SECTION 1 INTRODUCTION

1.1 PURPOSE

This Historical Resources Technical Report (report) has been prepared in support of the proposed City of Santa Ana (City) General Plan Update (the project) to facilitate compliance with the California Environmental Quality Act (CEQA). CEQA requires that the City, as Lead Agency, consider the effects of projects under its jurisdiction on the environment, including the historical environment. The report will inform the analysis of cultural resources to be included in a Program Environmental Impact Report (PEIR) that will be prepared for the project for the City in conjunction with the project. For the purposes of this report, “historical resources” are specifically defined as built environment historical resources, including buildings, structures, objects, districts, and sites. Other cultural resources, including archaeological and Native American resources and human remains, are addressed in a separate report. Built environment historical resources are further defined as those that satisfy the criteria for listing in the National Register of Historic Places (National Register or NRHP), California Register of Historical Resources (California Register or CRHR), Santa Ana Register of Historical Properties (Santa Ana Register or SARHP), or other statutory designation programs administered by Federal, state, regional, or local government agencies.

The report consists of an introduction, including statements of the project location, project description, methods used for the analysis, and qualifications of the preparer; discussions of the environmental setting, including the regulatory setting, historic context, and identification of historical resources; an assessment of potential environmental impacts; and recommended mitigation to address those potential impacts.

1.2 PROJECT LOCATION

The project encompasses the City of Santa Ana, an incorporated city occupying approximately 27 square miles in central Orange County. The cities of Orange and Costa Mesa border Santa Ana to the north and south, respectively. Santa Ana’s western border connects with the cities of Garden Grove, Westminster, and Fountain Valley, while Santa Ana’s eastern border touches the cities of Irvine and Tustin. Regional connectivity to the City of Santa Ana is provided by interstates 5 and 405 and by State Routes 22 and 55.

1.3 PROJECT DESCRIPTION

The City of Santa Ana is in the process of preparing a comprehensive update to its existing General Plan, adopted in 1982. Santa Ana’s “Golden City Beyond: A Shared Vision” General Plan is expected to be completed in 2020 and will guide the City’s development and conservation for the next 25 years through 2045. The update will provide long-term policy direction and communicate the vision, values, and goals for the City’s physical development, fiscal and environmental sustainability, and overall quality of life. The new Santa Ana General Plan will serve to identify areas of opportunity and provide options to enhance development potential in key areas of the city while bringing the City into compliance with recent state laws and reflect updates to current conditions and input from the general public, city staff, and other stakeholders. The updated plan will include eight elements mandated by state law, as well as five optional elements, including a Historic Preservation Element. The City’s vision statement specifically notes “We celebrate our past ...” and, with respect to culture, the Core Values underlying the General Plan Update states:

- Our community values efforts that celebrate our differences as a source of strength, preserve and build upon existing cultural resources, and nurture a citywide culture of empowered residents.¹

The City identified five areas suited for new growth and development: South Main Street, Grand Avenue/17th Street, West Santa Ana Boulevard, 55 Freeway/Dyer Road, and South Bristol Street. These five areas are located along major travel corridors, the future OC Streetcar line, and/or linked to the Downtown. In general, many areas currently designated for General Commercial and Professional Office are expanding opportunities for residential development through a proposed change to the Urban Neighborhood or District Center General Plan land use designations. Industrial Flex would be introduced where Industrial land use designations currently exist within each of the five focus areas in order to allow for cleaner industrial and commercial uses with live-work opportunities.

There are seven other planning areas that represent specific plans and other special zoning areas that were previously adopted: Adaptive Reuse Overlay (2014), Bristol Street Corridor Specific Plan (1991/2018), Harbor Mixed Use Corridor Specific Plan (2014), MainPlace Specific Plan (2019), Metro East Overlay Zone (2007/2018), Midtown Specific Plan (1996), and Transit Zoning Code Specific Development (2010). The potential for new development in these areas is based on the forecasted buildout at the time of the respective zoning document's adoption, minus the amount of new development built between their adoption date and 2019. The most recent adoption/amendment date for each zoning document is noted in parentheses.

Growth outside of the focus areas and special planning areas is expected to be incremental and limited. Some growth was projected for the professional office surrounding the Orange County Global Medical Center and along Broadway north of the Midtown Specific Plan. Some growth was also projected for the commercial and retail area south of the West Santa Ana Boulevard focus area. Finally, some additional residential development is expected to occur on a small portion (five percent) of single-family and multi-family lots through the construction of second units.

Table 1 provides a statistical summary of the buildout potential associated with the General Plan compared to existing conditions. Figure 1 (see Appendix) displays the draft General Plan Land Use Map while Figure 2 (see Appendix) illustrates the boundaries of the five focus areas and special planning areas.

Source: City of Santa Ana, 2020.

- Existing represents conditions as of December 2019 as derived from the City of Santa Ana Planning Information Network and projects already under construction per the January 2020 monthly development project report.
- The potential growth for new development in specific plan / special zoning area is based on the forecasted buildout at the time of the respective zoning document's adoption, minus the amount of new development built between its adoption date and 2019.
- Only includes nonresidential building square footage.
- The figures shown on the row for the Adaptive Reuse Overlay represents parcels that are exclusively in the Adaptive Reuse Overlay boundary. Figures for parcels that are within the boundaries of both the Adaptive Reuse Overlay Zone and a specific plan, other special zoning, or focus area boundary are accounted for in the respective specific plan, other special zoning, or focus area.
- The City has included an assumption for growth on a small portion (five percent) of residential parcels through the construction of second units, which is distributed throughout the City and is not concentrated in a subset of neighborhoods. Additional growth includes known projects in the pipeline and an increase of 10 percent in building square footage and employment for the professional office surrounding the Orange County Global Medical Center and along Broadway north of the Midtown Specific Plan, as well as the commercial and retail along 1st Street south of the West Santa Ana Boulevard focus area.

1.4 METHODS USED

Historical resources and contexts were identified from examination of relevant Federal, state, and local documents, including laws and regulations, plans, databases maintained by the U.S. Department of the Interior (National Park Service) and the California Office of Historic Preservation, the Santa Ana Register of Historical Properties and other City programs, consultation with City Planning and California Office of Historic Preservation staff, and other resources available both online and in archival collections. Specific sources of relevant information are cited in footnotes and compiled in the Sources section of this report. No field work was performed nor was a records search conducted at the South Central Coastal Information Center (SCCIC) at California State University, Fullerton in support of this report. However, the most recent tabulation of historic properties in Orange County, obtained from the SCCIC, was utilized. More information about how historical resources in Santa Ana were identified is provided in Section 4.1 of this report. Potential impacts to historical resources were determined in accordance with the thresholds established by CEQA (Public Resources Code § 21084.1), the California CEQA Regulations (California Code of Regulations § 15064.5), and the City.

1.5 QUALIFICATIONS OF PREPARERS

Chattel, Inc. (Chattel) is a full-service historic preservation consulting firm with practice throughout the western United States. The firm represents governmental agencies and private ventures, successfully balancing project goals with a myriad of historic preservation regulations without sacrificing principles on either side. Comprised of professionals meeting the Secretary of the Interior's Professional Qualifications Standards in history, architecture, architectural history, and historic architecture, the firm offers professional services including historical resources evaluation and project impacts analysis, in addition to consultation on federal, state, and local historic preservation statutes and regulations.

Chattel staff engage in a collaborative process and work together as a team on individual projects. This report was prepared by Principal Associate Leslie Heumann, Associate II Aleli Balaguer, and Associate I Alvin-Christian Nuval, with oversight from President Robert Chattel.

SECTION 2 REGULATORY SETTING

Historical resources in the City of Santa Ana are subject to laws, regulations, policies, and plans at the Federal, state, and local levels. This discussion examines the regulatory setting that applies not only to the adoption of the General Plan Update but also to projects that may occur in the future under the aegis of the General Plan.

2.1 FEDERAL

2.1.1 National Environmental Policy Act

The National Environmental Policy Act of 1969 (NEPA) requires that Federal agencies include in their decision-making processes appropriate and careful consideration of all environmental effects and actions. Specifically, Federal agencies must analyze potential environmental effects of proposed actions and their alternatives for public understanding and scrutiny, avoid or minimize adverse effects of proposed actions, and restore and enhance environmental quality as much as possible.

Regarding cultural resources, NEPA states, “It is the continuing responsibility of the Federal Government to use all practicable means . . . to preserve important historic, cultural, and natural aspects of our national heritage” (42 USC 4331). The degree to which the action may adversely affect districts, sites, highways, structures, or objects listed in or eligible for listing in the National Register of Historic Places (National Register), or may cause loss or destruction of significant scientific, cultural, or historical resources must be considered (40 CFR 1508.27(b)8).

Applicability: NEPA does not apply to the adoption of the General Plan. NEPA would apply to a future City project undertaken by or in partnership with the Federal government, where the relevant Federal agency is the Lead Agency.

2.1.2 National Historic Preservation Act of 1966

The National Historic Preservation Act (NHPA) of 1966, as amended, was established to preserve archaeological and historical sites across the United States at the federal, state, and local levels, by declaring a national policy of historic preservation and instituting a multifaceted program administered by the Secretary of the Interior. Its passage and subsequent amendments created the National Register of Historic Places (National Register), National Historic Landmarks, State Historic Preservation Officers (SHPOs), and Tribal Preservation Officers. It set up a process to certify local governments to carry out the purposes of the NHPA, assisted Native American tribes to preserve their cultural heritage, and created the Advisory Council on Historic Preservation (ACHP).

2.1.2.1 Section 106

Section 106 of the NHPA states that federal agencies with direct or indirect jurisdiction over federally funded, assisted, or licensed undertakings must take into account the effect of the undertaking on any historic property that is included in or eligible for inclusion in the National Register and that the ACHP must be afforded an opportunity to comment such undertakings. The Section 106 process, (36 CFR 800) involves identification of significant historic resources within an “area of potential effect,” determination if the undertaking will cause an adverse effect on historic resources, and resolution of those adverse effects through execution of a Memorandum of Agreement. Interested members of the public—including individuals, organizations, and agencies, such as the California Office of Historic Preservation (OHP)—are provided with opportunities to participate in the process.

Applicability: Section 106 does not apply to the adoption of the General Plan. Section 106 would apply to a future City project undertaken, funded, permitted, or licensed by or in partnership with the Federal government, as specified above.

2.1.2.2 National Register of Historic Places

The National Register of Historic Places is the nation's official list of historic and cultural resources worthy of preservation. Properties listed in the National Register include districts, sites, buildings, structures, and objects that are significant in American history, architecture, archaeology, engineering, and culture. The National Register is administered by the National Park Service (NPS), which is part of the United States Department of the Interior. Resources are eligible for National Register listing if they:

- A) are associated with events that have made a significant contribution to the broad patterns of our history; or
- B) are associated with the lives of significant persons in our past; or
- C) embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or
- D) have yielded or may be likely to yield, information important in history or prehistory.²

Ordinarily cemeteries, birthplaces, or graves of historic figures, properties owned by religious institutions or used for religious purposes, structures that have been moved from their original locations, reconstructed historic buildings, and properties that are primarily commemorative in nature are not considered eligible for the National Register, unless they satisfy certain conditions. In general, a resource must be 50 years old to be considered for the National Register, unless it satisfies a standard of exceptional importance.

