Additional help when you need it

Successful retirement saving can mean having the tools, resources, and people who help you make the right decisions. The plan can help you find the freedom to retire on your terms. Visit Empower online or call **1-877-778-2100** for help with managing your account and answering your questions Monday through Friday, 8 a.m. to 9 p.m. ET.

Preparing for tomorrow starts today. By taking advantage of all that the plan offers, you can be on the path to a more comfortable, fulfilling retirement.

Sincerely,

Kathryn Downs
Executive Director of Finance & Management Svcs

Retirement products and services are provided by Prudential Retirement Insurance and Annuity Company (PRIAC) or its Empower affiliates. PRIAC is an Empower business. Empower refers to the products and services offered by Empower Annuity Insurance Company of America and its subsidiaries, including Empower Retirement, LLC and PRIAC, marketed under the Empower brand. This material is for informational purposes only and is not intended to provide investment, legal or tax recommendations or advice.

NO ACTION REQUIRED: FOR YOUR INFORMATION

Overview

On April 1, 2022, Empower acquired the full-service retirement business of Prudential Retirement. Over a period of time, you may see references to Prudential and Empower as we transition our experiences. Throughout this process, we want you to know that our focus is on you and making this transition as seamless as possible. For your reference, outlined below is the entity-level detail of the acquisition, including important information to help determine who will be servicing your account or other products.

Empower Annuity Insurance Company of America (EAICA), formerly known as Great-West Life & Annuity Insurance Company, the parent company of Empower Retirement, LLC (Empower), acquired the full-service retirement business of Prudential Financial, Inc. In connection with the transaction, EAICA acquired all shares of the following entities, which are no longer affiliated with Prudential Financial, Inc.: Prudential Retirement Insurance and Annuity Company; Prudential Bank & Trust, FSB; Global Portfolio Strategies, Inc.; TBG Insurance Services Corporation; MC Insurance Agency Services, LLC; and Mullin TBG Insurance Agency Services, LLC. On October 3, 2022, Prudential Retirement Insurance and Annuity Company was renamed Empower Annuity Insurance Company. For additional information regarding the name changes, please see empower.com/name-change.

Empower is in the process of integrating the acquired full-service retirement business. Effective January 1, 2023, Global Portfolio Strategies, Inc. was merged into Empower Capital Management, LLC, an Empower affiliate. Effective March 31, 2023, Prudential Bank & Trust, FSB is merging into Empower Trust Company, LLC, an Empower affiliate, and all services performed by Prudential Bank & Trust, FSB will be assumed by Empower Trust Company, LLC.

Please use the following to determine if Empower is now the service provider for your account. If you have multiple accounts, you may be a customer of Prudential Financial, Inc. and its affiliates (together, Prudential) and Empower.

ACCOUNT TYPE	SERVICE PROVIDER
<p>If you are an annuitant, contingent annuitant, or other beneficiary under a group annuity contract issued or reinsured by Prudential’s pension risk transfer business OR a plan participant whose benefit is administered by Prudential’s pension risk transfer business...</p> <p>How do I know if this applies to me?</p> <p>You were previously issued an annuity certificate from the Prudential Insurance Company of America <u>in connection with your employer’s defined benefit plan</u> OR you previously received a communication from your employer that Prudential has issued a guaranteed annuity covering all or a portion of your pension benefit or pays your pension benefit.</p>	<p>...Your account remains with Prudential and was not impacted by the transaction.</p> <p>The “Important Disclosures Regarding the Empower Transaction” listed below do not apply to your account.</p>
<p>If you independently purchased an individual annuity, life insurance, or investment product with Prudential...</p> <p>How do I know if this applies to me?</p> <ul style="list-style-type: none">• You independently purchased a product from Prudential (other than a SmartSolution IRA) that is unrelated to an employer workplace plan.• The product you purchased is issued by The Prudential Insurance Company of America (PICA), Pruco Life Insurance Company, or Pruco Life Insurance Company of New Jersey.• You purchased an investment product or service through Pruco Securities, LLC.	<p>...Your account remains with Prudential and was not impacted by the transaction.</p> <p>The “Important Disclosures Regarding the Empower Transaction” listed below do not apply to your account.</p>

ACCOUNT TYPE	SERVICE PROVIDER
<p>If you are a participant in the Prudential Employee Savings Plan (PESP); the Jennison Associates Savings Plan; the Assurance Savings Plan; the Prudential Supplemental Employee Savings Plan; the Prudential Financial, Inc. 2021 Omnibus Incentive Plan and the attendant Prudential Long-Term Incentive Program; the Prudential Financial, Inc. 2016 Deferred Compensation Plan for Non-Employee Directors; or the PGIM, Inc. Omnibus Deferred Compensation Plan...</p> <p>How do I know if this applies to me?</p> <ul style="list-style-type: none"> You receive statements and other notifications from Prudential in connection with one or more of these plans. 	<p>...Prudential remains the service provider for these plans. Empower is currently providing services as a sub-contractor for a transitional period.</p> <p>Please carefully review the “Important Disclosures Regarding the Empower Transaction” below that apply to you as applicable.</p>
<p>If you are a participant in a retirement plan previously serviced by Prudential Retirement, which may include defined benefit plans, nonqualified plans, defined contribution plans, and 401(k) plans (including a plan that permits self-directed brokerage accounts), or you are an account holder of a SmartSolution IRA, an Auto Roll IRA, or an NFS Prudential Brokerage Account...</p> <p>How do I know if this applies to me?</p> <ul style="list-style-type: none"> You receive a notification from Prudential Retirement notifying you that Empower will become the service provider for your account. You receive a welcome email or letter from Empower. 	<p>...Empower is now the service provider for your account. However, with respect to Smart Solution IRAs and certain Auto Roll IRAs, Prudential Investment Management Services LLC (PIMS) remains the broker-dealer for a transitional period.</p> <p>Please carefully review the “Important Disclosures Regarding the Empower Transaction” below that apply to you.</p>

Important Disclosures Regarding the Empower Transaction

Effective April 1, 2022, the following will apply to you:

- All references to “Prudential Retirement” refer to Empower. Prudential Retirement is no longer a business unit of Prudential.
- Certain insurance products written by The Prudential Insurance Company of America were reinsured to EAICA and Empower Life & Annuity Insurance Company of New York (for New York business). Empower will become the administrator of this business acquired from Prudential.
- Empower refers to the products and services offered by EAICA and its subsidiaries, including Empower Retirement, LLC. Empower is not affiliated with Prudential or its affiliates.
- Full-service retirement sales personnel and certain service personnel are no longer registered representatives of Prudential Investment Management Services LLC (PIMS) and are registered representatives of Empower Financial Services, Inc., formerly known as GWFS Equities, Inc. For a transitional period, certain back office and service personnel will remain registered representatives of PIMS.
- During a transition period, Prudential and, as applicable, its affiliates will continue to provide services to Empower. PIMS will continue to provide certain broker-dealer services under the terms of existing service agreements for certain plans and will continue to be the broker-dealer of record for existing SmartSolution IRAs and certain Auto Roll IRAs for a transitional period.
- On or about May 1, 2023, the principal underwriter and distributor for certain legacy Prudential products will change from Prudential Investment Management Services LLC to Empower Financial Services, Inc, resulting from the sale of Prudential’s retirement business to Empower. The change of principal underwriter and distributor will not impact the way these products operate. You can find further details if you wish in the prospectus to be released on or about May 1, 2023, to determine which principal underwriter and distributor supports the product you are invested in.
- Any documents pertaining to fraud or security commitments by Prudential Retirement are no longer applicable and are replaced with Empower’s commitments set forth at participant.empower-retirement.com/participant/#/articles/securityGuarantee
- If Empower is the service provider for your account, Prudential’s Privacy Statements and Privacy Notices are replaced with Empower’s Privacy Notice as set forth at empower-retirement.com/privacy for that account.

All product names, logos, and brands are property of their respective owners. “EMPOWER” and all associated logos and product names are trademarks of Empower Annuity Insurance Company of America. Prudential, the Prudential logo and the Rock Design are trademarks of Prudential Financial, Inc. and its affiliates and are used under license.

Information provided herein, including linked documents, is being provided for informational or educational purposes only. By sharing it, neither PIMS nor Prudential is acting as your fiduciary as defined by the Department of Labor or otherwise. If you need investment advice, please consult with a qualified professional. Prudential Financial, its affiliates, and their financial professionals do not render tax or legal advice. Please consult with your tax and legal advisors regarding your personal circumstances.

Have additional questions? For Prudential accounts and products, please call 800-621-1089. For Empower accounts and products, please call 877-778-2100.

PLAN HIGHLIGHTS

On the following pages, you will find important information about the City Of Santa Ana Deferred Compensation Plan. The information in the guide is just an overview of the plan's features. For more detailed information about your plan, you can request your plan's Summary Plan Description (SPD) from your Plan Administrator.

ENROLLMENT AND ELIGIBILITY

- You will be eligible to enroll after you reach age 18 years old. You may enroll at anytime, after meeting your eligibility requirement.
- You can enroll online: sa457futures.retirepru.com Or join by phone: 1-877-PRU-2100 (1-877-778-2100). Hearing impaired? Please call 1-877-760-5166.

YOUR CONTRIBUTIONS

- You may contribute a minimum of \$0 per paycheck, on a before tax basis, up to an annual maximum amount of \$22,500.*
- You may make Roth contributions to your retirement plan account.*
- If you will be at least 50 years old in 2023, you are also eligible to make an additional before-tax catch-up contribution of \$7,500 per year.
- You may change your contribution amount any time.
- You may roll over money to your account, in any amount, from another similar retirement plan. Refer to the SPD for further information.
- If you are in the three calendar years prior to normal retirement age, you may also be able to make special catch-up contributions if eligible.

Under the special catch-up provision, you can contribute up to twice the annual limit, depending on how much you were able to contribute in previous years but did not.

* In 2023, federal tax law allows you to make a combined contribution of before-tax and Roth contributions to your retirement plan up to \$22,500.

ROTH CONTRIBUTIONS

Your retirement plan allows you to make Roth contributions to your account. Roth contributions combine the savings and investment features of a traditional before-tax retirement program with the tax-free distribution features of the Roth IRA. If you meet certain requirements down the road, the Roth money you withdraw at retirement - and any investment earnings - won't be taxable. When deciding if you should make Roth contributions, consider the following scenarios:

- If your tax rate will be higher in retirement than it is today, making designated Roth contributions may make sense for you.
- If your tax rate will be lower in retirement than your working years, you may benefit more from making before-tax contributions and deferring your tax obligation until retirement.
- With tax rates in retirement being uncertain, you may choose to diversify your taxation by making both before-tax and Roth contributions to your retirement plan.

To help you determine if Roth contributions are appropriate for you, visit roth.connectwithpru.com and enter your personal data into our Roth contribution calculator.

WHAT IS VESTING?

"Vesting" refers to your ownership of the money in your account. You are always 100% vested in your own contributions.

ACCESSING YOUR MONEY

You may be able to access money in your retirement plan account through a loan, in-service withdrawal, or an unforeseen emergency withdrawal.

In-service withdrawals

While employed, you may make in-service withdrawals within plan restrictions, including attainment of age 59-1/2 and Qualified Birth or Adoption Distributions.

PLAN HIGHLIGHTS

LOANS

Your plan allows you to take:	2 loans at one time
Application fee:	\$50 for each loan
Processing fee:	\$6.25 quarterly
Method of repayment:	Payroll Deduction
Tax consequences:	If loan is not paid in full, tax consequences will apply.
Prepayment available:	Yes

GENERAL PURPOSE

Interest rate:	Prime + 2%*
Minimum loan:	\$1,000
Maximum loan:	50% of your vested account balance, up to \$50,000 in a 12 month period*
Repayment period:	0 to 5 years

*Interest is paid back to participant's account. Additional information about loan calculations and loan interest rate details can be found in your plan's loan policy.

PRIMARY RESIDENCE

Interest rate:	Prime + 2%*
Minimum loan:	\$1,000
Maximum loan:	50% of your vested account balance, up to \$50,000 in a 12 month period*
Repayment period:	5 to 15 years

*Interest is paid back to participant's account. Additional information about loan calculations and loan interest rate details can be found in your plan's loan policy.

Any outstanding loan balance not paid back at termination becomes taxable in the year of default. Under the Tax Cuts and Jobs Act, for defaults related to termination of employment after 2017, the individual has until the due date of that year's return (including extensions) to roll over this amount to an IRA or qualified employer plan.

Unforeseeable emergency withdrawals*

You can withdraw money from your account in certain emergency situations, as defined by your plan. Please call Service Center for more details.

***Unforeseeable emergency withdrawal:** The taxable portion of a withdrawal is taxed as ordinary income. The total amount of the withdrawal may not be more than the amount required to meet your immediate financial need; however, you may have the option to "gross-up" the amount you receive to cover taxes. You may want to consult a tax professional before taking a withdrawal from the plan

Important note!

Amounts withdrawn, except for qualified withdrawals from Roth sources, are generally taxed at ordinary income tax rates. Amounts withdrawn are subject to plan restrictions.

Neither Empower nor any of its affiliates provide tax or legal advice for which you should consult your qualified professional.

In order for distributions to be made from a Roth source free of penalties and federal income taxes, your Roth account must have been established at least five tax years before the withdrawal and your distribution must be: a) made on or after the date you attain age 59½; b) made to your beneficiary or your estate after your death or c) attributable to your being disabled.

Disability option: If you become disabled, you may be eligible to receive all of your vested account balance immediately. The amount you receive is subject to all applicable income taxes, but no penalties.

RETIRING OR LEAVING THE EMPLOYER

It's important to learn about all options regarding your account balance before you retire or separate from service. You will need to make a decision about what to do with your vested account balance when one of the following events occurs:

- Your employment with City of Santa Ana ends.
- You retire from City of Santa Ana at the normal retirement age of 70.
- You become permanently disabled.
- Your death. Your beneficiary is entitled to your account balance when you die; they are responsible for all federal income tax imposed. Distribution upon death may also be subject to federal and state inheritance and estate taxes.

When any of the events listed above occur, you or your beneficiary will have several distribution options. It's important to understand each of the distribution options listed in your plan's Summary Plan Description, before you make your decision. For assistance, please contact a representative at **1-877-778-2100**.

Retired Public Safety Officers can request a distribution for purposes of paying qualified health and long-term care insurance premiums federal income tax-free of up to \$3,000 annually.

PLAN HIGHLIGHTS

Directly rolling it over

You can choose to move or “roll” money over into another qualified retirement plan, a Traditional Individual Retirement Account (IRA), or Roth IRA. This allows your money to continue growing tax-deferred. Keep in mind, if you have not reached the age 59½, and you choose to move your money into a retirement account other than a 457 plan, subsequent withdrawals may be subject to a 10% early withdrawal penalty. This is based on our understanding of the tax law. You may wish to discuss this matter with your tax advisor. Because each situation is unique, neither we nor our representatives can provide tax or legal advice.

Having account balance paid in the form of an annuity

An annuity pays you a regular income, usually monthly. This option spreads the tax burden over a period of years.

Having account balance paid in installments

You can withdraw your account balance in a series of payments, in an amount over a period of time determined by the employer.

Lump sum

You may choose to take a full or partial lump sum distribution. A 20% federal income tax may be applied. If you have not reached age 59½, you may be subject to a 10% early withdrawal penalty.

INVESTMENT TYPES

This section is designed to provide general information about different types of investments. Not all plans offer investments in every category. Information about the specific investments offered through your plan is available in the Investment Options section of this guide. The main types of investments in which participants generally invest:

Stable-Value Investments: These investments combine safety of principal, liquidity and a competitive rate of return with potentially improved earnings power versus alternative short-term investments.

Fixed-Income Investments: Invest in corporate and government bonds. They can go up or down in value each day, so they carry more risk than stable-value investments, but also offer more opportunity for a potentially larger return. Fixed income investment mutual funds are subject to interest rate risk; their value will decline as interest rates rise.

Stocks/Equities: Stock funds also called equity investments represent ownership in funds, which own shares of corporations. Stock funds offer you a chance to share in the profits or losses of those corporations. Stock funds have the potential for higher returns, but they carry more risk than the other investment options.

Allocation: Allocation investments combine fixed-income and stock components to offer you a combination of the interest income from fixed-income investments and the growth potential of stock investments. As a result, allocation investments typically do not experience the full ups and downs of the stock market.

Retirement Income: Although they may vary in structure, these options are designed to provide a steady stream of income for life.

INVESTMENT OPTIONS

City Of Santa Ana Deferred Compensation Plan offers a selection of investments to choose from. You can decide how you want your money invested, and may move money between investments anytime. Please refer to the disclosures at the end of this section for a description of any restrictions that may apply.

*These investments are included in your plan's GoalMaker portfolios. These investments are subject to change. You will be notified in writing in advance of any such change.

An investment in the money market fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the fund seeks to preserve the value of your investment at \$1.00/\$10.00 per share, it is possible to lose money by investing in the fund.

⌘ Generally, distributions resulting from your termination of employment, retirement, death or disability, hardship withdrawals and minimum required distributions will always be paid in full without any fees or restrictions and will not be deferred. Prudential reserves the right to defer certain other withdrawals from GIF assets if your plan's pool level cashflow exceeds 10% of the pool's beginning of calendar year balance. A pool consists of similar contracts that are funded with us in the same calendar year. This availability of withdrawals and distributions is subject to the specific provision of your retirement plan.

Amounts withdrawn from this investment may not be transferred to a competing fund for a period of 90 days after the withdrawal date. Competing funds are generally short term fixed income investments, money market investments, or stable value investments that may be available in your plan.

If the SEC has suspended or otherwise restricted trading, or another emergency outside of our control exists, Prudential may defer transfers, distributions or disbursements for up to six months.

GOALMAKER

Your retirement plan offers GoalMaker®, an optional easy-to-use asset allocation program that will invest your contributions in a portfolio that matches your investor style and years to retirement.

By enrolling in GoalMaker, you direct Prudential to immediately reinvest your future contributions and existing account balance (if applicable) to match this investment allocation. Your entire account will be rebalanced according to this portfolio unless a restriction is in place or a portion of your account is invested in a restricted source that isn't available through GoalMaker. Of course, as your goals and years to retirement change, you can select a new portfolio at any time without charges or penalties. Making an allocation change, however, will cause you to no longer be enrolled in the GoalMaker program.

The GoalMaker portfolio you choose will be automatically rebalanced at a frequency determined by your plan. Automatic rebalancing with GoalMaker ensures your asset allocation stays in line with your original investment objectives. During the rebalancing process, money is moved among investments in your GoalMaker portfolio to maintain the allocation percentages you choose.

Additionally, GoalMaker's optional age adjustment feature automatically adjusts your allocations over time, based on the number of years you have left until retirement. How does it work? If you choose a conservative investor portfolio with 11-15 years to retirement, once you reach an age that brings you ten years before your expected retirement age, your account will automatically be updated to the conservative investor portfolio with 6-10 years to retirement.

To see how your money would be invested across various asset classes, find your Investor Style code in the chart below that matches your investing style.

Keep in mind that application of asset allocation and diversification concepts does not ensure safety of principal and interest. **It is possible to lose money by investing in securities.**

These model portfolios are provided as samples and not as investment recommendations. The model portfolios are based on generally accepted investment practices and take into account the principles of modern portfolio theory, in which allocations are adjusted in an effort to achieve maximum returns for a given level of risk. You should consider other assets, income, and investments (e.g. equity in a home, Social Security benefits, individual retirement plan investments, etc.) in addition to your interest in the plan, to the extent those items are not taken into account in the model before applying these models to your individual situation. Please note that in addition to the specific investments used in the GoalMaker model portfolios, other designated investment alternatives have similar risks and return characteristics. Information regarding those designated investment alternatives can be found in your plan enrollment materials or by logging into your retirement account at Prudential.com. The GoalMaker portfolios are subject to change including, for example, the replacement of investment options and allocations within the portfolios. You will be notified in writing in advance of such changes. Past performance of investments or asset classes does not guarantee future results.

