environmental Protections Agency's All Appropriate Inquires (AAI) Final Rule of November 1, 2005 as amended December 30, 2013. Any exceptions to, or deletions from, this practice are described in Section 8.0 of the report. ASTM defines good commercial and customary practice for conducting an ESA of a parcel of commercial real estate with respect to the range of

contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. 9601) and petroleum products. Therefore, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability. The practice constitutes "all appropriate inquiries into the previous ownership and uses of the facility in accordance with generally accepted good commercial and customary standards and practices" as defined at 42 U.S.C. 9601(35)(B).

As part of ASTM E 1527-13, Phase I ESAs must be conducted by or under the supervision of a qualified Environmental Professional. The AAI Final Rule defines an Environmental Professional as someone who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases on, at, in, or to a property, sufficient to meet the objectives and performance factors of the rule. We declare that to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 40 C.F.R. 312.10. We have the specific qualifications based on education, training and experience to assess a property of the nature, history, and setting of the site. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

11.2 Detailed Scope-of-Services

As part of this Phase I ESA, and in accordance with the provisions of ASTM E 1527-13, VERTEX performed a visual reconnaissance of the site, noted use of adjoining properties, and conducted historical and regulatory records research. The following provides a more detailed description of the scope of services:

- Visual inspection of the site building(s), if present, and grounds to identify potential for on-site petroleum or hazardous material release(s).

- Visual inspection and categorization of the use of abutting and adjoining properties as potential off-site sources of petroleum or hazardous material contamination to the site.

- Review of readily available state and federal regulatory records related to on-site activities and to potential off-site activities to identify sources of petroleum or hazardous material contamination to the site.

- Review of readily available historical information to assess for potential on-site and off-site sources of petroleum or hazardous material contamination to the site.

- Review of readily available local records related to historical site ownership, usage, and development. This includes obtaining information from local environmental authorities to identify complaints, violations, citations, inspections, environmental liens, activity and use limitations (AULs), or institutional and engineering controls related to the site.

- Review of readily available documents and other resources for the site and site vicinity to evaluate current and historical development and renovation activities.

- Visual assessment for suspect Polychlorinated Biphenyl (PCB) containing equipment, e.g., transformers, elevators. Please note, this scope of work does not include an evaluation for or testing of suspect PCBs in building materials such as caulking, mastic/adhesives, oil-based paints, coatings and sealants. Currently, there are no regulatory requirements to test in-place building materials for the presence of PCBs. Although testing is not required for in place materials, owners are required to know the content of the waste streams that they generate and potentially sign waste profiles prior to disposal facility acceptance. Therefore, if renovation or demolition activities are to be conducted at the site that will result in the generation of demolition debris, a contractor or waste disposal facility may request certification of knowledge of the waste stream or testing to determine if the material(s) contain PCBs for proper handling and disposal purposes. VERTEX can further discuss this issue and provide a proposal for testing and analysis for PCBs if requested.

- Visual inspection of the accessible areas of the site and review of readily available public records to assess the presence or absence of the following ASTM E 1527-13 non-scope considerations: ACMs, and LBP.

- Preparation of a Phase I ESA report.

11.3 Significant Assumptions

Information obtained from the Client, the Client's representative, site representatives, individuals interviewed, and prior environmental reports is considered to be accurate unless VERTEX's reasonable inquiries clearly revealed otherwise.

Conditions observed were considered to be representative of areas that were not observed unless otherwise indicated.

The primary direction of groundwater flow is assumed to follow topography, unless otherwise indicated by measurement of the potentiometric surface or other quantifiable data.

VERTEX reviewed reasonably ascertainable public records with respect to past operations and ownership of the site in an attempt to determine past site usage. VERTEX is not a professional title insurance firm and makes no guarantee, express or implied, that the listing reviewed represented a comprehensive delineation of past site ownership or tenancy for legal purposes. The accuracy and completeness of information maintained in public records by public agencies or other entities is assumed to be sufficient for the purposes of this Phase I ESA, and independent verification of its validity is beyond the scope of this investigation.

11.4 Limitations and Exceptions

Our professional services have been performed, our findings obtained, and our recommendations prepared in accordance with customary principles and practices in the fields of environmental science and engineering. The findings within this ESA utilized information that was practically

reviewable per ASTM Practice E 1527-13, meaning that only relevant data relating to the subject site has been incorporated into the findings, disregarding extraordinary analysis of irrelevant data. The investigation conducted for this ESA was limited to data that were reasonably ascertainable, meaning that the information was publicly available, obtainable within the cost and time constraints under the scope of services for this project, and practically available. VERTEX is not responsible for the independent conclusions, opinions, or recommendations made by others based on the records review, site inspection, field exploration, and laboratory test data presented in this report.

It should be noted that all surficial environmental assessments are inherently limited in the sense that conclusions are drawn and recommendations developed from information obtained from limited research and site evaluation. Subsurface conditions were not field-investigated as part of this study and may differ from the conditions implied by the surficial observations. Additionally, the passage of time may result in a change in the environmental characteristics at this site and surrounding properties. VERTEX does not warrant against future operations or conditions, or against operations or conditions present of a type or at a location not investigated. VERTEX does not assume responsibility for other environmental issues that may be associated with the subject site.

This study is not intended to assess or otherwise determine if soil contamination, waste emplacement, or groundwater contamination exists. These data are accessible only by sampling of subsurface material and groundwater through the completion of soil borings and the installation of monitoring wells and the chemical analyses of soil and groundwater samples. The scope of work, determined by the client, did not include these activities.

In view of the rapidly changing status of environmental laws, regulations and guidelines, VERTEX cannot be responsible for changes in laws, regulations, or guidelines that occur after the study has been completed and that may affect the subject site.

It must be noted that no investigation can absolutely rule out the existence of hazardous materials at a given site. This assessment has been based upon prior site history and observable conditions. Existing hazardous materials and contaminants can escape detection using these methods.

Significant data gaps or accessibility limitations that would affect VERTEX's ability to identify RECs at the site are discussed in Section 8.0.

While VERTEX may comment on environmental compliance matters that fall under the scope of this assessment, this study does not constitute a regulatory compliance audit, and does not document compliance with applicable state, federal, or local regulations.

11.5 Special Terms and Conditions

No special Terms and Conditions were agreed upon between the User and the Environmental Professional.

11.6 User Reliance

This report is for the exclusive use of Extra Space Storage LLC and its insurers, counsel and accountants. Use of this report by any other party shall be at such party's sole risk.

Dear Mr. Selby:

We are pleased to present our "Report of Foundation Investigation, Proposed All Aboard Mini Storage, Between First and Fourth Streets and West of the Santa Fe Railroad Depot Grounds, Santa Ana, California." We were advised of the features of the development with Mr. Jim Barney of Jordan Valli Architects, Inc., who also provided us with a site plan showing the location of the proposed buildings.

The results of our investigation are presented in the report, along with recommendations for grading, foundation design, and floor slab support for the proposed buildings. Recommendations for paving design for automobile and truck traffic areas are also included.

Please call us if you have any questions or if we can be of further service to you on this or future projects.

Respectfully submitted,

1.0 SUMMARY

A foundation investigation has been conducted for the proposed storage facility to be located between First and Fourth Streets and west of the Santa Fe Railroad Depot grounds, in Santa Ana, California.

The proposed facility will consist of four one-story storage buildings and a two-story manager's unit and office building. The property is currently undeveloped and relatively level.

Fill soils to ½ foot in thickness were encountered in one of the borings. These fills consist of silty gravel. The natural soils beneath the site consist of silty sand, silt and sand. The natural soils are moderately firm and medium dense at their present moisture content, but they will loose strength when wetted. Water was not encountered within the depth drilled.

As encountered, the existing natural soils are moderately firm, but will loose strength when wetted. At their present condition, the natural soils are not considered suitable for support of foundations, floor slabs, or paving. Accordingly, we recommend that the upper natural soils be removed and replaced with properly compacted fill. If the grading recommendations are followed, the proposed structures may be established in the resulting compacted fill soils.

* * * * *

2.0 SCOPE

This report presents the results of a foundation investigation performed to provide design criteria for the subject proposed storage facility. The locations of the proposed structures and of our exploratory borings are shown on Plate 1, Plot Plan.

This investigation was authorized to determine the physical characteristics of the soils at selected locations and to provide recommendations for grading, for design of foundations and floor slab support for the proposed buildings, and for paving design. More specifically, the scope of the investigation included the following objectives.

- To evaluate the existing surface and subsurface conditions, including the soil and ground water conditions, within the area of proposed construction
- To recommend alternative foundation systems together with the associated design parameters
- To provide recommendations for floor slab support
- To provide pavement thickness recommendations
- To present general recommendations concerning construction procedures and quality control measures relating to earthwork

Our recommendations are based on the results of our field explorations and laboratory tests and associated engineering analyses. The results of the field explorations and laboratory tests are presented in the Appendix.

Our professional services have been performed using that degree of care and skill ordinarily exercised, under similar circumstances, by reputable geotechnical consultants practicing in this or similar localities. *No other warranty, expressed or implied, is made as to the professional advice included in this report.* This report has been prepared for Rail Pacific, Inc., and their consultants to be used solely in the evaluation of the subject project. The report has not been prepared for use by other parties, and may not contain sufficient information for purposes of other parties or other uses.

3.0 STRUCTURAL INFORMATION

The proposed storage facility will consist of four single-story storage buildings and a two-story manager's unit and office building. The storage buildings will be of steel frame construction and the managers's unit and office building of wood frame and stucco construction. We were informed that maximum column loads are expected to be on the order of 7,000 pounds. Wall loads will be about 2,000 pounds per lineal foot. The proposed buildings will be established at about the existing grade.

Paved parking areas and driveways are also planned. Recreational Vehicle (RV) parking and storage area are also planned on the southeast portion of the site.

4.0 SITE CONDITIONS

The proposed storage facility will be located west of Santa Fe Railroad Depot grounds, between First and Fourth Streets in Santa Ana, California.

The site is generally flat. Most of the site is undeveloped. The southwest portion of the site is currently occupied by Liberty Hard Woods, wood storage sheds, and an office building. These structures will be demolished during clearing operations of the site. The remainder of the site is currently vacant.

5.0 SOIL CONDITIONS

Fill soils to ½ foot in thickness were encountered in one of the borings. These soils consist of silty gravel. Deeper and/or poorer quality fill may be encountered between the boring locations.

The natural soils beneath the site consist of silty sand, silt and sand. The sandy soils are medium dense to dense, the silt soils are only moderately firm at their present moisture content. The silt soils will loose strength when wetted. Water was not encountered within the depth explored.

6.0 CONCLUSIONS AND RECOMMENDATIONS

6.1 GENERAL

The on-site natural soils are moderately firm and medium dense at their present moisture content, but they will loose strength when wetted. At their present condition, the on-site natural soils are not considered suitable for foundation and floor slab support. If the grading recommendations are followed, the proposed buildings may be supported on compacted fill.

We recommend overexcavation and placement of at least 2 feet of fill beneath the footings and at least 1 foot of compacted fill beneath the floor slabs and areas to be paved.

6.2 FOUNDATIONS

Bearing Value

Spread footings established on properly compacted fill may be designed to impose a net dead plus live load pressure of 2,000 pounds per square foot. A one-third increase in the bearing value may be used for wind or seismic loads. Exterior footings should extend to a depth of at least 2 feet below the adjacent final grade. Interior footings should extend to a depth of at least 1½ feet below the top of the adjacent floor slab. Since the recommended bearing value is a net value, the weight of the concrete in the footings may be taken as equal to 50 pounds per cubic foot, and the weight of the soil backfill may be neglected.

While the actual bearing value of the compacted fill will depend on the material used and the compaction methods employed, the quoted value will be applicable if the soils recommended in this report are used and are compacted as recommended. The bearing value of the fill should be confirmed after completion of the grading.

Settlement

Settlement of the proposed buildings supported in the manner recommended are expected to be on the order of ¼ inch. Differential settlement is not expected to be greater than ¼ inch.

Lateral Loads

Lateral loads may be resisted by soil friction and by the passive resistance of the soils. A coefficient of friction of 0.4 may be used between footings or the floor slabs on grade and the supporting compacted fill soils. The passive resistance of the compacted fill soils against footings may be assumed to be equal to the pressure developed by a fluid with a density of 300 pounds per cubic foot. The frictional resistance and the passive resistance of the soils may be combined without reduction in determining the total lateral resistance.

Footing Observation

To verify the presence of satisfactory soils at design elevations, all footing excavations should be observed by personnel of our firm. Footing excavations should be cleaned of any loosened soil and debris before placing steel or concrete. Footing excavations should be observed and probed for soft areas. Any soft or loose soils should be removed and replaced as properly compacted fill.

All applicable requirements of the California Construction and General Industry Safety Orders, the Occupational Safety and Health Act of 1970, and the Construction Safety Act should be met. Inspection of footing excavations may be required by the appropriate reviewing governmental agencies. The contractor should be familiar with the inspection requirements of the reviewing agencies.

6.3 BACKFILL

The on-site natural soils, less any debris or organic material, may be used in the required fills. All required footing backfill and utility trench backfill should be mechanically compacted. Flooding should not be permitted. The exterior grades should be sloped to drain away from the structures to minimize ponding of water adjacent to the foundations. Proper compaction of the backfill will be necessary to minimize settlement of the backfill and consequent settlement of the overlying walks, paving, and utilities.

Some settlement of the backfill should be anticipated, and any utilities supported therein should be designed to accept differential settlement, particularly at the points of entry to the building. Also, provisions should be made for some settlement of concrete walks on-grade supported on fill.

6.4 GRADING

General

The proposed storage facility will be established at approximately the existing grade. To provide support for spread footings, building floor slabs, and pavement, any unsuitable materials should be removed and replaced by compacted fill. A minimum of 2 feet of compacted fill beneath the footings and at least 1 foot beneath floor slabs and pavement should be provided. Such fill should extend at least 5 feet beyond structures and adjacent walls and slabs in plan.

Site Preparation and Compaction

After clearing the site, the on-site materials should be excavated as recommended. After excavating and prior to placement of any compacted fill, the exposed soils should be carefully inspected to verify the removal of unsuitable deposits. Next, the exposed soils should be proofrolled with heavy compaction equipment to disclose areas of soft or yielding subgrade. Such materials should also be removed. Next the exposed soils should be scarified to a depth of 6 inches and compacted to at least 90% of the maximum density obtainable by the ASTM Designation D1557-91 method of compaction. After inspecting and compacting the exposed soils, the required fill should be placed in horizontal lifts not more than 8 inches in thickness and compacted to at least 90%. The soils should be compacted at a moisture content varying no more than 2% above or below optimum moisture content.

Material For Fill

The on-site soils, less debris and organic material, may be used in the required fills. Any required imported fill should consist of relatively non-expansive soils with an Expansion Index of less than 35. Any import material should contain sufficient fines (binder material) so as to provide a compacted fill which will be relatively impermeable and which will be stable in shallow trenches.

Grading Observation

The excavation of the upper soils and the compaction of all required fill should be observed and tested by our firm. All applicable requirements of the California Construction and General Industry Safety Orders, the Occupational Safety and Health Act of 1970, and the Construction Safety Act should be met.

The governmental agencies having jurisdiction over the project should be notified prior to commencement of grading so that the necessary grading permits may be obtained and arrangements made for the required inspection.

6.5 FLOOR SLAB SUPPORT

If the subgrade is prepared as recommended, the building floor slabs and other concrete walks and slabs may be supported on-grade. The required thickness and reinforcing of the concrete slabs will depend on the imposed loadings as well as the structural characteristics of the concrete. For design of concrete slabs supported on the recommended compacted fill soils, a modulus of subgrade reaction (k) of 150 pounds per cubic inch may be used. To provide protection against vapor and water transmission through the building floor slabs, we recommend that the floor slabs be underlain by a layer of Caltrans Class 2 permeable material or crushed rock at least 4 inches thick. A suggested gradation for the rock layer would be as follows:

Sieve Size	Percent Passing
3/4"	90 - 100
No. 4	0 - 10
No. 100	0 - 3

For areas where moisture-sensitive floor covering is planned or where moisture sensitive tenant materials might be stored, we recommend that the gravel layer be overlain by a 10-mil impermeable plastic membrane to provide additional protection against water vapor transmission through the slab. The vapor barrier should be installed in accordance with the manufacturers instructions. We recommend that at least a 2-foot lap be provided at the membrane edges or that the edges be sealed.

To protect the membrane during later concrete work and to facilitate curing of the concrete and reduce slab curling, a 2-inch-thick, clean-sand bedding may be placed over the membrane. If this sand bedding is used, care should be taken during concrete placement to prevent displacement of the sand. A low-slump concrete (4-inch maximum slump) should be used to further minimize possible curling of the slabs. The concrete slabs should be allowed to cure properly before placing vinyl or other moisture-sensitive floor covering.

7.0 PAVING

A California Bearing Ratio (CBR) test was performed on a composite sample of the upper natural soils. CBR values of 3 and 5 at 90 and 95% compaction, respectively, were obtained. The results of the test is presented in the Appendix.

To provide support for paving, the subgrade soils should be prepared as recommended in the previous section on Grading. Compaction of the subgrade to at least 90%, including trench backfills, will be important for paving support. The preparation of the paving subgrade should be done immediately prior to the placement of the base course. Adequate drainage of the paved surface must be provided to reduce infiltration of water into the subgrade soils.