In addition to satisfying at least one of the criteria of significance, a resource must also possess integrity. Integrity refers to the ability of a property to convey its significance, and the degree to which the property retains the identity, including physical and visual attributes, for which it is significant. The National Register recognizes seven aspects or qualities of integrity: location, design, setting, materials, workmanship, feeling, and association. To retain its historic integrity, a property must possess several, and usually most, of these aspects. While integrity is important in evaluating and determining significance, a property's physical condition, whether it is in a deteriorated or pristine state, has relatively little influence on its significance. A property that is in good condition may lack the requisite level of integrity to convey its significance due to alterations or other factors. Likewise, a property in extremely poor condition may still retain substantial integrity from its period of significance and clearly convey its significance.

Applicability: National Register-listed and -eligible properties in Santa Ana are considered to be historical resources for purposes of establishing baseline conditions for adoption of the General Plan, as well as for any future developments enabled by the General Plan.

2.1.3 National Historic Landmarks

Originally authorized by the Historic Sites Act of 1935 (Public Law 74-292), National Historic Landmarks (NHLs) are cultural properties designated by the Secretary of the Interior as being nationally significant. These buildings, sites, districts, structures, and objects possess exceptional value or quality in illustrating or interpreting the heritage of the United States in history,

² National Register Bulletin #15, *How to Apply the National Register Criteria for Evaluation* (National Park Service, 1990, revised 2002).

architecture, archeology, engineering, and culture. The National Historic Landmarks criteria (36 CFR 65.4[a and b]) set a stringent test for national significance, including high historical integrity

Applicability: There are currently no designated National Historic Landmarks in Santa Ana. Any future designations would be historical resources, as defined at the Federal, state, and local levels.

2.1.4 Secretary of the Interior's Standards for the Treatment of Historic Properties

Under the NHPA, the Secretary of the Interior was made responsible for establishing professional standards and for providing guidance on the preservation of the nation's historic properties. Developed in several iterations between 1973 and 2017, The Secretary of the Interior's Standards for the Treatment of Historic Properties (Secretary's Standards) (36 CFR Part 68, 1995) consists of four sets of treatment standards—Preservation, Rehabilitation, Restoration and Reconstruction—and are regulatory for grants-in-aid projects assisted through the Historic Preservation Fund (authorized by the NHPA). The Secretary of the Interior's Standards for Rehabilitation (36 CFR Part 67, 1990), which are included in the treatment standards, are regulatory for the Federal Historic Preservation Tax Incentives program and used as the criteria to determine if a project qualifies as "a certified rehabilitation." "Preservation" focuses on the stabilization, maintenance, and repair of existing historic materials and retention of a property's form as it has evolved over time. "Rehabilitation" not only incorporates the retention of features that convey historic character but also accommodates alterations and additions to facilitate continuing or new uses. "Restoration" involves the retention and replacement of features from a specific period of significance and elimination of features not from that period. "Reconstruction," the least used treatment, provides a basis for recreating a missing resource. The Secretary of the Interior's Standards for the Treatment of Historic Properties, in particular the Standards for Rehabilitation, are intended as general guidance for work on all historic properties, are widely used, and have been adopted at the Federal, State and local levels. The Standards and their associated guidelines are intended to be applied to a wide variety of resource types, including buildings, sites, structures, objects, and districts.

Applicability: The Secretary's Standards are not directly relevant to adoption of the General Plan. However, with respect to future development, conformance to the Secretary's Standards is accepted in California as one way to lessen potential impacts to historical resources to a less-than-significant level (see Section 2.2.1, below). To that end, the Secretary's Standards are used by the City of Santa Ana for project reviews involving historical resources.

2.2 STATE OF CALIFORNIA

2.2.1 California Environmental Quality Act

According to the California Environmental Quality Act (CEQA),

an historical resource is a resource listed in, or determined eligible for listing in, the California Register of Historical Resources. Historical resources included in a local register of historical resources ... or deemed significant pursuant to criteria set forth in subdivision (g) of § 5024.1 [i.e., the California Register of Historical Resources criteria, see below], are presumed to be historically or culturally significant for purposes of this section, unless the preponderance of the evidence demonstrates that the resource is not historically or culturally significant (Public Resources Code (PRC) §21084.1).

If a proposed project were expected to cause substantial adverse change in an historical resource, environmental clearance for the project would require mitigation measures to reduce impacts. "Substantial adverse change in the significance of an historical resource means the physical demolition, destruction, relocation, or alteration of the resource or its immediate

surroundings such that the significance of an historical resource would be materially impaired” (CEQA Guidelines³ §15064.5 (b)(1)). The CEQA Guidelines (§15064.5 (b)(2)) describe material impairment taking place when a project:

- A) Demolishes or materially alters in an adverse manner those physical characteristics of an historical resource that convey its historical significance and that justify its inclusion in, or eligibility for, inclusion in the California Register... or
- B) Demolishes or materially alters in an adverse manner those physical characteristics that account for its inclusion in a local register... or its identification in an historical resources survey... unless the public agency reviewing the effects of the project establishes by a preponderance of evidence that the resource is not historically or culturally significant; or
- C) Demolishes or materially alters those physical characteristics of an historical resource that convey its historical significance and that justify its inclusion in, or eligibility for, inclusion in the California Register... as determined by a lead agency for the purposes of CEQA.

According to the CEQA Guidelines (§15064.5 (b)(3)), “Generally, a project that follows the *Secretary of the Interior Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic Buildings* or the *Secretary of the Interior’s Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings* (1995), Weeks and Grimmer, shall be considered as mitigated to a level of less than a significant impact on the historical resource.” The *Secretary of the Interior Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic Buildings* (*Secretary’s Standards*) is published by the National Park Service (NPS), and was updated and reissued in July 2017.⁴

Applicability: The adoption of the General Plan is a project under CEQA and therefore potential impacts to historical resources are evaluated in this Technical Report and in the PEIR it supports.

2.2.2 California Register of Historical Resources

The California Register of Historical Resources (California Register) was established to serve as an authoritative guide to the state’s significant historical and archaeological resources (PRC §5024.1). State law provides that in order for a property to be considered eligible for listing in the California Register, it must be found by the State Historical Resources Commission to be significant under any of the following four criteria:

- 1) Associated with events that have made a significant contribution to the broad patterns of local or regional history or the cultural heritage of California or the United States; or
- 2) Associated with the lives of persons important to local, California or national history; or
- 3) Embodies the distinctive characteristics of a type, period, region or method of construction or represents the work of a master or possesses high artistic values; or
- 4) Has yielded, or has the potential to yield, information important to the prehistory or history of the local area, California or the nation.

The primary difference between eligibility for listing in the National and California Registers is integrity. Properties eligible for listing in the National Register generally have a higher degree of integrity than those only eligible for listing in the California Register. There is, however, no difference with regard to significance. A property that meets the significance criteria for California

³ 14 California Code of Regulations (CCR) §15000 et seq.

⁴ Anne E. Grimmer. “The Secretary of the Interior’s Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring & Reconstruction Historic Buildings.” Rev. National Park Service, U.S. Department of the Interior, 2017.

Register eligibility would also be eligible for listing in the National Register unless there are issues of integrity that decrease the ability of the property to convey its significance.

The California Register also includes properties which: have been formally *determined eligible for listing in*, or are *listed in* the National Register; are registered State Historical Landmark Number 770, and all consecutively numbered landmarks above Number 770; points of historical interest, which have been reviewed and recommended to the State Historical Resources Commission for listing; and city and county-designated landmarks or districts (if criteria for designation are determined by the OHP to be consistent with California Register criteria). PRC §5024.1(g) also states:

- g) A resource identified as significant in an historical resource survey may be listed in the California Register if the survey meets all of the following criteria:
 - 1) The survey has been or will be included in the State Historical Resources Inventory.
 - 2) The survey and the survey documentation were prepared in accordance with [OHP]... procedures and requirements.
 - 3) The resource is evaluated and determined by the office to have a significance rating of category 1-5 on DPR [Department of Parks and Recreation] form 523.
 - 4) If the survey is five or more years old at the time of its nomination for inclusion in the California Register, the survey is updated to identify historical resources which have become eligible or ineligible due to changed circumstances or further documentation and those which have been demolished or altered in a manner that substantially diminishes the significance of the resource.

Resources are eligible as a California Register historic districts if they meet National Register historic district criteria.

Applicability: Eligibility for listing in the California Register is a primary means of identifying historical resources under CEQA.

2.2.3 California Historical Landmarks

California Historical Landmarks (CHLs) are buildings, structures, sites, or places that have been determined to have statewide historical significance by meeting at least one of the criteria listed below:

- The first, last, only, or most significant of its type in the state or within a large geographic region (Northern, Central, or Southern California).
- Associated with an individual or group having a profound influence on the history of California.
- A prototype of, or an outstanding example of, a period, style, architectural movement or construction or is one of the more notable works or the best surviving work in a region of a pioneer architect, designer or master builder.

The resource also must have written consent of the property owner; be recommended by the State Historical Resources Commission; and be officially designated by the Director of California State Parks. CHLs #770 and above are automatically listed in the California Register of Historical Resources.⁵

⁵ http://ohp.parks.ca.gov/?page_id=21387

Applicability: California Historical Landmarks generally are historical resources for purposes of CEQA.

2.2.4 California Points of Historical Interest

California Points of Historical Interest are sites, buildings, features, or events that are of local (city or county) significance and have anthropological, cultural, military, political, architectural, economic, scientific or technical, religious, experimental, or other value. Points of Historical Interest designated after December 1997 and recommended by the State Historical Resources Commission are also listed in the California Register. To be eligible for designation as a Point of Historical Interest, a resource must meet at least one of the following criteria:

- The first, last, only, or most significant of its type within the local geographic region (City or County).
- Associated with an individual or group having a profound influence on the history of the local area.
- A prototype of, or an outstanding example of, a period, style, architectural movement or construction or is one of the more notable works or the best surviving work in the local region of a pioneer architect, designer or master builder.

Designation requires owner consent and approval of the State Historical Resources Commission.

Applicability: California Points of Historical Interest may be historical resources for purposes of CEQA.

2.2.5 California Historical Building Code⁶

Defined in Sections 18950 to 18961 of Division 13, Part 2.7 of California's Health and Safety Code, the California Historical Building Code (CHBC) exists to preserve the state's architectural heritage by recognizing unique construction issues inherent in maintaining and rehabilitating historical resources. The CHBC provides alternative building regulations for permitting repairs, alterations, and additions necessary for preservation, rehabilitation, relocation, related construction, change of use, or continued use of a "qualified historical building or structure."

Section 18955 of the CHBC defines such a "qualified historical building or structure" as follows:

Any structure or property, collection of structures, and their associated sites deemed of importance to the history, architecture, or culture of an area by an appropriate local or state governmental jurisdiction. This shall include structures on existing or future national, state or local historical registers or official inventories, such as the National Register of Historic Places, State Historical Landmarks, State Points of Historical Interest, and city or county registers or inventories of historical or architecturally significant sites, places, historic districts, or landmarks. This shall also include places, locations, or sites identified on these historical registers or official inventories and deemed of importance to the history, architecture, or culture of an area by an appropriate local or state governmental jurisdiction.