GoalMaker's model allocations are based on generally accepted financial theories that take into account the historic returns of different asset classes. But, of course, past performance of any investment does not guarantee future results. Participants should consider their other assets, income and investments (e.g. equity in a home, Social Security benefits, individual retirement plan investments, etc.) in addition to their interest in the plan, to the extent those items are not taken into account in the model. Participants should also periodically reassess their GoalMaker investments to make sure their model portfolio continues to correspond to their changing attitudes and retirement time horizon.

The performance quoted represents past performance. The investment return and principal value will fluctuate so that an investor's shares or units, when redeemed, may be worth more or less than original cost. Past performance does not guarantee future results. Current performance may be lower or higher than the performance data quoted. For performance information current to the most recent month end, please call 1-877-778-2100 or visit our website at www.prudential.com/online/retirement. Past performance is not indicative of future performance and short periods of performance may be particularly unrepresentative of long-term performance.

The performance in this report is based in part, on adjusted historical returns of the oldest share class of the fund, which has been adjusted to reflect the fees and expenses of this share class. These returns are net of investment-related fees and charges as well as current contract fees (including asset charges). Your actual rate of return may differ from these returns depending on your specific account activity (including the timing of your contributions and purchases and other account transactions), and any changes in contract charges. Investments in the market-valued funds involve the risk and reward associated with the securities market. **Investment performance reflects true period earnings. The Inception Date represents the date assets were first invested in the fund or the date a specific share class was initiated. "N/A" indicated the fund was not in existence or data was not available/applicable at the time this statement was printed. Performance is based on 10 years when an Inception Date is not displayed.**

*** Expense Ratios –**

The net and gross expenses shown include the total operating expenses of the funds and the indirect expenses of the funds' underlying portfolios. Your investment returns are reduced by various fees and expenses. For each investment option, expense ratios are presented as an annual percentage. Depending on the type of investment, these charges are paid to Prudential or to unaffiliated mutual fund complexes or bank collective trusts. **Gross Expense Ratio** - The Gross Expense Ratio represents the percentage of fund assets paid for operating expenses and management fees. It typically includes the following types of fees: accounting, administrator, advisor, auditor, board of directors, custodial, distribution (12b-1), legal, organizational, professional, registration, shareholder reporting, sub-advisor, and transfer agency. The Gross Expense Ratio does not reflect a fund's brokerage costs, fee waivers, or investor sales charges. **Net Expense Ratio** - The Net Expense Ratio represents fees charged against fund assets after adjustment for any fee waivers, if applicable. The Net Expense Ratio will equal the Gross Expense Ratio when no fee waivers are in place.

****An expense waiver is the elimination of all or part of a fund's expenses and fees. The waiver may be contractual or voluntary in nature, and the expiration date indicates when the waiver is set to expire. In certain circumstances, fund companies may not set an explicit expiration date, but have the discretion to subsequently set an expiration date or withdraw the waiver at any time. As a result, expiration dates can change and may range from short-term to long-term commitments. Please reference the fund prospectus for further information on expense waivers before making an investment decision.**

Some mutual funds and bank collective trusts, or their affiliates, compensate Prudential for selling their shares and servicing your retirement plan, as detailed in the Fact Sheet for that investment option. For other investment options, the charges reflected in the Expense Ratio are typically deducted by Prudential in return for investment and recordkeeping services, and product distribution. For some plans, the charges also enable Prudential to satisfy the plan's request for allowances to defray plan expenses. Your retirement plan may not include investment options with lower fee structures or lower cost share classes in order to compensate Prudential, in the aggregate, for servicing your retirement plan.

For money market fund: You could lose money by investing in a money market fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor has no legal obligation to provide financial support to the fund, and you should not expect that the sponsor will provide financial support to the fund at any time. The yield quotation more closely reflects the current earnings of the fund than the total return quotation. To obtain historical 7 day yield please call 1-877-778-2100.

Investors should carefully consider a fund's investment objectives, risks, charges and expenses before investing. For more complete information about the investment options available through your plan, Please call 1-877-778-2100 for a free prospectus that contains this and other information about our funds. Please read the prospectus carefully before investing. It is possible to lose money investing in securities.

Data presented is as of the period specified for this report, unless otherwise specified within a table heading. Data and expense ratios presented are the most current made available at the time of production. For mutual funds, the fund company may have more recent data available on its website. Price corrections that impact performance data may occur after production of this material.

Fund Fact Sheet User's Guide

This guide will help provide a glossary of terms and benchmark definitions commonly found on fund fact sheets.

In providing this information Prudential Retirement Insurance and Annuity Company (PRIAC) is not undertaking to provide impartial investment advice, or to give advice in a fiduciary capacity. PRIAC may benefit from advisory and other fees paid to it or its affiliates for managing, selling, or settling of proprietary mutual funds, and other investment products or securities offered by PRIAC or its affiliates. Investment vehicles sponsored or managed by a PRIAC affiliate generate more revenue for the Empower Retirement, LLC. enterprise than non-proprietary investment vehicles.

PRIAC will also benefit from participant managed account services provided by third party Registered Investment Advisers (RIA) and sales personnel will receive compensation based upon plan sponsor adoption of the managed account service provided by a third-party RIA.

PRIAC's sales personnel generally receive greater compensation if plan assets are invested in proprietary investment vehicles. Sales personnel also receive compensation if plan sponsors/employers adopt other plan features such as automatic enrollment, automatic escalation, offshore sourcing, electronic delivery, GreenPath, Wellthy and other financial wellness services.

PRIAC may benefit directly from the difference between investment earnings of PRIAC's stable value funds and the amount credited to deposits in those funds. PRIAC may also benefit from broker-dealer or other entities' co-sponsorship of PRIAC conferences.

Allocation

We break down the investment holdings into general investment classes. The pie chart shows how much emphasis is placed on stocks, bonds or cash. We also show how much is held in foreign stocks. Bond investments replace the portfolio allocation chart with the following: Quality Distribution: We reveal the quality of the bonds in a bond-heavy portfolio, from least risky to most risky, with the percentage assigned to each.

Benchmark Performance

The holdings and characteristics may differ from those of the benchmark(s), and such differences may be material. Factors affecting portfolio performance that do not affect benchmark performance may include portfolio rebalancing, the timing of cash flows, credit quality, diversification and differences in volatility. In addition, financial indices do not reflect the impact of fees, applicable taxes or trading costs which reduce returns. Unless otherwise noted, financial indices assume reinvestment of dividends. You cannot make a direct investment in an index. The statistical data regarding such indices has not been independently verified.

Fund/Portfolio Category

Morningstar, an investment research and investment management firm, assigns each mutual fund to a category, based on their actual investment style as measured by their underlying portfolio holdings over the past three years. Categories for Manager of Managers separate accounts are determined by Prudential.

Morningstar Style Box

The Morningstar Style Box™ reveals a fund's investment strategy. For equity funds the vertical axis shows the market capitalization of the long stocks owned and the horizontal axis shows investment style (value, blend, or growth).

For portfolios holding fixed-income investments, a Fixed Income Style Box is calculated. The vertical axis shows the credit quality based on credit ratings and the horizontal axis shows interest-rate sensitivity as measured by effective duration. There are three credit categories - "High", "Medium", and "Low"; and there are three interest rate sensitivity categories - "Limited", "Moderate", and "Extensive"; resulting in nine possible combinations. As in the Equity Style Box, the combination of credit and interest rate sensitivity for a portfolio is represented by a darkened square in the matrix. Morningstar uses credit rating information from credit rating agencies (CRAs) that have been designated Nationally Recognized Statistical Rating Organizations (NRSROs) by the Securities and Exchange Commission (SEC) in the United States. For a list of all

Morningstar Style Box (continued)

NRSROs, please visit <https://www.sec.gov/ocr/ocr-current-nrsros.html>. Additionally, Morningstar will use credit ratings from CRAs which have been recognized by foreign regulatory institutions that are deemed the equivalent of the NRSRO designation. To determine the rating applicable to a holding and the subsequent holding weighted value of a portfolio two methods may be employed. First is a common methodology approach where if a case exists such that two CRAs have rated a holding, the lower rating of the two should be applied; if three or more CRAs have rated a holding, the median rating should be applied; and in cases where there are more than two ratings and a median rating cannot be determined, the lower of the two middle ratings should be applied. Alternatively, if there is more than one rating available an average can be calculated from all and applied.

Please Note: Morningstar, Inc. is not an NRSRO nor does it issue a credit rating on the fund. Credit ratings for any security held in a portfolio can change over time.

Morningstar uses the credit rating information to calculate a weighted-average credit quality value for the portfolio. This value is based only upon those holdings which are considered to be classified as "fixed income", such as a government, corporate, or securitized issues. Other types of holdings such as equities and many, though not all, types of derivatives are excluded. The weighted-average credit quality value is represented by a rating symbol which corresponds to the long-term rating symbol schemas employed by most CRAs. Note that this value is not explicitly published but instead serves as an input in the Style Box calculation. This symbol is then used to map to a Style Box credit quality category of "low," "medium," or "high". Funds with a "low" credit quality category are those whose weighted-average credit quality is determined to be equivalent to the commonly used High Yield classification, meaning a rating below "BBB", portfolios assigned to the "high" credit category have either a "AAA" or "AA+" average credit quality value, while "medium" are those with an average rating of "AA-" inclusive to "BBB-". It is expected and intended that the majority of portfolios will be assigned a credit category of "medium".

For assignment to an interest-rate sensitivity category, Morningstar uses the average effective duration of the portfolio. From this value there are three distinct methodologies employed to determine assignment to category.

Portfolio which are assigned to Morningstar municipal-bond categories employ static breakpoints between categories. These breakpoints are: "Limited" equal to 4.5 years or less, "Moderate" equal to 4.5 years to less than 7 years; and "Extensive" equal to more than 7 years. For portfolios assigned to Morningstar categories other than U.S. Taxable, including all domiciled

Morningstar Style Box (continued)

outside the United States, static duration breakpoints are also used: "Limited" equals less than or equal to 3.5 years, "Moderate" equals greater than 3.5 years but less than or equal to 6 years, and "Extensive" is assigned to portfolios with effective durations of more than 6 years. Note: Interest-rate sensitivity for non-U.S. domiciled portfolios (excluding those in Morningstar convertible categories) may be assigned using average modified duration when average effective duration is not available.

For portfolios Morningstar classifies as U.S. Taxable Fixed-Income, interest-rate sensitivity category assignment is based on the effective duration of the Morningstar Core Bond Index (MCBI). The classification assignment is dynamically determined relative to the benchmark index value. A "Limited" category will be assigned to portfolios whose average effective duration is between 25% to 75% of MCBI average effective duration, where the average effective duration is between 75% to 125% of the MCBI the portfolio will be classified as "Moderate", and those portfolios with an average effective duration value 125% or greater of the average effective duration of the MCBI will be classified as "Extensive".

Morningstar Style Box/Investment Style Box

While the category description tells you how the portfolio has been run in the past, the Style Box is a snapshot of what the portfolio currently owns. For equity separate accounts, Investment Style Box data is based on a quarter lag and assigned by Prudential.

Morningstar Volatility Rank

The Morningstar Volatility Rank is an investment's 3-year standard deviation overall percentile rank within its US open-end, VA/L fund, or VA/L subaccount universe. The investment with the lowest standard deviation receives a rank of 1. We then classify investment portfolios as having one of three volatility levels relative to all types of mutual funds: Low, Moderate, and High. Investments with wider ranges of returns are labeled "high," as they are considered riskier than "low" volatility investments, which have had smaller ranges of returns.

Performance

The total return is shown for the quarter, year-to-date and preceding year, as well as the average annual total return for the past three, five, and 10 years if available. Since inception is also provided when applicable. To provide you with a point of comparison, the returns of the benchmark indexes are also provided.

Sector Allocation

Morningstar classifies each stock holding into 11 major industrial sectors for all Retail, Non-Qualified and Variable Annuity Fact sheets. The top five are listed on the Fund Fact Sheets. For Institutional Equity Sub-Advised Separate Accounts Source of Sector Classification: S&P/MSCI.

Description of PRIAC Separate Accounts

In addition to registered mutual funds and bank collective trust funds, PRIAC makes available an array of insurance company separate accounts ("Separate Account") from which the retirement plan's fiduciary can construct the investment lineup for your retirement plan. A PRIAC Separate Account is an insurance company separate account whose investors include only qualified retirement plans and certain governmental retirement plans. PRIAC makes most Separate Accounts

available as commingled investment vehicles; however, in certain instances, PRIAC may make a Separate Account available only to a single retirement plan client.

PRIAC offers a variety of different types of Separate Accounts through a group annuity contract issued by PRIAC. Each retirement plan's fiduciary is generally responsible for all investment decisions related to its plan and for selecting the investment options for the retirement plan's investment lineup. Each retirement plan's fiduciary is also responsible for monitoring and, if necessary, replacing the investment options on the retirement lineup. The following is a general description of the types of Separate Accounts offered by PRIAC.

A Custom Client Separate Account PRIAC provides investors with the information in this Fact Sheet to assist them in making investment decisions regarding the Fund. Investors must determine whether any other information is necessary in making those decisions. The investor is solely responsible for obtaining any other information required by the investor, which may not be available from PRIAC. To the extent PRIAC provides such information, PRIAC makes no warranty as to the accuracy of such information and makes no undertaking to continue to provide such information unless PRIAC agrees to continue to provide such information in writing. The investor is solely responsible for the decision to invest or continue to invest in the Fund. PRIAC assumes no responsibility for any investor's decision to invest or continue to invest in the Fund. Selection or termination of the Fund on a retirement plan's investment line-up is the sole responsibility of each retirement plan's fiduciary. These Separate Accounts are not part of the Manager of Manager's program.

Empower Separate Account - Empower provides investors with the information in this Fact Sheet to assist them in making investment decisions regarding the Fund. Investors must determine whether any other information is necessary in making those decisions. The investor is solely responsible for obtaining any other information required by the investor, which may not be available from Empower. To the extent Empower provides such information, Empower makes no warranty as to the accuracy of such information and makes no undertaking to continue to provide such information unless Empower agrees to continue to provide such information in writing. The investor is solely responsible for the decision to invest or continue to invest in the Fund. Empower assumes no responsibility for any investor's decision to invest or continue to invest in the Fund. Selection or termination of the Fund on a retirement plan's investment line-up is the sole responsibility of each retirement plan's fiduciary. These Separate Accounts are not part of the Manager of Manager's program.

ISelect Platform: Limitation of PRIAC's Responsibilities Institutional Select Separate Accounts. PRIAC provides investors with the information in this Fact Sheet to assist them in making investment decisions regarding the Fund. Investors must determine whether any other information is necessary in making those decisions. The investor is solely responsible for obtaining any other information required by the investor, which may not be available from PRIAC. The investor is solely responsible for the decision to invest or continue to invest in the Fund. PRIAC assumes no responsibility for any investor's decision to invest or continue to invest in the Fund. These Separate Accounts are not part of the Manager-of-Managers program and therefore, PRIAC does not assume any responsibility with respect to the selection, monitoring, or replacement of the investment manager. Selection or termination of the Fund on a retirement plan's investment line-up is the sole responsibility of each retirement plan's fiduciary.

PRIAC Manager-of-Managers Institutional Sub-Advised Separate Accounts - With respect to separate accounts designated as Institutional Sub-Advised Funds under the Manager-of-Managers Program, PRIAC acknowledges it is a fiduciary as defined by ERISA Section 3(38), as amended, for the selection, monitoring, and, if necessary, the replacement of the investment manager. Selection or termination of the fund on a retirement plan's investment line-up is the sole responsibility of each retirement plan's fiduciary.

PRIAC Manager-of-Managers Retail-Branded Sub-Advised Separate Accounts With respect to separate accounts designated as Retail-Branded Sub-Advised Funds under the Manager-of-Managers Program, PRIAC acknowledges it is a fiduciary as defined by ERISA Section 3(38), as amended, for the selection, monitoring, and if necessary, replacement of the investment manager. Selection or termination of the Fund on a retirement plan's investment line-up is the sole responsibility of each retirement plan's fiduciary.

PRIAC Separate Account Fund-of-Fund and Target Date Products: These separate accounts are manufactured by PRIAC and comprised of multiple underlying investment options. For fund-of-fund separate accounts for which PRIAC serves as an ERISA §3(38) investment manager, PRIAC is responsible for the selection, monitoring and replacement of underlying funds. This type of Separate Account offered by PRIAC is not part of the Manager of Manager's program, and therefore, unless otherwise noted, PRIAC does not assume any responsibility with respect to the selection, monitoring, or replacement of the investment manager.

Custom Plan Investment Options (Recordkeeping Constructs)

These investment options are designed and maintained by your plan sponsor and/or the plan's investment adviser and are not investment options offered by PRIAC. PRIAC provides investors with the information in this Fact Sheet to assist them in making investment decisions regarding the investment option. Investors must determine whether any other information is necessary in making those decisions. The investor is solely responsible for obtaining any other information required by the investor, which may not be available from PRIAC. The investor is solely responsible for the decision to invest or continue to invest in the investment option. PRIAC assumes no responsibility for any investor's decision to invest or continue to invest in the investment option. Selection or termination of the Fund on a retirement plan's investment line-up is the sole responsibility of each retirement plan's fiduciary. These investment options are not part of the Manager-of-Managers program.

Description of PICA Separate Accounts

The Prudential Insurance Company of America, Inc. (PICA) makes available group annuity insurance contracts such as variable annuities and insurance company separate accounts to institutional clients. Empower Annuity Insurance Company (EAIC) services as the administrator and reinsurer of many of these accounts. Each retirement plan's fiduciary is generally responsible for all investment decisions related to its plan and for selecting the investment options for the retirement plan's investment lineup. Each retirement plan's fiduciary is also responsible for monitoring and, if necessary, replacing the investment options on the retirement plan's investment lineup. **Note:** Empower Annuity Insurance Company of America and Empower Life & Annuity Insurance Company of New York (affiliates of EAIC) reinsure certain PICA separate accounts, as such, receive the economic benefits pertaining to these PICA accounts.

NO ACTION REQUIRED: FOR YOUR INFORMATION

Overview

On April 1, 2022, Empower Annuity Insurance Company of America (EAICA), formerly known as Great-West Life & Annuity Insurance Company, the parent company of Empower Retirement, LLC (Empower) acquired the full-service retirement business of Prudential Financial, Inc. In connection with the transaction, EAICA acquired all shares of the following entities, which are no longer affiliated with Prudential Financial, Inc.: Prudential Retirement Insurance and Annuity Company; Prudential Bank & Trust, FSB; Global Portfolio Strategies, Inc.; TBG Insurance Services Corporation; MC Insurance Agency Services, LLC; and Mullin TBG Insurance Agency Services, LLC. On October 3, 2022, Prudential Retirement Insurance and Annuity Company was renamed Empower Annuity Insurance Company. For additional information regarding the name changes, please see www.empower.com/name-change.