The required paving thickness and base thickness will depend on the subgrade soils and on the Traffic Index applicable to the intended usage. For purposes of pavement design, it was assumed that the on-site soils compacted as recommended will be used as the supporting subgrade. As an option, design thicknesses for a subgrade soil consisting of non-expansive imported soil with a CBR of at least 10, are also provided. These values should be confirmed prior to construction so that any required modifications may be made based on testing of the actual materials to be used.

Paving sections have been estimated for the subgrade options described based on assumed Traffic Indexes of 5 for parking areas, and of 6 (assuming light commercial truck traffic) for driveways and loading areas. These paving sections were established based on the Orange County Design Method.

Subgrade Option	Assumed Traffic Index	Paving Section
Existing Soils (CBR - 2)	5	3 inches Asphalt Paving; 8 inches Base Course
	6	4 inches Asphalt Paving; 10 inches Base Course
Non-Expansive Fill (CBR - 10)	5	3 inches Asphalt Paving; 4 inches Base Course
	6	4 inches Asphalt Paving; 5 inches Base Course

The base course should meet the specifications for Class 2 Aggregate Base as defined in Section 26 of the State of California, Department of Transportation, Standard Specifications, dated January 1988. Alternatively, the base course could meet the specifications for untreated base as defined in Section 200-2 of the 1991 edition of the Standard Specifications for Public Works Construction. The base course should be compacted to at least 95%. Careful inspection is recommended to verify that the recommended thicknesses or greater are achieved and that proper construction procedures are used.

8.0 BASIS FOR RECOMMENDATIONS

The recommendations provided in this report are based on our understanding of the described project information and on our interpretation of the data collected during the subsurface exploration. We have made our recommendations based on experience with similar subsurface conditions under similar loading conditions. The recommendations apply to the specific project discussed in this report; therefore, any change in building loads, building locations, or site grades should be provided to us so we may review our conclusions and recommendations and make any necessary modifications.

The recommendations provided in this report are also based on the assumption that the necessary geotechnical observations and testing during construction will be performed by representatives of our firm. The field observation services are considered a continuation of the geotechnical investigation and essential to verify that the actual soil conditions are as anticipated. This also provides for the procedure whereby the Client can be advised of unanticipated or changed conditions that would require modifications of our original recommendations. In addition, the presence of our representatives at the site provides the Client with an independent professional opinion regarding the geotechnically related construction procedures. If another firm is retained for the geotechnical observation services, our professional responsibility and liability would be impaired.

PLOT PL

SCALE: 1" = 10(

LAW/CRANDALL,

PL

FORM 137-A

Confined consolidation tests were performed on three undisturbed samples to determine the compressibility of the soils. Water was added to two of the samples during testing to illustrate the effect of moisture on the compressibility. The results of the tests are presented on Plates A-4.1 and A-4.2, Consolidation Test Data.

The optinium moisture content and maximum dry density of the upper soils were determined by performing a compaction test on a composite sample from borings 1 and 2. The test was performed in accordance with the ASTM Designation D1557-91 method of compaction. After completion of the compaction test, a California Bearing Ratio (CBR) test was performed in accordance with the ASTM Designation D1883-87 method. The results are presented on Plate A-5, Compaction and C.B.R. Test Data.

COARSE GRAINED SOILS (More than 50% of material is LARGER than No. 200 sieve size)	GRAVELS (More than 50% of coarse fraction is LARGER than the No. 4 sieve size)	CLEAN GRAVELS (Little or no fines)		GW	Well graded gravels, gravel - sand mixtures, little or no fines.
				GP	Poorly graded gravels or gravel - sand mixtures, little or no fines.
		GRAVELS WITH FINES (Appreciable amount of fines)		GM	Silty gravels, gravel - sand - silt mixtures.
				GC	Clayey gravels, gravel - sand - clay mixtures.
	SANDS (More than 50% of coarse fraction is SMALLER than the No. 4 sieve size)	CLEAN SANDS (Little or no fines)		SW	Well graded sands, gravelly sands, little or no fines.
				SP	Poorly graded sands or gravelly sands, little or no fines.
		SANDS WITH FINES (Appreciable amount of fines)		SM	Silty sands, sand - silt mixtures.
				SC	Clayey sands, sand - clay mixtures.
FINE GRAINED SOILS (More than 50% of material is SMALLER than No. 200 sieve size)	SILTS AND CLAYS (Liquid limit LESS than 50)			ML	Inorganic silts and very fine sands, rock flour, silty or clayey fine sands or clayey silts with slight plasticity.
				CL	Inorganic clays of low to medium plasticity, gravelly clays, sandy clays, silty clays, lean clays.
				OL	Organic silts and organic silty clays of low plasticity.
	SILTS AND CLAYS (Liquid limit GREATER than 50)			MH	Inorganic silts, micaceous or diatomaceous fine sandy or silty soils, elastic silts.
				CH	Inorganic clays of high plasticity, fat clays.
				OH	Organic clays of medium to high plasticity, organic silts.
HIGHLY ORGANIC SOILS				Pt	Peat and other highly organic soils.

BOUNDARY CLASSIFICATIONS: Soils possessing characteristics of two groups are designated by combinations of group symbols.

EXECUTIVE SUMMARY

SECOR International Incorporated (SECOR) is pleased to present our Phase I Environmental Site Assessment (Phase I ESA). Cited below is an overview of the project, including a summary of our significant findings:

Property name ("subject property"):	All Aboard Mini Storage
Subject property address (or other physical location description):	1030 East 4th Street Santa Ana, CA 92701

GE-RE ("User"):	Ms. Rene Earls
Reason for Requesting the Phase I ESA:	Pre-Financing Due Diligence
Date of initial contact from client:	6/15/05
Date Project Authorized:	6/17/05
Date Project Completed:	7/08/05

Subject property description:	The subject property is developed with a 423 unit self-storage facility. The subject property consists of seven single-story self storage buildings and one single-story office/residence on approximately 2.92-acres. The subject property is located in a mixed industrial and commercial area in the City of Santa Ana, Orange County, California.
Subject property operations:	The subject property operates as All Aboard Mini Storage, a self-storage facility with a resident manager.

Summary of subject property History	
From at least 1895 to approximately 1906	The subject property was developed with a residential dwelling and hay barn.
From approximately 1906to approximately 1993	The subject property was developed with a train depot and associated with the Southern Pacific railroad yard.
From approximately 1993 to approximately 1995	The subject property was vacant bare land and under construction.
From approximately 1995 to the present	The subject property has been developed with the current All Aboard Mini Storage facility.

Conclusions
SECOR has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527 and the GE Capital Real Estate Scope of Work Guidelines for Environmental Due Diligence, of the All Aboard Mini Storage located at 1030 East 4th Street, Santa Ana, Orange County, California, the "subject property". Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report. This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the subject property.

1.0 INTRODUCTION

1.1 SITE NAME AND LOCATION

Subject property name:	All Aboard Mini Storage
Street address (or other physical location description):	1030 East 4th Street Santa Ana, CA 92701

Figure 1 In Appendix A presents a Site Location Map showing the location of the subject property and the general vicinity within an approximately 1-mile radius.

1.2 CONTACT INFORMATION

GE-RE ("User"):	Ms. Rene Earls, GE-RE NAD
Subject Property Owner ("Owner"):	Hyrail Partners, LLC Management Enterprises, Ms. Kathleen Durr
"Key Site Manager":	Mr. and Mrs. Sergio and Iverie Almaraz

1.3 OBJECTIVE

The objective of this Phase I Environmental Site Assessment (ESA) was to identify, to the extent feasible pursuant to the processes outlined in the GE Capital Real Estate Scope of Work Guidelines for Environmental Due Diligence, dated February 2001, and as applicable, recognized environmental conditions (RECs) or historical (HRECs), as defined by ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, ASTM Designation E 1527-00 (ASTM E1527). A REC is defined by ASTM as the presence or likely presence of any hazardous substance or petroleum products on a property under conditions that indicate an existing release, a past release, or the material threat of release of any hazardous substance or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term does not include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A HREC is defined as an environmental condition which in the past would have been considered a REC, but which may not be considered a REC currently.

1.4 SCOPE OF WORK, SIGNIFICANT ASSUMPTIONS, TERMS AND CONDITIONS

The scope of work, significant assumptions, and terms and conditions applicable to this Phase I ESA are identified in the following documents:
SECOR's Proposal for Environmental Services, Proposal Number: B3-05-423 dated June 15, 2005.
ASTM Designation E 1527-00 (ASTM E1527).
GE Capital Commercial Real Estate Financing & Services, "Scope of Work Guidelines for Conducting Phase I Environmental Due Diligence," Dated February 2001 (GECC Scope of Work).
Statement of Limitations presented in Appendix B of this report.

1.5 LIMITATIONS AND EXCEPTIONS

There were no exceptions to, or deletions from, the above-	SECOR was unable to document the historical use of the subject property prior to 1895, at which time the

referenced scope of work, with the exception of:	subject property was developed with a dwelling and hay barn. This exception is not expected to alter the conclusions of this report.
Weather-related restrictions:	None
Facility access restrictions:	None

1.6 RELIANCE

This report was prepared for the exclusive use of the following:
GE-Real Estate, North American Debt

This report is for the exclusive use of GE Real Estate and any and all holders of a note or notes secured by a mortgage, deed of trust or deed to secure debt encumbering the subject property, and their respective affiliates, designates, successors and assignees, rating agencies, prospective bond holders and bond holders, and no other party shall have any right to rely on any service provided by SECOR without prior written consent.

1.7 PROVIDED INFORMATION

Prior to initiating the site reconnaissance, SECOR requested the following information from the User of this Phase I ESA report.

Information on environmental liens on the Subject Property:	None provided
Information on site activity or use limitations:	None provided
Specialized knowledge or experience that is material to RECs in connection with the subject property:	None provided
Knowledge that subject property purchase/sale price is significantly lower than market value:	None provided
Reason why the User wants to have the Phase I ESA performed:	Pre-Financing Due Diligence

SECOR interviewed the Owner, Site Manager, and User to determine if they were aware of any pending, threatened, or past incidences of the following:

	Owner	**Subject Property Manager**	**User (GE-RE NAD)**
- Litigation relevant to hazardous substances or petroleum products in, on, or from Subject Property?	No	No	No
- Administrative proceedings relevant to hazardous substances or petroleum	No	No	No

products in, on, or from Subject Property? **- Notices from any governmental entity regarding possible violations of environmental laws or possible liability relating to hazardous substances or petroleum products?**	No	No	No

The Property Owner, Key Site Manager, and the User were asked if they know whether any documents exist that may be helpful to the completion of this Phase I ESA and, if so, whether copies can and will be provided to SECOR within reasonable time and cost constraints. Such documents include prior Phase I ESA reports, environmental permits, registration of underground storage tanks (USTs) and/or above ground storage tanks (ASTs), correspondences from environmental agencies, etc. A complete list of the documents requested in listed in Section 9.8.1 of the ASTM Practice. Documents provided to SECOR are summarized below.

Document, Source	Brief Description
Site plans and/or maps:	None provided
Title records:	None provided
Previous environmental reports (including ESAs, safety plans, community right to know plans, waste generation notices, geotechnical studies, etc.):	***Phase I Environmental Site Assessment Report for All Aboard Mini Storage, 1030 East 4th Street, Santa Ana, California*, by SECOR International Incorporated, dated September 21, 1998.** SECOR International Incorporated (SECOR) concluded that the subject property consisted of seven single-story self storage buildings and one single-story office/residence building on 2.42 acres. The seven self storage buildings were constructed of concrete walls and floors on slab on-grade concrete foundations. The office/residence was constructed of wood frame on a slab on-grade concrete foundation. The subject property was formerly a part of the Southern Pacific railroad, where cargo was loaded and unloaded, from at least 1906 to approximately 1992. The subject property was developed in approximately 1994 with the self-storage facility. SECOR reviewed a previous Phase I prepared by Law/Crandell in 1992 for the subject property. The subject property was identified as being associated with the Southern Pacific railroad. Surface soil staining, believed by Law/Crandell to be residue of diesel fuel from the rail spurs or parked cars, was observed along the former railroad tracks during Law/Crandell's site reconnaissance in 1992. According to Mr. L. D. Romine, with Hyrail Partners II L.P., the entire subject property was graded to a depth of approximately 6 feet below ground surface in 1993

	during site development. The staining was determined to be surficial, and no other issues of environmental concern were observed No further investigation was recommended by SECOR. ***Update of a Prior Phase I Environmental Site Assessment for All Aboard Mini Storage, 1030 E 4th Street, Santa Ana, California*, by SECOR International Incorporated, dated December 15, 2000.** The subject property consisted of approximately 2.42 acres, developed in approximately 1994 with seven self storage buildings and one single-story office/residential building. The update did not reveal any evidence of potential environmental risks in connection with the subject property.
Environmental registrations and/or permits (including tanks, waste disposal, wastewater discharge, stormwater discharge, etc.):	None provided
Governmental agency correspondence:	None provided
Material Safety Data Sheets (MSDS):	None provided
Other (describe):	None

2.0 SITE RECONNAISSANCE

The site reconnaissance was conducted by Amy Zach on June 23, 2005. Access to the subject property was provided by Mr. and Mrs. Sergio and Iverie Almaraz, Resident Managers with All Aboard Mini Storage, who accompanied SECOR on the site visit.

2.1 METHODOLOGY

SECOR utilized the following methodology to observe the subject property:
Traverse the outer subject property boundary.
Traverse transects across the subject property.
Traverse the periphery of all structures on the subject property.
Visually observe assessable interior common areas expected to be used by occupants or the public, maintenance and repair areas, utility areas, and a representative sample of occupied spaces.

2.2 GENERAL DESCRIPTION

Subject property description:	The subject property consists of seven single-story self storage buildings and one single-story office/residence on approximately 2.92 acres. The subject property is located in a mixed industrial and commercial area in the City of Santa Ana, Orange County, California.
Subject property size:	2.92 acres
Estimated % of subject property covered by buildings and/or pavement:	100%
Observed current subject property use/operations:	The subject property operates as a self-storage facility with a resident manager.
Structures, roads, other improvements:	The self storage buildings are constructed on a concrete slab-on-grade foundation with concrete walls. The roof materials consist of steal beams and metal sheeting roofs. The interior of the self storage buildings are finished with concrete walls and floors and a metal roof. There is approximately 44,830 square feet of rentable space at the subject property. The single-story office/residence building is finished with painted drywall walls and floors which are either covered with carpet, tile, or vinyl flooring. The subject property is covered by concrete and landscaping near the office/residence building. Access to the subject property is from East 4th Street to the north.
Sewage disposal method (and age):	The City of Santa Ana Water Resources Division has provided sanitary sewer services to the subject property since construction of the existing building in 1995.

Potable water source:	The City of Santa Ana Water Resources Division supplies the City of Santa Ana with drinking water. Rivers, lakes, streams, ponds, reservoirs, springs, and wells are the source of the drinking water. According to the most recent available water quality report (2004) Santa Ana water meets all federal and state drinking water standards.
Electric utility:	Southern California Edison (SCE)
Heating (including energy source):	Natural Gas supplied by The Gas Company

Figure 2 in Appendix A presents a not-to-scale site plan. Site photographs are provided in Appendix C.

2.3 INTERIOR AND EXTERIOR OBSERVATIONS

SECOR made the following visual and/or physical observations during the site reconnaissance and/or identified the presence of the following during the interview or records review portions of the assessment:

Observation	Description
Hazardous substances and petroleum products:	Small quantities of paint and household cleaners were observed in a facility maintained storage unit. All materials were observed to be stored in their original manufacturer-issued containers, with no evidence of leaks. No staining or floor drains were observed in the storage unit.
Hazardous Waste:	None observed
Drums (≥ 5 gallons):	None observed
Strong, pungent, or noxious odors:	None
Pools of liquid:	None observed
Unidentified substance containers:	None observed
PCB-containing equipment:	None observed
Other:	None

2.4 INTERIOR OBSERVATIONS

SECOR made the following observations during the site reconnaissance and/or identified the presence the following during the interview or records review portions of the assessment:

Observation	Description
Heating/Cooling method (including fuel source):	The office/residential building at the subject property is serviced by natural gas heat and electric air conditioning unit. The storage units are not heated or cooled.
Stains or corrosion:	None observed
Floor drains and sumps:	None observed
Other:	None

2.5 EXTERIOR OBSERVATIONS

SECOR made the following observations during the site reconnaissance and/or identified the presence the following during the interview or records review portions of the assessment:

Observation	Description
On-site pits, ponds, or lagoons:	None observed
Stained soil or pavement:	None observed, with the exception of *de minimis* oily staining observed in the parking areas. The staining appeared consistent with small leaks or drips from parked automobiles.
Stressed vegetation:	None observed
Solid waste:	No evidence of improper or unauthorized solid waste disposal was observed on the subject property. One dumpster was observed on the east side of Building G on the western portion of the subject property. Great Western Reclamation collects the dumpster twice a week for disposal off-site at the Bee Canyon Landfill located in Irvine, CA. The Bee Canyon Landfill was not listed on the Federal NPL, CERCLIS or state equivalent list. No evidence of staining or improper disposal was observed in the vicinity of the solid waste dumpster.
Wastewater:	The subject property is connected to the municipal sanitary sewer. Wastewater generated at the subject property consists of sanitary discharges from sinks and restrooms.
Stormwater:	Stormwater flows via sheet flow toward stormwater drains located on Breeden Street, where it discharges to the municipal storm sewer system.
Wells:	None observed or reported
Septic Systems:	None observed or reported
Other:	None

2.6 UNDERGROUND STORAGE TANKS/STRUCTURES

Existing USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), which would indicate the presence of USTs, was discovered during the site reconnaissance.
Former USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), reports, or other evidence of the former presence of USTs was discovered during this Phase I ESA.
Other underground structures:	None observed or reported

2.7 ABOVEGROUND STORAGE TANKS

Existing ASTs:	No ASTs were observed during the site reconnaissance.
Former ASTs:	No reports or other evidence of the former presence of ASTs was discovered during this Phase I ESA.