Rather than being prescriptive, the CHBC constitutes a set of performance criteria. The CHBC is designed to help facilitate restoration or change of occupancy in such a way as to preserve original or restored elements and features of a resource; to encourage energy conservation and a cost-effective approach to preservation; and to provide for reasonable safety from earthquake,

⁶ California State Historical Building Safety Board, Division of the State Architect. "California's State Historical Building Code and State Historical Building Safety Board." Sacramento, CA.
<http://www.dgs.ca.gov/dsa/AboutUs/shbsb.aspx>

fire, or other hazards for occupants and users of such buildings, structures, and properties.” The CHBC also serves as a guide for providing reasonable availability, access, and usability by the physically disabled.

Applicability: The California Historical Building Code is not relevant to adoption of the General Plan. However, use of the CHBC may enable future developments to conform to the Secretary’s Standards and thus result in a less-than-significant impact to historical resources.

2.2.6 State Historic Preservation Officer

The State Historic Preservation Officer (SHPO) is responsible for the operation and management of the California State Office of Historic Preservation (OHP), as well as long range preservation planning in California. The Governor appoints the SHPO, in consultation with the State Historical Resources Commission and the Director of the Department of Parks and Recreation. The SHPO assists the State Historical Resources Commission in accomplishing its goals and duties by developing and administering a program of public information, education, training, and technical assistance. The SHPO also oversees implementation of preservation laws regarding historic resources, and oversees the California Historic Resources Inventory, which serves as a listing of historic resources identified using national, state, and local criteria. Under the supervision of the SHPO, OHP administers the Certified Local Government program (see below); reviews nominations for the National Register and the state designation programs; assists with local surveys of historical resources; comments on the use of the Secretary’s Standards to achieve certified rehabilitation as required for federal historic preservation tax credits; and evaluates applications for grants funded by the Historic Preservation Fund.

Applicability: SHPO will be asked to comment on the PEIR and on future project EIRs. Comments usually concern the identification of historical resources, assessment of project impacts on historical resources, and proposed avoidance and mitigation measures.

2.2.7 Certified Local Government Program⁷

Established by the 1980 amendments to the NHPA of 1966, as amended, the Certified Local Government (CLG) program encourages the direct participation of local governments in the identification, evaluation, registration, and preservation of historic properties within their jurisdictions, and promotes the integration of local preservation interests and concerns into local planning and decision-making processes. The CLG program is a partnership among local governments, the OHP, and the NPS, which is responsible for administering the National Historic Preservation Program. Through the CLG program, local governments may apply for federal grants annually to assist with local historic preservation programs. In order to become a CLG and to maintain that status, a local government commits to fulfill certain responsibilities, including enforcement of state and/or local historic resource designation programs, maintenance of a qualified historic review body or commission, performance of local historic resources surveys to identify historic properties, management of requests to demolish or alter historic resources, and encouragement of public participation in its historic preservation program. The City of Santa Ana became a CLG in 2002.

Applicability: Avoidance of potential impacts to historical resources from General Plan policies and future developments would be consistent with the City’s status and responsibilities as a CLG.

⁷ California Office of Historic Preservation. “Certified Local Government Program (CLG).” State of California. http://ohp.parks.ca.gov/?page_id=21239

2.2.8 California Historical Resources Information System⁸

The California Historical Resources Information System (CHRIS) consists of the OHP, a series of Information Centers (ICs) statewide, and the State Historical Resources Commission. CHRIS is administered and coordinated by the OHP. The CHRIS Inventory includes the State Historic Resources Inventory through the Historic Property Data File maintained by the OHP and the ICs, as defined by PRC §5020.1(p), as well as the larger number of resource records and research reports managed under contract by the ICs. Properties listed in the Historic Property Data File have been assigned a California Historical Resource status code of 1 through 7, indicating level of eligibility, designation or evaluation and whether the property is an individual resource, part of a historic district, or both. Several hundred properties in Santa Ana are included in the Historic Property Data File as a result of historic resources surveys, National Register designations, Federal evaluations in fulfillment of Section 106 responsibilities, and other studies. Properties in the Historic Property Data File assigned a California Historical Resource status code of 1 through 5 are assumed to be historical resources for purposes of CEQA, unless a preponderance of evidence proves otherwise. *Technical Assistance Bulletin 8*⁹ published by the OHP provides a key and guidance on use of the status codes. Status codes were revised in August 2003, and assigned the following definitions:¹⁰

- 1 Properties listed in the National Register or the California Register
- 2 Properties determined eligible for listing in the National Register or California Register
- 3 Properties that appear eligible for National Register or California Register through survey evaluation
- 4 Properties that appear eligible for National Register or California Register through other evaluation
- 5 Properties recognized as historically significant by local government or appearing eligible such recognition
- 6 Properties determined to be not eligible for listing or designation
- 7 Properties either not evaluated for National Register or California Register eligibility or needing reevaluation

Assigned status codes reflect *opinions* or *actions* taken at a *specific point in time*, and therefore may not accurately reflect the historical resource's eligibility for Federal, state, or local listing or designation at some later time. In particular, OHP guidance directs that survey evaluations that are more than five years old be updated for use in satisfying CEQA requirements.

Applicability: CHRIS is a primary source utilized to identify historical resources in Santa Ana and to establish baseline conditions for assessment of any potential impacts to historical resources resulting from adoption of the General Plan.

⁹ California Office of Historic Preservation. "Technical Assistance Bulletin #8: User's Guide to the California Historical Resource Status Codes & Historic Resources Inventory Directory." State of California. November 2004. <http://ohp.parks.ca.gov/pages/1069/files/tab8.pdf>

¹⁰ Classifications 1 through 7 are further broken down into subclassifications. See: <http://www.ohp.parks.ca.gov/pages/1069/files/chrstatus%20codes.pdf>

2.3 REGIONAL

2.3.1 Southern California Association of Governments

The Southern California Association of Governments Growth Management Chapter (SCAGGMC) has instituted policies regarding the protection of cultural resources. SCAGGMC Policy No. 3.21 “encourages the implementation of measures aimed at the preservation and protection of recorded and unrecorded cultural resources and archaeological sites.”¹¹

Applicability: This Technical Report is consistent with the County’s cultural resources policy.

2.3.2 Orange County Historical Commission¹²

Established by the County of Orange Board of Supervisors in 1973, the Orange County Historical Commission (Historical Commission) is a citizen advisory group that advises the Board of Supervisors’ and County agencies regarding matters related to historic places, archeological and paleontological sites, archives/historic records, publications, special events, etc. The Historical Commission consists of fifteen members and meets monthly to review related items. Included in the duties and objectives of the Historical Commission is the identification and promotion of the preservation and use of buildings, sites, structures, objects, and districts of importance in Orange County, as well as the development and maintenance of a central file of Orange County historical resources for public use. The Historical Commission established and administered the Orange County Historical Site Plaque Program, which has placed plaques to commemorate approximately 49 historical sites throughout Orange County.¹³

Applicability: The Orange County Historical Commission may choose to comment on the PEIR and/or on future developments as an interested party. Properties awarded a plaque by the County are included in the Existing Conditions Database (see Section 4).

2.4 LOCAL

2.4.1 Santa Ana General Plan (1982)¹⁴ and Conservation Element¹⁵

Adopted in 1982, the Santa Ana General Plan is the City’s existing principal long-range policy and planning document guiding the development, conservation, and enhancement of Santa Ana. It is a document that contains a comprehensive collection of goals and policies related to the physical development of the City. State law requires every city and county to adopt a general plan to represent the jurisdiction’s view of its future. Various updates to the Land Use Element, Circulation Element, Urban Design Element and Economic Development Element were completed in 1998.

The Santa Ana General Plan (1982) contains the following 16 elements:

- Airport Environs Element
- Circulation Element
- Conservation Element
- Economic Development Element

¹¹ Southern California Association of Governments. 2001. *SCAG Growth Management Chapter (GMC) Policy No. 3.21*. Los Angeles, CA.

¹² Orange County Parks. “Orange County Historical Commission.” County of Orange. Accessed March 27, 2019. <http://www.ocparks.com/about/historical/>

¹³ Ibid.

¹⁴ City of Santa Ana. “About the General Plan.” City of Santa Ana. <https://www.santa-ana.org/general-plan/new-general-plan>

¹⁵ City of Santa Ana. “City of Santa Ana General Plan: Conservation Element.” City of Santa Ana. <https://www.santa-ana.org/sites/default/files/Documents/Conservation.pdf>

- Education Element
- Energy Element
- Growth Management Element
- Housing Element
- Land Use Element
- Noise Element
- Open Space, Parks and Recreation Element
- Public Facilities Element
- Public Safety Element
- Scenic Corridors Element
- Seismic Safety Element
- Urban Design Element

The Conservation Element of the Santa Ana General Plan is concerned with the protection, utilization and development of natural and cultural resources. It emphasizes scarce resources and those needing special attention or management, and aims to prevent their exploitation, neglect or destruction. Major features of the Conservation Element include protection of the public health, safety and welfare through effective management of natural resources; preservation of those natural and cultural resources existing today; and enhancement of the City's aesthetic and visual amenities through increased use of vegetation and restoration of historic and cultural resources. Cultural resources include waterways, natural habitats, open spaces, historic buildings, and pre-historic remains.

Applicability: The 1982 General Plan and Conservation Element are being updated; the potential for those updates to affect historical resources is the purpose of this Technical Report.

2.4.2 Santa Ana Municipal Code Chapter 30 – Historic Preservation Ordinance

Chapter 30 of the Santa Ana Municipal Code (SAMC),¹⁶ adopted by City Council in 1998 and amended at various points since that time, established Santa Ana's Historic Preservation program, created the Historic Resources Commission (HRC) to oversee the program, and instituted the Santa Ana Register of Historical Properties (Santa Ana Register) to list local historically significant properties. Designation of any building, structure, object or site that is fifty or more years old must satisfy criteria for inclusion on the Santa Ana Register. A building, structure, object or site less than fifty years old may be nominated provided that it can be proven to be of exceptional significance. To be designated, one or more of the following criteria must be met:

- (1) Buildings, structures or objects with distinguishing characteristics of an architectural style or period, that exemplify a particular architectural style or design features;
- (2) Works of notable architects, builders, or designers whose style influenced architectural development;
- (3) Rare buildings, structures, or objects or original designs;
- (4) Buildings, structures, objects or sites of historical significance which include places:
 - a. Where important events occurred;
 - b. Associated with famous people, original settlers, renowned organizations and businesses;
 - c. Which were originally present when the city was founded; or
 - d. That served as important centers for political, social, economic, or cultural activity.
- (5) Sites of archaeological importance;
- (6) Buildings or structures that were connected with a business or use which was once common, but is now rare.

¹⁶ Santa Ana Municipal Code (SAMC) § 30.

Religious buildings, i.e., properties used for religious purposes or owned by religious organizations, are not designated by the City of Santa Ana even if the property demonstrably satisfies one or more of the criteria of significance, if the institution objects to such designation.