Empower is in the process of integrating the acquired full-service retirement business. Effective January 1, 2023, Global Portfolio Strategies, Inc. was merged into Empower Capital Management, LLC, an Empower affiliate. Effective March 31, 2023, Prudential Bank & Trust, FSB is merging into Empower Trust Company, LLC, an Empower affiliate, and all services performed by Prudential Bank & Trust, FSB will be assumed by Empower Trust Company, LLC.

Please use the following to determine if Empower is now the service provider for an account or product. If an individual has multiple accounts, they may be a customer of Prudential Financial, Inc. and its affiliates (together, Prudential) and Empower.

If an individual is an annuitant, contingent annuitant or other beneficiary under a group annuity contract issued or reinsured by Prudential's pension risk transfer business or a plan participant whose benefit is administered by Prudential's pension risk transfer business... How does an individual know if this applies?

- They were previously issued an annuity certificate from the Prudential Insurance Company of America in connection with their employer's defined benefit plan, OR they previously received a communication from their employer that Prudential has issued a guaranteed annuity covering all or a portion of their pension benefit or pays their pension benefit.
- Service Provider...The account remains with Prudential and was not impacted by the transaction. The "Important Disclosures Regarding the Empower Transaction" listed below **do not apply** to the account.

If an individual independently purchased an individual annuity, life insurance or investment product with Prudential... How does an individual know if this applies?

- They independently purchased a product from Prudential (other than a SmartSolution IRA) that is unrelated to an employer workplace plan.
- The product purchased is issued by The Prudential Insurance Company of America (PICA), Pruco Life Insurance Company, or Pruco Life Insurance Company of New Jersey.
- They purchased an investment product or service through Pruco Securities, LLC.
- Service Provider...The account remains with Prudential and was not impacted by the transaction. The "Important Disclosures Regarding the Empower Transaction" listed below **do not apply** to the account.

If an individual is a participant in the Prudential Employee Savings Plan (PESP); the Jennison Associates Savings Plan; the Assurance Savings Plan; the Prudential Supplemental Employee Savings Plan; the Prudential Financial, Inc. 2021 Omnibus Incentive Plan and the attendant Prudential Long-Term Incentive Program; the Prudential Financial, Inc. 2016 Deferred Compensation Plan for Non-Employee Directors; or the

PGIM, Inc. Omnibus Deferred Compensation Plan... How does an individual know if this applies?

- They receive statements and other notifications from Prudential in connection with one or more of these plans.
- Service Provider...Prudential remains the service provider for the plans. Empower is currently providing services as a sub-contractor for a transitional period. Please carefully review the "Important Disclosures Regarding the Empower Transaction" below that **apply to the account as applicable**.

If an individual is a participant in a retirement plan previously serviced by Prudential Retirement that may include defined benefit plans, nonqualified plans, defined contribution plans and 401(k) plans (including a plan that permits self-directed brokerage accounts), or is an account holder of a SmartSolution IRA, an Auto Roll IRA or an NFS Prudential Brokerage Account...This category includes certain Stable Value products on third party recordkeeping platforms where the service provider will transfer to Empower. These clients will be notified directly... How does an individual know if this applies?

- They receive a notification from Prudential Retirement notifying them that Empower will become the service provider for their account.
- They receive a welcome email or letter from Empower.
- Service Provider...Empower is now the service provider for the account. However, with respect to SmartSolution IRAs and certain Auto Roll IRAs, Prudential Investment Management Services LLC (PIMS) remains the broker-dealer for a transitional period. Please carefully review the "Important Disclosures Regarding the Empower Transaction" below that **apply**.

Important Disclosures Regarding the Empower Transaction

Effective April 1, 2022, the following will apply:

- All references to "Prudential Retirement" refer to Empower. Prudential Retirement is no longer a business unit of Prudential.
- Certain insurance products written by The Prudential Insurance Company of America were reinsured to EAICA and Empower Life & Annuity Insurance Company of New York (for New York business). Empower will become the administrator of this business acquired from Prudential.
- Empower refers to the products and services offered by EAICA and its subsidiaries, including Empower Retirement, LLC. Empower is not affiliated with Prudential or its affiliates.
- Full-service retirement sales personnel and certain service personnel are no longer registered representatives of Prudential Investment Management Services LLC (PIMS) and are registered representatives of Empower Financial Services, Inc., formerly known as GWFS Equities, Inc., For a transition period, certain back office and service personnel will remain registered representatives of PIMS.
- During a transition period, Prudential and, as applicable, its affiliates will continue to provide services to Empower. PIMS will continue to provide certain broker-dealer services under the terms of existing services agreements for certain plans and will continue to be the broker-dealer of record for existing SmartSolution IRAs and certain Auto Roll IRAs for a transition period.
- On or about May 1, 2023, the principal underwriter and distributor for certain legacy Prudential products will change from Prudential Investment Management Services LLC to Empower Financial Services, Inc, resulting from the sale of Prudential's retirement business to Empower. The change of principal underwriter and distributor will not impact the way these products operate. You can find further details if you wish in the prospectus to be released on or about May 1, 2023, to determine which principal underwriter and distributor supports the product you are invested in.
- Any documents pertaining to fraud or security commitments by Prudential Retirement are no longer applicable and are replaced with Empower's commitments as set forth at <https://participant.empower-retirement.com/participant/#/articles/securityGuarantee>.
- If Empower is the service provider for an account, Prudential's Privacy Statements and Privacy Notices are replaced with Empower's Privacy Notice as set forth at <https://www.empower-retirement.com/privacy> for the account.

Bloomberg Global Aggregate ex-USD Float Adjusted RIC Capped Index Global Aggregate ex-USD Float Adjusted RIC Capped Index ETFs gather total assets under management of \$16.20B. The average expense ratio is 0.09%.

Bloomberg Global Aggregate Index Bloomberg Global Aggregate Index provides a broad based measure of the international investment grade bond market. The index combines the U.S. Aggregate Index with dollar-denominated versions of the Pan-European Index and the Japanese, Canadian, Australian and New Zealand components of the Global Treasury Index.

Bloomberg Government 1-3 Year Index The index measures the performance of the U.S. Treasury and U.S. Agency Indices with maturities of 1-3 years, including Treasuries and U.S. agency debentures. It is a component of the U.S. Government/Credit Index and the U.S. Aggregate Index.

Bloomberg Government 1-5 Yr TR USD US Government 1-5 Year Unmanaged index that measures the performance of 1-5 year government bonds issued by the US Treasury.

Bloomberg Government Bond Index Measures the performance of the U.S. Treasury and U.S. Agency Indices, including Treasuries and U.S. agency debentures. It is a component of the U.S. Government/Credit Index and the U.S. Aggregate Index.

Bloomberg Government/Corporate 1 Yr Duration TR USD The index measures the performance of investment grade, U.S. denominated,

fixed-rate securities excluding STRIPS, TIPS and floaters. Its minimum index rating is A3 and the max maturity is 5 years.

Bloomberg Government-Long Term Index Measures the performance of the U.S. Treasury and U.S. Agency Indices with maturities of 10 years and greater, including Treasuries and U.S. agency debentures. It is a component of the U.S. Government/Credit Index and the U.S. Aggregate Index.

Bloomberg Mortgage-Backed Securities Index Measures the performance of the agency mortgage-backed pass-through securities (both fixed-rate and hybrid ARM) issued by Ginnie Mae (GNMA), Fannie Mae (FNMA), and Freddie Mac (FHLMC).

Bloomberg Municipal 20 Yr 17-22 Index Measures the performance of USD-denominated long-term tax exempt bond market with maturities of 20 years (17-22), including state and local general obligation bonds, revenue bonds, insured bonds, and pre-refunded bonds.

Bloomberg Municipal 3 Yr 2-4 Index Measures the performance of USD-denominated long-term tax exempt bond market with maturities of 3 years(2-4), including state and local general obligation bonds, revenue bonds, insured bonds, and pre-refunded bonds.

Bloomberg Municipal Bond Index The Municipal Managed Money Index is a rules-based, market-value-weighted tax-exempt bond market index.

Bloomberg Municipal California Exempt TR USD Measures the performance of USD-denominated long-term tax exempt bond market, including California bonds only.

Bloomberg Municipal Index Measures the performance of USD-denominated long-term tax exempt bond market, including state and local general obligation bonds, revenue bonds, insured bonds, and pre-refunded bonds.

Bloomberg Municipal New York Exempt TR Measures the performance of USD-denominated long-term tax exempt bond market, including New York bonds only.

Bloomberg Roll Select Commodity Index The Bloomberg Roll Select Commodity Index (BCOMRS or "Roll Select") is a dynamic version of the Bloomberg Commodity Index ("BCOM") that aims to mitigate the effects of contango market structure on index performance.

Bloomberg Treasury Long Term Index The index measures the performance of public obligations of the U.S. Treasury with maturities of 10 years and greater, including securities roll up to the U.S. Aggregate, U.S. Universal, and Global Aggregate Indices.

Bloomberg U.S. Aggregate Bond Index Measures the performance of investment grade, U.S. dollar-denominated, fixed-rate taxable bond market, including Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-through's), ABS, and CMBS. It rolls up into other Bloomberg flagship indices, such as the multi-currency Global Aggregate Index and the U.S. Universal Index, which includes high yield and emerging markets debt.

Bloomberg U.S. Aggregate Float Adjusted Index The Bloomberg US Aggregate Bond Index is a broad-based benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS and CMBS (agency and non-agency).

Bloomberg U.S. Credit Index Measures the performance of the US Corporate and a non-corporate component that includes foreign agencies, sovereigns, supranationals and local authorities. It is a subset of the US Government/Credit Index and the US Aggregate Index.

Bloomberg U.S. Gov./Credit Intermediate Index Measures the performance of the U.S. investment grade fixed rate bond market, with index components for Agencies, Financial Institutions, Industrial, Treasuries and Utility, with remaining time to maturity of 1-10 years. It's a custom index.

Bloomberg U.S. Gov/Credit Long Term Index The Bloomberg US Government/Credit Bond Index is a broad-based flagship benchmark that measures the non-securitized component of the US Aggregate Index. It includes investment grade, US dollar-denominated, fixed-rate Treasuries, government-related and corporate securities.

Bloomberg U.S. Gov/Credit Long Term Index Measures the performance of the US Corporate and a non-corporate component that includes foreign agencies, sovereigns, supranationals and local authorities with maturities of 10 years and greater. It is a subset of the US Government/Credit Index and the US Aggregate Index.

Bloomberg U.S. Government Bond Index Measures the performance of the U.S. Treasury and U.S. Agency Indices, including Treasuries and U.S. agency debentures. It is a component of the U.S. Government/Credit Index and the U.S. Aggregate Index.

Bloomberg U.S. Government/Credit 1-3 Year Index The index measures the performance of non-securitized component of the U.S. Aggregate Index with maturities of 1-3 years, including Treasuries, government-related issues and corporates. It is a subset of the U.S. Aggregate Index.

Bloomberg U.S. Government/Credit 1-5 Year Index Measures the performance of the non-securitized component of the U.S. Aggregate Index including treasuries, government-related issues and corporates with maturities of one to five years. It is a subset of the U.S. Aggregate Index.

Bloomberg U.S. High Yield 2% Issuer Cap Index Measures the performance of USD-denominated, non-investment grade, fixed-rate, taxable corporate bonds. It follows the same rules as the uncapped index but limits the exposure of each issuer to 2% of the total market value and redistributes any excess market value index-wide on a pro-rata basis.

Bloomberg U.S. Treasury Inflation Notes: 1-10 Year The index measures the performance of inflation-protected securities issued by the U.S. Treasury (TIPS).

Bloomberg U.S. Treasury Inflation-Protected Securities (TIPS) 0-5 Year Index The Bloomberg U.S. Treasury Inflation-Protected Securities (TIPS) 0-5 Year Index is a market-capitalization-weighted index that includes all inflation-protected public obligations issued by the U.S. Treasury with remaining maturities of less than five years.

Bloomberg U.S. Treasury Inflation-Protected Securities (TIPS) Index Measures the performance of rules-based, market value-weighted inflation-protected securities issued by the U.S. Treasury. It is a subset of the Global Inflation-Linked Index (Series-L).

Bloomberg U.S. Universal Index Measures the performance of USD-denominated, taxable bonds that are rated either investment grade or high-yield. It represents the union of the U.S. Aggregate Index, U.S. Corporate High Yield Index, Investment Grade 144A Index, Eurodollar

Index, U.S. Emerging Markets Index, and the non-ERISA eligible portion of the CMBS Index.

Bloomberg US 1-5 Year Credit Bond Index Includes investment-grade (rated Baa3 or above by Moody's) corporate and international dollar-denominated bonds with maturities of 1 to 5 years.

Bloomberg US Corporate Bond TR USD The Bloomberg US Corporate Bond Index measures the investment grade, fixed-rate, taxable corporate bond market. It includes USD-denominated securities publicly issued by US and non-US industrial, utility and financial issuers.

Bloomberg US Corporate High Yield Index Measures the performance of USD-denominated, non-investment grade, fixed-rate, taxable corporate bonds, including corporate bonds, fixed-rate bullet, puttable, and callable bonds, SEC Rule 144A securities, Original issue zeros, Pay-in-kind (PIK) bonds, Fixed-rate and fixed-to-floating capital securities.

Bloomberg US Government Treasury 1-3 Year Index The index measures the performance of the U.S. Treasury and U.S. Agency Indices with maturities of 1-3 years, including Treasuries and U.S. agency debentures. It is a component of the U.S. Government/Credit Index and the U.S. Aggregate Index.

Bloomberg US Treasury Inflation Notes TR Index Value The Index measures the performance of the U.S. treasury inflation-linked bond market. Securities must be rated investment grade as defined by the Index methodology. The principal and the interest of all constituent bonds must be inflation-linked and denominated in U.S. Dollars. Nominal U.S. Treasury bonds, floating rate bonds and STRIPS are excluded.

BofAML All Convertible All Qualities BofAML All Convertible All Qualities measures the performance of convertible bonds.

BofAML Preferred Stock Fixed Rate TR USD BofAML Preferred Stock Fixed Rate TR USD measures the performance of preferred stock securities.

Capital Growth Asset Allocation Index The custom benchmark reflects Bloomberg Aggregate Bond Index 25%, MSCI EAFE 15%, Russell 3000 Index 60%.

CBOE S&P 500 BuyWrite BXM The CBOE S&P 500 BuyWrite Index (ticker symbol BXM) is a benchmark index designed to show the hypothetical performance of a portfolio that engages in a buy-write strategy using S&P 500 index call options.

Credit Suisse Equity Market Neutral USD The Credit Suisse Equity Market Neutral Hedge Fund Index is a subset of the Credit Suisse Hedge Fund IndexSM that measures the aggregate performance of dedicated short bias funds. Equity market neutral funds typically take both long and short positions in stocks while seeking to reduce exposure to the systematic risk of the market (i.e., a beta of zero is desired). Equity market neutral funds typically seek to exploit investment opportunities unique to a specific group of stocks, while maintaining a neutral exposure to broad groups of stocks defined for example by sector, industry, market capitalization, country, or region. The index has a number of subsectors including statistical arbitrage, quantitative long/short, fundamental long/short and index arbitrage. Managers often apply leverage to enhance returns.

Credit Suisse Leveraged Loan USD This index tracks the investable market of the U.S. dollar denominated leveraged loan market. It consists of issues rated "5B" or lower, meaning that the highest rated issues included in this index are Moody's/S&P ratings of Baa1/BB+ or Ba1/BBB+. All loans are funded term loans with a tenor of at least one year and

are made by issuers domiciled in developed countries.

Credit Suisse Managed Futures USD The index measures the performance of market trends across a range of asset classes, including: Equities, Fixed Income, Commodities and Currencies. It has demonstrated positive expected returns during upward trending markets and the ability to hedge against some negative tail risk events, potentially making it a less expensive but effective hedge over the long term. The index is asset-weighted.

CRSP U.S. Large Cap Index The CRSP US Large Cap Index includes U.S. companies that comprise the top 85 percent of investable market capitalization and are traded on NYSE, NYSE American, NYSE ARCA, NASDAQ, Bats Global Markets, and the Investors Exchange.

CRSP U.S. Large Cap Value Index The CRSP U.S. Value Style Indexes are part of CRSP's investable index family. Once securities are assigned to a size-based market cap index, they are made eligible for assignment to a value or growth index using CRSP's multifactor model. CRSP classifies value securities using the following factors: book to price, forward earnings to price, historical earnings to price, dividend-to-price ratio and sales-to-price ratio.

CRSP U.S. Mega Cap Index The CRSP U.S. Mega Cap Index includes the largest U.S. companies, with a target of including the top 70 percent of investable market capitalization. The index includes securities traded on NYSE, NYSE American, NYSE ARCA, NASDAQ, Bats Global Markets, and the Investors Exchange.

CRSP U.S. Mid Cap Index The CRSP U.S. Mid Cap Index targets inclusion of the U.S. companies that fall between the 70-85 percent of investable market capitalization. The index includes securities traded on NYSE, NYSE American, NYSE ARCA, NASDAQ, Bats Global Markets, and the Investors Exchange.

CRSP U.S. Total Market Index Nearly 4,000 constituents across mega, large, small and micro capitalizations, representing nearly 100% of the U.S. investable equity market, comprise the CRSP US Total Market Index.

CRSP US Mid Cap Growth Index CRSP classifies growth securities using the following factors, future long-term growth in earning per share (EPS), future short-term growth in EPS, 3-year historical growth in EPS, 3 -year historical growth in sales per share, current investment-to-assets ratio and return on assets.

DJ Brookfield Global Infra TR USD The Dow Jones Brookfield Global Infrastructure Composite Index is designed to measure the performance of pure-play infrastructure companies domiciled globally. The index covers all sectors of the infrastructure market and includes Master Limited Partnerships (MLPs) in addition to other equity securities.

Dow Jones U.S. Completion Total Stock Market Index The Dow Jones U.S. Completion Total Stock Market Index is a subindex of the Dow Jones U.S. Total Stock Market Index that excludes components of the S&P 500®.

Dow Jones U.S. Total Stock Market Index The index measures the performance of all US equity securities with readily available prices. It represents the top 95% of the US stock market based on market capitalisation. The index is float-adjusted market capitalisation weighted.

FTSE 4Good US Select Index The FTSE4Good US Select Index is a socially responsible investment (SRI) index of US stocks that excludes companies with certain business activities such as weapons, tobacco, gambling, alcohol, nuclear power, and adult entertainment. Additionally,

in order to be included companies must meet a series of stringent environmental and social criteria in areas including environmental management, labor rights, human rights, health and safety, and diversity.

FTSE Developed Markets Ex North America Index The FTSE Developed Markets Ex North America Index comprises Large and Mid cap stocks providing coverage of Developed markets, excluding the US and Canada.

FTSE Global All Cap ex US Index The FTSE Global All Cap ex US Index is a free-float, market-capitalization weighted index representing the performance of around 5350 large, mid and small cap companies in 46 developed and emerging markets worldwide, excluding the USA.

FTSE Gold Mines PR USD The FTSE Gold Mines Index encompasses all gold mining companies that have a sustainable, attributable gold production of at least 300,000 ounces a year and that derive 51% or more of their revenue from mined gold. 5-Year Performance - Capital Return

FTSE Three Month T-Bill Measures the performance of the last three three-month Treasury bill month-end rates.

FTSE WGBI NonUSD USD The index measures the performance of fixed-rate, local currency, investment-grade sovereign bonds of all WGBI countries except the United States and is stated in US dollar terms. It is a subset of Citigroup World Government Bond Index (WGBI).