2.8 ADJOINING PROPERTIES

2.8.1 Current Uses of Adjoining Properties

North:	East 4th Street, across which was Taqueria De Anda Restaurant and a new unnamed commercial building.
Northwest	The intersection of South 3rd Street and Breeden Street, across which was Tom's Towing Center
South:	Auto Storage Yard, To's & Mo's Imports, Sterling Auto Body, and East 1st Street, across which was Crowley's Roofing Supplies and Minnie Street
East:	A new unnamed commercial building, beyond which was a railroad track
West:	North Standard Avenue, across which was East 3rd Street, Tom's Truck Center, East 2nd Street, and National Auto Parts (wrecking yard)

2.8.2 Pits, Ponds or Lagoons on Adjoining Properties

North:	None observed
South:	None observed
East:	None observed
West:	None observed

2.9 PHYSICAL SETTING

Topography:	The United States Geological Survey (USGS) 7.5-minute topographic quadrangle map for the Tustin, California Quadrangle dated 1978, depicted the subject property to be at an elevation of approximately 130 feet above mean sea level. The topography in the vicinity of the subject property slopes to the southwest. The topographic map depicts the subject property to be developed with a rectangular building and railroad track and labeled station, no other features that indicate potential sources of environmental concern.
Soil/bedrock data:	The soil at the subject property was identified as Mocho loam. This soil consists of well drained soils on flood plains and alluvial fans. The soil formed in alluvium derived from sedimentary rocks. In a typical profile the surface layer is brown loam 31 inches thick. The next layers are light brownish gray, brown, and pale brown stratified fine sandy loam, silty clay loam, and loam to a depth of 61 inches or more. If the soil is bare, runoff is slow and the erosion hazard is slight.
Hydrology:	The Groundwater Atlas of the United States, California/Nevada indicates that the subject property is located above a costal basin. Coastal Basin aquifers occupy a number of basins in coastal areas of southern California. These basins have similar morphology and a Mediterranean climate. All are in structural depressions formed by folding and faulting, all are filled with marine and alluvial sediments, and all are drained by streams that contain water at least part of the year. Groundwater in the basins is under unconfined to confined conditions, and two or more vertically sequential aquifers can be present in a basin, separated by confining units that consist of fine-grained sediments. In nearly all basins that contain more than one aquifer, however, the aquifers are hydraulically connected to some

3.0 RECORDS REVIEW

3.1 FEDERAL/STATE ENVIRONMENTAL RECORDS

The regulatory agency database was obtained from a third-party environmental regulatory agency database search firm. A complete copy of the database, including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in Appendix D.

The subject property was not identified in the environmental database report.

Based on the Database Assessment Criteria presented in Appendix E, none of the facilities listed in the database report represent a REC or HREC to the subject property.

Facility Name/Address	Database Listing	Distance/Direction from subject property	Gradient	REC
Madison Materials 1035 East 4th Street Santa Ana, CA	RCRA-SQG SWF/LF	Adjacent to the north, across East 4th Street	Presumed upgradient	No
Madison Materials was not observed during the site reconnaissance. No violations were reported. The facility is a large transfer station for construction/demolition, green, inert, and metal materials. Based on the lack of reported violations and releases, this facility does not represent a REC to the subject property.				
Reindeer Towing 1008 East 4th Street Santa Ana, CA	HIST UST	Adjacent to the west, across Breeden Street	Presumed cross-gradient	No
At the time of SECOR's site reconnaissance, this facility was Tom's Truck Center and Tom's Towing. According to the EDR, the facility had one former 7,600-gallon gasoline UST. The installation and removal dates were not reported by EDR. Based on the lack of reported violations and releases, this facility does not represent a REC to the subject property.				
Vitec, Inc. 1043 East 4th Street Santa Ana, CA	HIST UST	Approximately 450 feet to the northeast of the subject property	Presumed upgradient	No
The facility was not observed during the site reconnaissance. Based on the lack of reported violations and releases, this facility does not represent a REC to the subject property.				
Joes Transmission 117 N Standard Ave Unit C Santa Ana, Ca	RCRA-SQG	Adjacent to the south-southwest	Presumed downgradient	No
The facility was not observed during the site reconnaissance. Based on the lack of reported violations and releases, this facility does not represent a REC to the subject property.				
Tom's Truck Center, Inc. 936 E 3rd Street Santa Ana, CA	RCRA-SQG	Adjacent to the west, across Breeden Street	Presumed cross-gradient	No
Based on the lack of reported violations and releases, this facility does not represent a REC to the subject property.				

Facility Name/Address	Database Listing	Distance/Direction from subject property	Gradient	REC
Berlin Tire Center 115 N Standard Santa Ana, CA	RCRA-SQG	Adjacent to the south-southwest	Presumed downgradient	No
The facility was not observed during the site reconnaissance. Based on the lack of reported violations and releases, this facility does not represent a REC to the subject property.				
ECS Trucking 1016 E 1st Street Santa Ana, CA	HIST UST	Approximately 125 feet to the south-southwest of the subject property.	Presumed downgradient	No
According to the EDR, the facility had three historic USTs, including one 1,000-gallon gasoline UST installed in 1974, one 2,000-gallon gasoline UST installed in 1974, and one 280-gallon waste oil UST installed in 1970. The historic USTs were owned by Goode Oil Company. No removal date was reported by EDR. Based on the lack of reported spills, leaks, or releases, this facility does not represent a REC to the subject property.				
Ston & Van Dyke 1101 E 3rd Street Santa Ana	RCRA-SQG	Approximately 500 feet to the east of the subject property	Presumed cross-gradient	No
Based on the lack of reported violations and releases, this facility does not represent a REC to the subject property.				
Rice Auto Parts 905 E 2nd Street Santa Ana, CA	LUST	Approximately 600 feet to the west of the subject property	Presumed downgradient	No
According to the EDR, the facility has impacted soil only. A "no action" status was reported by EDR for the facility. The number of current or former USTs was not reported. No additional information was reported by EDR. Based on the lack of reported groundwater impacts and the presumed downgradient location from the subject property, this facility does not represent a REC to the subject property.				

Other facilities were identified by the EDR however, based on their regulatory status, distance or cross-gradient position, these facilities are not expected to be of environmental concern for the subject property.

3.2 LOCAL/REGIONAL ENVIRONMENTAL RECORDS

SECOR checked the following sources to obtain information pertaining to site use and/or indicative of RECs in connection with the subject property:

3.2.1 Health Department/Environmental Division

Agency Name, Address, Phone Number	Finding
California Department of Toxic Substances Control (DTSC) Public Participation Unit 1001 I Street Sacramento, CA 916/322-0476 916/327-0978 fax	A Freedom of Information Act (FOIA) request was submitted to the DTSC on June 21, 2005. A letter dated June 23, 2005 from the DTSC, stated the DTSC did not have any records associated with the subject property.

California State Water Resources Control Board (SWRCB) 1001 I Street Sacramento, CA 916/341-5851 916/341-5808	A FOIA request was submitted to the SWRCB on June 21, 2005. No response has been received as of the date of this report.
Orange County Health Care Agency (OCHCA) 511 North Sycamore Street Santa Ana, CA 714/834-3536 714/835-9312 fax	A FOIA request was submitted to the OCHCA on June 21, 2005. No response has been received as of the date of this report.

3.2.2 Fire Department

Agency Name, Address, Phone Number	Finding
City of Santa Ana Fire Department (SAFD) – Records 1439 South Broadway Santa Ana, CA 714/647-5792 714/647-5779 fax	A FOIA request was submitted to the SWRCB on June 21, 2005. The SAFD responded that they did not have any records pertaining to the subject property address.

3.2.3 Planning/Zoning Department

Agency Name, Address, Phone Number	Finding
City of Santa Ana Planning and Building Department 20 Civic Center Plaza Santa Ana, CA 714/647-5804	The subject property was zoned M-2 HDII, heavy industrial within height district two. The zoning of the subject property is not expected to change.

3.2.4 Building Department

Agency Name, Address, Phone Number	Finding
City of Santa Ana Planning and Building Department 20 Civic Center Plaza Santa Ana, CA 714/647-5804	Permits for the current subject property buildings dated back to 1993. Multiple building, plumbing, electrical, and mechanical permits were reviewed for the subject property. The current subject property was issued new construction permits in 1994. Demolition permits were reviewed for East 4th Street. There were no demolition permits on file for any former buildings located at the subject property. Permits reviewed at the building department did

	not indicate any environmental concerns associated with the subject property.

3.2.5 Land Title Records/Deeds

Year	Owner
1993 to the Present	The subject property has been owned by Hyrail Partners, LLC.

SECOR performed land title record/deed research at the following location(s):

- Orange County Tax Assessor
- City of Santa Ana

3.3 HISTORY

3.3.1 Summary of Subject Property History

Dates	Subject Property Use
From at least 1895 to approximately 1906	The subject property was developed with a residential dwelling and hay barn.
From approximately 1906to approximately 1993	The subject property was developed with a train depot and associated with a railroad yard.
From approximately 1993 to approximately 1995	The subject property was vacant bare land and under construction.
From approximately 1995 to the present	The subject property has been developed with the current self storage configuration.

3.3.2 Summary of History of Properties in Surrounding Area

Direction	Past Use(s)
North	East 4th Street, across which was undeveloped from at least 1895 to approximately 1906, a commercial building, railroad tracks, a creamery, and three fruit packing warehouses from approximately 1906 to approximately 1949, a commercial building, railroad tracks, and three fruit packing warehouses from approximately 1949 to approximately 1990, a restaurant and railroad tracks from approximately 1990 to approximately 2004, and a restaurant and a commercial building from approximately 2004 to the present.
South	A fruit cannery and East 1st Street, across which was one dwelling from approximately 1906 to approximately 1928, a fruit cannery and East 1st Street, across which was an oil/gasoline distributor and two commercial buildings from approximately 1928 to approximately 1965, two commercial buildings and East 1st Street, across which was an oil/gasoline distributor and two commercial buildings from approximately 1965 to the present.
East	Railroad tracks and the Sante Fe Railroad Depot from approximately 1940 to approximately 1990, vacant bare land from approximately 1990 to approximately 2004, and a commercial building, beyond which was a railroad track from approximately 2004 to the present.
West	Dwellings from at least 1895 to approximately 1906, a lumber yard from approximately 1906 to approximately 1995, and a truck repair shop from approximately 1995 to the present.

3.3.3 Aerial Photographs

Year	Scale	Subject Property and Adjoining Property Observations
1952	Unknown	The 1952 aerial photograph depicted the subject property to be developed with multiple railroad spurs and tracks and a rectangular building near the northwest corner of the property. The aerial photograph depicted the adjacent property to be the north to be East 4th Street, across which was developed with a building, railroad tracks, and another building; to the northwest was the intersection of Breeden Avenue and North Standard Avenue, across which was developed with three buildings; to the south were five buildings and East 1st Street, across which were multiple buildings; to the east were railroad tracks, across which were six buildings; to the west was North Standard Avenue, across which was developed with multiple auto related facilities.
1959	Unknown	The 1959 aerial photograph depicted the subject property and adjacent properties to be generally unchanged from the 1952 aerial photograph.
1967	Unknown	The 1967 aerial photograph depicted the subject property to be generally unchanged from the 1959 aerial photograph. The aerial photograph depicted the adjacent property to the north to be two buildings, railroad tracks, and two other buildings; to the northwest to be two rectangular buildings beyond which was the intersection of Breeden Avenue and North Standard Avenue, across which were three buildings; to the south were two rectangular buildings and East 1st Street, across which were three buildings and a gas station; to the east were railroad tracks, across which were five buildings; to the west was North Standard Avenue, across which was developed with multiple auto related facilities.
1975	Unknown	The 1975 aerial photograph depicted the subject property and adjacent properties to be generally unchanged from the 1967 aerial photograph.
1983	Unknown	The 1983 aerial photograph depicted the subject property and adjacent properties to be generally unchanged from the 1975 aerial photograph.
1992	1" = 2,000'	The 1992 aerial photograph depicted the subject property to be vacant bare land with one railroad spur. The adjacent properties appear to be generally unchanged from the 1983 aerial photograph.
1995	1" = 2,000'	The 1995 aerial photograph depicted the subject property to be developed with the current building configuration. The adjacent properties appeared to be generally unchanged, with the exception of the adjacent property to the east which was vacant bare land, across which was a railroad track, across which were two buildings.
1999	1" = 2,000'	The 1999 aerial photograph depicted the subject property

		and adjacent properties to be generally unchanged from the 1995 aerial photograph.
2004	Unknown	The 2004 aerial photograph depicted the subject property and adjacent properties to be developed with the current buildings observed during the site reconnaissance.

Aerial photograph research was conducted the following location(s):

- Continental Aerial Photo, Inc., Los Alamitos, California, 1953 through 1999
- www.terraserverusa.com, 2004

3.3.4 City Directories

SECOR reviewed city directories in approximately five year intervals for the years 1928 through 1995 at the Santa Ana City Library History Room and the Anaheim Public Library History Room. City directories after 1995 were not available for review.

The subject property was first listed in 1934 as SP Railroad crossing, C C Collins Co., C G White, and Langley Oil Co. The subject property was listed as SP Railroad crossing, Santa Fe Depot, C C Collins Co., Culver utilities Co, Lawrence Warehouse, and Tree Sweet Products in 1940. From 1945 through 1965 the subject property is listed solely as SP Railroad Company Depot. The subject property address was not listed from 1974 through 1990. The subject property was listed as Right Track Construction in 1995.

Properties surrounding the subject property were commercial fruit packaging and warehousing facilities and a lumber company from at least 1928 through approximately 1960. From 1960 to the present the surrounding properties have consisted predominantly of smaller commercial auto parts, repair, towing, and salvage facilities. A complete listing of adjacent and nearby properties identified in the city directories is presented in Appendix G.

3.3.5 Historical Fire Insurance Maps

Year	Observations
1885, 1887, 1888, and 1891	The Sanborn Maps did not cover the subject property.
1895	The 1895 Sanborn Map depicted the northern portion of subject property to be a dwelling and a hay barn. The southern portion of the subject property was not covered. The Sanborn Map depicted the adjacent property to the north as East 4th Street, across which was S H Pendleton's Lumber Yard and undeveloped land, to the east to be undeveloped and railroad tracks; and to the west to be two dwellings and a horse corral.
1906	The 1906 Sanborn Map depicted the subject property to be the Southern Pacific Railroad Depot, near the northwest corner of the property, and multiple railroad spurs on the remaining portion. The Sanborn Map depicted the adjacent property to the north to be East 4th Street, across which was a lodge, railroad tracks, Southern CA Creamery & Ice Co., railroad tracks, and three walnut warehouses; to the northwest was the intersection of Breeden and North Evergreen, across which were two dwellings and a restaurant; to the south to be Southern CA Fruit Growers Association and East 1st Street, across

	which was one dwelling; to the east the A.T. & S.F. Railroad Depot and railroad tracks; and to the west was North Evergreen, across which was undeveloped.
1949	The 1949 Sanborn Map depicted the subject property to be the Southern Pacific Railroad Depot, near the northwest corner of the property, a part of a lumber yard on the western portion of the property, section housing on the southern portion of the property, and railroad tracks. The 1949 Sanborn Map depicted the adjacent property to the north to be East 4th Street, across which was a neon sign manufacturer, a warehouse, railroad tracks and multiple fruit warehouses; to the northwest was a lumber yard, the intersection of Breeden and North Evergreen, across which was Barr-Lumber Co; to the south a vacant cannery and East 1st Street, across which was Union Oil Co. gasoline distributors and railroad tracks; to the east the A.T. & S.F. Railroad Depot and railroad tracks; and to the west was a lumber yard, North Evergreen, across which were four dwellings.

Name of maps and source:

- www.multcolib.org

3.3.6 Other Historical Sources

There were no other sources of historical information reviewed during this assessment.

3.4 OPINION

It is SECOR's opinion that none of the findings from the records review represent a REC or HREC.

4.0 INTERVIEWS

4.1 KEY SITE MANAGER

Name, Title	Telephone	Comments
Mr. Sergio Almaraz, Resident Manager	714/564-9910	Mr. Almaraz stated that he has worked for All Aboard Mini Storage for two years and has been the resident manager at the subject property for one year. He stated that he was not aware of any environmental concerns associated with the subject property. Mr. Almaraz stated that all renters at the subject property sign an agreement, which states "storing of hazardous materials is strictly forbidden".

4.2 MAJOR OCCUPANTS

All Aboard Mini Storage was the only occupant of the subject property at the time of the site reconnaissance.

4.3 OTHERS

SECOR interviewed the following people likely to be knowledgeable of the environmental condition or history of the subject property, such as local agency officials, neighbors, past owners, operators, or occupants, etc.:

Name, Title	Telephone	Qualifications relevant to subject property knowledge	Comments
Mr. Jay Bento, UST Coordinator with the Santa Ana Fire Department (SAFD)	In Person Interview 714/647-5761	Mr. Bento has worked with the UST program since 1993 and with the SAFD since 1990.	Mr. Bento stated that he was not aware of any former USTs at the subject property.

4.4 OPINION

None of the information obtained during the interviews described above indicated the existence of a REC or HREC to the subject property.

5.0 OTHER ENVIRONMENTAL CONSIDERATIONS

SECOR was requested to investigate the following other environmental considerations, which are included in the GECC Scope of Work for this project.