Every property listed in the Santa Ana Register is categorized based upon the following criteria for each category:

- Landmark category.
 - a. The building, structure, object or site is on the National Register or appears eligible for listing on the National Register; or
 - b. The building, structure, object or site is on the California Register or appears eligible for listing on the California Register; or
 - c. The building, structure, object or site has historical/cultural significance to the city; or
 - d. The building, structure, object or site has a unique architectural significance.
- Key category.
 - a. The building, structure, object or site has a distinctive architectural style and quality; or
 - b. The building, structure, object or site is characteristic of a significant period in the history of the City; or
 - c. The building, structure, object or site is associated with a significant person or event in the City.
- Contributive category. The building, structure, object or site contributes to the overall character and history of a neighborhood or district and is a good example of period architecture.

The City has instituted a Certificate of Appropriateness process for exterior modifications, major alterations, relocations, and/or demolitions of historic properties. Staff and the HRC review and approve applications for Certificates of Appropriateness with respect to conformance with the Secretary's Standards.

Applicability: Ordinance 30 is the City's mechanism for managing its historical resources. Ideally, the General Plan Update would be consistent with purpose of Ordinance 30. Future developments may be subject to review by the Historical Resources Commission under Ordinance 30. Properties listed in the Santa Ana Register are historical resources under CEQA.

2.4.3 Santa Ana Historic Property Preservation Agreements (Mills Act)¹⁷

Property owners whose properties are listed on the Santa Ana Register are eligible to enter into a historic property preservation agreement (Mills Act Agreement) with the City, as recommended by the Commission and approved by City Council. Pursuant to California Government Code Section 50281 et seq., a Mills Act Agreement provides a property tax relief incentive for owners of qualified historic properties to maintain and preserve the historic and architectural character of their property. Mills Act Agreements are held in perpetuity, renewable in ten-year increments, and are transferred to the new owner should a historic property be sold. Qualified historic properties include those listed on the Santa Ana Register, are owner-occupied, single family residences, or income-producing commercial properties. The types of preservation conditions established by a Mills Act Agreements differ for each property's specific needs. As of 2019, Santa Ana has awarded 293 recorded and 2 pending Mills Act Agreements.

¹⁷ SAMC § 30-25 through § 30-30.

Applicability: The properties awarded Mills Act Agreements are historical resources under CEQA.

2.4.4 Santa Ana Historic Districts

As defined by Chapter 30 of the SAMC, a local historic district refers to a collection or group of historic properties within a defined area. According to Chapter 30, a local historic district shall be designated only if it meets one or more of the following standards:

- (1) The area constitutes a distinct section of the city and has special character, historical, architectural, or aesthetic interest and value.
- (2) The area provides significant examples of architectural values of the past or landmarks in the history of architecture.
- (3) The area serves as a reminder of past eras, events, or persons important in the history of the city, the county, the state or the United States of America or illustrates past living styles for future generations to observe, study, or inhabit.
- (4) The area is the site of a historically or culturally significant ground, garden, or object.

Under Chapter 30, local historic districts are designated by resolution from the City Council after receiving the recommendation from the HRC. At the time of the creation of the local historic district, the City Council may adopt design guidelines for the historic district. To date (2019), the City has not designated any local historic districts utilizing this provision.

However, the City of Santa Ana has two listed National Register historic districts: Downtown Santa Ana (listed in 1984) and French Park (listed in 1999). In addition to National Register listing status, the French Park Neighborhood also maintains zoning protection for its historical resources through Specific Development 19 (SD-19). While not National Register-listed, a third district, the Heninger Park neighborhood, also has zoning protection for its historic buildings through Specific Development 40 (SD-40). A specific Neighborhood Review¹⁸ process must be followed for all exterior improvements and new construction within the boundaries of the Historic French Park (SD-19) and Heninger Park (SD-40) districts.

Applicability: The National Register-listed and -eligible districts and Specific Development districts are historical resources under CEQA.

2.4.4.1 French Park Historic District Specific Development No. 19 (SD-19) Development Standards and Architectural Design Guidelines

In 1984, the City Council created the French Park Historic District Specific Development No. 19 (SD-19) (French Park Historic District) through adoption of a Zoning Ordinance which delineated the SD-19 boundary, implemented the City's first historic overlay zone, and set standards for all exterior rehabilitation and new infill development projects of properties within the French Park Historic District. The ordinance stipulates that all exterior rehabilitation and conversion projects be subject to design review by the Planning Department and all new infill development projects be subject to site plan review by the Planning Commission. All rehabilitation projects must conform to the Secretary of the Interior's Standards for Rehabilitation (Secretary's Standards), and all exterior projects must conform to any City Council-adopted Development Standards and Guidelines.

In 1995, the Historic French Park Association created the French Park Historic District Architectural Design Guidelines (guidelines)¹⁹ which clarify the Secretary's Standards

¹⁸ City of Santa Ana Planning Division. 2014. Neighborhood Review Application Process. Santa Ana, CA. https://www.santa-ana.org/sites/default/files/Documents/Neighborhood_Review_Application2014.pdf

¹⁹ Diann Marsh and the Historic French Park Association. 1995. Historic French Park: Its Architectural Legacy and Design Guidelines. Santa Ana, CA. <https://www.santa->

requirements and assists residents and property owners in the design of new infill development and exterior improvements, including but not limited to rehabilitation and/or additions. A Neighborhood Review²⁰ process requires all exterior improvements and new construction within the boundaries of Historic French Park (SD-19) to be reviewed by City Planning staff for zoning and development standards, and the Neighborhood Architectural Review Committee. Based on the scope of the improvement project, approval by the HRC and/or the City of Santa Ana Planning Commission may also be required.

2.4.4.2 Heninger Park Specific Development No. 40 (SD-40) Development Standards and Architectural Design Guidelines

In 1996, the City Council created the Heninger Park Specific Development No. 40 (SD-40) through adoption of a Zoning Ordinance, amended in 2006, which delineated the SD-40 boundary, implemented the City's second historic overlay zone, identified SD-40 "project areas," and detailed General and Specific Development Standards specifying strict zoning provisions over the designated SD-40 area. These General and Specific Development Standards prescribe permitted uses, allowable minimum gross floor areas, allowable minimum lot sizes, allowable building heights, required yards, general provisions, demolition permits, etc.

Completed in 2006, the Heninger Park Specific Development (SD-40) Architectural Design Guidelines (Guidelines)²¹ established architectural standards and processes the City staff follows in developing recommendations for the Heninger Park district. The purposes of the Guidelines are to provide an official direction to the future development, rehabilitation, and preservation of the Heninger Park district and promote the preservation and enhancement of its historical character and culturally significant structures within the district. The Guidelines are not intended to be strict development standards, and therefore, they may be interpreted by the City with some flexibility when applied to specific projects.

The guidelines apply to all new infill development projects and all properties within Heninger Park that have been determined to be eligible for, or are listed in, the City of Santa Ana Register of Historical Properties. These Guidelines are intended to assist residents and property owners in the design of new infill development and exterior improvements, including but not limited to rehabilitation and/or additions. A Neighborhood Review²² process requires all exterior improvements and new infill development projects within the boundaries of Heninger Park (SD-40) to be reviewed by City Planning staff for zoning and development standards, and the Neighborhood Architectural Review Committee. Based on the scope of the improvement project, approval by the HRC and/or the City of Santa Ana Planning Commission may also be required. Properties within the Heninger Park district that are not listed in Appendix A of the Guidelines are subject to the Citywide Design Guidelines.

2.4.5 Citywide Design Guidelines

The Citywide Design Guidelines²³ provide design guidance on repairs and alterations to historical resources, as well as new infill construction in local historic districts. Two chapters of the Citywide Design Guidelines apply to historical resources—Chapter 8, "Downtown Development Guidelines," and Chapter 13, "Historic Structures Guidelines"—and both are based on the Secretary's Standards. The "Downtown Development Guidelines" apply to the National Register-

ana.org/sites/default/files/Documents/FrenchParkDesignGuidelines.pdf

²² City of Santa Ana Planning Division. 2014. Neighborhood Review Application Process. Santa Ana, CA.

²³ City of Santa Ana. 2006. Santa Ana Citywide Design Guidelines. Santa Ana, CA. https://www.santa-ana.org/sites/default/files/Documents/SantaAnaCitywideDesignGuidelines_rev060706_0.pdf

listed Downtown Santa Ana Historic District, and provide design guidelines for historically significant buildings as well as for additions and new infill development projects. Section 8.4 provides both general guidelines and recommendations for the treatment of various components of a historic building, and, based on the Secretary's Standards, focus on rehabilitation, adaptive reuse, and preservation. Section 8.4 also includes a section on seismic retrofit of historic structures and architectural guidelines, and focuses on building form and mass, rhythm and proportion, wall and roof articulation, and materials and colors. Chapter 13 applies to all properties listed in the Santa Ana Register, and emphasizes preservation, rehabilitation, and adaptive reuse. It covers exterior repairs and alterations, with recommendations for the treatment of historic building materials and components, additions and new accessory buildings, landscaping, and residential lighting. Preservation incentives are also included.

Applicability: Future projects that affect historical resources would be subject to the Citywide Design Guidelines.

2.4.6 Adaptive Reuse Ordinance

The City has adopted an Adaptive Reuse Ordinance to encourage reuse of historic buildings while maintaining a reasonable level of safety and habitability in conformance with the provisions of the California Health and Safety Code (HSC) §17958.11.²⁴ The Adaptive Reuse Ordinance provides eligibility criteria for adaptive reuse projects, as well as minimum development standards including residential unit size, commercial/retail space street frontage, common area space, and open space. The Adaptive Reuse Ordinance may be applied to a building or structure located in a "project incentive area." These areas include the midtown specific plan zoning district (SP-3); the transit zoning code district (SD-84); the North Main Street Corridor on both sides of Main Street from Seventeenth Street to the northern end of Main Place Drive; and, the East First Street Corridor on both sides of First Street from Grand Avenue to Elk Lane. Adaptive reuse projects that comply with the development standards are eligible for certain project incentives that include modification of underlying zoning requirements.²⁵

Applicability: Future projects in incentive areas that affect historical resources may be subject to CEQA.

2.4.7 Midtown Specific Plan

In 1996, the City Council adopted the Midtown Specific Plan (SP-3) (specific plan) through adoption of a Zoning Ordinance²⁶ which changed the existing zoning of the Midtown planning area to SP-3, and included design guidelines and development standards for all properties within the Midtown planning area. The specific plan encourages the adaptive reuse of historically or architecturally significant buildings and districts throughout the Midtown planning area. The Midtown planning area identifies five districts: the Civic/Professional District, Financial District, Community and Specialty Retail District, Broadway Corridor District, and Bush Street Professional District.

Chapter 4 "Civic/Professional District" identifies historic buildings clustered along Civic Center Drive as 'site attributes,' as well as the Christian Science Church as a development opportunity. Chapter 6 "Community and Specialty Retail District" encourages relocation of historic structures on Main Street, identifying Specialty Row as a development opportunity. Chapter 7 "Broadway Corridor District" and Chapter 8 "Bush Street Professional District" encourage the preservation of scale and character attributed by the historic and architecturally significant structures within both respective districts.

²⁴ Santa Ana Municipal Code, Chapter 41, Article XVI.II, Sec. 41-1650.

²⁵ Santa Ana Municipal Code, Chapter 41, Article XVI.II, Sec. 41-1652.