HFRI RV: Multi-Strategy Index Multi-Strategies employ an investment thesis predicated on realization of a spread between related yield instruments in which one or multiple components of the spread contains a fixed income, derivative, equity, real estate, MLP or combination of these or other instruments. Strategies are typically quantitatively driven to measure the existing relationship between instruments and, in some cases, identify attractive positions in which the risk adjusted spread between these instruments represents an attractive opportunity for the investment manager. In many cases these strategies may exist as distinct strategies across which a vehicle which allocates directly, or may exist as related strategies over which a single individual or decision making process manages. Multi-strategy is not intended to provide broadest-based mass market investors appeal, but are most frequently distinguished from others arbitrage strategies in that they expect to maintain >30% of portfolio exposure in 2 or more strategies meaningfully distinct from each other that are expected to respond to diverse market influences.

ICE BofA 3 Month U.S. Treasury Bill Index The ICE BofA 3 Month U.S. Treasury Index measures the performance of a single issue of outstanding treasury bill which matures closest to, but not beyond, three months from the rebalancing date. The issue is purchased at the beginning of the month and held for a full month; at the end of the month that issue is sold and rolled into a newly selected issue.

ICE BofAML Fixed Rate Preferred Securities The Index is designed to replicate the total return of a diversified group of investment-grade preferred securities.

ICE BofAML US Convnt Bonds The ICE BofAML U.S. Corporate, Government and Mortgage Index is a broad-based measure of the total rate of return performance of the U.S. investment grade bond markets.

ICE BofAML US Dollar 3-Month Deposit Offered Rate Constant Maturity Is a subset of The Bank of America Merrill Lynch 0-1 Year US Treasury Index including all securities with a remaining term to final maturity less than 3 months.

ICE BofAML US High Yield ICE BofAML US High Yield Index tracks the performance of US dollar denominated below investment grade corporate debt publicly issued in the US domestic market. Qualifying securities must have a below investment grade rating (based on an average of Moody's, S&P and Fitch), at least 18 months to final maturity at the time of issuance, at least one year remaining term to final maturity as of the rebalancing date, a fixed coupon schedule and a minimum amount outstanding of \$250 million. In addition, qualifying securities must have risk exposure to countries that are members of the FX-G10, Western Europe or territories of the US and Western Europe. The FX-G10 includes all Euro members, the US, Japan, the UK, Canada, Australia, New Zealand, Switzerland, Norway and Sweden.

iMoneyNet Taxable Money Funds - Net Includes all taxable retail and institutional money funds. Consists of funds in the Treasury Retail, Treasury Institutional, Treasury & Repo Retail, Treasury & Repo Institutional, Government & Agency Retail, Government & Agency Institutional, First Tier Retail, First Tier Institutional, Second Tier Retail, and Second Tier Institutional categories.

IncomeFlex Aggressive Fund Benchmark IncomeFlex Aggressive Fund Benchmark: Each IncomeFlex Fund's composite benchmark reflects the weighted average of the Fund's stock/international stock/bond allocation, as represented by the Russell 3000 Index, the MSCI ACWI ex US Index, and the Bloomberg US Aggregate Bond Index, respectively.

IncomeFlex Conservative Fund Benchmark IncomeFlex Conservative Fund Primary Benchmark: Each IncomeFlex Fund's composite benchmark reflects the weighted average of the Fund's stock/international stock/bond/cash allocation, as represented by the Bloomberg US Aggregate Bond Index, the Russell 3000 Index, and the MSCI ACWI ex US Index, respectively.

IncomeFlex Moderate Fund Benchmark IncomeFlex Moderate Fund Primary Benchmark: Each IncomeFlex Fund's composite benchmark reflects the weighted average of the Fund's stock/international stock/bond allocation, as represented by the Bloomberg US Aggregate Bond Index, the Russell 3000 Index, and the MSCI ACWI ex US Index, respectively.

JP Morgan Emerging Market Bonds Plus Measures the performance of fix-rate for external-currency denominated debt instruments including Brady bonds, loans, Eurobonds in emerging markets. Countries covered are Argentina, Brazil, Bulgaria, Mexico, Morocco, Nigeria, the Philippines, Poland, Russia, and South Africa. It covers more of the eligible instruments than the EMBI+ by relaxing somewhat the strict EMBI+ limits on secondary market trading liquidity.

JPM EMBI Global TR USD The index measures the performance of fix-rate for external-currency denominated debt instruments including Brady bonds, loans, Eurobonds in emerging markets. Countries covered are Argentina, Brazil, Bulgaria, Mexico, Morocco, Nigeria, the Philippines, Poland, Russia, and South Africa. It covers more of the eligible instruments than the EMBI+ by relaxing somewhat the strict EMBI+ limits on secondary market trading liquidity.

JPMorgan Govt Bond Index exUS (\$Hgd) The index measures the performance of fixed rate issuances for local debt instruments from high-income countries spanning Europe, North America and Asia-Pacific regions. It is a sub-set of GBI Global index excluding bond from U.S. The developed markets index lineup has a long track record since the launch of the GBI Global in 1989 and has grown to include indices covering the Eurozone and Cash Deposit Rates.

Lifetime Aggressive Growth Primary Benchmark Each Lifetime Fund's

composite benchmark reflects the weighted average of the Fund's stock/international stock/bond allocation, as represented by the Russell 3000 Index, the MSCI EAFE Index and the Bloomberg US Aggregate Bond Index, respectively.

Lifetime Balanced Primary Benchmark Each Lifetime Fund's composite benchmark reflects the weighted average of the Fund's stock/international stock/bond allocation, as represented by the Russell 3000 Index, the MSCI EAFE Index and the Bloomberg US Aggregate Bond Index, respectively.

Lifetime Conservative Growth Primary Benchmark Each Lifetime Fund's composite benchmark reflects the weighted average of the Fund's stock/international stock/bond allocation, as represented by the Russell 3000 Index, the MSCI EAFE Index and the Bloomberg US Aggregate Bond Index, respectively.

Lifetime Growth Primary Benchmark Each Lifetime Fund's composite benchmark reflects the weighted average of the Fund's stock/international stock/bond allocation, as represented by the Russell 3000 Index, the MSCI EAFE Index and the Bloomberg US Aggregate Bond Index, respectively.

Lifetime Income & Equity Primary Benchmark Each Lifetime Fund's composite benchmark reflects the weighted average of the Fund's stock/international stock/bond/cash allocation, as represented by the Russell 3000 Index, the MSCI EAFE Index, the Bloomberg US Aggregate Bond Index and the Citigroup 3-Month T-Bill Index, respectively.

Lipper International Fund Index The Lipper International Fund Index measures the performance of the 30 largest mutual funds in the international equity fund objective, as determined by Lipper, Inc. The Morningstar category average represents a universe of funds with similar objectives

Morningstar Aggressive Target Risk TR USD The Morningstar Target Risk Index family is designed to meet the needs of investors who would like to maintain a target level of equity exposure through a portfolio diversified across equities, bonds and inflation-hedged instruments. The Morningstar Aggressive Target Risk Index seeks approximately 95% exposure to global equity markets. This Index does not incorporate Environmental, Social, or Governance (ESG) criteria.

Morningstar Conservative Target Risk TR USD The Morningstar Target Risk Index family is designed to meet the needs of investors who would like to maintain a target level of equity exposure through a portfolio diversified across equities, bonds and inflation-hedged instruments. The Morningstar Conservative Target Risk Index seeks approximately 20% exposure to global equity markets. This Index does not incorporate Environmental, Social, or Governance (ESG) criteria.

Morningstar Global Allocation TR USD The index measures the performance of a multi-asset class portfolio of global equities, global bonds and cash. The Morningstar Moderately Conservative Target Risk Index seeks approximately 40% exposure to global equity markets. This Index does not incorporate Environmental, Social, or Governance (ESG) criteria.

Morningstar Technology Sector Index Measures the performance of companies engaged in the design, development, and support of

computer operating systems and applications. This sector also includes companies that provide computer technology consulting services. Also includes companies engaged in the manufacturing of computer equipment, data storage products, networking products, semiconductors, and components.

Morningstar US Market The index measures the performance of US securities and targets 97% market capitalization coverage of the investable universe. It is a diversified broad market index.

MSCI AC Asia Ex Japan NR USD The MSCI AC Asia ex Japan Index captures large and mid cap representation across 2 of 3 Developed Markets (DM) countries* (excluding Japan) and 9 Emerging Markets (EM) countries* in Asia. With 953 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country.

MSCI AC Far East Ex Japan NR USD The MSCI AC Far East ex Japan Index captures large and mid cap representation across 2 Developed Markets countries (excluding Japan) and 7 Emerging Markets countries in the Far East*. With 863 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country.

MSCI ACWI ex US Growth NR USD The MSCI ACWI ex USA Growth Index captures large and mid cap securities exhibiting overall growth style characteristics across 22 Developed Markets (DM) countries and 26 Emerging Markets (EM) countries*. The growth investment style characteristics for index construction are defined using five variables: long-term forward EPS growth rate, short-term forward EPS growth rate, current internal growth rate and long-term historical EPS growth trend and long-term historical sales per share growth trend.

MSCI ACWI ex US Value NR USD The MSCI ACWI ex USA Value Index captures large and mid cap securities exhibiting overall value style characteristics across 22 Developed and 26 Emerging Markets countries*. The value investment style characteristics for index construction are defined using three variables: book value to price, 12-month forward earnings to price and dividend yield.

MSCI ACWI Ex USA Value Index Measures the performance of the value large and mid cap segments of the particular regions, excluding USA equity securities, including developed and emerging market. It is free float-adjusted market-capitalization weighted.

MSCI ACWI Index Captures large and mid cap representation across 23 Developed Markets (DM) and 24 Emerging Markets (EM) countries. With 2,499 constituents, the index covers approximately 85% of the global investable equity opportunity set.

MSCI ACWI Large Cap NR USD The MSCI ACWI Large Cap Index captures large cap representation across 23 Developed Markets (DM) and 24 Emerging Markets (EM) countries*. With 1,487 constituents, the index covers about 70% of the free float-adjusted market capitalization in each country.

MSCI ACWI SMID NR USD The MSCI ACWI SMID Cap Index captures mid and small cap representation across 23 Developed Markets (DM) and 24 Emerging Markets (EM) countries*. With 7,329 constituents, the index covers approximately 28% of the free float-adjusted market capitalization in each country.

MSCI All Country Asia Pacific Cmp The index measures the performance of the large and mid cap segments of the Asia Pacific region equity securities, including developed and emerging market. It is free float-adjusted market-capitalization weighted.

MSCI All Country World Ex United States Net Index The MSCI ACWI ex USA Index captures large and mid cap representation across 22 of 23 Developed Markets (DM) countries (excluding the US) and 24 Emerging Markets (EM) countries*. With 1,863 constituents, the index covers approximately 85% of the global equity opportunity set outside the US.

MSCI All Country World Ex US Investable Market Index The MSCI ACWI ex USA Investable Market Index (IMI) captures large, mid and small cap representation across 22 of 23 Developed Markets countries (excluding the United States) and 24 Emerging Markets countries. With 6,435 constituents, the index covers approximately 99% of the global equity opportunity set outside the US.

MSCI All Country World Ex. U.S. Index Measures the performance of the large and mid cap segments of the particular regions, excluding USA equity securities, including developed and emerging market. It is free float-adjusted market-capitalization weighted.

MSCI All Country World Index (net) The MSCI ACWI captures large and mid cap representation across 23 Developed Markets (DM) and 24 Emerging Markets (EM) countries.

MSCI China NR USD The MSCI China Index captures large and mid cap representation across China H shares, B shares, Red chips, P chips and foreign listings (e.g. ADRs). With 461 constituents, the index covers about 85% of this China equity universe. Currently, the index also includes Large Cap A shares represented at 5% of their free float adjusted market capitalization.

MSCI EAFE (net) The MSCI EAFE Index is designed to represent the performance of large and mid-cap securities across 21 developed markets, including countries in Europe, Australasia and the Far East, excluding the U.S. and Canada. The Index is available for a number of regions, market segments/sizes and covers approximately 85% of the free float-adjusted market capitalization in each of the 21 countries.

MSCI EAFE Growth (net) The MSCI EAFE Growth Index captures large and mid cap securities exhibiting overall growth style characteristics across Developed Markets countries around the world, excluding the US and Canada

MSCI EAFE Value Index (net) The index measures the performance of the value large and mid cap segments of developed markets, excluding the US & Canada equity securities. It is free float-adjusted market-capitalization weighted.

MSCI EM (Emerging Markets) Latin America Index Measures the performance of the large and mid cap segments of emerging Latin America equity securities. It is free float-adjusted market-capitalization weighted.

MSCI Emerging Markets IMI Index The MSCI Emerging Markets Investable Market Index (IMI) captures large, mid and small cap representation across 26 Emerging Markets (EM) countries*. With 2,829 constituents, the index covers approximately 99% of the free float-adjusted market capitalization in each country

MSCI Emerging Markets Index Measures the performance of the large and mid cap segments of emerging market equity securities. It is free float-adjusted market-capitalization weighted.

MSCI Emerging Markets Net Dividend Index Measures the performance of the large and mid cap segments of emerging market equity securities. It is free float-adjusted market-capitalization weighted.

MSCI Europe Net Dividend Index Represents the performance of large and mid-cap equities across 15 developed countries in Europe. The Index has a number of sub-Indexes which cover various sub-regions market segments/sizes, sectors and covers approximately 85% of the free float-adjusted market capitalization in each country.

MSCI India NR USD The MSCI India Index is designed to measure the performance of the large and mid cap segments of the Indian market. With 79 constituents, the index covers approximately 85% of the Indian equity universe.

MSCI Japan Index Measures the performance of the large and mid cap segments of Japan equity securities. It is free float-adjusted market-capitalization weighted.

MSCI Japan Net Dividend Index MSCI Japan Index measures the performance of the large and mid cap segments of Japan equity securities. It is free float-adjusted market-capitalization weighted.

MSCI Pacific Index Captures large and mid cap representation across 5 Developed Markets (DM) countries in the Pacific region. With 471 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country.

MSCI US REIT Index Measures the performance of the large, mid and small cap segments of the US equity securities. It is comprised of Equity REITs securities and based on the MSCI USA Investable Market Index, with the exception of Mortgage REIT and selected Specialized REITs. The index represents approximately most of the US REIT universe and securities are classified in the REIT sector according to the Global Industry Classification Standard. It is a free float market capitalization weighted index.

MSCI World Ex USA SMID NR USD The MSCI World ex USA SMID Cap Index captures mid and small cap representation across 22 of 23 Developed Market (DM) countries*. With 3,117 constituents, the index covers approximately 28% of the free float-adjusted market capitalization in each country.

MSCI World Growth (net) Measures the performance of the growth large and mid cap segments of world equity securities. It is free float-adjusted market-capitalization weighted.

MSCI World Index Captures large and mid cap representation across 23 Developed Markets (DM) countries. With 1,653 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country.

MSCI World Index (net) Is a broad global equity benchmark that represents large and mid-cap equity performance across 23 developed markets countries. It covers approximately 85% of the free float-adjusted market capitalization in each country and MSCI World benchmark does not offer exposure to emerging markets.

MSCI World Metals & Mining Index The MSCI World Metals and Mining Index is composed of large and mid cap stocks across 23 Developed Markets (DM) countries*. All securities in the index are classified in the Metals & Mining industry (within the Materials sector) according to the Global Industry Classification Standard (GICS®).

MSCI World Value Index (net) Measures the performance of the value large and mid cap segments of world equity securities.

Multi-Asset Inflation Index The custom benchmark reflects Bloomberg Commodity Index (25%), Bloomberg U.S. Treasury Inflation Notes: 1-10 Year (25%) and MSCI ACW Commodity Producers Index (50%).

NASDAQ Composite Total Return Includes all domestic and international based common type stocks listed on The NASDAQ Stock Market. The NASDAQ Composite Index is a broad based Index.

PESP IncomeFlex Target Balanced The custom benchmark reflects Bloomberg Aggregate Bond Index (40%), MSCI ACWI ex USA Index (15%) and Russell 3000 Index (45%).

PGIM Retirement Real Estate Fund Benchmark For periods prior to and including September 30, 2012, the benchmark for this composite was comprised of the NCREIF Open-End Diversified Core Equity Fund Index (NFI-ODCE), the S&P Developed Property Index and the Citigroup U.S. Domestic Three Month Treasury Bill Total Return Index re-weighted on a monthly basis to correspond to the Fund's investment allocation. In order to better align the benchmark with the composite's strategic allocations, for periods October 1, 2012 to April 1, 2018, the benchmark for this composite was comprised of 75% NCREIF Open-End Diversified Core Equity Fund Index and 25% S&P Developed Property Index. PRREF's custom benchmark was changed when the fund transitioned their US REIT component from global real estate securities to a US-only REIT ETF (Vanguard's VNQ) on April 1, 2018. At that time VNQ, the new ETF, was in the process of changing their benchmark, so for a short period, there was a transition index used as a component of PRREF's custom benchmark. Subsequently, from April 1, 2018 through July 31, 2018, PRREF's benchmark was comprised of 75% of the NCREIF Open-End Diversified Core Equity Fund Index (ODCE), and 25% MSCI US Investable Market Real Estate 25/50 Transition Index. Effective August 1, 2018, PRREF's benchmark is comprised of 75% of the NCREIF Open-End Diversified Core Equity Fund Index (ODCE), and 25% MSCI US Investable Market Real Estate 25/50 Index. The MSCI US Investable Market Real Estate 25/50 Index is a free float-adjusted market capitalization weighted index that is comprised of Equity REIT securities. The MSCI US Investable Market Real Estate 25/50 Index is based on the MSCI USA Investable Market Index (IMI) ("the parent index"), which is comprised of all the securities included in the MSCI USA Large Cap, MSCI USA Mid Cap and MSCI USA Small Cap Indices. Note: The ODCE index is not professionally managed, does not have a defined investment objective, and does not incur fees or expenses. Investors cannot invest directly in the index.

Preservation Asset Allocation Index The custom benchmark reflects Bloomberg Aggregate Bond Index 65%, MSCI EAFE 7%, Russell 3000 Index 28%.

Pru Day One IncomeFlex Target 2015 Benchmark The custom benchmark reflects the normal weighted average of the respective Day One Fund's stock/non-traditional assets/bond/cash allocation, as represented by the S&P 1500 Composite Index, the Russell Developed ex North America Large Cap Index, the MSCI Emerging Markets Net Dividend Index, the Bloomberg Commodities Index, the PGIM Retirement Real Estate Fund Benchmark, the Bloomberg US Treasury: US TIPS Index, the Bloomberg US Aggregate Bond Index and the FTSE Three Month T-Bill. Effective January 1, 2013, the International asset class is represented in the mandate benchmark by the Russell Developed ex North America Large Cap Index, replacing the MSCI EAFE Net Dividend Index. Because the asset allocation of each Fund changes over time, the custom benchmark allocations also change over time. Effective close of business December 31, 2018, Russell discontinued the Russell Developed Ex-North America Large Cap Net Index. Therefore, also effective on December 31, 2018, the FTSE Developed Markets Ex-North America Index (FTSE Index) replaced the Russell Developed Ex-North America Large Cap Net Index as the primary performance benchmark for the Day One Funds' underlying PGIM Quant Solutions International Developed Markets Index Fund and a component of the custom benchmark with respect to each Prudential Day One Fund. The FTSE Index performance will be reflected in the

performance of the Day One Funds' custom benchmark index on a go-forward basis only; the custom benchmark's performance history will not be re-stated.