5.1 LEAD-BASED PAINT

Concern for lead-based paint (LBP) is primarily related to residential structures. The risk of lead toxicity in LBP varies based upon the condition of the paint and the year of its application. The U.S. Department of Housing and Urban Development (HUD) has identified the following risk factors:

- The age of the dwelling as follows:
  - The maximum risk is from paint applied before 1950.
  - There is severe risk from paint applied before 1960.
  - There is moderate risk from deteriorated paint applied before 1970.
  - There is slight risk from the paint that is intact but applied before 1977.
- The condition of the painted surfaces.
- The presence of children and certain types of households in the building.
- Previously reported cases of lead poisoning in the building or area.

The recommended HUD guideline for LBP is 0.5 percent lead by weight. GE-RE guidelines indicate that the potential environmental risk for LBP should be evaluated for structures constructed in 1978 or earlier.

Construction Date	Residential (Yes/No)	Condition of Painted Surfaces
1995	Yes	Good Condition

The interior painted surfaces in routinely inhabited areas (e.g., offices, food preparation and eating, and process areas) appeared to be in good condition, with no visual evidence of cracking or peeling. Therefore, an assessment of LBP is not required by GECC scope of work.

5.2 ASBESTOS

The goal of this Phase I ESA was to visually determine if there is a potential for asbestos-containing material (ACM) to be present within any on-site structures. Asbestos can be found in many applications, including sprayed-on or blanket-type insulation, pipe wraps, mastics, floor and ceiling tiles, wallboard, mortar, roofing materials, and a variety of other materials commonly used in construction. The most concern for human health comes from friable asbestos, which has been associated with specific types of respiratory diseases. Friable asbestos is asbestos material that can be reduced to powder by hand pressure such as pipe insulation or sprayed on ceiling material and can become air-borne by touch. The manufacturing and use of asbestos was curtailed during the late 1970s.

In buildings constructed prior to 1980 SECOR has noted potential ACM in readily accessible areas of the building, its condition, the amount observed, and whether it is friable or non-friable.

Construction Date	Potential ACM Material/Location (if constructed after 1980, N/A)	Condition	Approx. Amount	Friable (Yes/No)
1995	N/A	N/A	N/A	N/A

5.3 WETLANDS

Wetlands cannot be definitively identified through visual observation alone. Defensible wetland delineations require taxonomic classification of site vegetation, an investigation into the surface and subsurface hydrology of the site, and identification of hydric soils. This level of delineation is outside of the scope or work for this assessment. However, SECOR did review the National Wetland Inventory maps as provided by EDR, the USDA Soil Survey, and the Flood Insurance Rate Maps.

Wetlands Identified on NRCS Map	Hydric Soils (Yes/No)	Within 100 or 500 year flood plain	New Development Planned (Yes/No)	Potential Wetlands Observed/Comments
No	No	No	No	No

No distinct evidence indicating the presence of wetlands on the subject property was observed during the site visit. Based on the above documents, the field observations, and the fact that no new development is planned at the property, a wetlands delineation does not appear to be warranted at this time.

5.4 AIR EMISSIONS

No sources of regulated air emissions or indoor air quality issues were reported or observed at the subject property.

5.5 RADON

Radon is a colorless, tasteless radioactive gas with an EPA-specified action level of 4.0 PicoCuries per liter of air (pCi/L). Radon gas has a very short half-life of 3.8 days. The health risk potential of radon is associated with its rate of accumulation within confined areas, particularly confined areas near or in the ground, such as basements, where vapors can readily transfer to indoor air from the ground through foundation cracks or other pathways. Large, adequately ventilated rooms generally present limited risk for radon exposure.

According to regional radon information obtained from the EPA, the subject property is located within EPA-designated Zone 2 for radon gas. Average radon concentrations within Zone 2 are reported to be between 2 and 4 pCi/L, below EPA-designated action levels for radon mitigation and/or control measures (USEPA, 1993). Based on SECOR's review of available information, as well as the absence of basements within the subject property building, elevated radon levels are not expected to accumulate in the subject property building.

5.6 DRY-CLEANING OPERATIONS

No dry-cleaning operations were reported or observed at or near the subject property. The historic review did not indicate a potential for past dry-cleaning operations on the subject property or in the vicinity. Dry-cleaning operations are not considered a potential environmental risk.

5.7 PESTICIDES

No agricultural use of the subject property was identified dating back to at least 1895, therefore pesticides are not considered a potential environmental risk.

6.0 CONCLUSIONS

SECOR has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527 and the GE Capital Real Estate Scope of Work Guidelines for Environmental Due Diligence, of the All Aboard Mini Storage facility located at 1030 East 4th Street, Santa Ana, Orange County, California, the "subject property". Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report. This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the subject property.

STATEMENT OF LIMITATIONS

STATEMENT OF LIMITATIONS

The conclusions presented in this report are professional opinions based on data described in this report. These opinions have been arrived at in accordance with currently accepted environmental industry standards and practices applicable to the work described in this report. The opinions presented are subject to the following inherent limitations:

1. This report was prepared for the exclusive use of the entity referenced in Section 1.6. No other entity may rely on the information presented in the report without the expressed written consent of SECOR. Any use of the Phase I report constitutes acceptance of the limits of SECOR's liability. SECOR's liability extends only to its client and not to any other parties who may obtain the Phase I report.

2. SECOR derived the data in this report primarily from visual inspections, examination of records in the public domain, and interviews with individuals having information about the subject property. The passage of time, manifestation of latent conditions, or occurrence of future events may require further study at the subject property, analysis of the data, and reevaluation of the findings, observations, and conclusions in the report.

3. The data reported and the findings, observations, and conclusions expressed in the report are limited by the scope of work. The scope of work is presented in Section 1.4 and was agreed to by the client.

4. SECOR's Phase I ESA reports present professional opinions and findings of a scientific and technical nature. The report shall not be construed to offer legal opinion.

5. The conclusions presented in this report are professional opinions based on data described in this report. They are intended only for the purpose, subject property location, and project indicated. This report is not a definitive study of contamination at the subject property and should not be interpreted as such. An evaluation of subsurface soil and groundwater conditions was not performed as part of this investigation, unless indicated in Section 1.4. No sampling or chemical analyses of structural materials or other media was completed as part of this study unless explicitly stated in Section 1.4.

6. This report is based, in part, on unverified information supplied to SECOR by third-party sources. While efforts have been made to substantiate this third-party information, SECOR cannot guarantee its completeness or accuracy.

TARGET PROPERTY SEARCH RESULTS

The target property was not tisted in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of availabte ("reasonably ascertainable ") government records either on the target property or within the ASTM E 1527-00 search radius around the target property for the following databases:

FEDERAL ASTM STANDARD

NPL	National Priority List
Proposed NPL	Proposed National Priority List Sites
CERC-NFRAP	CERCLIS No Further Remedial Action Planned
RCRA-TSDF	Resource Conservation and Recovery Act Information
RCRA-LQG	Resource Conservation and Recovery Act Information
ERNS	Emergency Response Notification System

STATE ASTM STANDARD

Cal-Sites	Calsites Database

EXECUTIVE SUMMARY

FEDERAL ASTM STANDARD

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).
CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 02/15/2005 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Dist / Dir	Map ID	Page
FREEWAY AUTO WRECKERS	***1041 EAST 6TH STREET***	***1/8 - 1/4 NNE***	***F18***	***16***

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/29/2005 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

RCRAInfo: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System(RCRIS). The database includes selective information on sites which generate, transport, store , treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-SQG list, as provided by EDR, and dated 05/20/2005 has revealed that there are 22 RCRA-SQG sites within approximately 0.25 miles of the target property.

Background Info: Former operations at the site have apparently included the manufacturing of agriculture chemicals insecticides and liquid fertilizers. A battery manufacturing business has also been reported as having operated on or adjacent to this site. High concentrations of lead and antimony have been detected in the soil. Currently the site is an abandoned lot, with bare soil on the surface. Sampling events occurred on 2/88, 2/91, and 8/94 in which many contaminants were detected. DTSC has sent letters to the managers, inviting them to perform a preliminary endargerment assessment on this site, however they have not responded.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Elapsed ASTM days: Provides confirmation that this EDR report meets or exceeds the 90-day updating requirement of the ASTM standard.

FEDERAL ASTM STANDARD RECORDS

NPL: National Priority List
Source: EPA
Telephone: N/A
National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/28/05
Date Made Active at EDR: 05/16/05
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 05/04/05
Elapsed ASTM days: 12

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System
Source: EPA
Telephone: 703-413-0223
CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned
Source: EPA
Telephone: 703-413-0223
As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

UMTRA: Uranium Mill Tailings Sites
Source: Department of Energy
Telephone: 505-845-00t t
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized. In t978, 24 inactive uranium mill tailings sites in Oregon, Idaho, Wyoming, Utah, Colorado, New Mexico, Texas, North Dakota, South Dakota, Pennsylvania, and on Navajo and Hopi tribal lands, were targeted for cleanup by the Department of Energy.

DATABASE ASSESSMENT CRITERIA

REGULATORY DATABASE ASSESSMENT CRITERIA

Research into environmental regulatory agency database listings was performed by a third party environmental regulatory agency database search firm. The purpose of the review was to identify reported environmental issues for the subject property and other properties in the vicinity. The database search firm utilized the more stringent of the approximate minimum search distances specified in the Scope of Work described in Section 1.40 for each of the referenced federal and state environmental databases. The definition of the databases searched and the associated search distances from the subject property are identified in the regulatory agency database search report.

The regulatory agency database search report lists a number of properties identified as "unmappable." The database search firm was unable to confirm the physical locations of these properties relative to the subject property or to assess whether they were located within the designated search radii. SECOR independently reviewed the locations of these "unmappable" properties, to the extent possible, using various maps and our knowledge of the subject property area. Any of the "unmappable" properties determined to be within the designated search radii were included in our evaluation of the various listed properties potential to result in a recognized environmental condition relative to the subject property.

SECOR reviewed the results of the database search report to note reported release sites in the vicinity of the subject property that were considered to have a potential to have adversely impacted the subject property (i.e., are known to have or are expected to result in recognized environmental conditions). Reported release sites identified in the regulatory agency database search report were evaluated with respect to the nature and extent of a given release, the distance of the reported release site from the subject property, the stratigraphy of soils, the expected soil permeability, and the topographic position of a reported release site with respect to known or expected local and/or regional groundwater flow direction. Those release sites that were considered likely to have impacted the subject property are identified in the report as recognized environmental conditions, as defined in ASTM 1527. Sites that were listed in the database search report, but not identified as a release site (for example, a site listed as a hazardous waste generator but not as having had a release), and sites that were listed as being "closed" were not considered likely to have impacted the subject property.

APPENDIX F

ENVIRONMENTAL PROFESSIONALS QUALIFICATIONS

SECOR

AMY C. ZACH
Staff Geologist

B.S. Environmental Science, 1999, University of California, Riverside
B.S. Geology, 1999, University of California, Riverside

Ms. Zach has over five years of professional experience in the environmental consulting field. She has worked on and written health and safety plans, groundwater monitoring reports, Phase I ESAs, Phase II reports, proposals, and draft environmental impact reports/statements. She has also worked on permitting at the city and county level. Her project experience is presented below.

Project Experience

- Completed over 150 Phase I Environmental Site Assessments in 23 states. Responsibilities included property owner/tenant interviews, interviews with city and county departments; site reconnaissance; environmental database records searches and reviews; report preparation and submittal.

- Multiple Phase II projects in California, Oregon, and Washington. Responsibilities included marking boring locations, job set up with driller, logging the boring, collecting soil and groundwater samples, preparing chain-of-custody forms, and report writing.

- Completed site assessment activities at the Shell terminal in Portland, Oregon. Responsibilities included oversight of hollow stem auger drilling, well installations, soil and water sample collection, daily health and safety meetings, preparing chain-of-custody forms and daily log sheets.

- Groundwater monitoring. Duties included scheduling, invoicing, collecting water levels, purging water, collecting samples, and preparing chain-of-custody forms.

- Phase II, Beaver Engraving. Assisted in hand-augering five borings and collecting soil samples at various depths. Duties included field documentation, preparing chain-of-custody forms and site map.

- Baseline site investigations. Responsibilities included marking boring locations, job set up with driller, drilling to 30 feet at 10 or 15 degrees, logging the boring, collecting soil samples, preparing chain-of-custody forms and report writing.

- Installed two groundwater monitoring wells to 100 feet. Responsibilities included marking well locations, job set up with driller, onsite meeting with Department of Transportation, well installation, soil sample collection, preparing chain-of-custody forms and permitting.

- Phase I, AT&T. Completed several Phase I projects for various cell sites throughout southern California. These evaluations have included property owner/tenant interviews, interviews with utility companies; site reconnaissance; on-line environmental database records searches and reviews; report preparation and submittal.

Professional Certifications and Registrations

AHERA Building Inspector (TSCA Title II EPA AHERA/AHARA), August 2002
4-Hour AHERA Building Inspector Refresher, January 15, 2004
8-Hour OSHA Health and Safety Refresher, March 15, 2004
First Aid and CPR, 2004
UST Supervisor License, May 2001
Supervisor HAZWOPER (29 CFR 1910.120), 2000
40-Hour OSHA Health & Safety Certification (29 CFR 1910.120), October 1999

D. HOWE GATES, R.E.H.S.
Principal Scientist

B.S. Environmental Health, 1983, Oregon State University

Mr. Gates has 20 years of diversified professional experience in the fields of environmental consulting, environmental health, and environmental management. During this time, Mr. Gates has been employed as an Environmental Health Officer, Hazardous Waste Specialist, and Supervising Hazardous Waste Specialist for county environmental health departments; as a Senior Environmental Specialist in the solid waste management industry for Waste Management of North America, Inc.; and in the environmental consulting industry for the past 12 years. In addition to his technical skills, Mr. Gates has extensive experience in personnel supervision, business development, client management and project management. Specific project experience includes environmental due diligence investigations (Phase I & Phase II environmental site assessments), hazardous waste investigations, regulatory reviews, underground storage tank (UST) regulatory audits, UST closure investigations, and utility asset (substation) inspection and evaluations.

Management / Business Development Experience

Mr. Gates is a member of SECOR's Real Estate and Financial Services (REFS) business sector management team. In this role, Mr. Gates is national client manager of a SECOR Tier One (>1mm revenue annually) client, and responsible for overall day-to-day operations including responding to requests for proposal, report preparation, report review, quality assurance and quality control, and client management. In addition, Mr. Gates is responsible for business development, business sector operations, and supervision and mentoring of REFS dedicated staff.

Project Experience

- Project Manager and Senior Reviewer for multiple environmental due diligence investigations of industrial warehouse distribution properties, residential apartment communities, shopping centers, multi-level parking garages, and manufactured home communities. Project locations include San Diego, Orange County (CA), San Francisco Bay Area, Portland, Salt Lake, Denver, Las Vegas, Minneapolis, Pittsburgh, St. Louis, Boston, Dallas, San Antonio, Houston, Corpus Christi, Milwaukee, New York, Baltimore, Washington, D.C., Atlanta, Orlando, Tampa, and Miami.

- Conducted environmental due diligence and TSCA compliance investigations of electrical substations at multiple locations in Montana and California.

- Managed environmental investigations of multiple dry-cleaning facilities in California.

- Coordinated development and implementation of specialized regulatory compliance assessments of gas station convenience ("C") stores. Assessments were conducted typically of multi-site portfolios of C stores which included underground storage tank compliance, sensitive receptor review, historical site use, and sampling of existing groundwater monitoring wells for laboratory analysis with 10-days of authorization to proceed.

- Conducted environmental compliance audits, including preparation of written reports, of four hazardous waste treatment facilities in Ontario, Canada.

- Prepared a RCRA Subpart G closure plan for an interim status hazardous waste treatment facility in Long Island, New York.

- Prepared work plan for characterization of shallow soil and groundwater at a hazardous waste treatment facility in Ontario, Canada. Served as client liaison with the Ministry of the Environment and Energy while negotiating scope and schedule of the investigation. Managed implementation of characterization and coordinated subcontractor activities.

- Prepared work plan and health and safety plan for the investigation and removal of buried drums containing hazardous wastes at a hazardous waste treatment facility in Ontario, Canada. Served as client liaison with the Ministry of the Environment and Energy while negotiating scope and schedule of the investigation.

- Served as Task Manager for an asbestos survey and abatement project at a former wood treatment plant in Portland, Oregon, which was recently added to the National Priorities List (NPL). Included coordination with the Oregon Department of Environmental Quality (DEQ) preparation of bid packages and technical specifications, project oversight, budget management, and documentation.

- Served as Task Manager for characterization and disposal of approximately 80 55-gallon drums of hazardous waste, which consisted of creosote, pentachlorophenol, and arsenic waste, at a former wood treatment plant in Portland, Oregon, which was recently added to the NPL. Included coordination with the Oregon DEQ, preparation of bid packages and technical specifications, determination of waste codes, project oversight, budget management, and documentation.

- Managed Phase I ESAs of 47-site bank properties in Oregon, Washington, Idaho, and Utah within a 60-day period. Delivered all 47 assessment reports within project deadline.

- Managed Phase I ESAs of 10 hotel/motel properties in Oregon, Washington, Idaho, Utah, and Nevada.

- Managed Phase I ESAs of a block of 13 properties in Oregon and Washington, which included a large covered shopping mall in Walla Walla, Washington; a 62-story office building and attached parking garage; and a retail plaza in downtown Seattle.