²⁶ City of Santa Ana Ordinance No. NS-2308

Applicability: Future projects in the specific plan areas that affect historical resources may be subject to CEQA.

2.4.8 Community Arts and Cultural Master Plan

The Community Arts and Culture Master Plan²⁷ was published in 2016 and produced goals and recommended strategies informed by eight themes to guide the future of arts and culture within the City. Goal 7 is to “preserve Santa Ana’s unique heritage while creating arts and cultural opportunities through new placemaking initiatives”. Under the *Placemaking and Placekeeping* theme, Recommendation 7.2 is to develop a comprehensive plan for the cultural preservation of the legacy and history of the city, inclusive of historic mural preservation and distinctive architecture identified several initiatives:

Initiative 7.2.1: Identify opportunities within the City for Santa Ana Cultural Trails and work with the Historic Commission to install high-quality, artistic plaques and historical markers throughout the city to note local history.

Initiative 7.2.2: Create policies and regulations protecting historic landmarks against developers and provide incentives and tax abatements for historic preservation and restoration. Review the Mills Act processes to ensure more equitable outcomes balancing historic preservation with planned development.

Initiative 7.2.3: Conduct a citywide historic survey, updating the results of the 1980s Heritage OC survey.

Initiative 7.2.4: Identify key buildings in need of seismic retrofitting. Work to pass bond measures that finance building owners to rehabilitate seismically unstable buildings.

Initiative 7.2.5: Identify key Mid-Century architecture and other missing buildings to be added to the City Historical Register that are currently outside of its scope.

The Community Arts and Cultural Master Plan assigns the Department of Planning and Building and the Historic Resources Commission as responsible to lead the implementation of Recommendation 7.2 and associated initiatives.

Applicability: Ideally, the General Plan Update and future development projects will be consistent with the Community Arts and Cultural Master Plan.

²⁷ City of Santa Ana. 2016. Santa Ana Arts and Culture Master Plan. Santa Ana, CA. <http://www.santa-ana.org/cda/artsmasterplan.asp>

SECTION 3 HISTORIC CONTEXT

3.1 OVERVIEW OF SANTA ANA HISTORY

Originally inhabited by indigenous Tongva²⁸ tribes,²⁹ the land that is now within the boundaries of the City of Santa Ana fell under jurisdiction of Mission San Juan Capistrano during the era of Spanish rule (1769-1821, Mission Period). The first European exploration of the area that would become Orange County began in 1769 when the Gaspar de Portola expedition passed through on its way from Mexico to Monterey, Alta California (now California).³⁰ In 1776, Mission San Juan Capistrano was founded, bringing Spanish colonization to present-day Orange County. From 1784 to 1821, Spain granted several large land concessions in an effort to promote Spanish settlement of Alta California. Spain, however, retained title to the land and individual land ownership was not granted. On July 1, 1810, permission for ranch settlement and cattle grazing of Rancho Santiago de Santa Ana was granted to Antonio Yorba and his nephew, Juan Pablo Peralta, by Jose Joaquin de Arrillago, Spanish Governor of Alta California. The total land concession comprised 17 leagues (62,516 acres), extending along the southeast bank of the Santa Ana River from the mountains to the coastline,³¹ and would later become present-day Santa Ana.

In 1821, Mexico gained independence from Spain, ending the Mission Period and transferring rule of Spain's North American territories to Mexico.³² In 1848, the Treaty of Guadalupe Hidalgo was signed, ceding the southwestern territories of present-day Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming from Mexican rule to the United States. In 1850, California was officially admitted as a state, with the region of present-day Orange County originally part of Los Angeles County. American pioneers gradually migrated west during this transitional period, and in 1868, Illinois-based American pioneer Jacob Ross Sr. and his family³³ purchased 650 acres of the Yorba family's Rancho Santiago de Santa Ana.

In 1869, William H. Spurgeon purchased from Jacob Ross Sr. 74.25 acres of land for 594 dollars, to establish what would become the original town of Santa Ana.³⁴ Laid out by George Wright of Los Angeles, the original town consisted of 24 square-blocks³⁵ with ten lots each on 43 acres. The boundaries were First Street to the south, West Street (now Broadway) to the west, Seventh Street to the north, and Spurgeon Street to the east. The town's first building was the Spurgeon Store, which also served as the post office. The first institutions founded in the new settlement were the Spring School District in 1869 and the Methodist Episcopal Church South in 1870.³⁶ At the time of the town's conception, the region was transforming from a ranch economy into a more established agriculturally based society, with the town serving as a central trade center and post office with supportive infrastructure for surrounding agricultural areas. By 1880, Santa Ana was becoming a major commercial center for southern Los Angeles County with a variety of stores and businesses including blacksmiths, harness makers, saloons and billiard parlors, a gunsmith, and several grocery and dry goods stores.³⁷ The arrival of the Southern Pacific Railroad in 1878

²⁸ Indigenous Tongva people were referred to as *Juaneños* and *Gabrielesños* by Spanish settlers.

³⁷ *Ibid.*, 59-60.

and the Santa Fe Railroad in 1886 gave way for Santa Ana's first building and subsequent population boom, encouraging the development of Santa Ana's first residential subdivisions. Santa Ana's first historic district, French Park (see Appendix Figure 3 for a city map illustrating neighborhoods referenced in this report), originated at this time when a 160-acre tract called Santa Ana East was plotted parallel to the Southern Pacific Railroad tracks.³⁸ Once known as the "Nob Hill of Orange County"³⁹, the French Park Historic District, is a 20-square block residential district northeast of Santa Ana's historic core, and includes Victorian and Craftsman residences, including some extant from this 1880s community.⁴⁰

On June 12, 1886, the City of Santa Ana incorporated into Los Angeles County with a population of 2,000.⁴¹ A few years later, in 1889, Santa Ana won the County Seat as Orange County separated from Los Angeles County, further stimulating the development of businesses, stores, financial institutions and hotels to accommodate and serve the booming population. Citrus and walnut farms were still plentiful and buying and selling land became the number one enterprise. In the 1890s, Santa Ana held a "mixed population of farmers, skilled and unskilled workers, professionals, merchants, bankers, and industrialists."⁴² At this time, Santa Ana's Eastside neighborhood began to develop southeast of the City's historic core, with house-sized lots and large parcel subdivisions expanding south in 1898 through 1913, resulting in Victorian era Queen Anne and Eastlake style residences, as well as Colonial Revival and later Craftsman bungalow styles to follow southwest.

Development in the early 1900s and 1920s reflected the needs of this mixed demographic, as many buildings in the downtown area and surrounding bungalows were constructed at this time, and the boardinghouse became a typical property type for working class citizens seeking housing above commercial shops and office spaces.⁴³ By 1906, the arrival of the Pacific Electric Railway's Red Car provided a suburban line from Santa Ana to Los Angeles,⁴⁴ and by 1910, Santa Ana steadily grew in population of up to 8,429 persons, marking Santa Ana as the largest city in Orange County at the time. The expansion of an interurban trade network and the growth of agricultural citrus industry, brought in both permanent and temporary immigrants as a valuable labor force in Orange County,⁴⁵ including the arrival of Chinese and Japanese immigrants by the 1900s, leading to the development of local 'Chinatowns' in both Santa Ana⁴⁶ and Anaheim.

Residential development particularly surrounding Santa Ana's downtown historic core established many of Santa Ana's oldest neighborhoods today, attributing much of their growth to their proximity to the original civic and commercial center as well as the expansion of Pacific Electric railway lines. This included the Flower Park residential neighborhood west of downtown; the Lacy neighborhood inclusive of residential, commercial, institutional, and industrial uses east of downtown; and the Heninger Park residential neighborhood south of downtown. In addition, competitive city annexations in Orange County at the turn of the early twentieth century further

⁴⁶ Originally located downtown at Third and Bush, Santa Ana's Chinatown is no longer extant due to displacement pressures caused by anti-Chinese sentiment increasing since the 1870s through 1906.

enabled the development of residential subdivisions, including the French Court and Santa Ana Triangle neighborhoods north of French Park. Areas not immediately adjacent to the historic core remained primarily agricultural and undeveloped well into the twentieth century.

During the 1910s and 1920s, residential subdivisions of neighborhoods not immediately adjacent to the historic core steadily increased, including the building of small- to medium-sized Craftsman bungalows and Colonial Revival style residences. By 1912, more than half of the Pico-Lowell neighborhood southwest of downtown was subdivided with residential lots. The 1910s also exhibited increased manufacturing and industry as a sign of Santa Ana's economic strength.⁴⁷

By 1916, Santa Ana had three *barrios*, or neighborhoods which emerged under the City's politics of spatial segregation as a result of racial prejudice at the time.⁴⁸ A vibrant and cultural community of *Californios*,⁴⁹ California Indians, and Mexicans from the pre-American statehood period, and new Mexican immigrants alike formed Santa Ana's three barrios: the Artesia, Delhi, and Logan neighborhoods. The *barrios* were relatively small, "situated near fields, factories, and railroads,"⁵⁰ and were linked to and populated by informal migration networks. The Artesia Pilar neighborhood (originally the Artesia barrio) was built on Santa Ana's western city limits on swampland drained for the construction of the Pacific Electric railway. Historically notable, this barrio was one of approximately 45 neighborhoods, or *colonias*, in Orange County in which Mexican-Americans were able to purchase property, live, attend school, and worship. The Delhi barrio (originally known as Glorietta) was similarly built on Santa Ana's southern city limits on farm and swampland. Like the Artesia and Delhi barrios, the Logan barrio was built on Santa Ana's eastern city limits near railway tracks.⁵¹ All three barrios were constituted by working-class residents, with the growth of the barrios enabled by the then-low cost of land and facilitated by nearby industrial sugar factories.

By the 1920s, Santa Ana had established a strong economy based on its agriculture, industry, and retail. This coincided with explosive population growth throughout Orange County, with the majority of that growth concentrated in Santa Ana as the City sought to annex much of the area west of Orange,⁵² and Santa Ana became the commercial center for all of Orange County.⁵³ Santa Ana grew from a population of 16,000 in 1920 to a population of 30,000 by 1929,⁵⁴ in part due to the expansion of interurban rail networks, and the popularity of the automobile in the 1920s.⁵⁵ Through to the 1930s, Santa Ana's downtown commercial center experienced prosperity and growth, as many of its brick structures along Fourth Street were improved with classical and modern facades between 1919 and 1930, and new multi-story commercial and professional buildings were constructed, making Downtown Santa Ana "truly cosmopolitan."⁵⁶ The mid- to late-1920s marked the founding of Santa Ana's first radio station and the formation of the Metropolitan Water District. Prosperity and growth at this time was also reflected in the increase in patrons of religious institutions and social, community organizations like the Ebell Club and the Young Mens' Christian Association (YMCA).⁵⁷ By 1923, Downtown Santa Ana's building boom was evident in

the planning and construction of hotels, theaters, entertainment centers, and buildings associated with social organizations, businesses, and tradesmen.