Pru Day One IncomeFlex Target 2020 Benchmark The custom benchmark reflects the normal weighted average of the respective Day One Fund's stock/non-traditional assets/bond/cash allocation, as represented by the S&P 1500 Composite Index, the Russell Developed ex North America Large Cap Index, the MSCI Emerging Markets Net Dividend Index, the Bloomberg Commodities Index, the PGIM Retirement Real Estate Fund Benchmark, the Bloomberg US Treasury: US TIPS Index, the Bloomberg US Aggregate Bond Index and the FTSE Three Month T-Bill. Effective January 1, 2013, the International asset class is represented in the mandate benchmark by the Russell Developed ex North America Large Cap Index, replacing the MSCI EAFE Net Dividend Index. Because the asset allocation of each Fund changes over time, the custom benchmark allocations also change over time. Effective close of business December 31, 2018, Russell discontinued the Russell Developed Ex-North America Large Cap Net Index. Therefore, also effective on December 31, 2018, the FTSE Developed Markets Ex-North America Index (FTSE Index) replaced the Russell Developed Ex-North America Large Cap Net Index as the primary performance benchmark for the Day One Funds' underlying PGIM Quant Solutions International Developed Markets Index Fund and a component of the custom benchmark with respect to each Prudential Day One Fund. The FTSE Index performance will be reflected in the performance of the Day One Funds' custom benchmark index on a go-forward basis only; the custom benchmark's performance history will not be re-stated.

Pru Day One IncomeFlex Target 2025 Benchmark The custom benchmark reflects the normal weighted average of the respective Day One Fund's stock/non-traditional assets/bond/cash allocation, as represented by the S&P 1500 Composite Index, the Russell Developed ex North America Large Cap Index, the MSCI Emerging Markets Net Dividend Index, the Bloomberg Commodities Index, the PGIM Retirement Real Estate Fund Benchmark, the Bloomberg US Treasury: US TIPS Index, the Bloomberg US Aggregate Bond Index and the FTSE Three Month T-Bill. Effective January 1, 2013, the International asset class is represented in the mandate benchmark by the Russell Developed ex North America Large Cap Index, replacing the MSCI EAFE Net Dividend Index. Because the asset allocation of each Fund changes over time, the custom benchmark allocations also change over time. Effective close of business December 31, 2018, Russell discontinued the Russell Developed Ex-North America Large Cap Net Index. Therefore, also effective on December 31, 2018, the FTSE Developed Markets Ex-North America Index (FTSE Index) replaced the Russell Developed Ex-North America Large Cap Net Index as the primary performance benchmark for the Day One Funds' underlying PGIM Quant Solutions International Developed Markets Index Fund and a component of the custom benchmark with respect to each Prudential Day One Fund. The FTSE Index performance will be reflected in the performance of the Day One Funds' custom benchmark index on a go-forward basis only; the custom benchmark's performance history will not be re-stated.

Pru Day One IncomeFlex Target 2030 Benchmark The custom benchmark reflects the normal weighted average of the respective Day One Fund's stock/non-traditional assets/bond/cash allocation, as represented by the S&P 1500 Composite Index, the Russell Developed ex North America Large Cap Index, the MSCI Emerging Markets Net Dividend Index, the Bloomberg Commodities Index, the PGIM Retirement Real Estate Fund Benchmark, the Bloomberg US Treasury: US TIPS Index, the Bloomberg US Aggregate Bond Index and the FTSE Three Month T-Bill. Effective January 1, 2013, the International asset class is represented in the mandate benchmark by the Russell

Developed ex North America Large Cap Index, replacing the MSCI EAFE Net Dividend Index. Because the asset allocation of each Fund changes over time, the custom benchmark allocations also change over time. Effective close of business December 31, 2018, Russell discontinued the Russell Developed Ex-North America Large Cap Net Index. Therefore, also effective on December 31, 2018, the FTSE Developed Markets Ex-North America Index (FTSE Index) replaced the Russell Developed Ex-North America Large Cap Net Index as the primary performance benchmark for the Day One Funds' underlying PGIM Quant Solutions International Developed Markets Index Fund and a component of the custom benchmark with respect to each Prudential Day One Fund. The FTSE Index performance will be reflected in the performance of the Day One Funds' custom benchmark index on a go-forward basis only; the custom benchmark's performance history will not be re-stated.

Because the asset allocation of each Fund changes over time, the custom benchmark allocations also change over time. Effective close of business December 31, 2018, Russell discontinued the Russell Developed Ex-North America Large Cap Net Index. Therefore, also effective on December 31, 2018, the FTSE Developed Markets Ex-North America Index (FTSE Index) replaced the Russell Developed Ex-North America Large Cap Net Index as the primary performance benchmark for the Day One Funds' underlying PGIM Quant Solutions International Developed Markets Index Fund and a component of the custom benchmark with respect to each Prudential Day One Fund. The FTSE Index performance will be reflected in the performance of the Day One Funds' custom benchmark index on a go-forward basis only; the custom benchmark's performance history will not be re-stated.

Prudential Day One 2035 Benchmark The custom benchmark reflects the normal weighted average of the respective Day One Fund's stock/non-traditional assets/bond/cash allocation, as represented by the S&P 1500 Composite Index, the Russell Developed ex North America

Large Cap Index, the MSCI Emerging Markets Net Dividend Index, the Bloomberg Commodities Index, the PGIM Retirement Real Estate Fund Benchmark, the Bloomberg US Treasury: US TIPS Index, the Bloomberg US Aggregate Bond Index and the FTSE Three Month T-Bill. Effective January 1, 2013, the International asset class is represented in the mandate benchmark by the Russell Developed ex North America Large Cap Index, replacing the MSCI EAFE Net Dividend Index. Because the asset allocation of each Fund changes over time, the custom benchmark allocations also change over time. Effective close of business December 31, 2018, Russell discontinued the Russell Developed Ex-North America Large Cap Net Index. Therefore, also effective on December 31, 2018, the FTSE Developed Markets Ex-North America Index (FTSE Index) replaced the Russell Developed Ex-North America Large Cap Net Index as the primary performance benchmark for the Day One Funds' underlying PGIM Quant Solutions International Developed Markets Index Fund and a component of the custom benchmark with respect to each Prudential Day One Fund. The FTSE Index performance will be reflected in the performance of the Day One Funds' custom benchmark index on a go-forward basis only; the custom benchmark's performance history will not be re-stated.

Prudential Day One 2040 Benchmark The custom benchmark reflects the normal weighted average of the respective Day One Fund's stock/non-traditional assets/bond/cash allocation, as represented by the S&P 1500 Composite Index, the Russell Developed ex North America Large Cap Index, the MSCI Emerging Markets Net Dividend Index, the Bloomberg Commodities Index, the PGIM Retirement Real Estate Fund Benchmark, the Bloomberg US Treasury: US TIPS Index, the Bloomberg US Aggregate Bond Index and the FTSE Three Month T-Bill. Effective January 1, 2013, the International asset class is represented in the mandate benchmark by the Russell Developed ex North America Large Cap Index, replacing the MSCI EAFE Net Dividend Index. Because the asset allocation of each Fund changes over time, the custom benchmark allocations also change over time. Effective close of business December 31, 2018, Russell discontinued the Russell Developed Ex-North America Large Cap Net Index. Therefore, also effective on December 31, 2018, the FTSE Developed Markets Ex-North America Index (FTSE Index) replaced the Russell Developed Ex-North America Large Cap Net Index as the primary performance benchmark for the Day One Funds' underlying PGIM Quant Solutions International Developed Markets Index Fund and a component of the custom benchmark with respect to each Prudential Day One Fund. Russell 1000 Value Index Measures the performance of the large-cap value segment of the US equity securities. It includes the Russell 1000 index companies with lower price-to-book ratios and lower expected growth values. It is market-capitalization weighted.

Russell 1000@ Growth Index Measures the performance of the large-cap growth segment of the US equity securities. It includes the Russell 1000 index companies with higher price-to-book ratios and higher forecasted growth values. It is market-capitalization weighted.

Russell 2000 Growth Index Measures the performance of small-cap growth segment of the US equity universe. It includes those Russell 2000 companies with higher price/book ratios and higher predicted and forecasted growth values. It is market-capitalization weighted.

Russell 2000@ Index Measures the performance of the small-cap segment of the US equity universe. It is a subset of the Russell 3000

Index and it represents approximately 8% of the US market. It includes approximately 2,000 of the smallest securities based on a combination of their market cap and current index membership.

Russell 2000® Value Index Measures the performance of small-cap value segment of the US equity universe. It includes those Russell 2000 companies with lower price-to-book ratios and lower expected and historical growth values.

Russell 2500 Growth Index Measures the performance of the small to mid-cap growth segment of the US equity universe. It includes Russell 2500 index companies with higher price-to-book ratios and higher forecasted growth values. It is market-capitalization weighted.

Russell 2500® Index Measures the performance of the small to mid-cap segment of the US equity universe, commonly referred to as mid cap. It is a subset of the Russell 3000 index. It includes approximately 2,500 of the smallest securities based on a combination of their market cap and current index membership. The index is constructed to provide a comprehensive and unbiased barometer for the small to mid-cap segment. The index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small to mid-cap opportunity set.

Russell 2500® Value Index Measures the performance of the small to mid-cap value segment of the US equity universe. It includes Russell 2500 index companies with lower price-to-book ratios and lower expected and historical growth rates.

Russell 3000 Growth Index Measures the performance of the broad growth segment of the US equity universe. It includes Russell 3000 index companies with higher price-to-book ratios and higher forecasted growth values. It is market-capitalization weighted.

Russell 3000 Value Index Measures the performance of the broad value segment of US equity value universe. It includes Russell 3000 index companies with lower price-to-book ratios and lower forecasted growth values. It is market-capitalization weighted.

Russell 3000® Index Measures the performance of the largest 3,000 US companies representing approximately 98% of the investable US equity market. It is constructed to provide a comprehensive, unbiased and stable barometer of the broad market and is completely reconstituted annually to ensure new and growing equities are reflected.

Russell Midcap Index Measures the performance of the mid-cap segment of the US equity universe. It is a subset of Russell 1000 index and includes approximately 800 of the smallest securities based on a combination of their market cap and current index membership. The index represents approximately 31% of the total market capitalization of the Russell 1000 companies. It is constructed to provide a comprehensive and unbiased barometer for the mid-cap segment. The index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true mid-cap opportunity set.

Russell Midcap Value Index Measures the performance of the mid-cap value segment of the US equity universe. It includes Russell midcap index companies with lower price-to-book ratios and lower forecasted growth values. It is market-capitalization weighted.

Russell Midcap® Growth Index Measures the performance of the midcap growth segment of the U.S. equity universe. It includes those Russell Midcap Index companies with higher price-to-book ratios and higher forecasted growth values.

Russell Top 200 Index Measures the performance of the largest cap segment of the US equity universe. It is a subset of the Russell 3000 index. It includes approximately 200 of the largest securities based on a combination of their market cap and current index membership and represents approximately 68% of the US market. The index is constructed to provide a comprehensive and unbiased barometer for this very large cap segment and is completely reconstituted annually to ensure new and growing equities are reflected.

S&P 1000 Index The S&P 1000® Index combines the S&P MidCap 400® and the S&P SmallCap 600® to form an investable benchmark for the mid- to small-cap segment of the U.S. equity market.

S&P 1500 Cons Discretionary TR The S&P Composite 1500® Consumer Discretionary Index comprises those companies included in the S&P Composite 1500 that are classified as members of the GICS® consumer discretionary sector.

S&P 1500 Cons Staples TR The S&P Composite 1500® Consumer Staples Index comprises those companies included in the S&P Composite 1500 that are classified as members of the GICS® consumer staples sector.

S&P 1500 Energy TR The S&P Composite 1500® Energy Index comprises those companies included in the S&P Composite 1500 that are classified as members of the GICS® energy sector.

S&P 1500 Financials TR The S&P Composite 1500® Financials Index comprises those companies included in the S&P Composite 1500 that are classified as members of the GICS® financials sector.

S&P 1500 Health Care TR The S&P Composite 1500® Health Care Index comprises those companies included in the S&P Composite 1500 that are classified as members of the GICS® health care sector.

S&P 1500 Index The S&P Composite 1500® combines three leading indices, the S&P 500®, the S&P MidCap 400®, and the S&P SmallCap 600® to cover approximately 90% of the U.S. market capitalization. It is designed for investors seeking to replicate the performance of the U.S. equity market or benchmark against a representative universe of tradable stocks.

S&P 1500 Industrials TR The S&P Composite 1500® Industrials Index comprises those companies included in the S&P Composite 1500 that are classified as members of the GICS® industrials sector.

S&P 1500 Telecom Services TR The S&P Composite 1500® Communication Services comprises those companies included in the S&P Composite 1500 that are classified as members of the GICS® communication services sector.

S&P 1500 Utilities TR The S&P Composite 1500® Utilities Index comprises those companies included in the S&P Composite 1500 that are classified as members of the GICS® utilities sector.

S&P 500 Information Technology Comprises those companies included in the S&P 500 that are classified as members of the GICS® information technology sector.

S&P 500 Index The S&P 500® is widely regarded as the best single gauge of large-cap U.S. equities. There is over USD 7.8 trillion benchmarked to the index, with index assets comprising approximately USD 2.2 trillion of this total. The index includes 500 leading companies and captures approximately 80% coverage of available market capitalization.

S&P 500 Industrials The S&P 500® Industrials Index comprises those companies included in the S&P 500 that are classified as members of the GICS® industrials sector

S&P 500 Technology Index Measures the performance of all those companies held in the S&P 500 index that are classified as a information technology(sector) company using the Global Industry Classification Standard(GICS) system.

S&P 500 Telecomm Service The S&P 500® Telecommunication Services Index comprises those companies included in the S&P 500 that are classified as members of the GICS® telecommunication services sector.

S&P 500 Value Index We measure value stocks using three factors: the ratios of book value, earnings, and sales to price. S&P Style Indices divide the complete market capitalization of each parent index into growth and value segments. Constituents are drawn from the S&P 500®.

S&P 500-Consumer Discretionary The S&P 500® Consumer Discretionary Index comprises those companies included in the S&P 500 that are classified as members of the GICS® consumer discretionary sector.

S&P 500-Energy The S&P 500® Energy Index comprises those companies included in the S&P 500 that are classified as members of the GICS® energy sector.

S&P 500-Financial Services The S&P 500® Financials Index comprises those companies included in the S&P 500 that are classified as members of the GICS® financials sector.

S&P 500-Health Care The S&P 500® Health Care Index comprises those companies included in the S&P 500 that are classified as members of the GICS® health care sector.

S&P 500-Utilities The S&P 500® Utilities Index comprises those companies included in the S&P 500 that are classified as members of the GICS® utilities sector.

S&P 600 Index The S&P SmallCap 600® Index (S&P 600) is a stock market index established by Standard & Poor's. It covers roughly the small-cap range of US stocks, using a capitalization-weighted index.

S&P Composite 1500® Index The S&P Composite 1500® combines three leading indices, the S&P 500®, the S&P MidCap 400®, and the S&P SmallCap 600® to cover approximately 90% of the U.S. market capitalization. It is designed for investors seeking to replicate the performance of the U.S. equity market or benchmark against a representative universe of tradable stocks.

S&P Developed Property Index This index defines and measures the investable universe of publicly traded property companies domiciled in developed markets. The companies in the index are engaged in real estate related activities, such as property ownership, management, development, rental and investment.

S&P Global Infrastructure Index The S&P Global Infrastructure Index is designed to track 75 companies from around the world chosen to represent the listed infrastructure industry while maintaining liquidity and tradability. To create diversified exposure, the index includes three distinct infrastructure clusters: energy, transportation, and utilities.

S&P Global REIT Measures the performance of publicly traded equity REITs listed in both developed and emerging markets. It is a member of the S&P Global Property Index Series.

S&P MidCap 400 Growth Index Measures growth stocks using three factors: sales growth, the ratio of earnings change to price, and momentum. S&P Style Indices divide the complete market capitalization of each parent index into growth and value segments. Constituents are drawn from the S&P MidCap 400®.

S&P MidCap 400 Index The S&P MidCap 400® provides investors with a benchmark for mid-sized companies. The index, which is distinct from the large-cap S&P 500®, measures the performance of mid-sized companies, reflecting the distinctive risk and return characteristics of this market segment.

S&P North American Natural Resources TR The S&P North American Natural Resources Index provides investors with a benchmark that represents U.S. traded securities that are classified under the GICS® energy and materials sector excluding the chemicals industry; and steel sub-industry.

S&P United States REIT Measures the performance of investable universe of publicly traded real estate investment trusts domiciled in the United States.

S&P/LSTA Leveraged Loan Index The S&P/LSTA Leveraged Loan Index represents the U.S. Senior loan market.

S&P500-Consumer Staples The S&P 500® Consumer Staples Index comprises those companies included in the S&P 500 that are classified as members of the GICS® consumer staples sector.

Spliced Bloomberg U.S. Treasury 3-10 Year Index Bloomberg U.S. 3-10 Year Government Float Adjusted Index through December 11, 2017; Bloomberg U.S. Treasury 3-10 Year Bond Index thereafter.

USTREAS Treasury Bill Constant Maturity Rate 3 Year This index is an average yield on United States Treasury securities adjusted to a constant maturity of 3 year, as made available by the Federal Reserve Board. Yields are interpolated by the United States Treasury from the daily yield curve.

Guaranteed Income Fund

Key Facts

Issuers: Empower Annuity Insurance Company (EAIC)
Investment advisor: Empower Capital Management, LLC (ECM)
Inception date: January 1, 1981
Fund category: Stable Value

5-Year U.S. Treasury Rate as of 03/31/2023

There is no applicable benchmark for the product as it utilizes various asset classes to support its guarantees and liability dynamics in order to produce desirable balance between interest crediting rate responsiveness and stability. However, it is common to benchmark the product against various indices, which include 3 or 5-year Treasury, Money Markets and other fixed income indices (i.e., Bloomberg Barclays U.S. Intermediate Aggregate Bond Index).

Objective & Structure

The Guaranteed Income Fund (GIF) is a Stable Value fund designed to provide safety of principal, liquidity, and a competitive rate of return.

The fund offers

- Stability of crediting rate
- Guaranteed protection of principal and accumulated interest from market volatility
- Intermediate-term fixed income returns

Features

- Principal and accumulated interest are fully guaranteed by Empower Annuity Insurance Company (EAIC).
- The guaranteed interest rate is announced in advance and is guaranteed for a six-month period. A minimum rate will apply.
- GIF invests in a broadly diversified, fixed-income portfolio within EAIC's general account. The portfolio is primarily invested in public bonds, commercial mortgages and private placement bonds.

Other / Risks

In most circumstances, Participants may not directly transfer amounts from Guaranteed Income Fund to a competing fund. A transfer out of this investment must be directed to and remain in a non-competing fund for a period of 90 days before it can be invested in a competing fund. Competing funds are generally short-term fixed income investments, money market funds or stable value investments that may be available as a Plan investment option. However, the transfer provisions and competing fund definitions may differ depending on the provisions of the group annuity contract.

A "pool" consists of similar contracts that are funded with us in the same calendar year. Empower reserves the right to defer certain withdrawals from GIF assets if the amount of withdrawals and transfers to date for that pool is greater than 10% of the pool's beginning balance for that calendar year. However, distributions resulting from a plan participant's termination of employment, retirement, death or disability, hardship withdrawals and minimum required distributions will always be paid in full and not deferred.

Additionally, when your Plan's group annuity contract terminates, payments from the Guaranteed Income Fund may be delayed depending on the terms of the group annuity contract which may result in a delay in payments by the Plan. The Customer Service Center can answer questions regarding these provisions applicable to a Plan.