- Managed a Phase I ESA and Phase II investigation of a 7-acre vehicle compound at a U.S. National Guard base. Phase II in investigation consisted of collection and compositing of soil samples from 70 shallow boreholes.

- Managed Phase I ESA updates, Phase II investigations, and site characterization investigations of two bank properties located at former gasoline service station sites in Grants Pass and Portland, Oregon ,for a major bank. Prepared statements of work for contractors and laboratories, as well as the Sampling and Analysis Plan (SAP) for field work. Designed work plan to facilitate cost recovery from previous owners/operators of the property.

- Managed an update of Phase I ESA and prepared the work plan for a site characterization investigation of a retail shopping center located at a former bulk fueling facility in Sandpoint, Idaho.

- Managed a Phase I ESA and UST removal at a bank property located at a former gasoline service station in Poulsbo, Washington. Prepared statements of work for contractors and laboratories, as well as the SAP for field work. Designed work plan to facilitate cost recovery from previous owners/operators of the property.

- Managed a Phase I ESA and asbestos survey of an office building in Modesto, California, which was constructed in the 1930s. Identified a UST in the basement and substantial quantities of asbestos. Conducted follow-up Phase II investigation to evaluate if a release had occurred from the UST.

- Managed a Phase II ESA of a former junkyard in San Jose, California. Included excavation of six backhoe test pits at locations where soil contamination was suspected. Collected soil samples for laboratory analysis. Detected PCBs, metals, chlorinated solvents, and petroleum hydrocarbons in the soil samples. Utilized the California Leaking Underground Fuel Tank (LUFT) document and the California Code of Regulations to formulate conclusions and make recommendations for further investigation at the site.

- Managed the Phase II investigation and site characterization investigation of two former bank branches for a major bank which were located at former gasoline service station sites in Oregon.

- Managed the Phase II site characterization of a 300-acre sawmill and veneer plant in southern Oregon.

- Managed groundwater remediation project of a LUFT site in Southern California. Monitored recovery and monitoring wells, and prepared monthly field reports and quarterly reports for regulatory authority.

- Managed the design and installation of a truck-fueling facility in Southern California. Included development of conceptual and final design, regulatory approvals, and construction management of installation.

- Conducted multiple waste management audits of waste hauling facilities in Southern California to determine generator/hauler compliance with special waste management and hazardous waste requirements. Investigated facility waste management procedures and record-keeping practices, and issued reports of findings for each facility audited.

- Reviewed facility generator activities relative to California hazardous waste laws and regulations, documented exceptions, and recommended corrective actions. [What type of facilities and where?]

- Reviewed facility activities relative to California hazardous waste laws and regulations. Documented exceptions and recommended corrective actions. [what type of facilities and where?]

- Reviewed waste management hauling facility activities relative to California UST law and regulations, documented exceptions, and recommended corrective actions.

- Provided waste management training to client's staff at multiple facilities in Southern California.

- Performed environmental audit of a major precision valve manufacturing facility in Southern California to determine compliance with state and federal hazardous waste, UST, wastewater discharge, SARA Title III, and air pollution control laws and regulations.

- Managed Phase I ESA of a warehouse property in Portland, Oregon.

- Managed a Limited ESA of a maintenance yard in Portland, Oregon.

- Conducted a Phase II investigation of a maintenance yard in Portland, Oregon, to investigate subsurface condition of the facility.

- Managed a Phase I ESA of a sandblast and coating facility in Tualatin, Oregon.
- Managed and performed numerous Fannie Mae Phase I environmental assessments utilizing the Fannie Mae format requirement.
- Managed Phase I ESA of a 3.5-acre automotive center. Assessed the potential for on-site contamination and investigated historic land use of both the site and surrounding properties.
- Served as Project Manager for Phase I ESAs of paper-converting plants in Longview and Vancouver, Washington.

Professional Certifications and Registrations

Registered Environmental Assessor, CA (lapsed)
Registered Environmental Health Specialist, CA
AHERA-certified Asbestos Inspector
40-Hour OSHA Health & Safety Certification (29 CFR 1910.120), 1991
8-Hour OSHA Health & Safety Annual Update Certification, 2002
8-Hour OSHA Supervisor's Certification, 1992

RE: Phase I Environmental Site Assessment and
Phase II Limited Subsurface Investigation
All Aboard Mini Storage
1030 East 4th Street
Santa Ana, California
VERTEX Project No. 25121

Dear Mr. Allen:

Vertex Environmental Services, Inc. (VERTEX) is pleased to submit this Phase I Environmental Site Assessment (ESA) and Phase II Limited Subsurface Investigation (LSI) report for the above referenced property (the site). The purpose of this assessment was to identify *recognized environmental conditions* in connection with the site. Recognized environmental conditions are defined as "the presence or likely presence of hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or material threat of a release into structures on the property or into the ground, groundwater, or surface water of the property."

In conducting this assessment, VERTEX followed the E1527-05 American Society for Testing and Materials (ASTM) document entitled "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" for commercial real estate, as well as the All Appropriate Inquires (AAI) Final Rule of November 1, 2005. To the best of our knowledge, this Phase I ESA and Phase II LSI report is true and accurate.

We declare that, to the best of our professional knowledge and belief, we meet the definition of an Environmental Professional as defined in §312.10 of 40 CFR Part 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature,

history, and setting of the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

This report is for the exclusive use of Extra Space Storage LLC and its insurers, counsel and accountants. Use of this report by any other party shall be at such party's sole risk.

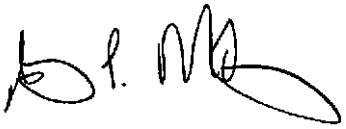
Please do not hesitate to contact us at your convenience, should you have any questions or comments regarding this report or our recommendations. It has been a pleasure working with you on this project.

Sincerely,

Vertex Environmental Services, Inc.

Ken Jones
Geologist I

Eric Wirtanen
Assistant Project Manager



Stephen P. McCarthy
Division Manager

PHASE I ENVIRONMENTAL SITE ASSESSMENT and
PHASE II LIMITED SUBSURFACE INVESTIGATION

All Aboard Mini Storage
1030 East 4th Street
Santa Ana, California
VERTEX Project No. 25121

1.0 PROJECT SUMMARY

Vertex Environmental Services, Inc. (VERTEX) was contracted by Extra Space Storage, Inc. to conduct a Phase I Environmental Site Assessment (ESA) and a Phase II Limited Subsurface Investigation (LSI) of the property located at 1030 East 4th Street, Santa Ana, California (the site). The site is developed with a single-story office building with a retail area and manager's apartment and seven single-story self-storage buildings. Additional improvements consist of asphalt and concrete-paved parking and driveway areas, security gates and landscaped areas. Construction of the storage facility was completed in 1995. The site is currently owned by Santa Ana Hyrail III LLC.

The purpose of the Phase I ESA is to identify, to the extent feasible pursuant to the processes prescribed in the American Society for Testing and Materials (ASTM) document E 1527-05, recognized environmental conditions (RECs) in connection with the site.

A summary of our key findings is provided below:

- Based on a review of aerial photographs (1938-2012), topographic maps (1901-1981), city directories (1920-2012), Sanborn Fire Insurance Maps (1885-1969), title records, previous environmental investigations, and interviews with municipal officials, the site was residentially occupied from at least 1885 until approximately 1906, when it was developed as a railway station and railroad tracks. Other areas of the site were further improved in 1949 with section housing and, in 1969, with a planing mill. The site was vacant land from approximately 1994 until developed with the current improvements in

1995. No environmental concerns were identified with respect to the current use of the site.

- VERTEX did not observe fill pipes, vent pipes or other evidence of underground storage tanks (USTs) or above ground storage tanks (ASTs) at the site. VERTEX did not observe evidence of the use or storage of hazardous materials or petroleum products at the site. VERTEX did not observe evidence of a release of hazardous materials or petroleum products at the site.

- The site is located in a commercial and industrial area. Numerous facilities were identified on state and federal regulatory databases that are located within 500 feet and up-gradient of the site. Impact to the site from a release at one or more of these facilities cannot be ruled out. Therefore, these facilities are considered a concern to the site. There is no indicated similar use of chemicals on the site; therefore, it is unlikely that the owner or operator of the site would be required by a regulatory agency to address impacts to the site, if identified, emanating from an off-site source. Furthermore, we do not believe that impacts to the site emanating from off-site sources would present a vapor intrusion risk to site occupants given that (i) the depth to groundwater of 85 to 90 feet, (ii) the uses associated with those sites that are up-gradient of the on-site apartment unit do not present vapor intrusion risks, and (iii) the portions of the site that are down-gradient of areas of concern are occupied by parking lots and storage units.

- To further assess the historical use of the site for rail operations, VERTEX conducted a LSI, which included conducting a ground-penetrating radar (GPR) survey, the advancement of four test borings, and the laboratory analysis of select soil samples. The GPR survey was utilized to pre-clear all soil borings of potential subsurface utilities. No subsurface anomalies were identified during the GPR survey.

- VERTEX advanced four test borings (VB-1 through VB-4) on the site on June 18, 2013. Soil borings were advanced to a depth of approximately 30 feet below ground surface (bgs) using direct-push drilling techniques. Groundwater was not encountered during the

drilling activities. No visual or olfactory evidence of contamination was detected in the soil borings. Field screening of soil samples using a photoionization detector (PID) did not identify total volatile organic compounds (TVOCs) concentrations above 1 part-per million by volume (ppmv).

- Select soil samples from each of the four test borings were submitted to ESC Lab Sciences (ESC) for the analysis of volatile organic compounds (VOCs), polynuclear aromatic hydrocarbons (PAHs), total petroleum hydrocarbons – diesel range organics (TPH DRO), Resource Conservation and Recovery Act (RCRA) 8 metals, and polychlorinated biphenyls (PCBs).

- Acetone was detected in soil samples VB-1 and VB-3 at concentrations below the California Regional Water Quality Board (RWQCB) Environmental Screening Levels (ESLs; Deep Soil Screening Levels) for Commercial/Industrial Land Use. Benzene was detected in soil samples VB-1 and VB-3 at concentrations below the RWQCB ESL. Toluene was detected in soil sample VB-1 below the RWQCB ESL. No other VOCs were detected at concentrations exceeding laboratory method reporting limits. TPH DRO in the C10-C22 Hydrocarbons Range was detected in soil sample VB-4 at a concentration below the RWQCB ESL. No other TPH DRO fractions were detected at concentrations exceeding laboratory method reporting limits. No PAHs or PCBs were detected in the soil samples collected at concentrations exceeding laboratory method reporting limits.

- Barium, lead, mercury, and selenium were detected in soil samples VB-1, VB-2, VB-3, and VB-4 at concentrations below the applicable California Human Health Screening Levels for Commercial/Industrial Land Use (CHHSL) and the RWQCB ESL. Chromium was detected in soil samples VB-1, VB-2, VB-3, and VB-4 at concentrations below the RWQCB ESL. There is no applicable CHHSL standard for total chromium. Cadmium and silver concentrations were not detected in the soil samples collected. Arsenic was detected in soil samples VB-1, VB-2, VB-3, and VB-4 at concentrations ranging from 5.4 to 6.4 milligrams per kilogram (mg/kg), exceeding the applicable CHHSL of 0.24 mg/kg and the ESL of 0.96 mg/kg. However, according to a document obtained from the

California Department of Toxic Substances Control (DTSC) website dated March 2008, the DTSC findings suggested that, in Southern California, 12 mg/kg may be a useful screening number for evaluating arsenic as a chemical of potential concern. As such, the arsenic concentrations identified are considered to be similar to background arsenic levels found throughout the region, and no regulatory reporting of these concentrations is required.

Conclusions and Recommendations

VERTEX performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-05 and a Phase II LSI of the property located at 1030 East 4th Street, Santa Ana, California. Any exceptions to or deletions from this practice are described in Section 10.0. This assessment revealed no evidence of RECs in connection with the site. As such, no additional work is recommended at this time.

2.0 INTRODUCTION

On April 18, 2013 VERTEX was contracted by Extra Space Storage LLC to conduct a Phase I ESA of the property located at 1030 East 4th Street, Santa Ana, California. On June 7, 2013 VERTEX was contracted by Extra Space Storage LLC to conduct a Phase II LSI of the property. According to the Orange County Clerk, the site is currently owned by Santa Ana Hyrail III LLC.

In conducting this assessment, VERTEX followed the E1527-05 ASTM document entitled "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" for commercial real estate, as well as the AAI Final Rule of November 1, 2005. Any exceptions to, or deletions from, this practice are described in Section 10.0 of the report. The primary purpose of this assessment was to identify RECs in connection with the subject property. RECs are defined as the presence or likely presence of hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or material threat of a release into structures on the property or into the ground, groundwater, or surface water of the property.

In accordance with the above-referenced agreement, VERTEX performed a visual reconnaissance of the site, noted use of adjacent properties, and conducted historical and regulatory records research. The following provides a more detailed description of the scope of services:

- Visual inspection of the site building and grounds to identify potential for on-site oil or hazardous material release(s).
- Visual inspection of the site building to confirm the presence or absence of Polychlorinated Biphenyls (PCBs) in equipment, i.e., transformers.
- Visual inspection and categorization of the use of abutting and adjacent properties as potential off-site sources of chemical contamination.
- Review of published federal regulatory records related to on-site activities and to potential off-site sources of oil or hazardous material contamination. Federal records reviewed include, but are not limited to, the following:

- National Priorities List (NPL)
- Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)
- Resource Conservation and Recovery Act (RCRA)
- Emergency Response Notification System (ERNS)
- Institutional Control/Engineering Control Registries

- Review of readily available state regulatory records and publications for environmental activities related to the site and potential off-site sources of oil or hazardous material contamination. State records reviewed include, but are not limited to, the following:

    - California State Hazardous Waste Sites (SHWS)
    - California Registered USTs
    - California Registered ASTs
    - California Leaking Underground Storage Tank (LUST)
    - California Licensed Solid Waste Facilities/Landfills Facilities (SWF/LF)
    - California Voluntary Cleanup Program (VCP) Sites

- Review of readily available historical site documents to assess for potential on-site sources of oil or hazardous material contamination.

- Confirm the year of construction for all on-site buildings and if necessary visually inspect for suspect asbestos containing materials (ACMs) and suspect lead based paint (LBP) surfaces.

- Review of local records related to historical ownership, usage and site development. This also included interviewing local environmental authorities to identify complaints, violations, citations, inspections, environmental liens, activity and use limitations (AULs), or institutional and engineering controls related to the site.

- Review readily available aerial photographs for the sites and site vicinity to evaluate present and historical development/facilities.

- Preparation of this Phase I ESA report.

- To assess the potential for impacts from the past use of the site for rail operations, VERTEX conducted a Phase II LSI, which included the advancement of four test borings and the collection of select soil samples for laboratory analysis. Please refer to Section 9.0 for additional information.

3.0 PROPERTY DESCRIPTION

3.1 Site Reconnaissance

A site visit was conducted by VERTEX representative Mr. Ken Jones, Geologist I, between 11:30 a.m. and 12:30 p.m. on April 30, 2013. During the site visit, the weather was overcast with a temperature of approximately 65 degrees Fahrenheit. The site visit consisted of a walk-through of the site, an interview with a site representative, and visual reconnaissance of neighboring properties from curbside. Photographic documentation of the site visit is included in Appendix A.

3.2 General Site Conditions

The site is located on the south side of East 4th Street, east of Breeden Street and North Standard Avenue and north of East 1st Street in Santa Ana, California. According to the Orange County Clerk, the approximately 3.3-acre site parcel is identified as Parcel Number 398-461-18 and is addressed as 1030 East 4th Street. The site is developed with a single-story office building with a retail area and manager's apartment and seven single-story self-storage buildings that were constructed in 1995. Additional improvements consist of asphalt and concrete-paved parking and driveway areas, security gates, and landscaped areas. The site location is shown on the 1981 USGS Topographic Quadrangle Map of Tustin, California. Please refer to Figure 1 - Site Locus Map.

3.3 Site Improvements

3.3.1 Exterior Improvements

Exterior improvements at the site consist of asphalt- and concrete-paved driveways and parking areas, which surround the office and self-storage buildings and security gates. Paved areas did not exhibit obvious staining indicative of a release at the time of the site visit.

Three pole-mounted transformers were observed southwest of the site, outside the site boundary. The transformers appeared to be in good condition, with no evidence of leaks or staining. As such, the presence of transformers is not considered a concern to this investigation. VERTEX was not able to identify the owner of the transformers.

Small landscaped areas were observed along the western boundary of the site and surrounding the office/manager's housing building.

Refer to Figure 2 - Site Schematic, for a layout of the site.

3.3.2 Building Description

The single-story office building is constructed of wood framing with stucco on a slab-on-grade foundation. Interior construction consists of painted drywall walls and ceilings and tile flooring. The single-story self-storage buildings are constructed of steel, concrete, and concrete brick walls on a slab-on-grade foundation with rollup steel doors. The storage units consist of bare concrete floors and metal walls. Ceilings typically consist of metal panels. Metal rollup doors are used for access to each storage unit.