To accommodate the rapidly growing population, several of the City's residential neighborhoods were laid out and developed, as was the expansion of the City's school system. This included the construction of Period Revival single-family homes and duplexes, and a handful of multi-family apartment buildings in residential neighborhoods into the 1930s. By this time, the French Park, Eastside, and other neighborhoods surrounding the downtown historic core were fully developed. The Wilshire Square neighborhood south of downtown began development circa 1923, and constituted of single-family residences, with multi-family residences serving as a buffer between commercial development. The Washington Square neighborhood northwest of downtown was developed from 1925 until 1950, with many of its residences built during the 1930s by local contractor Emmett Rogers according to standard plans and individual customization. The Floral Park neighborhood also northwest of downtown began development in 1920, with its subdivisions and custom residences developed by local developer and builder Allison Honer in the English Tudor, French Norman, Spanish Colonial, and Colonial Revival styles. The Jack Fisher Park and Park Santiago neighborhoods were both developed in the 1930s, with the coinciding Jack Fisher Park and Santiago Park developed in 1935.⁵⁸

With an increased housing stock and population base came the demand for more schools, resulting in the construction of two junior highs (Willard and Lathrop) and over a dozen elementary schools; as well as additions to the Santa Ana High School, and the then-neighboring Santa Ana College.⁵⁹ New schools were constructed in remote parts of the City, while segregation still in force reflected by construction of four Mexican-only schools during this period.⁶⁰

During the 1930s, Santa Ana sought recovery from the impact of a series of significant nationwide and regional events, including the stock market crash of October 29, 1929; the Great Depression; the Long Beach earthquake of March 10, 1933; and torrential rain and flooding from February 27 to March 4, 1938. The Long Beach earthquake caused the death of three residents in the City and substantial property damage. As a result, construction slowed dramatically in the 1930s, marking the end of a period of prosperity.⁶¹ The 1930s was also characterized by Federal reconstruction efforts following the Great Depression, as new commercial, civic, and institutional buildings particularly in Downtown Santa Ana⁶² replaced those demolished or damaged by the earthquake, with many designed in the popular Art Deco/Art Moderne styles. New construction and reconstruction of demolished or damaged public buildings was Federally funded, with buildings designed or redesigned in the Art Moderne style of the Works Progress Administration (WPA). Many of Santa Ana's old brick commercial buildings in Downtown Santa Ana were improved with Moderne facades which replaced original brick and iron storefronts. "Declared unsafe for occupancy,"⁶³ Santa Ana's old City Hall was demolished and replaced with the WPA-sponsored Santa Ana City Hall at Third and Main Street in 1935.⁶⁴ The 1930s also marked a turning point for arts and cultural institutions, as public support launched the formal opening of the public Bowers Museum in 1936.⁶⁵ Between 1935 and 1942, infill construction in neighborhoods like Wilshire Square began to reoccur, marking the City's recovery from the Great Depression and the war preparation years.

Most development of the early 1940s and during World War II involved four regional military bases,⁶⁶ including the Santa Ana Army Air Base and the West Coast Air Corps Training Center, both established to aid the war effort. The Air Base functioned as a basic training camp, and did not have airplanes, hangars, or runways, and the Training Center located on 8th Street near downtown served as a training center for airmen throughout the duration of the war.

Following World War II, Santa Ana experienced the increased suburbanization characteristic of Orange County at the time as servicemen returned from the war and the demand for homes in southern California grew, launching an unprecedented period of growth and industrial expansion that would significantly alter the once expansive agricultural, open ranch landscape.⁶⁷ Santa Ana had a population of 31,921 residents in 1940, and by 1950, the population had grown to 45,533. This influx of new residents and immigrants would continue for 40 years.⁶⁸ The need for a labor force to harvest existing crops of Orange County ranchers and farmers accounted for this population influx, where by 1943, a committee of growers and farmers established the *bracero* program to import seasonal workers from Mexico, and by 1945, over 500 German prisoners of war were brought in as part of this labor force.⁶⁹

Residential neighborhoods like West Floral Park were largely developed between 1947 and 1950, with subsequent development and infill construction displaying the emerging, modest, and simplified California Ranch style as in the Park Santiago neighborhood. The late 1940s and 1950s post-war housing boom further developed sections of neighborhoods that remained unimproved prior to the war, like the Pico-Lowell neighborhood southwest of the City center and the Morrison Park neighborhood north of the City center, where hundreds of modest California Ranch style residences were constructed. Architects of the early 1950s had overwhelming success in building residences ranging from 1,500-6,000 square feet in this modest ranch style, including the Jack Fisher Park neighborhood north of the City center.

By the late 1940s, Downtown Santa Ana was thriving with the construction of many department stores like the J.C. Penney, Sears and Roebuck, and Rankin's Department Store.⁷⁰ However, with the post-war housing boom came a population with changing needs and values that would impact the historic character of many neighborhoods and their historic buildings. Alterations to some of the City's oldest buildings along West Fourth Street occurred at this time, while the historic character of neighborhoods like the French Park neighborhood began to decline in the 1940s and 1950s as some homes were converted into rooming houses and others left to deteriorate.

During the 1950s and 1960s, the post-war housing boom accelerated change in the character of neighborhoods as demolition and/or new construction increased in neighborhoods like the Santa Ana Triangle neighborhood northeast of the City center, and the Riverview West neighborhood northwest of the City center. The 1950s was also characterized by the growth of the automobile industry following the end of wartime gasoline rationing.⁷¹ Changing social and economic trends led to the suburbanization of shopping areas, as the Fashion Square Mall was constructed in 1959 adjacent to the Bullock's Department Store north of downtown.

From the 1960s into the 1980s, Santa Ana was characterized by explosive population growth. By 1960, Santa Ana's population of 100,359 was almost double its 1950 census count. By 1970,

⁶⁶ Diann Marsh, *Santa Ana...An Illustrated History*, 1994, 147.

⁶⁷ *Ibid.*, 147.

⁶⁸ Diann Marsh, *Santa Ana...An Illustrated History*, 1994, 154.

⁶⁹ *Ibid.*, 155.

⁷⁰ *Ibid.*, 155.

⁷¹ Diann Marsh, *Santa Ana...An Illustrated History*, 1994, 155.

Santa Ana's population was 156,359, and by 1980, had grown to 203,714.⁷² This influx in new residents was partly a result of changing post-war immigration policies, including the influx of Vietnamese refugees following the end of the Vietnam War in 1975.⁷³

The early 1960s through to the late 1970s exhibited a trend of downtown business decay. This resulted in a "grass roots" historic preservation movement as advocates aimed to keep the historic integrity of buildings intact, or promote modification with reversible alterations. The demolition of some historic properties in the French Park and Heninger Park neighborhoods and their redevelopment and replacement with high-density multi-family properties during the 1960s through the 1980s coincided with this 1970s "grass roots" effort to establish the French Park neighborhood as the City's first local historic district in 1984 and the Heninger Park neighborhood as the second in 1986, through the creation of Specific Development (SD) zoning districts intended to preserve historic character. In 1984, the Downtown Santa Ana Historic District was listed in the National Register, and in 1999, the French Park Historic District was listed in the National Register. In 1998, City Council adopted Chapter 30 of the Santa Ana Municipal Code as their Historic Preservation Ordinance, which established the City's local inventory of historical resources, the "Santa Ana Register of Historical Properties," as well as created the Historic Resources Commission to oversee the City's Historic Preservation Program.

3.2 HISTORIC CONTEXT THEMES

Historical resources in the City would typically fall into six broad categories defined by function and themes specific to the City: residential; commercial; institutional and infrastructural; agricultural and industrial; architectural; and arts and cultural resources.

3.2.1 Residential

Residential properties include single-family houses, both individually constructed and part of suburban tracts, rooming houses, multi-family buildings (duplexes, fourplexes, apartment buildings, etc.), condominium development, townhouses, bungalow courtyard housing, mobile home parks, and any other buildings constructed for residential use. The majority of historically significant residential properties in Santa Ana are significant as examples of architectural styles or periods. Residential historical resources may also be significant for representation of important historical events or patterns or association with noteworthy personages. Residential properties may include accessory structures, gardens, landscaping, and mature trees, if they contribute to the historic character of the resource. In Santa Ana, notable residential resources are concentrated in early residential neighborhoods such as the French Park Historic District, Heninger Park Historic District, Floral Park, Wilshire Square, and surrounding the Downtown Santa Ana Historic District, although an increasing number of post-World War II properties have also been recognized.

3.2.2 Commercial

Commercial resources include but are not limited to retail buildings, restaurants, banks, shopping and commercial town centers, entertainment venues (theaters, bowling alleys, etc.), hotels and motels, office buildings, medical office buildings, automobile showrooms, garages, self-storage facilities, gas stations, mixed-use industrial buildings, mixed-use residential buildings, and other properties operated for profit or reused for commercial use. Notable commercial resources are concentrated in the Downtown Santa Ana Historic District along Fourth Street and the adjacent streets and along the Main Street and Broadway corridors.

⁷² Ibid., 154.

⁷³ Vietnamese refugees settled throughout Orange County, including Garden Grove, Westminster, and Santa Ana, resulting in Orange County having the largest concentration of Vietnamese-Americans outside of Vietnam.

3.2.3 Institutional and Infrastructural

Institutional resources include but are not limited to schools, libraries, civic buildings or structures (e.g., city hall, library), Federal government buildings or structures (e.g., courthouse, post office), fraternal halls and social facilities, hospitals, religious buildings, parks and recreational facilities, detention facilities, transportation facilities, and any other resources used for public or institutional use.

Infrastructural resources include parks, bridges, historic highways, parkways, period street lighting, street furniture, and other publicly funded improvements.

Examples of notable institutional resources include the Old Orange County Courthouse, Old City Hall, and the YMCA building. A collection of historically and architecturally significant institutional resources remain concentrated around the Downtown Santa Ana Historic District.⁷⁴

3.2.4 Agricultural and Industrial

Agricultural resources include but are not limited to farm buildings, structures, fields or groves, and packing houses associated with cultivation and distribution of citrus and walnuts, as these specific industries were historically associated with the growth of the City. Industrial resources include but are not limited to manufacturing plants, warehouses, airports and associated industrial buildings and structures, and railroad-associated resources. Industries historically associated with the City include agriculture, dairy, oil, railroad transportation, U.S. Army and Air Force, and manufacturing of clothing, jewelry, and other products.

Agricultural resources have become scarce in Santa Ana and include the Maag Ranch and Maag Ranch House. The former Pacific Electric Substation is an example of a transportation-related resource.

3.2.5 Architectural

Santa Ana's architectural history paralleled that of other southern California communities. Most historical properties that have been recognized in the City are representative of particular styles or eras. Typical architectural styles for residential resources include (but are not limited to) Eastlake, Queen Anne, Craftsman, various Period Revivals (Spanish Colonial Revival, Mission Revival, Colonial Revival, English Revival, Tudor Revival, etc.), California Ranch, and Modern. Typical architectural styles for commercial and institutional resources include Spanish Colonial Revival, Renaissance Revival, Beaux Arts, Art Deco, and Modern (International, Corporate International, etc).

A minority of historical resources in Santa Ana can be definitively attributed to specific architects, designers, or builders. Notable architects/practitioners in Santa Ana include Fred (Frederick) Eley, Rex D. Weston, Everett E. Parks, Clifford Yates, Frank Lansdown, and Gilbert Stearns. Notable regional architects/practitioners with work in Santa Ana include W. Horace Austin and Donald Beach Kirby; and work by Federal architects James A. Wetmore and Louis A. Simon. Notable builders/developers in Santa Ana include Allison Honer, Roy Russell, Wesley Farney, William D. Greschner, T.H. Fowler, and Floyd B. Rogers.