All guarantees are based on the claims-paying ability of the issuing company.

An annual rate guarantee may apply to certain 403(b) or nonqualified plan arrangements. Contact Empower for further information.

Frequent exchanging between plan investment options may harm long-term investors. Your plan or the plan's investment funds may have provisions to deter exchanges that may be abusive. These policies may require us to modify, restrict or suspend purchase or exchange privileges and/or impose redemption fees.

Empower Capital Management, LLC is an Empower company.

The Guaranteed Income Fund (GIF) is a group annuity product issued by Empower Annuity Insurance Company (EAIC), Hartford, CT. Amounts contributed to the contract are deposited in EAIC general account. Payment obligations and the fulfillment of any guarantees specified in the group annuity contract are insurance claims supported by the full faith and credit of EAIC. However, if you are a participant in an unfunded nonqualified deferred compensation plan, GIF may be only a reference account that is used to determine the plan's liability to you and may not represent an actual investment in the group annuity. EAIC periodically resets the interest rate credited on contract balances, subject to a minimum rate specified in the group annuity contract. The minimum interest rate may be greater for certain 403(b) or nonqualified plan arrangements. Contact Empower for further information. Past interest rates are not indicative of future rates. This product is neither a mutual fund nor a bank product. The obligations of EAIC are not insured by the FDIC or any other federal governmental agency. Empower refers to the products and services offered by Empower Annuity Insurance Company of America and its subsidiaries, including EAIC and Empower Retirement, LLC. Effective October 3, 2022, Prudential Retirement Insurance and Annuity Company was renamed Empower Annuity Insurance Company. Contract form # GA-2020-IA-0805 or state variation thereof.

EAIC is compensated in connection with this product when general account investment returns exceed the interest credited on contract balances. EAIC may earn fee revenue plus the foregoing compensation if your plan has agreed to pay contract charges—which are sometimes paid with respect to plan/participant recordkeeping and distribution services. For some plans, EAIC uses a portion of its aggregate compensation to satisfy the plan's request for allowances and for payments to defray plan expenses. If EAIC's aggregate compensation from this product and from other plan investment products exceeds the costs of servicing your plan, EAIC earns a profit; otherwise it incurs a loss.

Vanguard Federal Money Market Fund Investor Shares

A Mutual Fund

First Quarter 2023 Fund Fact Sheet

Key Facts		Description / Objective
Investment Advisor	Vanguard Group Inc	The investment seeks to provide current income while maintaining liquidity and a stable share price of \$1. The fund invests primarily in high-quality, short-term money market instruments.
Asset Class	Fixed Income - Money Market	Under normal circumstances, at least 80% of the fund's assets are invested in securities issued by the U.S. government and its agencies and instrumentalities. The adviser maintains a dollar-weighted average maturity of 60 days or less and a dollar-weighted average life of 120 days or less. The fund generally invests 100% of its assets in U.S. government securities and therefore will satisfy the 99.5% requirement for designation as a government money market fund.
Primary Index	iMoneyNet Taxable Money Funds - Net	There is no assurance the objectives will be met.
Broad Based Index	ICE BofA US Dollar 3-Month Deposit Offered Rate Constant Maturity TR USD	You could lose money by investing in a money market fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor has no legal obligation to provide financial support to the fund, and you should not expect that the sponsor will provide financial support to the fund at any time. The yield quotation more closely reflects the current earnings of the fund than the total return quotation.
Net Assets	\$238,606.0 Million	
Inception Date	07/13/1981

*Fees that Prudential Retirement and its affiliates may receive in connection with plan investments in this fund include:

Finders Fee	No	12b-1 Fee	0%
Sub-accounting fee (\$ per participant)	--	Sub-accounting fee %	0%
Other Service fee (\$ per participant)	--	Other Service fee %	0%

Fees if applicable to this fund, compensate Prudential Retirement for selling the fund's shares and servicing your retirement plan. The fund's expense ratio includes these fees. Other investment options may generate more or less revenue than the fees associated with this fund. If the aggregate revenue from your plan exceeds our associated costs, we earn a profit. Otherwise, we incur a loss. Other share classes of this fund may have a lower expense ratio, but your plan's investment options do not include such shares to compensate us for distribution and plan servicing.

The performance quoted represents past performance. The investment value and return will fluctuate so that an investment, when redeemed, may be worth more or less than original cost. Past performance does not guarantee future results. Current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 1-877-778-2100. These performance results represent the change in net asset value of an investment over a stated period, assuming the reinvestment of dividends and capital gain distributions. Past performance is not indicative of future performance and short periods of performance may be particularly unrepresentative of long-term performance.

Investors should consider the fund's investment objectives, risks, charges and expenses before investing. The prospectus, and if available the summary prospectus, contain complete information about the investment options available through your plan. Please call 1-877-778-2100 for a free prospectus and if available, a summary prospectus that contain this and other information about the mutual funds. You should read the prospectus and the summary prospectus, if available, carefully before investing. It is possible to lose money when investing in securities.

Annual Performance

	Fund Primary Index	Broad Based Index
2022	1.55%	1.32%
2021	0.01%	0.02%
2020	0.45%	0.33%
2019	2.14%	1.83%
2018	1.78%	1.53%

Securities products and services are offered through Prudential Investment Management Services LLC (PIMS), Newark, NJ, a Prudential Financial company.

Data presented is as of the period specified for this report, unless otherwise specified within a table heading. Data and expense ratios presented are the most current made available at the time of production. For mutual funds, the fund company may have more recent data available on its website. Price corrections that impact performance data may occur after production of this material.

12b-1 Fee An annual marketing or distribution fee on a mutual fund. The 12b-1 fee is considered an operational expense and, as such, is included in a fund's expense ratio. It is generally between 0.25-1% (the maximum allowed) of a fund's net assets.

Finders Fee A commission paid to an entity who served as the facilitator of a transaction.

Gross Expense Ratio The Total Gross Expense Ratio represents the percentage of fund assets paid for operating expenses and management fees. It typically includes the following types of fees: accounting, administrator, advisor, auditor, board of directors, custodial, distribution (12b-1), legal, organizational, professional, registration, shareholder reporting, sub-advisor, and transfer agency. The expense ratio does not reflect the fund's brokerage costs, fee waivers, or investor sales charges. Expense data is typically quoted with two decimal places; however, three decimal places will be displayed when values are available.

Net Assets Balance data presented is the most current data available at the time of receipt, however some information may be presented on a lag. The data is deemed reliable but the accuracy cannot be guaranteed. All balances are unaudited.

Other Service fee % Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Other Service fee (\$ per participant) Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Portfolio Manager The name of the person(s) who determines which stocks, bonds and cash equivalents belong in the investment portfolio.

Sub-accounting fee % Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Sub-accounting fee (\$ per participant) Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Market Timing: Frequent exchanging of investment options may harm long-term investors. Policies may be in effect at the plan or the investment level to detect and deter exchanges that may be abusive. Such policies may require us to modify, restrict, suspend or terminate purchase or exchange privileges and impose redemption fees. Please refer to the prospectus, if available for the investment, for information on these potential restrictions and any applicable redemption fees. Otherwise, please contact your Representative.

Indices are unmanaged and cannot be invested in directly. See User Guide for index definitions. The index shown, if applicable, in the Characteristics chart refers to the primary index.

Overall # of Funds in Morningstar Category	414
Portfolio Manager(s)	Joshua C. Barrickman CFA

Description / Objective
The investment seeks to track the performance of the Bloomberg U.S. Aggregate Float Adjusted Index. This index measures the performance of a wide spectrum of public, investment-grade, taxable, fixed income securities in the United States-including government, corporate, and international dollar-denominated bonds, as well as mortgage-backed and asset-backed securities-all with maturities of more than 1 year. All of the fund's investments will be selected through the sampling process, and at least 80% of its assets will be invested in bonds held in the index. There is no assurance the objectives will be met.

Fixed income investment (bond) funds are subject to interest rate risk; their value will decline as interest rates rise. Fund shares are not guaranteed by the U.S. Government.

Securities products and services are offered through Prudential Investment Management Services LLC (PIMS), Newark, NJ, a Prudential Financial company.

Data presented is as of the period specified for this report, unless otherwise specified within a table heading. Data and expense ratios presented are the most current made available at the time of production. For mutual funds, the fund company may have more recent data available on its website. Price corrections that impact performance data may occur after production of this material.

12b-1 Fee An annual marketing or distribution fee on a mutual fund. The 12b-1 fee is considered an operational expense and, as such, is included in a fund's expense ratio. It is generally between 0.25-1% (the maximum allowed) of a fund's net assets.

Average Maturity For a single bond, it is a measure of maturity that takes into account the possibility that a bond might be called back to the issuer.

For a portfolio of bonds, average effective maturity is the weighted average of the maturities of the underlying bonds. The measure is computed by weighing each bond's maturity by its market value with respect to the portfolio and the likelihood of any of the bonds being called. In a pool of mortgages, this would also account for the likelihood of prepayments on the mortgages.

Effective Duration Calculated for a bond with an embedded option when the value is calculated to include the expected change in cash flow caused by the option as interest rates change. This measures the responsiveness of a bond's price to interest rate changes, and illustrates the fact that the embedded option will also affect the bond's price.

Finders Fee A commission paid to an entity who served as the facilitator of a transaction.

Gross Expense Ratio The Total Gross Expense Ratio represents the percentage of fund assets paid for operating expenses and management fees. It typically includes the following types of fees: accounting, administrator, advisor, auditor, board of directors, custodial, distribution (12b-1), legal, organizational, professional, registration, shareholder reporting, sub-advisor, and transfer agency. The expense ratio does not reflect the fund's brokerage costs, fee waivers, or investor sales charges. Expense data is typically quoted with two decimal places; however, three decimal places will be displayed when values are available.

Net Assets Balance data presented is the most current data available at the time of receipt, however some information may be presented on a lag. The data is deemed reliable but the accuracy cannot be guaranteed. All balances are unaudited.

Other Service fee % Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Other Service fee (\$ per participant) Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Portfolio Manager The name of the person(s) who determines which stocks, bonds and cash equivalents belong in the investment portfolio.

Portfolio Turnover (%) This is a measure of the fund's trading activity, which is computed by taking the lesser of purchases or sales (excluding all securities with maturities of less than one year) and dividing by average monthly net assets. A low turnover figure (20% to 30%) would indicate a buy-and-hold strategy. High turnover (more than 100%) would indicate an investment strategy involving considerable buying and selling of securities.

Sub-accounting fee % Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service

Indices are unmanaged and cannot be invested in directly. See User Guide for index definitions. The index shown, if applicable, in the Characteristics chart refers to the primary index.

providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Sub-accounting fee (\$ per participant) Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Description / Objective

The investment seeks to maximize long-term total return. The fund pursues its objective by investing, under normal circumstances, at least 80% of its net assets in investment grade fixed income securities or unrated securities determined by the Adviser to be of comparable quality. Up to 20% of the fund's net assets may be invested in securities rated below investment grade or unrated securities determined by the Adviser to be of comparable quality. The fund also invests at least 80% of its net assets, plus any borrowings for investment purposes in fixed income securities it regards as bonds.

There is no assurance the objectives will be met.

Fixed income investment (bond) funds are subject to interest rate risk; their value will decline as interest rates rise. Fund shares are not guaranteed by the U.S. Government.

Average Maturity For a single bond, it is a measure of maturity that takes into account the possibility that a bond might be called back to the issuer.

For a portfolio of bonds, average effective maturity is the weighted average of the maturities of the underlying bonds. The measure is computed by weighing each bond's maturity by its market value with respect to the portfolio and the likelihood of any of the bonds being called. In a pool of mortgages, this would also account for the likelihood of prepayments on the mortgages.

Effective Duration Calculated for a bond with an embedded option when the value is calculated to include the expected change in cash flow caused by the option as interest rates change. This measures the responsiveness of a bond's price to interest rate changes, and illustrates the fact that the embedded option will also affect the bond's price.

Finders Fee A commission paid to an entity who served as the facilitator of a transaction.

Gross Expense Ratio The Total Gross Expense Ratio represents the percentage of fund assets paid for operating expenses and management fees. It typically includes the following types of fees: accounting, administrator, advisor, auditor, board of directors, custodial, distribution (12b-1), legal, organizational, professional, registration, shareholder reporting, sub-advisor, and transfer agency. The expense ratio does not reflect the fund's brokerage costs, fee waivers, or investor sales charges. Expense data is typically quoted with two decimal places; however, three decimal places will be displayed when values are available.

Net Assets Balance data presented is the most current data available at the time of receipt, however some information may be presented on a lag. The data is deemed reliable but the accuracy cannot be guaranteed. All balances are unaudited.

Other Service fee % Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Other Service fee (\$ per participant) Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Portfolio Manager The name of the person(s) who determines which stocks, bonds and cash equivalents belong in the investment portfolio.

Portfolio Turnover (%) This is a measure of the fund's trading activity, which is computed by taking the lesser of purchases or sales (excluding all securities with maturities of less than one year) and dividing by average monthly net assets. A low turnover figure (20% to 30%) would indicate a buy-and-hold strategy. High turnover (more than 100%) would indicate an investment strategy involving considerable buying and selling of securities.

Sub-accounting fee % Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Sub-accounting fee (\$ per participant) Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

A Mutual Fund

First Quarter 2023 Fund Fact Sheet

Key Facts		Description / Objective
Investment Advisor	Pacific Investment Management Company, LLC	The investment seeks to maximize current income; long-term capital appreciation is a secondary objective. The fund invests at least 65% of its total assets in a multi-sector portfolio of Fixed Income Instruments of varying maturities, which may be represented by forwards or derivatives such as options, futures contracts or swap agreements. It may invest up to 50% of its total assets in high yield securities rated below investment grade by Moody's, S&P or Fitch, or if unrated, as determined by PIMCO. There is no assurance the objectives will be met. <i>Fixed income investment (bond) funds are subject to interest rate risk; their value will decline as interest rates rise. Fund shares are not guaranteed by the U.S. Government.</i>

Finders Fee	No	12b-1 Fee	0.25%
Sub-accounting fee (\$ per participant)	--	Sub-accounting fee %	0%
Other Service fee (\$ per participant)	--	Other Service fee %	0%

Market Timing: Frequent exchanging of investment options may harm long-term investors. Policies may be in effect at the plan or the investment level to detect and deter exchanges that may be abusive. Such policies may require us to modify, restrict, suspend or terminate purchase or exchange privileges and impose redemption fees. Please refer to the prospectus, if available for the investment, for information on these potential restrictions and any applicable redemption fees. Otherwise, please contact your Representative.

Fees if applicable to this fund, compensate Prudential Retirement for selling the fund's shares and servicing your retirement plan. The fund's expense ratio includes these fees. Other investment options may generate more or less revenue than the fees associated with this fund. If the aggregate revenue from your plan exceeds our associated costs, we earn a profit. Otherwise, we incur a loss. Other share classes of this fund may have a lower expense ratio, but your plan's investment options do not include such shares to compensate us for distribution and plan servicing.

The performance quoted represents past performance. The investment value and return will fluctuate so that an investment, when redeemed, may be worth more or less than original cost. Past performance does not guarantee future results. Current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 1-877-778-2100. These performance results represent the change in net asset value of an investment over a stated period, assuming the reinvestment of dividends and capital gain distributions. Past performance is not indicative of future performance and short periods of performance may be particularly unrepresentative of long-term performance.

Indices are unmanaged and cannot be invested in directly. See User Guide for index definitions. The index shown, if applicable, in the Characteristics chart refers to the primary index.

Morningstar Rating™ (Open End Mutual Funds, Closed End Mutual Funds, or Variable Annuity Underlying Funds)

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a funds' monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five-, and ten-year (if applicable) Morningstar Rating metrics. Past performance is no guarantee of future results. **Investors should consider the fund's investment objectives, risks, charges and expenses before investing. The prospectus, and if available the summary prospectus, contain complete information about the investment options available through your plan. Please call 1-877-778-2100 for a free prospectus and if available, a summary prospectus that contain this and other information about the mutual funds. You should read the prospectus and the summary prospectus, if available, carefully before investing. It is possible to lose money when investing in securities.**

Securities products and services are offered through Prudential Investment Management Services LLC (PIMS), Newark, NJ, a Prudential Financial company.

Data presented is as of the period specified for this report, unless otherwise specified within a table heading. Data and expense ratios presented are the most current made available at the time of production. For mutual funds, the fund company may have more recent data available on its website. Price corrections that impact performance data may occur after production of this material.

12b-1 Fee An annual marketing or distribution fee on a mutual fund. The 12b-1 fee is considered an operational expense and, as such, is included in a fund's expense ratio. It is generally between 0.25-1% (the maximum allowed) of a fund's net assets.

Average Maturity For a single bond, it is a measure of maturity that takes into account the possibility that a bond might be called back to the issuer.

For a portfolio of bonds, average effective maturity is the weighted average of the maturities of the underlying bonds. The measure is computed by weighing each bond's maturity by its market value with respect to the portfolio and the likelihood of any of the bonds being called. In a pool of mortgages, this would also account for the likelihood of prepayments on the mortgages.

Effective Duration Calculated for a bond with an embedded option when the value is calculated to include the expected change in cash flow caused by the option as interest rates change. This measures the responsiveness of a bond's price to interest rate changes, and illustrates the fact that the embedded option will also affect the bond's price.

T. Rowe Price Retirement 2005 Fund

A Mutual Fund

First Quarter 2023 Fund Fact Sheet

Key Facts		Description / Objective
Investment Advisor	T. Rowe Price Associates, Inc.	<p>The investment seeks the highest total return over time consistent with an emphasis on both capital growth and income. The fund pursues its objective by investing in a diversified portfolio of other T. Rowe Price stock and bond mutual funds that represent various asset classes and sectors. It is managed based on the specific retirement year (target date 2005) included in its name and assumes a retirement age of 65.</p> <p>There is no assurance the objectives will be met.</p> <p><i>The target-date is the approximate year when investors plan to retire and may begin withdrawing their money. The asset allocation of the target-date funds will become more conservative as the target-date approaches by lessening your equity exposure and increasing your exposure in fixed income investments. The principal value of an investment in a target-date fund is not guaranteed at any time, including the target-date. There is no guarantee that the fund will provide adequate retirement income. A target-date fund should not be selected solely based on age or retirement date. Before investing, participants should carefully consider the fund's investment objectives, risks, charges and expenses, as well as their age, anticipated retirement date, risk tolerance, other investments owned, and planned withdrawals. The stated asset allocation may be subject to change. It is possible to lose money in a target-date fund, including losses near and following retirement. Investments in the funds are not deposits or obligations of any bank and are not insured or guaranteed by any governmental agency or instrumentality.</i></p>

12b-1 Fee An annual marketing or distribution fee on a mutual fund. The 12b-1 fee is considered an operational expense and, as such, is included in a fund's expense ratio. It is generally between 0.25-1% (the maximum allowed) of a fund's net assets.

3-Year Earnings Growth Rate (%) A measure of how a stock's earnings per share (EPS) has

grown over the last three years. Morningstar uses EPS from continuing operations to calculate this growth rate. For portfolios, this data point is the share-weighted collective earnings growth for all stocks in the current portfolio. The historical earnings growth rate can tell investors how quickly a company's profits are growing.

Finders Fee A commission paid to an entity who served as the facilitator of a transaction.