3.3.3 Utilities

According to site reconnaissance, interview with on-site management personnel, and/or municipal records reviewed, the following entities provide utility service to the site (see Table 3-1):

TABLE 3-1 – UTILITIES

Utility	Provider	Comments
Electricity	Southern California Edison	No concerns
Natural Gas	The Gas Company	No concerns

TABLE 3-1 – UTILITIES		
Utility	**Provider**	**Comments**
Water	City of Santa Ana	No concerns
Sanitary Sewer	City of Santa Ana	No concerns
Storm Sewer	City of Santa Ana	No concerns

3.4 Tenant Operations

The site is currently operated as an All Aboard self-storage facility with a ground floor, on-site manager's residence. Chemicals at the site are limited to common household strength cleaning products, construction supplies, pesticides and limited amounts of petroleum which are stored in a maintenance unit. The maintenance spaces appeared to be well-maintained and all products were stored within their original retail containers. No evidence of leaks or staining was observed in these areas. Significant quantities of petroleum products or hazardous material use or storage were not observed on-site. According to Ms. Nancy Talbot, Store Manager for All Aboard Storage, no operations using hazardous chemicals apart from minor cleaning/repair of the site maintenance equipment are performed on-site. As such, the current on-site operations are not considered an environmental concern.

3.5 Environmental Setting

3.5.1 Topography

The site location is shown on the 1981 USGS Topographic Quadrangle Map of Tustin, California. The surface elevation of the site is approximately 130 feet above mean sea level. Topography slopes to the southwest across the site. Regional topography slopes to the southwest.

3.5.2 Surface Water and Wetlands

The site was inspected for the presence of sensitive ecological areas by noting environmental indicators (e.g., wetlands, vegetation, floodplains) located on or immediately adjoining the site. No wetlands or surface water was observed on-site. According to the National Wetland Inventory, no wetlands are located on-site.

According to the Orange County, California FEMA Flood Map, 06059C0276J, the site is located in flood hazard zone X, which is defined as an area outside the 500-year flood plain.

A storm water drain was observed west of the site, along North Standard Avenue, which discharges into the city storm water system. VERTEX did not observe evidence of staining around the storm drain.

3.5.3 Subsurface Geologic Conditions

According to the SSURGO Soil Map provided by EDR, soils at the site consist of the Mocho Soil. The Mocho Soil consists of loam that is well drained, and has moderate infiltration rates. Based on a subsurface investigation of the site performed by VERTEX in June 2013, lithology encountered at the site generally consisted of brown loamy soils at depths less than 20 feet bgs, and brown loamy clays at depths of 20 to 30 feet bgs.

3.5.4 Groundwater Flow

Information from LUST files for two nearby facilities located within two miles of the site was obtained from the ENVIROSTOR database. According to groundwater elevation measurements collected over a period of more than five years, groundwater in the area flows to the southeast. Depth to groundwater at these locations was measured at 85 to 90 feet below ground surface (bgs). VERTEX notes that depth to groundwater may fluctuate depending upon seasonal rainfall amounts. Actual flow direction may be influenced by differential weathering and fracturing of

underlying bedrock or other factors including underground structures, and production wells, seasonal precipitation or nearby waterway fluctuations, none of which were considered during this study.

4.0 INTERVIEWS AND USER-PROVIDED INFORMATION

VERTEX requested information from the client ("User") and interviewed knowledgeable individuals about the subject site.

4.1 Historical Ownership Information

VERTEX was not provided with ownership information by Extra Space Storage LLC. According to the most recent deed record for the site, the site is currently owned by Santa Ana Hyrail III LLC. Additional deed records were not readily available for review. Previous owners of the site were not available to be interviewed.

4.2 Environmental Liens and Activity and Use Limitations

No environmental liens or AULs were noted through limited review of ownership records. An Environmental Lien Search conducted by Environmental Data Resources, Inc. (EDR), did not identify an environmental lien or AUL associated with the site (Appendix B). Extra Space Storage LLC was not aware of environmental liens or AULs associated with the subject site.

4.3 Valuation Reduction for Environmental Issues

Extra Space Storage, Inc. did not provide VERTEX with information regarding any reduction in the value of the site property resulting from on-site environmental issues.

4.4 Reason for Performing Phase I

This Phase I ESA was conducted on behalf of Extra Space Storage LLC as part of the Client's due diligence associated with the proposed acquisition of the subject site by Client.

4.5 Ownership, Management, and Tenant Information

The site is currently owned by Santa Ana Hyrail III LLC and is occupied and managed by All Aboard Mini Storage LLC.

4.6 Interviews

VERTEX conducted interviews regarding site and surrounding land use history with the following individuals (see Table 4-1):

TABLE 4-1 – INTERVIEWS

Personnel	Position	Information Provided
Ms. Nancy Talbot	Property Manager	Site history and current use
Representative	City of Santa Ana Water Department	Water and Sewer Connection Information

Additional information obtained during these interviews is discussed in the relevant sections of this report.

5.0 HISTORICAL RECORDS REVIEW

Past land uses were investigated to identify historical practices or conditions which may have impacted the site. This was accomplished via an ownership records review at the Orange County Recorder's Office as well as a review of historical documents (i.e., aerial photographs, topographic maps, and city directories, etc.).

5.1 Prior Ownership

VERTEX reviewed title records for the site provided by EDR and at the Orange County Recorder's Office. Please refer to Table 5-1 for information obtained:

TABLE 5-1 – DEED RECORDS REVIEW

Grantee	Grantor	Date	Reference Number
Rail Pacific II LP	Santa Ana Hyrail III LLC	8/16/2005	R050688797

Deed records dated prior to 2005 were not readily available. No environmental liens or AULs were noted through review of ownership records. Prior owners of the site were not available to be interviewed. VERTEX did not identify concerns associated with former operations.

5.2 Aerial Photography

Aerial photographs including the site and adjoining properties were obtained from EDR. Copies of the aerial photographs are included in Appendix C. A summary of the information obtained from the review is provided in Table 5-2.

TABLE 5-2 – AERIAL PHOTOGRAPHY REVIEW			
Year	**Summary (on-site)**	**Summary (off-site)**	**Concerns**
1938	The site appears to consist of railroad tracks, undeveloped land, and structure on the northern portion of the site. The remaining area on-site is undeveloped land.	East 4th Street is visible north of the site, beyond which, railroad tracks and several structures are visible. Railroad tracks and a structure are visible east of the site. East 1st Street is visible south of the site, beyond which is vacant land and several structures. Three structures are visible southwest of the site. North Standard Avenue is visible west of the site, beyond which, several large structures are visible. Two structures and Breeden Street are visible adjoining west of the site. Beyond Breeden Street, several structures are visible.	None
1947	The site appears similar to the 1938 aerial photograph.	The structures west of the site, beyond Breeden Street, appear to have been further developed.	None
1953	A structure has been developed on the southern portion of the site.	The structures south of the site, beyond East 1st Street appear to have been further developed.	None
1960	The site appears similar to the 1953 aerial photograph.	A structure has been developed north of the site, beyond East 4th Street.	None
1968	A structure has been developed on the western portion of the site. The structure on the southern portion of the site is no longer visible.	No structures are visible north of the site, beyond East 4th Street. One of the structures adjoining east of the site is no longer visible. The structures southwest of the site have been redeveloped.	None
1977	The structure on the northern portion of the site is no longer visible. Several structures have been developed towards the center of the site. The southern portion of the site appears to be used as vehicle storage.	Several structures have been developed south of the site, beyond East 1st Street.	None
1990	The southern portion of the site no longer appears to contain vehicle storage.	One of the structures east of the site is no longer visible.	None
1994,1995 Composite	The site appears to consist of vacant land.	The property adjoining east of the site appears to consist of vacant land. The property south of the site, beyond East 1st Street, appears to consist of vacant land. The property adjoining west of the site appears to consist of vacant land.	None
2005	The site appears to be developed with the current improvements.	A structure has been developed north of the site, beyond East 4th Street. A large structure has been developed adjoining east of the site. The property south of the site, beyond East 1st street has been redeveloped.	None
2009	The site appears similar to the 2005 aerial photograph.	Surrounding areas appear similar to the 2005 aerial photograph.	None
2010	The site appears similar to the 2009 aerial photograph.	Surrounding areas appear similar to the 2009 aerial photograph.	None
2012	The site appears similar to the 2010 aerial photograph.	The surrounding areas appear similar to the 2010 aerial photograph.	None

A review of the above-referenced historical aerial photographs revealed that the site was developed with railroad tracks and a railway station from beginning in 1938. The site was further developed with section housing and a planing mill prior to 1968. The site consisted of vacant land in 1994 and was developed with the current improvements prior to 2005.

5.3 Topographic Maps

Topographic maps including the site and adjoining properties were obtained from EDR. Copies of the topographic maps are included in Appendix D. A summary of the information obtained from the review is provided in Table 5-3.

TABLE 5-3 – TOPOGRAPHIC MAP REVIEW

Year	Summary (on-site)	Summary (off-site)	Concerns
1901	Due to the scale of the map, the exact use and location of the site could not be determined.	Due to the scale of the map, the exact use and location of surrounding areas could not be determined.	None
1902	Due to the scale of the map, the exact use and location of the site could not be determined.	Due to the scale of the map, the exact use and location of surrounding areas could not be determined.	None
1935	Due to the scale of the map, the exact use and location of the site could not be determined.	Due to the scale of the map, the exact use and location of surrounding areas could not be determined.	None
1942	The site is depicted as a built up area. Train tracks are depicted crossing the site.	East 4th Street is depicted adjoining north of the site. Train tracks are depicted adjoining east of the site. East 1st Street is depicted adjoining south of the site. Breeden Street and North Standard Avenue are depicted adjoining west of the site.	None
1948	The site is depicted with more train tracks.	More train tracks are depicted adjoining east of the site.	None
1965	A train station structure is depicted on the northern portion of the site.	A train station structure is depicted east of the site.	None
1972	The site appears similar to the 1965 topographic map.	Surrounding areas appear similar to the 1965 topographic map.	None
1981	The site appears similar to the 1972 topographic map.	Surrounding areas appear similar to the 1972 topographic map.	None

5.4 City Directories

City directories for the site were obtained from EDR at approximate five-year intervals from 1920-2012. Please refer to Table 5-4 below for a summary of properties noted during a review of city directories.

TABLE 5-4 – CITY DIRECTORY REVIEW

Year	Summary (on-site)	Summary (off-site)	Concerns
1920	No Listing	*East 3rd Street* 928: G.H. Dow *East 4th Street* 1029: CW Crawford Restaurant, EJ Vasquez Shoemaker (1922)	
1925	No Listing	*East 3rd Street* 928: G.J. Wood *Breeden Street* 312: De Luxe Photo Service 316: Depot Café	
1930	No Listing	*East 3rd Street* 928: G.J. Wood *East 4th Street* 1008: Raitt's Sanitary Dairy *Breeden Street* 312: Swiney & Wilsdn Photos 316: U.S. Termite Control Warehouse	
1936	*1030 East 4th Street:* SP Ry Co.	*East 3rd Street* 928: G.R. Oross *East 4th Street* 1008: Raitt's Rich Milk Co. 1029: Jesus Gastelo Restaurant *Breeden Street* 312: De Luxe Photo Service	
1941	*1030 East 4th Street:* Freight & Ticket Office	*East 4th Street* 1008: Arden Farms Co. 1029: Ray B Sandoval *North Standard Avenue* 201: La Belle Beauty Shop 203: Pillowry Gift Shop	
1945	*1030 East 4th Street:* Depot Freight & Ticketing Office	*East 3rd Street* 928: Barr Lumber Yard *East 4th Street* 1029: Right Road Café	

TABLE 5-4 – CITY DIRECTORY REVIEW			
Year	**Summary (on-site)**	**Summary (off-site)**	**Concerns**
1952	*1030 East 4th Street:* South Pacific Co.	*East 4th Street* 1008: Arden Farms Co. 1038: Santa Fe Ry Co. *North Standard Avenue* 201: Harris Drug Store 210: Gold Furn Co. 222: Fullerton Store	
1956	*1030 East 4th Street:* Pac Motor Trucking Co., Freight Ofc, Santa Ana Ticket Freight & Passenger Agt	*East 4th Street* 1008: Arden Farms Co. 1029: Right Road Café	
1960	*1030 East 4th Street:* PE Ry Frt Agency, SP Depot	*East 4th Street* 1008: Arden Farms 1029: Right Road Café	
1966	*1030 East 4th Street:* Santa Ana Freight Ofc, Southern Pacific Co.	*East 4th Street* 1008: Arden Farms Co. Santa Ana 1010: Skyline Realty 1029: Right Road café	
1970	No Listing	*East 4th Street* 1008: Arden Farms 1029: Right Road Café	
1975	No Listing	*East 3rd Street* 928: **Tom's Towing & Truck Repair** *East 4th Street* 1008: Arden Farms	
1980	No Listing	*East 3rd Street* 928: **Reindeer Towing & Repair Co., Truck Repair Service** *East 4th Street* 1008: Main Office Santa Ana	
1986	No Listing	*East 3rd Street* 928: **Honda Auto Dismantling, Honda Wrecking Yard** 938: **Tom's Truck Repair** *East 4th Street* 1008: **Tom's Towing Division**	
1991	No Listing	*East 3rd Street* 928: **Sure Lease Rentals Inc., Tom's Truck Center** 936: **Nissan UD Diesel Truck of Orange County** 938: **Tom's Truck Center** *East 4th Street* 1008: **Tom's Towing Division, Tom's Truck Sales**

Year	**Summary (on-site)**	**Summary (off-site)**	**Concerns**
		1029: Right Road Café	
2002	*1030 East 4th Street:* All Aboard Mini Storage	*East 3rd Street* 928: **Tom's Truck & Used Parts** 936: **Tom's Truck Center, Reindeer Inc.** *East 4th Street* 1008: **Sisu Trucks, Office, Reindeer Inc., Aeromatc Trucks, Magnum Trucks** 1029: Taqueria de Anda	
2007	No Listing	*East 3rd Street* 928: **Tom's Truck Center Santa Ana** 936: **Suzuki Depot** *East 4th Street* 1029: Taqueria de Anda 1038: Joe Kunz Co. Inc.	
2012	*1030 East 4th Street:* All Aboard Mini Storage	*East 3rd Street* 936: **Reindeer Inc, Tom's Truck Center, Iveco Diesel, Suzuki Depot Parts Department** *East 4th Street* 1008: **Tom's Truck Center** 1029: Taqueria de Anda 1038: Joe Kunz Co. Inc.	

No on-site concerns were noted from review of city directories. Off-site properties of potential concern are discussed in Section 6.2.2.

5.5 Sanborn Fire Insurance Maps

A search of Sanborn Fire Insurance maps by EDR Sanborn, Inc. was requested by VERTEX. A copy of the Sanborn Fire Insurance Maps is included in Appendix E. A summary of the information reviewed is presented below:

TABLE 5-5 – SANBORN REVIEW			
Year	**Summary (on-site)**	**Summary (off-site)**	**Concerns**
1885	A dwelling and a barn yard are depicted on the northern portion of the site. The rest of the site is not depicted.	*North:* East 4th Street, beyond which, S.H. Pendleton Lumber Yard is depicted. *South:* The area south of the site is not depicted. *East:* Railroad tracks and Southern California (Sante Fe) Depot are depicted. *West:* A dwelling is depicted.	None
1906	Southern Pacific Railroad Depot is depicted on the northern portion of the site. Railroad tracks are depicted across the site.	*North:* East 4th Street, beyond which, Southern Chill Creamery & Ice Co. is depicted. *South:* The area is not depicted. *Southwest:* East 2nd Street and Cal Fruit Canners Association are depicted. *East:* Railroad tracks and AT&SF Railroad Depot are depicted *West:* North Evergreen Street, Breeden Street and vacant land are depicted.	None
1949	Southern Pacific Railroad Depot is depicted on the northern portion of the site. Section Housing is depicted on the southern portion of the site. A lumber shed is depicted on the western portion of the site. Railroad tracks are depicted across the site.	*North:* East 4th Street, beyond which, railroad tracks are depicted. *South:* The area is not depicted. *Southwest:* East Second Street, two vacant buildings and railroad tracks are depicted. *East:* AT&SF Railroad Depot and railroad tracks are depicted. *West:* North Evergreen Street, Breeden Street and lumber sheds are depicted.	None

TABLE 5-5 – SANBORN REVIEW			
Year	**Summary (on-site)**	**Summary (off-site)**	**Concerns**
1963	Southern Pacific Railroad Depot is depicted on the northern portion of the site. Section Housing is depicted on the southern portion of the site. A lumber shed is depicted on the western portion of the site. Railroad tracks are depicted across the site.	*North:* East 4th Street, beyond which, railroad tracks are depicted. *South:* The area is not depicted. *Southwest:* Railroad tracks and vacant land are depicted. *East:* AT&SF Railroad Depot and railroad tracks are depicted. *West:* North Evergreen Street, Breeden Street and lumber sheds are depicted.	None
1969	Southern Pacific Railroad Depot is depicted on the northern portion of the site. Section Housing is depicted on the southern portion of the site. A planing mill and an office are depicted on the western portion of the site. Railroad tracks are depicted across the site.	*North:* East 4th Street, beyond which, railroad tracks are depicted. *South:* The area is not depicted. *East:* AT&SF Railroad Depot and railroad tracks are depicted. *Southwest:* Two concrete structures and East 2nd Street are depicted. *West:* Taylor Street is depicted, beyond which is a parking lot.	None

5.6 Previous Environmental Investigations

VERTEX was provided with and reviewed the following previous environmental reports regarding the site:

Report of Foundation Investigation, prepared by Law/Crandall, Inc. (LCI) for Rail Pacific, Inc., dated August 4, 1992.

LCI conducted a foundation investigation prior to the development of the current improvements. LCI drilled seven borings to depths ranging from six to 21 feet bgs and determined that soils below the site consist mostly of natural soils which consist of silty sand, silt, and sand. Fill soils were encountered in one of the borings comprised of silty gravel. LCI gathered samples and conducted compressibility tests to determine if the soils were suitable for development. It was

concluded that the existing natural soils at the site were moderately firm, but would lose strength when wetted and were not considered suitable for construction. LCI recommended two feet of the upper natural soils be removed and replaced with properly compacted fill.