3.2.6 Arts and Cultural

Arts and cultural resources include but are not limited to theaters, museums, art galleries, entertainment halls, community-based murals, and art centers. Notable arts and cultural

⁷⁴ National Register of Historic Places Nomination Application for the Downtown Santa Ana Historic District (Downtown Santa Ana Historic Districts National Register Application). Heritage Orange County. 1983.

resources include the Walkers Orange County Theater (Fox West Coast Theater), the Yost Theater/Ritz Hotel, and the Charles Bowers Memorial Museum.

SECTION 4 BUILT ENVIRONMENT HISTORICAL RESOURCES

4.1 METHODS USED TO IDENTIFY HISTORICAL RESOURCES

Systematic efforts to identify historical resources in the City of Santa Ana began in the late 1970s, when a series of historic resource surveys, partially funded by the National Preservation Fund through grants made by the California Office of Historic Preservation, were undertaken. By the turn-of-the-twenty-first-century, “grass roots” efforts by Santa Ana citizens had led to several listings in the National Register, including the Downtown Santa Ana and French Park historic districts, and to over one hundred local designations. Various Federally assisted projects, including improvements to the Interstate 5 freeway and loans and grants funded through the Department of Housing and Urban Development, have also resulted in the identification and evaluation for historic merit of a significant number of properties in the City. Beginning in 2000, the City, with the Planning Department and the Historic Resources Commission taking the lead, has made significant strides in identifying and designating in the Santa Ana Register several hundred properties throughout the City. Additionally, the incentive offered by Mills Act contracts has convinced numerous property owners to request evaluations of eligibility with a view towards designation.

As a result, nearly 2,000 properties in Santa Ana have been identified and recorded, although not all have current evaluations. In order to provide a picture of the nature and number of built environment historical resources in Santa Ana and to capture these prior efforts and studies, an Existing Conditions Database was compiled (see Appendix). The database is summarized in Table 2, Historical Resources Recorded in Santa Ana. Primary sources for this database included the National Park Service (for National Register and other federal designation programs); the Historic Property Data File (HPDF) maintained by the State (for historic resources surveys completed with OHP-administered grants, Section 106 and tax certification evaluations, national and California designation programs); and the City of Santa Ana (for the Santa Ana Register and Specific Development properties). Since the most recent Historic Property Data File for Orange County was issued in 2012, the OHP was further consulted to determine if any additional designations were made between 2012 and 2019.⁷⁵

4.1.1 Limitations

While the Historic Property Data File also includes properties evaluated and found not to be historical resources, as well as properties flagged for further evaluation, the resources listed in the Existing Conditions Database generally includes only those evaluated as eligible for federal, state, or local designation and excludes those found ineligible or noted for further evaluation. Many of these evaluations date to surveys recorded in 1981 and were not field checked during the course of compiling the database. Therefore, it is possible that many properties either no longer exist or have lost integrity. There were also multiple points of potential error during the process of consolidating disparate sources into a single database. These include varying dates and methods of identification and evaluation; gaps in available data such as recent listings or studies not recorded in the HPDF; the possibility of demolition or loss of integrity since identification; and multiple addresses or multiple evaluations for a single resource.

The most important consideration is that no systematic, city-wide, intensive level survey to identify historical properties in Santa Ana has been conducted, although preliminary or windshield surveys have been performed in most areas of the City. The results of these preliminary and windshield surveys have not been recorded. Also, as properties constructed in the 1960s and 1970s come of age, these must be added to the pool of potential resources. The results of

⁷⁵ Per email correspondence dated February 13, 2019 between OHP and Chattel, the California Historical Resources Commission has not approved any additional landmarks or points in the City of Santa Ana.

historical resource evaluations performed in support of City planning efforts (e.g., the Transit District) and various Environmental Impact Reports were not made available and therefore may not be reflected in the database. For all of these reasons, while the database is comprehensive of all officially designated properties in the City, it should be assumed that additional, as yet undocumented, historical resources exist throughout the City.

4.2 HISTORICAL RESOURCES IN SANTA ANA

Approximately 1950 historical resources have been recorded in Santa Ana. A breakdown by category is provided in Table 2.

Table 2
Historical Resources Recorded in Santa Ana

CHR Code	Definition	Count
1B, 1D, 1S	Listed in the NRHP either individually, as a contributor to a listed historic district, or both. Also listed in CRHR.	230
2D, 2D2, 2D3, 2S	Formally determined eligible for listing in the NRHP by the Keeper, by consensus through a Section 106 process, or by Part I Tax Certification, either individually or as a contributor to a historic district determined eligible for NRHP by the Keeper. Listed in the CRHR.	246
3B, 3D, 3S	Appears eligible for NRHP and/or CRHR either individually, as a contributor to a NRHP eligible district, or both through survey evaluation.	102
5S1	Individual property that is listed or designated locally (i.e., listed in the SAR).	667
5S2	Individual property that is eligible or appears eligible through survey evaluation for local listing or designation, either individually, as a contributor to a district eligible for local listing, or both.	970
Other		
CHL	California Registered Historical Landmark	1
CPHI	California Point of Historical Interest	6
OCHC	Orange County Historical Plaque	2
MA	SAR properties with a Mills Act contract	287
CHR	California Historical Resources	

Numerous historical properties in Santa Ana have been designated in two or more programs (typically, both listed in the National Register and the Santa Ana Register). Most of these resources with multiple classifications are located in the four historic districts that either have been listed in the National Register (Downtown Santa Ana and French Park), formally determined eligible for listing in the National Register (North Broadway Park), or recognized by the City as Specific Development areas (French Park and Heninger Park). The properties listed in the Santa Ana Register are mapped on Figure 4 (see the Appendix). Two properties in Santa Ana have plaques awarded by the Orange County Historical Commission.

Historical resources in Santa Ana reflect a range of historic contexts, property types, dates, and architectural styles:

- Association with significant historic trends or patterns include properties that reflect the City's bygone agricultural era; early settlement and community development; early or

- long-lived commercial enterprises or centers; and important civic and institutional buildings and organizations
- Association with historic personages include properties linked to people who played prominent roles in Santa Ana's past, including City officers, local attorneys, doctors and other professionals and businessmen
- The vast majority of designated or identified properties are single family dwellings, most of which were determined significant on the basis of intact representation of an architectural style or period. The most prevalent architectural styles are the period revivals of the 1920s and 1930s, but a substantial minority represent the styles of the Victorian era and the early twentieth century, including the Craftsman style. Newly historic post-war homes may eventually match period revivals in terms of numbers. Several neighborhoods retain concentrations of historic properties, including Floral Park, French Park, Heninger Park, and Wilshire Square, among others.

4.3 GENERAL PLAN UPDATE FOCUS AREAS

No systematic survey of the Focus Areas has been undertaken. The following discussion characterizes the potential for each area to contain historical resources, based on examination of the Orange County Assessor's records (for dates of construction) and available online, street-level photographs. A map overlaying these focus areas with the Santa Ana Register map is provided in the Appendix (Figure 5).

South Main Street. Extending from First Street south nearly to Dyer Road, this commercial corridor contains a mix of low-rise, one- and two-story commercial and residential properties predominantly dating from the Craftsman period (early 1900s) through the post-war period (1950s). The focus area also encompasses residential blocks east and west of South Main Street between Broadway on the west and Orange Avenue on the east. A preliminary desktop survey, using online street views and assessor data (for dates of construction) suggests that this area contains both potential and listed (e.g., 100-110 South Main Street) historical resources.

Grand Avenue/17th Street. This irregularly shaped area follows Grand Avenue from just north of 1st Street to the City boundary north of Fairhaven Avenue. It is broken into two parts by the 5 Freeway. A mixed use corridor with three lanes of traffic in each direction, Grand Avenue is characterized primarily by buildings dating from the post-war period and by large swaths of paved surface parking and other open space. The preliminary desktop survey suggests that this area has a low potential for built environment historical resources.

West Santa Ana Boulevard. With West Santa Ana Boulevard as its eastern spine, this focus area follows the street from Ross Street on the east to Raitt Street on the west and then encompasses a wedge-shaped area that continues to the west and north as far as Figueroa Street. West 1st Street is the southern boundary east of the Santa Ana River, where it jumps to West 5th Street. The area follows the planned route of the Orange County Streetcar and includes the Orange County jail and coroner's facilities, residential, office, and industrial uses as well as the Willowick Golf Course and the campuses of four primary, middle, and secondary schools. Some of Santa Ana's oldest homes are located along West 2nd and 3rd Streets (e.g., 1078 and 1220 West 2nd Street, 1410 West 3rd Street, all listed in the Santa Ana Register), with construction dates beginning in the late nineteenth century. The eastern portion of this focus area appears to contain several listed and potential historical resources.

55 Freeway/Dyer Road. Lying at the southeastern boundary of the City and bisected by the 55 Freeway, this irregularly shaped area contains office and commercial buildings dating from the 1960s through the 1980s. It is unlikely to contain built environment historical resources.

South Bristol Street. This corridor spans the blocks between Warner Avenue on the north and the City boundary at Sunflower Avenue on the south. Incorporating both commercial and medium density residential uses, the area was largely improved in the 1960s and 1970s. It has a low potential to contain built environment historical resources.

SECTION 5 ANALYSIS OF PROJECT IMPACTS

5.1 THRESHOLD OF SIGNIFICANT IMPACTS

According to §15064.5 of the State CEQA Guidelines, a project with an effect that may cause a substantial adverse change in the significance of a historical resource is a project that may have a significant effect on the environment. Substantial adverse change in the significance of a historical resource means physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the significance of an historical resource would be materially impaired. The significance of an historical resource is materially impaired when a project:

- Demolishes or materially alters in an adverse manner those physical characteristics of an historical resource that convey its historical significance and that justify its inclusion in, or eligibility for, inclusion in the California Register of Historical Resources; or
- Demolishes or materially alters in an adverse manner those physical characteristics that account for its inclusion in a local register of historical resources pursuant to § 5020.1(k) of the Public Resources Code or its identification in an historical resources survey meeting the requirements of § 5024.1(g) of the Public Resources Code, unless the public agency reviewing the effects of the project establishes by a preponderance of evidence that the resource is not historically or culturally significant; or
- Demolishes or materially alters in an adverse manner those physical characteristics of a historical resource that convey its historical significance and that justify its eligibility for inclusion in the California Register of Historical Resources as determined by a lead agency for purposes of CEQA.

Generally, a project that follows the Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic Buildings or the Secretary of the Interior's Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings (1995), Weeks and Grimmer, shall be considered as mitigated to a level of less than a significant impact on the historical resource. A lead agency shall identify potentially feasible measures to mitigate significant adverse changes in the significance of an historical resource. The lead agency shall ensure that any adopted measures to mitigate or avoid significant adverse changes are fully enforceable through permit conditions, agreements, or other measures.

5.2 POTENTIAL PROJECT IMPACTS ON BUILT ENVIRONMENT HISTORICAL RESOURCES

The project would not be expected to result in direct or indirect impacts to built environment historical resources. The General Plan Update does not entail any physical development that would result in physical demolition, destruction, relocation or alteration of a historical resource such that the significance of the historical resource would be materially impaired.