Gross Expense Ratio The Total Gross Expense Ratio represents the percentage of fund assets paid for operating expenses and management fees. It typically includes the following types of fees: accounting, administrator, advisor, auditor, board of directors, custodial, distribution (12b-1), legal, organizational, professional, registration, shareholder reporting, sub-advisor, and transfer agency. The expense ratio does not reflect the fund's brokerage costs, fee waivers, or investor sales charges. Other Service fee % Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Other Service fee (\$ per participant) Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Portfolio Allocation The pie chart illustrates how investment holdings breakdown into primary investment types.

Portfolio Manager The name of the person(s) who determines which stocks, bonds and cash equivalents belong in the investment portfolio.

Price/Book Ratio Calculated as a weighted average of the price/book ratios of all stocks in the portfolio. This ratio is used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share. A lower P/B ratio could mean that the stock is undervalued. However, it could also mean that something is fundamentally wrong with the company. As with most ratios, be aware that this varies by industry.

Price/Earnings Ratio (Forward) The price of a stock divided by next year's earnings per share estimate. P/E multiples enable investors to compare the relative value of stocks within a portfolio; they show how much an investor must pay for a company's earning power. A lower portfolio P/E ratio indicates that the stocks in a portfolio are not highly-valued relative to the market. Growth-oriented investments tend to have higher P/E ratios than value-oriented investments as investors expect higher earnings growth from the underlying companies and are therefore willing to pay a premium price.

Sub-accounting fee % Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Sub-accounting fee (\$ per participant) Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Weighted Geometric Market Cap (\$Bil) Calculated by raising the market capitalization of each stock to a power equal to that stock's weight in the portfolio. The resulting numbers multiplied together produce the geometric mean of the market caps of the stocks in the portfolio.

*Fees that Prudential Retirement and its affiliates may receive in connection with plan investments in this fund include:

Finders Fee	No	12b-1 Fee	0%
Sub-accounting fee (\$ per participant)	--	Sub-accounting fee %	0.15%
Other Service fee (\$ per participant)	--	Other Service fee %	0%

Market Timing: Frequent exchanging of investment options may harm long-term investors. Policies may be in effect at the plan or the investment level to detect and deter exchanges that may be abusive. Such policies may require us to modify, restrict, suspend or terminate purchase or exchange privileges and impose redemption fees. Please refer to the prospectus, if available for the investment, for information on these potential restrictions and any applicable redemption fees. Otherwise, please contact your Representative.

Fees if applicable to this fund, compensate Prudential Retirement for selling the fund's shares and servicing your retirement plan. The fund's expense ratio includes these fees. Other investment options may generate more or less revenue than the fees associated with this fund. If the aggregate revenue from your plan exceeds our associated costs, we earn a profit. Otherwise, we incur a loss. Other share classes of this fund may have a lower expense ratio, but your plan's investment options do not include such shares to compensate us for distribution and plan servicing.

Indices are unmanaged and cannot be invested in directly. See User Guide for index definitions. The index shown, if applicable, in the Characteristics chart refers to the primary index.

The performance quoted represents past performance. The investment value and return will fluctuate so that an investment, when redeemed, may be worth more or less than original cost. Past performance does not guarantee future results. Current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 1-877-778-2100. These performance results represent the change in net asset value of an investment over a stated period, assuming the reinvestment of dividends and capital gain distributions. Past performance is not indicative of future performance and short periods of performance may be particularly unrepresentative of long-term performance.

Morningstar Rating™ (Open End Mutual Funds, Closed End Mutual Funds, or Variable Annuity Underlying Funds)

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a funds' monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five-, and ten-year (if applicable) Morningstar Rating metrics. Past performance is no guarantee of future results.

Investors should consider the fund's investment objectives, risks, charges and expenses before investing. The prospectus, and if available the summary prospectus, contain complete information about the investment options available through your plan. Please call 1-877-778-2100 for a free prospectus and if available, a summary prospectus that contain this and other information about the mutual funds. You should read the prospectus and the summary prospectus, if available, carefully before investing. It is possible to lose money when investing in securities.

Securities products and services are offered through Prudential Investment Management Services LLC (PIMS), Newark, NJ, a Prudential Financial company.

Data presented is as of the period specified for this report, unless otherwise specified within a table heading. Data and expense ratios presented are the most current made available at the time of production. For mutual funds, the fund company may have more recent data available on its website. Price corrections that impact performance data may occur after production of this material.

12b-1 Fee An annual marketing or distribution fee on a mutual fund. The 12b-1 fee is considered an operational expense and, as such, is included in a fund's expense ratio. It is generally between 0.25-1% (the maximum allowed) of a fund's net assets.

3-Year Earnings Growth Rate (%) A measure of how a stock's earnings per share (EPS) has

grown over the last three years. Morningstar uses EPS from continuing operations to calculate this growth rate. For portfolios, this data point is the share-weighted collective earnings growth for all stocks in the current portfolio. The historical earnings growth rate can tell investors how quickly a company's profits are growing.

Finders Fee A commission paid to an entity who served as the facilitator of a transaction.

Gross Expense Ratio The Total Gross Expense Ratio represents the percentage of fund assets paid for operating expenses and management fees. It typically includes the following types of fees: accounting, administrator, advisor, auditor, board of directors, custodial, distribution (12b-1), legal, organizational, professional, registration, shareholder reporting, sub-advisor, and transfer agency. The expense ratio does not reflect the fund's brokerage costs, fee waivers, or investor sales charges. Expense data is typically quoted with two decimal places; however, three decimal places will be displayed when values are available.

Net Assets Balance data presented is the most current data available at the time of receipt, however some information may be presented on a lag. The data is deemed reliable but the accuracy cannot be guaranteed. All balances are unaudited.

Other Service fee % Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Other Service fee (\$ per participant) Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Portfolio Allocation The pie chart illustrates how investment holdings breakdown into primary investment types.

Portfolio Manager The name of the person(s) who determines which stocks, bonds and cash equivalents belong in the investment portfolio.

Price/Book Ratio Calculated as a weighted average of the price/book ratios of all stocks in the portfolio. This ratio is used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share. A lower P/B ratio could mean that the stock is undervalued. However, it could also mean that something is fundamentally wrong with the company. As with most ratios, be aware that this varies by industry.

Price/Earnings Ratio (Forward) The price of a stock divided by next year's earnings per share estimate. P/E multiples enable investors to compare the relative value of stocks within a portfolio; they show how much an investor must pay for a company's earning power. A lower portfolio P/E ratio indicates that the stocks in a portfolio are not highly-valued relative to the market. Growth-oriented investments tend to have higher P/E ratios than value-oriented investments as investors expect higher earnings growth from the underlying companies and are therefore willing to pay a premium price.

Sub-accounting fee % Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Sub-accounting fee (\$ per participant) Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Weighted Geometric Market Cap (\$Bil) Calculated by raising the market capitalization of each stock to a power equal to that stock's weight in the portfolio. The resulting numbers multiplied together produce the geometric mean of the market caps of the stocks in the portfolio.

T. Rowe Price Retirement 2015 Fund

A Mutual Fund

First Quarter 2023 Fund Fact Sheet

Key Facts		Description / Objective
Investment Advisor	T. Rowe Price Associates, Inc.	<p>The investment seeks the highest total return over time consistent with an emphasis on both capital growth and income. The fund invests in a diversified portfolio of other T. Rowe Price stock and bond mutual funds that represent various asset classes and sectors. Its allocation among T. Rowe Price mutual funds will change over time in relation to its target retirement date. The fund is managed based on the specific retirement year (target date 2015) included in its name and assumes a retirement age of 65.</p> <p>There is no assurance the objectives will be met.</p> <p><i>The target-date is the approximate year when investors plan to retire and may begin withdrawing their money. The asset allocation of the target-date funds will become more conservative as the target-date approaches by lessening your equity exposure and increasing your exposure in fixed income investments. The principal value of an investment in a target-date fund is not guaranteed at any time, including the target-date. There is no guarantee that the fund will provide adequate retirement income. A target-date fund should not be selected solely based on age or retirement date. Before investing, participants should carefully consider the fund's investment objectives, risks, charges and expenses, as well as their age, anticipated retirement date, risk tolerance, other investments owned, and planned withdrawals. The stated asset allocation may be subject to change. It is possible to lose money in a target-date fund, including losses near and following retirement. Investments in the funds are not deposits or obligations of any bank and are not insured or guaranteed by any governmental agency or instrumentality.</i></p>

Portfolio Allocation The pie chart illustrates how investment holdings breakdown into primary investment types.

Portfolio Manager The name of the person(s) who determines which stocks, bonds and cash equivalents belong in the investment portfolio.

Price/Book Ratio Calculated as a weighted average of the price/book ratios of all stocks in the portfolio. This ratio is used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share. A lower P/B ratio could mean that the stock is undervalued. However, it could also mean that something is fundamentally wrong with the company. As with most ratios, be aware that this varies by industry.

Price/Earnings Ratio (Forward) The price of a stock divided by next year's earnings per share estimate. P/E multiples enable investors to compare the relative value of stocks within a portfolio; they show how much an investor must pay for a company's earning power. A lower portfolio P/E ratio indicates that the stocks in a portfolio are not highly-valued relative to the market. Growth-oriented investments tend to have higher P/E ratios than value-oriented investments as investors expect higher earnings growth from the underlying companies and are therefore willing to pay a premium price.

Sub-accounting fee % Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Sub-accounting fee (\$ per participant) Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Weighted Geometric Market Cap (\$Bil) Calculated by raising the market capitalization of each stock to a power equal to that stock's weight in the portfolio. The resulting numbers multiplied together produce the geometric mean of the market caps of the stocks in the portfolio.

T. Rowe Price Retirement 2025 Fund

A Mutual Fund

First Quarter 2023 Fund Fact Sheet

Key Facts		Description / Objective
Investment Advisor	T. Rowe Price Associates, Inc.	<p>The investment seeks the highest total return over time consistent with an emphasis on both capital growth and income. The fund invests in a diversified portfolio of other T. Rowe Price stock and bond funds that represent various asset classes and sectors. Its allocation among T. Rowe Price mutual funds will change over time in relation to its target retirement date. The fund is managed based on the specific retirement year (target date 2025) included in its name and assumes a retirement age of 65.</p> <p>There is no assurance the objectives will be met.</p> <p><i>The target-date is the approximate year when investors plan to retire and may begin withdrawing their money. The asset allocation of the target-date funds will become more conservative as the target-date approaches by lessening your equity exposure and increasing your exposure in fixed income investments. The principal value of an investment in a target-date fund is not guaranteed at any time, including the target-date. There is no guarantee that the fund will provide adequate retirement income. A target-date fund should not be selected solely based on age or retirement date. Before investing, participants should carefully consider the fund's investment objectives, risks, charges and expenses, as well as their age, anticipated retirement date, risk tolerance, other investments owned, and planned withdrawals. The stated asset allocation may be subject to change. It is possible to lose money in a target-date fund, including losses near and following retirement. Investments in the funds are not deposits or obligations of any bank and are not insured or guaranteed by any governmental agency or instrumentality.</i></p>

Finders Fee	No	12b-1 Fee	0%
Sub-accounting fee (\$ per participant)	--	Sub-accounting fee %	0.15%
Other Service fee (\$ per participant)	--	Other Service fee %	0%

Market Timing: Frequent exchanging of investment options may harm long-term investors. Policies may be in effect at the plan or the investment level to detect and deter exchanges that may be abusive. Such policies may require us to modify, restrict, suspend or terminate purchase or exchange privileges and impose redemption fees. Please refer to the prospectus, if available for the investment, for information on these potential restrictions and any applicable redemption fees. Otherwise, please contact your Representative.

Fees if applicable to this fund, compensate Prudential Retirement for selling the fund's shares and servicing your retirement plan. The fund's expense ratio includes these fees. Other investment options may generate more or less revenue than the fees associated with this fund. If the aggregate revenue from your plan exceeds our associated costs, we earn a profit. Otherwise, we incur a loss. Other share classes of this fund may have a lower expense ratio, but your plan's investment options do not include such shares to compensate us for distribution and plan servicing.

Indices are unmanaged and cannot be invested in directly. See User Guide for index definitions. The index shown, if applicable, in the Characteristics chart refers to the primary index.

The performance quoted represents past performance. The investment value and return will fluctuate so that an investment, when redeemed, may be worth more or less than original cost. Past performance does not guarantee future results. Current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 1-877-778-2100. These performance results represent the change in net asset value of an investment over a stated period, assuming the reinvestment of dividends and capital gain distributions. Past performance is not indicative of future performance and short periods of performance may be particularly unrepresentative of long-term performance.

Morningstar Rating™ (Open End Mutual Funds, Closed End Mutual Funds, or Variable Annuity Underlying Funds)

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a funds' monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five-, and ten-year (if applicable) Morningstar Rating metrics. Past performance is no guarantee of future results.

Investors should consider the fund's investment objectives, risks, charges and expenses before investing. The prospectus, and if available the summary prospectus, contain complete information about the investment options available through your plan. Please call 1-877-778-2100 for a free prospectus and if available, a summary prospectus that contain this and other information about the mutual funds. You should read the prospectus and the summary prospectus, if available, carefully before investing. It is possible to lose money when investing in securities.

Securities products and services are offered through Prudential Investment Management Services LLC (PIMS), Newark, NJ, a Prudential Financial company.

Data presented is as of the period specified for this report, unless otherwise specified within a table heading. Data and expense ratios presented are the most current made available at the time of production. For mutual funds, the fund company may have more recent data available on its website. Price corrections that impact performance data may occur after production of this material.

12b-1 Fee An annual marketing or distribution fee on a mutual fund. The 12b-1 fee is considered an operational expense and, as such, is included in a fund's expense ratio. It is generally between 0.25-1% (the maximum allowed) of a fund's net assets.

3-Year Earnings Growth Rate (%) A measure of how a stock's earnings per share (EPS) has

grown over the last three years. Morningstar uses EPS from continuing operations to calculate this growth rate. For portfolios, this data point is the share-weighted collective earnings growth for all stocks in the current portfolio. The historical earnings growth rate can tell investors how quickly a company's profits are growing.

Finders Fee A commission paid to an entity who served as the facilitator of a transaction.

Gross Expense Ratio The Total Gross Expense Ratio represents the percentage of fund assets paid for operating expenses and management fees. It typically includes the following types of fees: accounting, administrator, advisor, auditor, board of directors, custodial, distribution (12b-1), legal, organizational, professional, registration, shareholder reporting, sub-advisor, and transfer agency. The expense ratio does not reflect the fund's brokerage costs, fee waivers, or investor sales charges. Expense data is typically quoted with two decimal places; however, three decimal places will be displayed when values are available.

Net Assets Balance data presented is the most current data available at the time of receipt, however some information may be presented on a lag. The data is deemed reliable but the accuracy cannot be guaranteed. All balances are unaudited.

Other Service fee % Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Other Service fee (\$ per participant) Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Portfolio Allocation The pie chart illustrates how investment holdings breakdown into primary investment types.

Portfolio Manager The name of the person(s) who determines which stocks, bonds and cash equivalents belong in the investment portfolio.

Price/Book Ratio Calculated as a weighted average of the price/book ratios of all stocks in the portfolio. This ratio is used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share. A lower P/B ratio could mean that the stock is undervalued. However, it could also mean that something is fundamentally wrong with the company. As with most ratios, be aware that this varies by industry.

Price/Earnings Ratio (Forward) The price of a stock divided by next year's earnings per share estimate. P/E multiples enable investors to compare the relative value of stocks within a portfolio; they show how much an investor must pay for a company's earning power. A lower portfolio P/E ratio indicates that the stocks in a portfolio are not highly-valued relative to the market. Growth-oriented investments tend to have higher P/E ratios than value-oriented investments as investors expect higher earnings growth from the underlying companies and are therefore willing to pay a premium price.

Sub-accounting fee % Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Sub-accounting fee (\$ per participant) Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Weighted Geometric Market Cap (\$Bil) Calculated by raising the market capitalization of each stock to a power equal to that stock's weight in the portfolio. The resulting numbers multiplied together produce the geometric mean of the market caps of the stocks in the portfolio.

Sub-accounting fee (\$ per participant)	--	Sub-accounting fee %	0.15%
Other Service fee (\$ per participant)	--	Other Service fee %	0%

Market Timing: Frequent exchanging of investment options may harm long-term investors. Policies may be in effect at the plan or the investment level to detect and deter exchanges that may be abusive. Such policies may require us to modify, restrict, suspend or terminate purchase or exchange privileges and impose redemption fees. Please refer to the prospectus, if available for the investment, for information on these potential restrictions and any applicable redemption fees. Otherwise, please contact your Representative.

Fees if applicable to this fund, compensate Prudential Retirement for selling the fund's shares and servicing your retirement plan. The fund's expense ratio includes these fees. Other investment options may generate more or less revenue than the fees associated with this fund. If the aggregate revenue from your plan exceeds our associated costs, we earn a profit. Otherwise, we incur a loss. Other share classes of this fund may have a lower expense ratio, but your plan's investment options do not include such shares to compensate us for distribution and plan servicing.

Indices are unmanaged and cannot be invested in directly. See User Guide for index definitions. The index shown, if applicable, in the Characteristics chart refers to the primary index.

The performance quoted represents past performance. The investment value and return will fluctuate so that an investment, when redeemed, may be worth more or less than original cost. Past performance does not guarantee future results. Current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 1-877-778-2100. These performance results represent the change in net asset value of an investment over a stated period, assuming the reinvestment of dividends and capital gain distributions. Past performance is not indicative of future performance and short periods of performance may be particularly unrepresentative of long-term performance.

Morningstar Rating™ (Open End Mutual Funds, Closed End Mutual Funds, or Variable Annuity Underlying Funds)

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a funds' monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five-, and ten-year (if applicable) Morningstar Rating metrics. Past performance is no guarantee of future results.

Investors should consider the fund's investment objectives, risks, charges and expenses before investing. The prospectus, and if available the summary prospectus, contain complete information about the investment options available through your plan. Please call 1-877-778-2100 for a free prospectus and if available, a summary prospectus that contain this and other information about the mutual funds. You should read the prospectus and the summary prospectus, if available, carefully before investing. It is possible to lose money when investing in securities.

Securities products and services are offered through Prudential Investment Management Services LLC (PIMS), Newark, NJ, a Prudential Financial company.

Data presented is as of the period specified for this report, unless otherwise specified within a table heading. Data and expense ratios presented are the most current made available at the time of production. For mutual funds, the fund company may have more recent data available on its website. Price corrections that impact performance data may occur after production of this material.

12b-1 Fee An annual marketing or distribution fee on a mutual fund. The 12b-1 fee is considered an operational expense and, as such, is included in a fund's expense ratio. It is generally between 0.25-1% (the maximum allowed) of a fund's net assets.

3-Year Earnings Growth Rate (%) A measure of how a stock's earnings per share (EPS) has

grown over the last three years. Morningstar uses EPS from continuing operations to calculate this growth rate. For portfolios, this data point is the share-weighted collective earnings growth for all stocks in the current portfolio. The historical earnings growth rate can tell investors how quickly a company's profits are growing.

Finders Fee A commission paid to an entity who served as the facilitator of a transaction.

Gross Expense Ratio The Total Gross Expense Ratio represents the percentage of fund assets paid for operating expenses and management fees. It typically includes the following types of fees: accounting, administrator, advisor, auditor, board of directors, custodial, distribution (12b-1), legal, organizational, professional, registration, shareholder reporting, sub-advisor, and transfer agency. The expense ratio does not reflect the fund's brokerage costs, fee waivers, or investor sales charges. Expense data is typically quoted with two decimal places; however, three decimal places will be displayed when values are available.

Net Assets Balance data presented is the most current data available at the time of receipt, however some information may be presented on a lag. The data is deemed reliable but the accuracy cannot be guaranteed. All balances are unaudited.