Phase I Environmental Site Assessment Report, prepared by Secor International Incorporated (Secor) for GE Real Estate and North American Debt, dated July 11, 2005.

At the time of Secor's assessment, the site consisted of 2.92 acres developed as All Aboard Mini Storage. The site consisted of seven single-story self-storage structures and one single-story office/manager's apartment unit. Secor determined that the site was formerly developed as a residential property, a train depot and a railroad yard prior to the development of the current improvements. Secor reviewed a prior Phase I Site Assessment conducted by LCI in 1992. LCI observed surface soil staining along the former railroad tracks that was determined to be diesel fuel from the rail spurs or parked cars. According to a representative of Hyrail Partners II LP, the site was graded to a depth of approximately six feet bgs in 1993. The staining was determined to be *de minimis* based on the observed soil. Secor identified several adjoining facilities on regulatory databases, but did not identify specific RECs in connection with the site and recommended no further assessment for the site.

5.7 Summary of Historical Records Review

Based on a review of aerial photographs (1938-2012), topographic maps (1901-1981), city directories (1920-2012), Sanborn Maps (1885-1969), title records, previous environmental investigations, and interviews with municipal officials, the site was residentially occupied from at least 1885 until approximately 1906 when it was developed as a railway station and railroad tracks. Other areas of the site were further improved in 1949 with section housing and in 1969, with a planing mill. The site was vacant land from approximately 1994 until developed with the current improvements in 1995. Since 1995, the site has been occupied by a self-storage facility with an office/retail area and manager's apartment. No environmental concerns were identified with respect to the current use of the site. Based on the past use of the site for rail operations, in June 2013 VERTEX performed a Phase II LSI at the site. Please refer to Section 9.0 for additional information.

6.0 REGULATORY AGENCY RECORDS SEARCH

VERTEX reviewed a regulatory database report obtained from EDR. The EDR report is included in Appendix F. A review of databases and files from federal, state, and local environmental regulatory agencies was conducted to identify the use, generation, storage, treatment or disposal of hazardous materials and chemicals, or release incidents of such materials which may impact the site. The databases discussed in the following sections address ASTM requirements. Additional Federal and state databases were also reviewed. Please refer to the EDR report for a detailed listing.

A summary of the EDR database information is provided in Table 6-1.

TABLE 6-1 – REGULATORY DATABASE SUMMARY

Database	Radius	Target Property	Surrounding Facilities
National Priorities List (NPL)/De-listed NPL	1 Mile	-	0
Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Sites	½ Mile	-	1

Included in the EDR database report is an orphan summary. This summary identifies facilities that are contained on one of the above-referenced databases or lists, but that did not contain complete or accurate geographic data. Consequently, EDR was unable to map the facilities in relation to the site. VERTEX reviewed the orphan summary prior to inspecting the site and

surrounding properties. Orphan properties located within ASTM search distances of the subject site were incorporated into VERTEX's review.

6.1 Federal Regulatory Records

6.1.1 On-Site Listings

The site was not identified on the federal databases searched by EDR.

6.1.2 Off-Site Listings

A review of the federal regulatory databases revealed six RCRA-SQG facilities within 500 feet and up-gradient of the site, which are discussed in Table 6-2.

TABLE 6-2 – OFF-SITE LISTINGS

Facility	Distance/Direction	Regulatory Status
Joe's Transmission 117 North Standard	Adjoining/southwest / Hydraulically Up-gradient	This facility is identified on the RCRA-SQG database as a small SQG facility. No violations have been reported related to this facility.
Berlin Tire Center 115 North Standard	Adjoining/southwest / Hydraulically Up-gradient	This facility is identified on the RCRA-SQG database as a recycler of aqueous solutions with total organic residuals of less than ten percent. No violations have been reported related to this facility.
Tom's Truck Center 936 East 3rd Street	70-feet/west/ Hydraulically Up-gradient	This facility is identified on the RCRA-SQG database as a small SQG facility. No violations have been reported related to this facility.
Madison Materials 1035 East 4th Street	125-feet/north/ Hydraulically Up-gradient	This facility is identified on the RCRA-SQG database as generating ignitable hazardous wastes, corrosive hazardous wastes, wastewaters, process residuals, preservative drips, and spent solvent formulations from wood preserving processes, and bottom sediment sludge from the treatment of wastewaters from wood preserving processes. No violations have been reported related to this facility.
Rice Auto Parts 905 East 2nd Street	330-feet/west/ Hydraulically Up-gradient	This facility is identified on the RCRA-SQG database as generating lead. No violations have been reported related to this facility.
Federal Disposal Services 922 East 4th Street	420-feet/west/ Hydraulically Up-gradient	This facility is identified on the RCRA-SQG database as a transporter of hazardous wastes. No violations have been reported related to this facility.

Numerous facilities were identified on state and federal regulatory databases that are located within 500 feet and up-gradient of the site. Impact to the site from a release at one or more of these facilities cannot be ruled out. Therefore, these facilities are considered a concern to the site. There is no indicated similar use of chemicals on the site; therefore, it is unlikely that the owner or operator of the site would be required by a regulatory agency to address impacts to the site, if identified, emanating from an off-site source. Furthermore, we do not believe that impacts to the site emanating from off-site sources would present a vapor intrusion risk to site occupants given that (i) the depth to groundwater of 85 to 90 feet, (ii) the uses associated with those sites that are up-gradient of the on-site apartment unit do not present vapor intrusion risks, and (iii) the portions of the site that are down-gradient of areas of concern are occupied by parking lots and storage units.

Facilities located greater than 500 feet from the site or facilities located to the east and south of the site (down-gradient) are not expected to present a concern, based on hydrogeologic relationship, depth to groundwater and/or distance.

6.2 State and Local Regulatory Records

6.2.1 On-Site Listings

The site was not identified on the state and local regulatory databases searched by EDR.

6.2.2 Off-Site Listings

A review of state regulatory databases revealed two HIST UST facilities, two SWEEPS UST facilities, one SWF/LF facility, one AST facility, one CA FID UST facility, one LUST facility, one SWRCY facility, and one PROC facility within 500 feet and up-gradient to the site. These facilities are discussed in Table 6-3.

TABLE 6-3 – OFF-SITE LISTINGS		
Facility	**Distance/Direction**	**Regulatory Status**
various auto service businesses 115 North Standard Avenue	Adjoining/southwest / Hydraulically Up-gradient	This facility is listed on the EDR Historical Auto Stations database as KC Auto Collision in 1999 and from 2001 through 2002, as Kraaco Automotive Inc. in 2003, as Sterling Auto Body Centers from 2004 through 2008, and as To & Mo Auto Center from 2010 through 2012. No releases have been reported related to this facility.
Tom's Truck Center 1008 East 4th Street	70-feet/west/ Hydraulically Up-gradient	**HIST UST:** Identified for one, 7,600 gallon gasoline UST. **SWEEPS UST:** Identified for one, 7,500 gallon gasoline UST **LUST:** Release discovered in 1998, soil impact only, received closure in 1999. **CA FID UST:** Identified as an active UST
Lanier Body Shop, Cruz Auto Repair 936 East 2nd Street	90-feet/ southwest/ Hydraulically Cross-gradient	This facility is identified on the EDR Historical Auto Stations database as Lanier Body Shop in 2002 and 2005, and as Cruz Auto Repair in 2012. No releases have been reported related to this facility.
Madison Materials 1035 East 4th Street	125-feet/north/ Hydraulically Up-gradient	**SWF/LF:** Listed as a large volume transfer/processing facility of construction/demolition debris, green materials, inert, and metals. **AST:** Listed for one, 1,320 gallon AST
Vitec Inc. 1043 East 4th Street	125-feet/northeast/ Hydraulically Cross-gradient	**CA FID UST:** Identified as an active UST **HIST UST:** Identified for one, 5,500 gallon UST that was installed in 1970. **SWEEPS UST:** Identified as an active UST
Rice Auto Salvage 905 East 2nd Street	330-feet/west/ Hydraulically Up-gradient	**LUST:** Release of gasoline from an unknown source in 1991, impacted soil only, has not received closure.
Men Cal Recycling 941 East 4th Street	330-feet/northwest/ Hydraulically Up-gradient	This facility is identified on the SWRCY and PROC as a recycler of aluminum, glass, plastic and metals. No releases or violations have been reported related to this facility.

Numerous facilities were identified on state and federal regulatory databases that are located within 500 feet and up-gradient of the site. Impact to the site from a release at one or more of these facilities cannot be ruled out. Therefore, these facilities are considered a concern to the site. However, because there is no indicated similar use of chemicals on the site, it is unlikely that the owner or operator of the site would be required by a regulatory agency to address impact to the site, if identified. Furthermore, it does not appear that impact to the site would present a vapor intrusion risk to site occupants, given depth to groundwater of 85 to 90 feet, no use of concern up-gradient of the on-site apartment unit, and that the portion of the site down-gradient of the areas of concern are occupied by parking lots and storage units.

Facilities located greater than 500 feet from the site or facilities located to the east and south of

the site (down-gradient) are not expected to present a concern, based on hydrogeologic relationship, depth to groundwater and/or distance.

6.3 Local Records

On April 24, 2013, VERTEX submitted an Open Records Request to Orange County for records relative to the site. A summary of the information obtained is included in Table 6-3.

TABLE 6-3 – LOCAL RESEARCH SUMMARY

Office	Information Obtained	Comments
Orange County Recorder's Office	Property Information	See Section 3.2
Santa Ana Fire Department	Not Yet Received	VERTEX has not received a response to an open records request.
Orange County Environmental Health Department	Not Yet Received	VERTEX has not received a response to an open records request.

7.0 ON-SITE ENVIRONMENTAL ASSESSMENT

7.1 Underground Storage Tanks (USTs)

Visual evidence (i.e., pipes, vents, and dispensers) indicating existing on-site USTs was not observed at the site. In addition, according to records at the state and federal agencies as provided by EDR, as well as interviews with a site representative and local municipal officials, the site does not currently contain USTs. As such, on-site USTs are not considered a concern to this investigation.

7.2 Aboveground Storage Tanks (ASTs)

Visual evidence (i.e., pipes, vents, steel cradles, concrete pads) indicating existing on-site ASTs was not observed at the site. In addition, according to records at the state and federal agencies as provided by EDR, as well as interviews with a site representative and local municipal officials, the site does not currently contain ASTs. As such, on-site ASTs are not considered a concern to this investigation.

7.3 Hazardous Material Usage

VERTEX observed that site management utilizes a maintenance unit to store various household strength cleaning products, paints, construction supplies, pesticides and a golf cart. No evidence of leakage was observed in or around these maintenance spaces and all products are stored in their original containers. No staining was observed on the concrete floor of these units. According to Ms. Talbot, operations requiring the use of hazardous materials on-site are limited to cleaning and minor construction/maintenance activities. As such, hazardous material usage at the site is not considered an environmental concern.

7.4 Solid Waste Management

Non-hazardous solid waste generated on-site consists of general household and office waste. A dumpster for the collection and storage of solid waste is located on the western portion of the site. The dumpster is staged on paved surfaces and is serviced by Waste Management. No evidence of petroleum or chemical discharge or disposal was observed around the dumpster at the time of the site visit.

7.5 Hazardous Waste Management

Hazardous waste is not currently generated by on-site operations.

7.6 Unlabeled Drums/Containers

No unlabeled drums or containers were observed on the site.

7.7 Stained Soil or Pavement

No stained soil or pavement was observed on the site.

7.8 Stressed Vegetation

VERTEX did not encounter visual evidence of stressed vegetation or stained surfaces at the site.

7.9 Polychlorinated Biphenyl (PCB) Containing Equipment

Three pole-mounted transformers were observed southwest of the office building. The transformers were mounted onto a single pole located outside the site boundary. The transformers appeared to be in good condition, with no evidence of leaks or staining. As such, the presence of transformers is not considered a concern to this investigation.

7.10 Water, Wastewater and Storm-Water

7.10.1 Water Supply

The site is connected to the municipal water supply provided by the City of Santa Ana. No on-site potable water wells were noted during the site investigation. The City of Santa Ana was not able to provide a connection date for the site; however, it is likely the site was connected to the city water system when it was developed with the current improvements in 1995. No concerns were noted with the municipal water service provided to the site.

7.10.2 Wastewater

The City of Santa Ana provides sewer service to the site. The City of Santa Ana was not able to provide a connection date for the site; however, it is likely the site was connected to the city sewer system when it was developed with the current improvements in 1995. No concerns were noted with the city sewer service provided to the site. Sanitary wastewater is the only wastewater generated at the site.

7.10.3 Storm-Water

Storm-water discharges into a storm-water drain west of the site, along North Standard Avenue, which discharges to the city storm-water system. VERTEX did not observe evidence of staining around the storm drain.

7.11 Surface Water and Wetlands

The site was inspected for the presence of sensitive ecological areas by noting environmental indicators (e.g., wetland vegetation, floodplains) located on or immediately adjoining the site. No surface water or wetlands were identified on-site.

7.12 Pits, Ponds, Lagoons and Pools of Liquids

No pits, ponds, lagoons and/or pools of liquid were observed on-site.

7.13 Drains and Sumps

No floor drains or sumps were observed on-site.

7.14 Wells

No dry wells, injection wells or other wells were observed on-site.

7.15 Odors

VERTEX did not note strong, pungent, or noxious odors at the time of the site visit.

7.16 Dry Cleaning Operations

Site reconnaissance, as well as review of available municipal records and regulatory records, did not reveal the presence of current or historical on-site dry cleaning operations.

7.17 Site Specific Environmental Issues

No site-specific environmental concerns were identified during the assessment.

8.0 REVIEW OF NEARBY/ADJACENT PROPERTIES

The area surrounding the site consists of commercial and industrial properties. Adjoining properties were observed (from the site or from public access areas) for signs of RECs and their potential to pose an environmental concern to the site. The uses and features of adjoining properties are described in Table 8-1.

TABLE 8-1 – NEARBY/ADJACENT PROPERTY SUMMARY

Direction	Property Use	Concerns
North	East 4th Street, beyond which is Taqueria de Anda and Madison Materials (Ware Disposal).	Ware Disposal Co. is discussed in Section 6.2.2.
East	Joe Kunz Co., beyond which is railroad tracks	None
South	East 1st Street, beyond which is California Tool & Welding Supply.	None
Southwest	Various automotive facilities.	The automotive facilities are discussed in Sections 6.1.2 and 6.2.2.
West	Breeden Street, North Standard Avenue, and a parking lot, beyond which is Tom's Truck Center.	Tom's Truck Center is discussed in Sections 6.1.2 and 6.2.2.

9.0 PHASE II LIMITED SUBSURFACE INVESTIGATION

In accordance with VERTEX proposal P.0790.13-rev1, dated June 7, 2013, VERTEX conducted a Phase II LSI.

On June 17, 2013, under the oversight of VERTEX, Ground Penetrating Radar Systems, Inc. (GPRS) of Los Angeles, California, conducted a GPR survey at the site to pre-clear each soil boring of potential subsurface utilities. No subsurface anomalies were identified during the GPR survey.

On June 18, 2013, under the oversight of VERTEX, Martini Drilling Corporation of Huntington Beach, California, advanced four test borings (VB-1 through VB-4) on the site to depths of 30 feet bgs using direct-push drilling techniques. Refusal was not encountered at any of the soil boring locations. Locations of the soil borings are depicted on Figure 2 – Site Schematic.

Soil samples were collected continuously from a four-foot acetate macro core sleeve. After the sampling activities were completed, each boring location was backfilled with native soil and bentonite and patched at grade.

9.1 Site Geology and Hydrogeology

Lithology encountered at the site generally consisted of brown loamy soils at depths less than 20 feet bgs, and brown loamy clays at depths of greater than 20 feet bgs. Groundwater was not encountered during the drilling activities. Although a groundwater flow direction was not identified during this investigation, as previously mentioned, groundwater is inferred to flow to the southeast. Soil boring logs are included in Appendix H.

9.2 Soil Screening and Sampling

Each soil sample was screened for the presence of TVOCs using a PID calibrated to 100 parts-per million by volume (ppmv) of isobutylene. Field screening results did not detect TVOCs in

any of the soil samples screened at concentrations greater than 1 ppmv. Visual or olfactory evidence of impacts was not noted during this investigation. Select soil samples were collected from depths (16 to 20 feet bgs) less than the dense loamy clay layer encountered at depths of 20 feet bgs and greater. The soil samples were submitted to ESC Lab Sciences (ESC) of Mt. Juliet, Tennessee for the following analysis:

- Volatile Organic Compounds (VOCs) via EPA Method 8260B (4 soil, VB-1 to VB-4)
- Polynuclear Aromatic Hydrocarbons (PAHs) via EPA Method 8270 (4 soil, VB-1 to VB-4)
- Total Petroleum Hydrocarbons – Diesel Range Organics (TPH DRO) via EPA Method SW-846 8015 (4 soil, VB-1 to VB-4)
- Resource Conservation and Recovery Act (RCRA) 8 metals via EPA Methods 6010B/7471A (4 soil, VB-1 to VB-4)
- Polychlorinated Biphenyls (PCBs) via EPA Method 8081 (4 soil, VB-1 to VB-4)

As presented in Table 1, acetone was detected in soil samples VB-1 and VB-3 at concentrations of 0.011 milligrams per kilogram (mg/kg), below the California Regional Water Quality Board (RWQCB) Environmental Screening Levels (ESLs; Deep Soil Screening Levels) for Commercial/Industrial Land Use (0.5 mg/kg). Benzene was detected in soil sample VB-1 at a concentration of 0.001 mg/kg and in soil sample VB-3 at a concentration of 0.00042 mg/kg, below the RWQCB ESL of 0.044 mg/kg. Toluene was detected in soil sample VB-1 at a concentration of 0.00076 mg/kg, below the RWQCB ESL of 2.9 mg/kg. No other VOCs were detected at concentrations exceeding laboratory method reporting limits.