However, future development of projects enabled by the General Plan Update could result in significant direct and/or indirect impacts to historical resources in the absence of mitigation. The City of Santa Ana contains nearly 2,000 recorded historical resources, with potential for many more, since the majority of the City's building stock is at least 45 years old. Places in the City affected by zoning changes, increases in buildout square footage, and other aspects of the General Plan Update may contain significant historical resources, either known or as yet unidentified. The Existing Conditions Database provides a listing of recorded designated and

potential historic resources; however, the database is incomplete and requires updating. Therefore, it should be consulted for the presence of historical resources but should not be regarded as the sole authority. The CEQA Guidelines (§15064.5(a)(4)) state:

The fact that a resource is not listed in, or determined to be eligible for listing in the California Register of Historical Resources, not included in a local register of historical resources (pursuant to §5020.1(k) of the Public Resources Code), or identified in an historical resources survey (meeting the criteria in §5024.1(g) of the Public Resources Code) does not preclude a lead agency from determining that the resource may be an historical resource as defined in Public Resources Code §5020.1(g) or §5024.1.

Potential impacts to historical resources resulting from future development activities pursuant to the General Plan Update will depend on where such development occurs and the nature of the proposed activity. Generally, with respect to the five focus areas, the South Main Street and West Santa Ana Boulevard areas are the most likely to contain historical resources that could be affected by future development (see Figure 5); however, in the absence of an intensive level survey of each area, the presence or absence of potential historical resources is not conclusively known. As stated in the previous subsection, a future development project that utilizes the Secretary of the Interior's Standards for the Treatment of Historic Properties would be expected to result in a less-than-significant impact on historical resources.

SECTION 6 MITIGATION MEASURES

6.1 FUTURE PROJECT MITIGATION

Generally, potential impacts to historical resources potentially resulting from future projects developed pursuant to the General Plan Update shall be mitigated by the City's fulfillment of its statutory responsibilities under CEQA. If the City's due diligence indicates that historical resources may be affected by a future project, then it shall enforce mitigation measures Historical-1 and Historical-2, unless the City determines Historical-2 is not feasible or that significant adverse impacts to historical resources cannot be avoided, in which case Historical-3 shall be implemented. Due diligence is defined as:

- Examination of the Existing Conditions Database, as it may be amended and updated from time to time, or other similar records search, to determine if recorded historical resources are present. The State assumes that any property with a California Historical Resource status code of 1 through 5 is a historical resource, for purposes of CEQA, unless evidence to the contrary is introduced into the administrative record. Such evidence may include, but is not limited to, documentation that a property has been demolished or substantially altered since its recordation such that it no longer retains historic integrity;
- Determination if any properties that are 45 years or older are present; or
- Determination that, in the opinion of the City, a property less than 45 years old and is potentially of exceptional significance, is present.

If the proposed future development site does not satisfy any of these conditions, and the City has no other reason to infer the presence of historical resources, then the City shall not implement the mitigation measures.

Historical-1. Identification of Historical Resources and Potential Project Impacts. A Historical Resources Assessment (HRA) shall be prepared by an architectural historian or historian meeting the Secretary of the Interior's Professional Qualification Standards. The HRA shall include definition of a study area or area of potential effect, which will encompass the affected property and may include surrounding properties or historic district(s); an intensive level survey of the study area to identify and evaluate under Federal, state, and local criteria significance historical resources that might be directly or indirectly affected by the proposed project; and an assessment of project impacts. An HRA is not required if an existing historic resources surveys and evaluations of the property is available; however, if the existing survey and evaluation is more than five years old, it shall be updated. The HRA shall satisfy Federal and state guidelines for the identification, evaluation, and recordation of historical resources.

Historical-2. Use of the Secretary of the Interior's Standards. The Secretary of the Interior's Standards for the Treatment of Historic Properties shall be used to the maximum extent practicable to ensure that projects involving the relocation, conversion, rehabilitation, or alteration of a historical resource and its setting or related new construction will not impair the significance of the historical resource. Use of the Standards shall be overseen by an architectural historian or historic architect meeting the Secretary of the Interior's Professional Qualification Standards. Evidence of compliance with the Standards shall be provided to the City in the form of a report identifying and photographing character-defining features and spaces and specifying how the proposed treatment of character-defining features and spaces and related construction activities will conform to the Standards. The Qualified Professional shall monitor the construction and provide a report to the City at the conclusion of the project. Use of the Secretary's Standards shall reduce the project impacts on historical resources to less than significant.

Historical-3. Documentation, Education, and Memorialization. If the City determines that significant impacts to historical resources cannot be avoided, the City shall require, at a minimum, that the affected historical resources be thoroughly documented before issuance of any permits and may also require additional public education efforts and/or memorialization of the historical resource. While demolition or alteration of a historical resource such that its significance is materially impaired cannot be mitigated to a less than significant level, recordation of the resource will reduce significant adverse impacts to historical resources to the maximum extent feasible. Such recordation should be prepared under the supervision of an architectural historian, historian, or historic architect meeting the Secretary of the Interior's Professional Qualification Standards and should take the form of Historic American Buildings Survey (HABS) documentation. At a minimum, this recordation should include an architectural and historical narrative; archival photographic documentation; and supplementary information, such as building plans and elevations and/or historic photographs. The documentation package should be reproduced on archival paper and should be made available to researchers and the public through accession by appropriate institutions such as the Santa Ana Library History Room, the South Central Coastal Information Center at California State University, Fullerton, and/or the HABS collection housed in the Library of Congress. Depending on the significance of the adversely affected historical resource, the City, at its discretion, may also require public education about the historical resource in the form of an exhibit, webpage, brochure, or other format and/or memorialization of the historical resource on or near the proposed project site. If memorialized, such memorialization shall be a permanent installation, such as a mural, display, or other vehicle that recalls the location, appearance, and historical significance of the affected historical resource, and shall be designed in conjunction with a qualified architectural historian, historian, or historic architect.

6.2 LEVEL OF SIGNIFICANCE

Adoption of the General Plan Update will not result in any physical disturbance of historical resources and therefore will not result in significant adverse impacts to historical resources and does not require mitigation measures.

Future development under the General Plan Update will not result in significant adverse impacts to historical resources with fulfillment of the City's obligations under CEQA described as mitigation measures Historical-1 and Historical-2.

Unavoidable impacts to historical resources resulting from future development under the General Plan Update will be reduced to the maximum extent feasible, but will still be significant, with implementation of mitigation measure Historical-3.

**EXISTING CONDITIONS DATABASE
of
RECORDED HISTORIC RESOURCES IN SANTA ANA**

LEGEND AND COMMENTARY

Number, Extension, Dir (Direction), Street Name, [Street] Type	Collectively, the primary address of a property. Numerous properties in Santa Ana have multiple addresses. Where additional addresses are known from the recorded information, these are indicated in the Extension column (for multiple addresses on the same street) and/or cross-referenced as a separate line item on a different street (for corner properties).
Resource Name	Where multiple names were recorded, the Santa Ana Register name was used. If the property was not listed in the Santa Ana Register, the most appropriate of the names shown in the Historic Property Data File (HPDF) was selected.
Date	The date of construction as shown in the HPDF. If multiple dates were listed, a judgement of the most likely was made. Many of these dates may be based on outdated research. Subsequent, property-specific research such as that conducted for Santa Ana Register listings may provide more accurate dates.
CHR Code	California Historical Resources Status Code (see table following this legend for a list of status code meanings and Section 2.2.8 of this Technical Report). Properties listed in the HPDF often have multiple status codes, reflecting evaluations at different points in time. The highest designation or evaluation (i.e., the lowest number code) appears in this column. Codes that are <i>italicized</i> were assigned when the database was compiled to fill in gaps in the HPDF and were usually based on the current local status of a property. For example, if a property had been designated in the Santa Ana Register, a code of <i>5S1</i> was assigned. Or, if a property was itemized as a contributor to a Specific Development district by the City of Santa Ana, but not listed in the HPDF, a code of <i>5D2</i> was used.
Other CHR Code	Many properties have more than one formal evaluation, and this column was utilized in those cases. For example, a property listed in the National Register of Historic Places and also designated in the Santa Ana Register will have a CHR code of 1 (either “S” for individual property, “D” for a historic district contributor, or “B” for both) in the CHR Code column and a <i>5S1</i> in the Other CHR Code column.
CHRIS	California Historical Resources Information System. See Section 2.2.8 of this Technical Report. The most common entry for this column is “HPDF,” indicating listing in the Historic Property Data File for Orange County. Other notations include “CPHI” for California Point of Historical Interest and “CHL” for a registered California Historical Landmark.
Historic District	There are two historic districts in Santa Ana that are listed in the National Register of Historic Places: Downtown Santa Ana and French Park. A third district, North Broadway Park, has been determined eligible for the National Register through a Section 106 process. Two Specific Developments in the City, French Park and Heninger Park, while not designated historic districts, function somewhat similarly. Additional potential historic district identifications resulted from historic resources surveys and may require updating. In numerous instances, it could not be

determined from the HPDF with which potential historic district a property was associated, resulting in an “Unknown” notation.

SAR	Santa Ana Register of Historical Properties. The sequential SAR listing number is indicated in this column.
Category	Every property in the Santa Ana Register is categorized as either Landmark (“L”), Key (“K”), or Contributive (“C”).
NR	National Register of Historic Places. If the notation in this column reads “NRHP”, then the property is an individual listing. “NRHP/C” and “NRHP/NC” denote National Register historic district Contributor or Non-Contributor, respectively.
Mills	A “MA” in this column indicates a property with a Mills Act Contract.
SD	Specific Development. The two Specific Development areas shown in this column are French Park (“SD-19”) and Heninger Park (“SD-40”).
OCHS	Orange County designation.

CHR Codes Used in Database

CHR Code	Definition
1B	Both 1D and 1S.
1D	Contributor to a district or multiple resource property listed in National Register (NR). Listed in the California Register (CR).
1S	Listed in the NR as an individual property. Listed in the CR.
2D	Contributor to a district determined eligible for NR by the Keeper. Listed in the CR.
2D2	Contributor to a district determined eligible for NR by consensus through Section 106 process. Listed in the CR.
2D3	Contributor to a district determined eligible for NR by Part I Tax Certification. Listed in the CR.
2S	Individual property determined eligible for NR by the Keeper. Listed in the CR.
2S2	Individual property determined eligible for NR by a consensus through Section 106 process. Listed in the CR.
3B	Both 3D and 3S.
3D	Appears eligible for NR as a contributor to a NR eligible district through survey evaluation.
3S	Appears eligible for NR as an individual property through survey evaluation.
5B	Locally significant both individually (listed, eligible, or appears eligible) and as a contributor to a district that is locally designated, determined eligible or appears eligible through survey evaluation.
5D2	Contributor to a district that is eligible for local listing or designation.
5S1	Individual property that is listed or designated locally.
5S2	Individual property that is eligible for local listing or designation.
5S3	Appears to be individually eligible for local listing or designation through survey evaluation.
6X	Determined ineligible for the NR by State Historical Resources Commission or Keeper.
