## SB 407 - Installation of Water Use Efficiency Improvements Verification Form

I, \_\_\_\_\_ who own and/or live at: \_\_\_\_\_  
 (Print Property Owner/Tenant Name) (Address)

verify that water conserving plumbing fixtures required by SB 407 have been installed in the dwelling in compliance with the Code and manufacturer's instructions, and that the fixtures have been tested and function properly.

As of January 1, 2014, SB 407 requires non-compliant plumbing fixtures to be replaced by water-conserving plumbing fixtures when a property is undergoing alterations or improvements as defined by the California Building Code and California Green Building Code. These codes define alteration and improvements as any construction to an existing structure which enhances or improves the structure. Construction related to repairs or maintenance of the structure is not considered to be an alteration or improvement.

These fixtures must be installed by the time a final inspection is requested for your project.

Type of Fixture	Quantity	Fixture Complies	
		Yes	No
Toilets (1.6 gpf) or less			
Faucets (2.2 gpm) or less			
Showerhead(s) (2.5 gpm) or less			
Urinal (0.5 gpf) or less			

*I understand the above requirements and certify that the structure now has compliant water conserving plumbing fixtures installed. I agree to comply with SB 407 in regards to water conserving plumbing fixtures.*

Date

**ATTENTION OWNER – OCCUPANT:**

*This is a Voluntary Water Conserving Plumbing Fixtures verification procedure. If you prefer a building inspection staff to perform the verification, you must arrange to have an adult present at the time of inspection.*

NOTE: This Verification is only used when normal access to the interior of the dwelling by the City of Santa Ana inspection staff is not achieved during the course of project construction.