TPH DRO in the C10-C22 Hydrocarbons Range was detected in soil sample VB-4 at a concentration of 1.0 mg/kg, below the applicable RWQCB ESL of 530 mg/kg. No other TPH DRO fractions were detected at concentrations exceeding laboratory method reporting limits.

Barium was detected in soil samples VB-1, VB-2, VB-3, and VB-4 at concentrations ranging from 93 to 120 mg/kg, below the applicable California Human Health Screening Levels for Commercial/Industrial Land Use (CHHSL; 63,000 mg/kg) and the RWQCB ESL of 5,000

mg/kg. Chromium was detected in soil samples VB-1, VB-2, VB-3, and VB-4 at concentrations ranging from 11 to 16 mg/kg, below the RWQCB ESL of 5,000 mg/kg. There is no applicable CHHSL standard for total chromium. Lead was detected in soil samples VB-1, VB-2, VB-3, and VB-4 at concentrations ranging from 5.0 to 6.9 mg/kg, below the CHHSL of 3,500 mg/kg and the ESL of 320 mg/kg. Mercury was detected in soil samples VB-1, VB-2, VB-3, and VB-4 at concentrations ranging from 0.034 to 0.041 mg/kg, below the CHHSL of 180 mg/kg and the ESL of 88 mg/kg. Selenium was detected in soil samples VB-1, VB-2, VB-3, and VB-4 at concentrations ranging from 0.70 mg/kg to 1.9 mg/kg, below the CHHSL of 4,800 mg/kg and the ESL of 5,000 mg/kg. Cadmium and silver concentrations were not detected in the soil samples collected.

Arsenic was detected in soil samples VB-1, VB-2, VB-3, and VB-4 at concentrations ranging from 5.4 to 6.4 mg/kg, exceeding the applicable CHHSL of 0.24 mg/kg and the ESL of 0.96 mg/kg. However, according to a document obtained from the California DTSC website dated March 2008, the DTSC findings suggested that, in Southern California, 12 mg/kg may be a useful screening number for evaluating arsenic as a chemical of potential concern. As such, the arsenic concentrations identified are considered to be similar to background arsenic levels found throughout the region, and no regulatory reporting of these concentrations is required.

No PAHs or PCBs were detected in the soil samples collected at concentrations exceeding laboratory method reporting limits. Based on the results of the Phase II LSI, no additional action is warranted at this time.

10.0 FINDINGS AND CONCLUSIONS

VERTEX performed a Phase I ESA and a Phase II LSI in conformance with the scope and limitations of ASTM Practice E 1527-05 of the property located at 1030 East 4th Street, Santa Ana, California. Any exceptions to or deletions from this practice are described in Section 10.0. This assessment revealed no evidence of RECs in connection with the site. As such, no additional work is recommended at this time.

11.0 QUALIFICATIONS

Our professional services have been performed, our findings obtained, and our recommendations prepared in accordance with customary principles and practices in the fields of environmental science and engineering. This warranty is in lieu of all other warranties either expressed or implied. VERTEX is not responsible for the independent conclusions, opinions or recommendations made by others based on the records review, site inspection, field exploration, and laboratory test data presented in this report.

It should be noted that all surficial environmental assessments are inherently limited in the sense that conclusions are drawn and recommendations developed from information obtained from limited research and site evaluation. Subsurface conditions were not field investigated as part of this study and may differ from the conditions implied by the surficial observations. Additionally, the passage of time may result in a change in the environmental characteristics at this site and surrounding properties. This report does not warrant against future operations or conditions, nor does this warrant operations or conditions present of a type or at a location not investigated. This report is not a regulatory compliance audit.

This study is not intended to assess if any groundwater contamination exists by subsurface sampling through the installation of monitoring wells. The scope of work, determined by the client, did not include these activities.

VERTEX reviewed past ownership of the project site in an attempt to determine past site usage. VERTEX is not a professional title insurance firm and makes no guarantee, explicit or implied, that the listing which was reviewed represented a comprehensive delineation of past site ownership or tenancy for legal purposes.

No significant data gaps which would affect VERTEX's ability to identify recognized environmental conditions at the site were identified during this investigation.

We have performed our services and prepared this report in accordance with applicable, generally accepted engineering, environmental or appraisal consulting practices. We make no other warranties, either expressed or implied, as to the character and nature of such services and product.

This report is for the exclusive use of Extra Space Storage LLC, its lenders, insurers, counsel and accountants. Use of this report by any other party shall be at such party's sole risk.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/09/2014 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/09/2014 has revealed that there are 30 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/09/2014 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 02/02/2015 has revealed that there are

EXECUTIVE SUMMARY

20 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, and dated 02/16/2015 has revealed that there are 2 SWF/LF sites within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

CA FID UST: The Facility Inventory Database contains active and inactive underground storage tank locations. The source is the State Water Resource Control Board.

A review of the CA FID UST list, as provided by EDR, and dated 10/31/1994 has revealed that there are 5 CA FID UST sites within approximately 0.25 miles of the target property.

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 11 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2014 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 59 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: D009
Waste name: MERCURY

Waste code: F034
Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESS GENERATED AT PLANTS THAT USE CREOSOTE FORMULATIONS. THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL. (NOTE: THE

MADISON MATERIALS (Continued) **1006805477**

LISTING OF WASTEWATERS THAT HAVE NOT COME INTO CONTACT WITH PROCESS CONTAMINANTS IS STAYED ADMINISTRATIVELY. THE STAY WILL REMAIN IN EFFECT UNTIL FURTHER ADMINISTRATIVE ACTION IS TAKEN.)

Waste code: K001
Waste name: BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATERS FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

Violation Status: No violations found

FINDS:

Registry ID: 110013306341

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

OSHA ESTABLISHMENT

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Manufactured Gas Plants:

The site is on 1.50 acres located in the City of Santa Ana. It is currently occupied by a plastic related business The majority of the site is paved and no evidence of any MGP related odors or visible residues remain. The Santa Ana I site was inspectted by DTSC staff on March 22, 1994. The site is currently occupied by a lumber company. The PEA Report dated December 1, 1993 (analytical) shows high levels of polyaromatic hydrocarbons and poly- nuclear aromatics, lead, and total petroleum hydrocarrbons. The PEA recommended no emergency removal be conducted because of limited exposure to the substances at the site. Additional investigation, however is recommended for the Site around the former concrete oil tank area. DTSC recommends that a loww permeability fill be added to the planter boxes that have high levels of lead. The RWQCB may be concerned with the elevated levels of total petroleum hydrocarbons.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

CA BOND EXP. PLAN:
Reponsible Party: BACKLOG SITE CLEANUP PLANNING REPORT
Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc: This site is projected for cleanup funded by responsible parties with reimbursement to DHS for staff and related costs. However, if the responsible parties fail to provide funding for cleanup, another source of funds will need to be established.
Site Description: This site was a metals plating shop which improperly stored plating wastes.
Hazardous Waste Desc: Heavy metals were stored onsite for long periods of time. The containers deteriorated and wastes were spilled on the pavement and the ground. Wastes may also include cyanide and corrosive materials. The wastes are potentially toxic and may be corrosive upon direct contact.
Threat To Public Health & Env: Although, the site is closed, there is potential for direct contact. Dissolved metals may migrate through the soil and into the ground water.
Site Activity Status: The Orange County Health Department has taken action to remove drummed materials and soil contamination from the site. There is residual contamination of the pavement and probably the soil.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART)

MENCHACA AUTO RPR (Continued) **1000595843**

provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification:	Small Quantity Generator

Hazardous Waste Summary:

Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Violation Status:	No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

G & M OIL #49 (Continued) **S105624533**

Local Agency: Not reported
RB Case Number: 083002831T
LOC Case Number: Not reported
File Location: Regional Board
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: VESA completed historically. Multiple phases of corrective action & CSB results show elevated VOCs persist above CHHSLs/RSLs. Risk evalaution req'd prior to closure consideration - soil vapor survey/RA completed - passed for current occupants (ongoing fueling) and more sensitive adjacent land use (elementary school).

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

EECO (Continued) **1000323973**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Document Type: Removal Action Workplan
Completed Date: 09/19/2002
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 06/27/2001
Comments: DTSC approves the RI/FS for the site. The FS recommended removal of volatile organic compounds via soil vapor extraction and soil excavation with offsite treatment for PAHs contaminated soils.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 01/19/1995
Comments: DTSC reviews and approves the PEA Report. The investigation showed PAHs, VOCs, and heavy metals contamination at the site. DTSC recommends further investigation of the site in the form of a Remedial Investigation/Feasibility study (RI/FS). A deed restriction is also recommended to preclude any changes in the existing or planned future uses without further investigation of the site.

Manufactured Gas Plants:

The former Santa Ana Manufactured Gas Plant (MGP) site is a contiguous property divided into western and eastern portions. The western portion of the site is currently occupied by a vacant historical building. The eastern portion of the site is curreently occupied by an active Southern California Edison electric substa- tion. The site is presently surrounded by a commercial/municipal neighborhood within 350 feet of the site. A community hospital and a school are located approximately 1.5 miles ffrom the site. Town gas plants were the primary source of household heating and lighting in the 1900s. Coal as well as oil were the raw materials used to manufacture gas products. By-products of this operation include tars and lampblack which containn polycyclic aromatic hydrocarbons (PAHs), volatile organic compounds (VOCs), and heavy metals. Although hazardous waste management was not common practice in the early days, water separations and recy- cling to recover and/or treat effluents may havve been employed at town gas sites. However, incidences of spills and leaks may have also been common. Approximately 125 million cubic feet of g were produced at the site during its years of operation. The western portion of the site currently occupiies a vacant historical office building which is located in a business area that has undergone renovation. The city of Santa Ana plans to develop the building for commercial and business purposes.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: Yes
Used oil transfer facility: No
Used oil transporter: No

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/16/2014
Date Data Arrived at EDR: 01/08/2015
Date Made Active in Reports: 02/09/2015
Number of Days to Update: 32

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/16/2014

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/16/2014

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 11/10/2014

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Data Release Frequency: No Update Planned

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

EPA WATCH LIST: EPA WATCH LIST
EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List
The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

North Map:	33117-G7 ORANGE, CA
Most Recent Revision:	1981

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

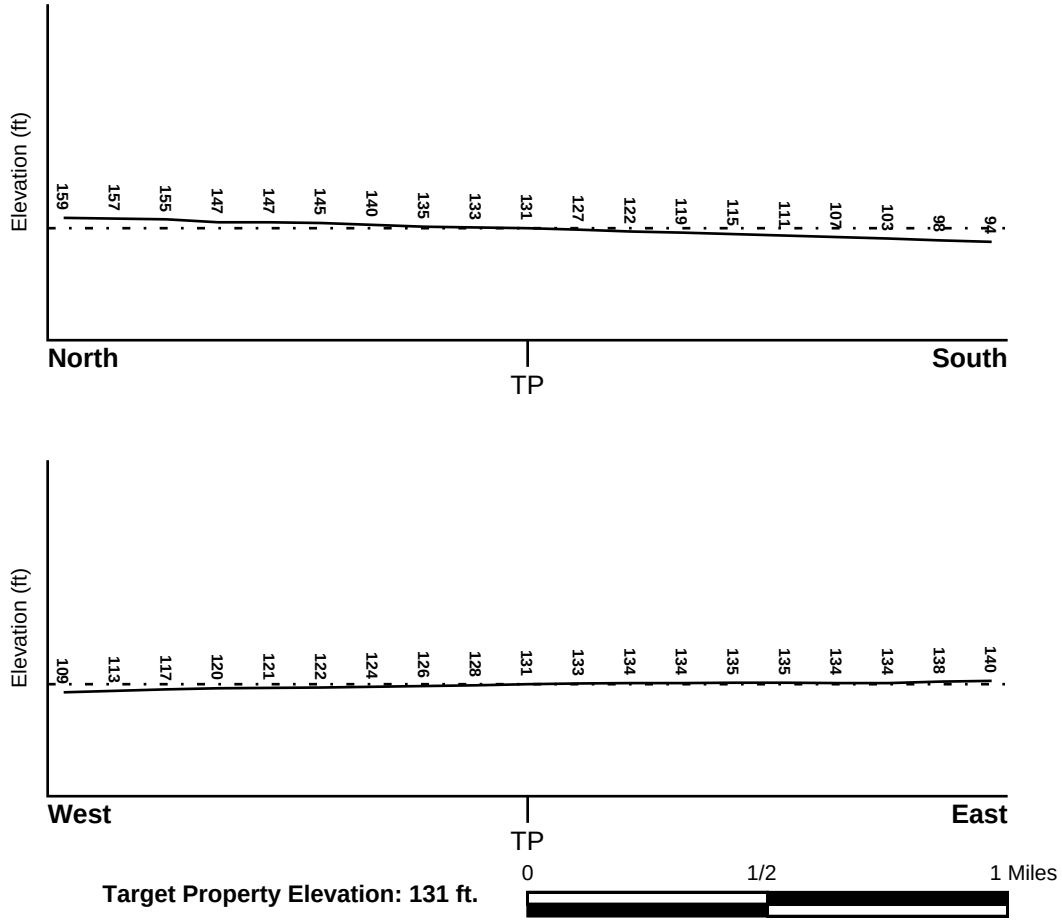
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 131 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
ORANGE, CA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06059C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
TUSTIN	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile WSW
Site Name:	Old Dry Cleaner
Site EPA ID Number:	CAD981164510
Groundwater Flow Direction:	NE AND TOWARD LAGUNA DE SANTA ROSA ON A REGIONAL BASIS, BUT IS AFFECTED BY PUMPING OF MUNICIPAL SUPPLY WELLS. IN PARTICULAR WELL #5, LOCATED WITHIN 1,000 FEET EAST OF THE SITE HAD A CAPTURE ZONE OF 1,000 FEET FROM THE WELL.
Measured Depth to Water:	as shallow as 2 feet.
Hydraulic Connection:	Information is not available about the hydraulic connection between aquifer(s) underlying the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
10	1/2 - 1 Mile SSE	WSW
12	1/2 - 1 Mile NNE	S

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: MOCHO

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	31 inches	loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9
2	31 inches	61 inches	loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9

Soil Map ID: 2

Soil Component Name: SAN EMIGDIO

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9
2	7 inches	61 inches	stratified gravelly loamy coarse sand to very fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

APPENDIX G:

RESUMES OF ENVIRONMENTAL PROFESSIONALS

Mark Jirgal, PG
Senior Project Manager

[mjirgal@vertexeng.com]

Expertise:

Environmental Portfolio Reviews
Phase I ESAs
Phase II LSI
Litigation Support & Expert Testimony (Insurance Support)
Third-Party Impact Investigation
Groundwater & Soil Characterization
Litigation Support & Expert Testimony (Environmental)
Site Characterization
Vapor Intrusion Investigations & Remediation

Education/Training:

B.S., Geology, University of Maryland
B.S., Resource Development, University of Maryland

Biography:

Mr. Jirgal is a Senior Project Manager for VERTEX located in Irvine, California. He has 25 years experience in the Environmental Consulting industry conducting and directing more than 500 Phase I ESAs, Phase II site investigations, and remediation projects throughout the United States. Mr. Jirgal has performed or directed assessment activities on properties ranging in complexity from vacant land to electrical power generating facilities. He has also provided litigation support for cases involving comingled plumes, PRP identification and remediation cost allocation for properties including commercial office, aerospace, waste oil re-refining and oil packaging facilities.

Mr. Jirgal has proven project management experience and has overseen subsurface investigations utilizing a wide variety of investiative techniques including hollow-stem auger, dual-tube percussion, mud-rotary, direct-push, cone-penetrometer and sonic drilling techniques. He has also designed and conducted indoor air and soil gas surveys.

Licenses/Certifications:

Professional Geologist (PG), California, 6611
10 Hour OSHA Training
40 Hour OSHA Training

Stephen McCarthy
Vice President, Due Diligence

[smccarthy@vertexeng.com / 781-952-6000]

Highlights:

Project Management Experience Nationwide
Nationwide Due Diligence Experience

Expertise:

Asbestos
Mold
Compliance Audits
PCA/PCS
Environmental Health & Safety
Remediation & Construction Management

Education/Training:

B.A., History, Providence College, 1986

Biography:

Mr. McCarthy has over 25 years of experience in Environmental Consulting. He has routinely managed several hundred environmental assessment due diligence projects per year for financial, commercial and institutional clients. These projects included Phase I and Phase II Environmental Site Assessments, asbestos surveys and abatement, mold assessments, removal of underground storage tanks and site investigations.

As Vice President, Mr. McCarthy is responsible for project and staff management, document review, quality control and client management. He is responsible for sales, client interaction, proposal preparation and quality assurance of product. In addition, Mr. McCarthy is also responsible for managing the set up and timely completion of due diligence services including Phase I ESAs, planning and management of Phase II subsurface investigations and remediation projects. Specifically this work includes observation of properties and operations, historic site research, delineation of contaminated media, coordinating UST removals, oversight of excavation activities, development of remediation strategies and serving as the liaison between clients, contractors and regulatory agencies.

Licenses/Certifications:

OSHA 40 Hour HAZWOPER