Other Service fee % Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Other Service fee (\$ per participant) Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Portfolio Allocation The pie chart illustrates how investment holdings breakdown into primary investment types.

Portfolio Manager The name of the person(s) who determines which stocks, bonds and cash equivalents belong in the investment portfolio.

Price/Book Ratio Calculated as a weighted average of the price/book ratios of all stocks in the portfolio. This ratio is used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share. A lower P/B ratio could mean that the stock is undervalued. However, it could also mean that something is fundamentally wrong with the company. As with most ratios, be aware that this varies by industry.

Price/Earnings Ratio (Forward) The price of a stock divided by next year's earnings per share estimate. P/E multiples enable investors to compare the relative value of stocks within a portfolio; they show how much an investor must pay for a company's earning power. A lower portfolio P/E ratio indicates that the stocks in a portfolio are not highly-valued relative to the market. Growth-oriented investments tend to have higher P/E ratios than value-oriented investments as investors expect higher earnings growth from the underlying companies and are therefore willing to pay a premium price.

Sub-accounting fee % Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Sub-accounting fee (\$ per participant) Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Weighted Geometric Market Cap (\$Bil) Calculated by raising the market capitalization of each stock to a power equal to that stock's weight in the portfolio. The resulting numbers multiplied together produce the geometric mean of the market caps of the stocks in the portfolio.

T. Rowe Price Retirement 2040 Fund

A Mutual Fund

First Quarter 2023 Fund Fact Sheet

Key Facts		Description / Objective
Investment Advisor	T. Rowe Price Associates, Inc.	<p>The investment seeks the highest total return over time consistent with an emphasis on both capital growth and income. The fund invests in a diversified portfolio of other T. Rowe Price stock and bond mutual funds that represent various asset classes and sectors. Its allocation among T. Rowe Price mutual funds will change over time in relation to its target retirement date. The fund is managed based on the specific retirement year (target date 2040) included in its name and assumes a retirement age of 65.</p> <p>There is no assurance the objectives will be met.</p> <p><i>The target-date is the approximate year when investors plan to retire and may begin withdrawing their money. The asset allocation of the target-date funds will become more conservative as the target-date approaches by lessening your equity exposure and increasing your exposure in fixed income investments. The principal value of an investment in a target-date fund is not guaranteed at any time, including the target-date. There is no guarantee that the fund will provide adequate retirement income. A target-date fund should not be selected solely based on age or retirement date. Before investing, participants should carefully consider the fund's investment objectives, risks, charges and expenses, as well as their age, anticipated retirement date, risk tolerance, other investments owned, and planned withdrawals. The stated asset allocation may be subject to change. It is possible to lose money in a target-date fund, including losses near and following retirement. Investments in the funds are not deposits or obligations of any bank and are not insured or guaranteed by any governmental agency or instrumentality.</i></p>

Portfolio Manager The name of the person(s) who determines which stocks, bonds and cash equivalents belong in the investment portfolio.

Price/Book Ratio Calculated as a weighted average of the price/book ratios of all stocks in the portfolio. This ratio is used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share. A lower P/B ratio could mean that the stock is undervalued. However, it could also mean that something is fundamentally wrong with the company. As with most ratios, be aware that this varies by industry.

Price/Earnings Ratio (Forward) The price of a stock divided by next year's earnings per share estimate. P/E multiples enable investors to compare the relative value of stocks within a portfolio; they show how much an investor must pay for a company's earning power. A lower portfolio P/E ratio indicates that the stocks in a portfolio are not highly-valued relative to the market. Growth-oriented investments tend to have higher P/E ratios than value-oriented investments as investors expect higher earnings growth from the underlying companies and are therefore willing to pay a premium price.

Sub-accounting fee % Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Sub-accounting fee (\$ per participant) Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Weighted Geometric Market Cap (\$Bil) Calculated by raising the market capitalization of each stock to a power equal to that stock's weight in the portfolio. The resulting numbers multiplied together produce the geometric mean of the market caps of the stocks in the portfolio.

T. Rowe Price Retirement 2050 Fund

A Mutual Fund

First Quarter 2023 Fund Fact Sheet

Key Facts		Description / Objective
Investment Advisor	T. Rowe Price Associates, Inc.	<p>The investment seeks the highest total return over time consistent with an emphasis on both capital growth and income. The fund invests in a diversified portfolio of other T. Rowe Price stock and bond mutual funds that represent various asset classes and sectors. Its allocation among T. Rowe Price mutual funds will change over time in relation to its target retirement date. The fund is managed based on the specific retirement year (target date 2050) included in its name and assumes a retirement age of 65.</p> <p>There is no assurance the objectives will be met.</p> <p><i>The target-date is the approximate year when investors plan to retire and may begin withdrawing their money. The asset allocation of the target-date funds will become more conservative as the target-date approaches by lessening your equity exposure and increasing your exposure in fixed income investments. The principal value of an investment in a target-date fund is not guaranteed at any time, including the target-date. There is no guarantee that the fund will provide adequate retirement income. A target-date fund should not be selected solely based on age or retirement date. Before investing, participants should carefully consider the fund's investment objectives, risks, charges and expenses, as well as their age, anticipated retirement date, risk tolerance, other investments owned, and planned withdrawals. The stated asset allocation may be subject to change. It is possible to lose money in a target-date fund, including losses near and following retirement. Investments in the funds are not deposits or obligations of any bank and are not insured or guaranteed by any governmental agency or instrumentality.</i></p>

Finders Fee	No	12b-1 Fee	0%
Sub-accounting fee (\$ per participant)	--	Sub-accounting fee %	0.15%
Other Service fee (\$ per participant)	--	Other Service fee %	0%

Market Timing: Frequent exchanging of investment options may harm long-term investors. Policies may be in effect at the plan or the investment level to detect and deter exchanges that may be abusive. Such policies may require us to modify, restrict, suspend or terminate purchase or exchange privileges and impose redemption fees. Please refer to the prospectus, if available for the investment, for information on these potential restrictions and any applicable redemption fees. Otherwise, please contact your Representative.

Fees if applicable to this fund, compensate Prudential Retirement for selling the fund's shares and servicing your retirement plan. The fund's expense ratio includes these fees. Other investment options may generate more or less revenue than the fees associated with this fund. If the aggregate revenue from your plan exceeds our associated costs, we earn a profit. Otherwise, we incur a loss. Other share classes of this fund may have a lower expense ratio, but your plan's investment options do not include such shares to compensate us for distribution and plan servicing.

Indices are unmanaged and cannot be invested in directly. See User Guide for index definitions. The index shown, if applicable, in the Characteristics chart refers to the primary index.

The performance quoted represents past performance. The investment value and return will fluctuate so that an investment, when redeemed, may be worth more or less than original cost. Past performance does not guarantee future results. Current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 1-877-778-2100. These performance results represent the change in net asset value of an investment over a stated period, assuming the reinvestment of dividends and capital gain distributions. Past performance is not indicative of future performance and short periods of performance may be particularly unrepresentative of long-term performance.

Morningstar Rating™ (Open End Mutual Funds, Closed End Mutual Funds, or Variable Annuity Underlying Funds)

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a funds' monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five-, and ten-year (if applicable) Morningstar Rating metrics. Past performance is no guarantee of future results.

Investors should consider the fund's investment objectives, risks, charges and expenses before investing. The prospectus, and if available the summary prospectus, contain complete information about the investment options available through your plan. Please call 1-877-778-2100 for a free prospectus and if available, a summary prospectus that contain this and other information about the mutual funds. You should read the prospectus and the summary prospectus, if available, carefully before investing. It is possible to lose money when investing in securities.

Securities products and services are offered through Prudential Investment Management Services LLC (PIMS), Newark, NJ, a Prudential Financial company.

Data presented is as of the period specified for this report, unless otherwise specified within a table heading. Data and expense ratios presented are the most current made available at the time of production. For mutual funds, the fund company may have more recent data available on its website. Price corrections that impact performance data may occur after production of this material.

12b-1 Fee An annual marketing or distribution fee on a mutual fund. The 12b-1 fee is considered an operational expense and, as such, is included in a fund's expense ratio. It is generally between 0.25-1% (the maximum allowed) of a fund's net assets.

3-Year Earnings Growth Rate (%) A measure of how a stock's earnings per share (EPS) has

grown over the last three years. Morningstar uses EPS from continuing operations to calculate this growth rate. For portfolios, this data point is the share-weighted collective earnings growth for all stocks in the current portfolio. The historical earnings growth rate can tell investors how quickly a company's profits are growing.

Finders Fee A commission paid to an entity who served as the facilitator of a transaction.

Gross Expense Ratio The Total Gross Expense Ratio represents the percentage of fund assets paid for operating expenses and management fees. It typically includes the following types of fees: accounting, administrator, advisor, auditor, board of directors, custodial, distribution (12b-1), legal, organizational, professional, registration, shareholder reporting, sub-advisor, and transfer agency. The expense ratio does not reflect the fund's brokerage costs, fee waivers, or investor sales charges. Expense data is typically quoted with two decimal places; however, three decimal places will be displayed when values are available.

Net Assets Balance data presented is the most current data available at the time of receipt, however some information may be presented on a lag. The data is deemed reliable but the accuracy cannot be guaranteed. All balances are unaudited.

Other Service fee % Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Other Service fee (\$ per participant) Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Portfolio Allocation The pie chart illustrates how investment holdings breakdown into primary investment types.

Portfolio Manager The name of the person(s) who determines which stocks, bonds and cash equivalents belong in the investment portfolio.

Price/Book Ratio Calculated as a weighted average of the price/book ratios of all stocks in the portfolio. This ratio is used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share. A lower P/B ratio could mean that the stock is undervalued. However, it could also mean that something is fundamentally wrong with the company. As with most ratios, be aware that this varies by industry.

Price/Earnings Ratio (Forward) The price of a stock divided by next year's earnings per share estimate. P/E multiples enable investors to compare the relative value of stocks within a portfolio; they show how much an investor must pay for a company's earning power. A lower portfolio P/E ratio indicates that the stocks in a portfolio are not highly-valued relative to the market. Growth-oriented investments tend to have higher P/E ratios than value-oriented investments as investors expect higher earnings growth from the underlying companies and are therefore willing to pay a premium price.

Sub-accounting fee % Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Sub-accounting fee (\$ per participant) Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Weighted Geometric Market Cap (\$Bil) Calculated by raising the market capitalization of each stock to a power equal to that stock's weight in the portfolio. The resulting numbers multiplied together produce the geometric mean of the market caps of the stocks in the portfolio.

Description / Objective

The investment seeks long-term capital growth, consistent with preservation of capital and balanced by current income. The fund pursues its investment objective by normally investing 35-65% of its assets in equity securities and the remaining assets in fixed-income securities and cash equivalents. It normally invests at least 25% of its assets in fixed-income senior securities. The fund may also invest in money market instruments. It may invest in fixed and floating rate obligations with varying durations. The fund will limit its investments in high-yield/high-risk bonds to 35% of the fixed-income portion of its net assets.

There is no assurance the objectives will be met.

Keep in mind that application of asset allocation and diversification concepts does not assure a profit or protect against loss in a declining market. It is possible to lose money by investing in securities.

Fixed income investments are subject to interest rate risk and their value will decline as interest rates rise. It is possible to lose money by investing in securities.

Other investment options may generate more or less revenue than the fees associated with this fund. If the aggregate revenue from your plan exceeds our associated costs, we earn a profit. Otherwise, we incur a loss. Other share classes of this fund may have a lower expense ratio, but your plan's investment options do not include such shares to compensate us for distribution and plan servicing.

The performance quoted represents past performance. The investment value and return will fluctuate so that an investment, when redeemed, may be worth more or less than original cost. Past performance does not guarantee future results. Current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 1-877-778-2100. These performance results represent the change in net asset value of an investment over a stated period, assuming the reinvestment of dividends and capital gain distributions. Past performance is not indicative of future performance and short periods of performance may be particularly unrepresentative of long-term performance.

Morningstar Rating™ (Open End Mutual Funds, Closed End Mutual Funds, or Variable Annuity)

First Quarter 2023 Fund Fact Sheet - Page 2

Annual Performance

	Fund	Primary Index	Broad Based Index
2022	-16.55%	-22.28%	-14.77%
2021	17.24%	15.42%	10.19%
2020	14.39%	27.18%	12.82%
2019	22.59%	24.95%	19.03%
2018	0.70%	-0.41%	-4.76%

Underlying Funds)

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a funds' monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five-, and ten-year (if applicable) Morningstar Rating metrics. Past performance is no guarantee of future results. **Investors should consider the fund's investment objectives, risks, charges and expenses before investing. The prospectus, and if available the summary prospectus, contain complete information about the investment options available through your plan. Please call 1-877-778-2100 for a free prospectus and if available, a summary prospectus that contain this and other information about the mutual funds. You should read the prospectus and the summary prospectus, if available, carefully before investing. It is possible to lose money when investing in securities.**

Market Timing: Frequent exchanging of investment options may harm long-term investors. Policies may be in effect at the plan or the investment level to detect and deter exchanges that may be abusive. Such policies may require us to modify, restrict, suspend or terminate purchase or exchange privileges and impose redemption fees. Please refer to the prospectus, if available for the investment, for information on these potential restrictions and any applicable redemption fees. Otherwise, please contact your Representative.

Indices are unmanaged and cannot be invested in directly. See User Guide for index definitions. The index shown, if applicable, in the Characteristics chart refers to the primary index.

Securities products and services are offered through Prudential Investment Management Services LLC (PIMS), Newark, NJ, a Prudential Financial company.

Data presented is as of the period specified for this report, unless otherwise specified within a table heading. Data and expense ratios presented are the most current made available at the time of production. For mutual funds, the fund company may have more recent data available on its website. Price corrections that impact performance data may occur after production of this material.

12b-1 Fee An annual marketing or distribution fee on a mutual fund. The 12b-1 fee is considered an operational expense and, as such, is included in a fund's expense ratio. It is generally between 0.25-1% (the maximum allowed) of a fund's net assets.

3-Year Earnings Growth Rate (%) A measure of how a stock's earnings per share (EPS) has grown over the last three years. Morningstar uses EPS from continuing operations to calculate this growth rate. For portfolios, this data point is the share-weighted collective earnings growth for all stocks in the current portfolio. The historical earnings growth rate can tell investors how quickly a company's profits are growing.

Finders Fee A commission paid to an entity who served as the facilitator of a transaction.

Gross Expense Ratio The Total Gross Expense Ratio represents the percentage of fund assets paid for operating expenses and management fees. It typically includes the following types of fees: accounting, administrator, advisor, auditor, board of directors, custodial, distribution (12b-1), legal, organizational, professional, registration, shareholder reporting, sub-advisor, and transfer agency. The expense ratio does not reflect the fund's brokerage costs, fee waivers, or investor sales charges. Expense data is typically quoted with two decimal places; however, three decimal places will be displayed when values are available.

Net Assets Balance data presented is the most current data available at the time of receipt, however some information may be presented on a lag. The data is deemed reliable but the accuracy cannot be guaranteed. All balances are unaudited.

Other Service fee % Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Other Service fee (\$ per participant) Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Portfolio Allocation The pie chart illustrates how investment holdings breakdown into primary investment types.

Portfolio Manager The name of the person(s) who determines which stocks, bonds and cash equivalents belong in the investment portfolio.

Price/Book Ratio Calculated as a weighted average of the price/book ratios of all stocks in the portfolio. This ratio is used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share. A lower P/B ratio could mean that the stock is undervalued. However, it could also mean that something is fundamentally wrong with the company. As with most ratios, be aware that this varies by industry.

Price/Earnings Ratio (Forward) The price of a stock divided by next year's earnings per share estimate. P/E multiples enable investors to compare the relative value of stocks within a portfolio;

they show how much an investor must pay for a company's earning power. A lower portfolio P/E ratio indicates that the stocks in a portfolio are not highly-valued relative to the market. Growth-oriented investments tend to have higher P/E ratios than value-oriented investments as investors expect higher earnings growth from the underlying companies and are therefore willing to pay a premium price.

Sub-accounting fee % Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Sub-accounting fee (\$ per participant) Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Weighted Geometric Market Cap (\$Bil) Calculated by raising the market capitalization of each stock to a power equal to that stock's weight in the portfolio. The resulting numbers multiplied together produce the geometric mean of the market caps of the stocks in the portfolio.

Morningstar Volatility Rank As of 03/31/2023

In the past, this investment has shown a relatively moderate range of price fluctuations relative to other investments. This investment may experience larger or smaller price declines or price increases depending on market conditions. Some of this risk may be offset by owning other investments with different portfolio make-ups or investment strategies.

Morningstar® Style Box™ As of 12/31/2022

Value	Blend	Growth	Domestic equity funds are placed in a category based on the style and size of the stocks they typically own. The style and size parameters are based on the divisions used in the
●			Large
			Mid
			Small

investment style box: Value, Blend, or Growth style and Small, Medium, or Large geometric average market capitalization.

Description / Objective

The investment seeks a high level of dividend income and long-term capital growth primarily through investments in stocks. The fund will normally invest at least 80% of its net assets (including any borrowings for investment purposes) in common stocks, with an emphasis on large-capitalization stocks that have a strong track record of paying dividends or that are believed to be undervalued. The adviser generally seeks investments in large-capitalization companies and the fund's yield, which reflects the level of dividends paid by the fund, is expected to normally exceed the yield of the Russell 1000® Value Index.

There is no assurance the objectives will be met.

Investments in large cap funds are subject to market fluctuations and may lose value. The investment risks associated with these funds may be impacted by a variety of factors, including investment style, objective, holdings, and focus in particular industries. On average, investments in large cap funds may be considered more conservative than investments in small and mid-cap funds, potentially posing less overall volatility in exchange for less aggressive growth potential.

Description / Objective
 The investment seeks long-term growth of capital and income. The fund invests primarily in common stocks of companies that appear to offer superior opportunities for capital growth and most of which have a history of paying dividends. It may invest significantly in securities of issuers domiciled outside the United States. The investment adviser uses a system of multiple portfolio managers in managing the fund's assets.

There is no assurance the objectives will be met.

Investments in large cap funds are subject to market fluctuations and may lose value. The investment risks associated with these funds may be impacted by a variety of factors, including investment style, objective, holdings, and focus in particular industries. Portfolio Manager(s)	Michelle Louie CFA; Donald M. Butler CFA

Description / Objective

The investment seeks to track the performance of the S&P 500 Index that measures the investment return of large-capitalization stocks. The fund employs an indexing investment approach designed to track the performance of the S&P 500 Index, a widely recognized benchmark of U.S. stock market performance that is dominated by the stocks of large U.S. companies. The advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

There is no assurance the objectives will be met.

Investments in large cap funds are subject to market fluctuations and may lose value. The investment risks associated with these funds may be impacted by a variety of factors, including investment style, objective, holdings, and focus in particular industries. On average, investments in large cap funds may be considered more conservative than investments in small and mid-cap funds, potentially posing less overall volatility in exchange for less aggressive growth potential.

Overall Morningstar Rating as of quarter ending 3/31/2023. The Morningstar Rating shown is for the share class of this fund only; other classes may have different performance characteristics. ©2023 Morningstar, Inc. All Rights Reserved. Additional Morningstar information is available in this factsheet.

*Fees that Prudential Retirement and its affiliates may receive in connection with plan investments in this fund include:

Finders Fee	No	12b-1 Fee	0%
Sub-accounting fee (\$ per participant)	--	Sub-accounting fee %	0%
Other Service fee (\$ per participant)	--	Other Service fee %	0%

Market Timing: Frequent exchanging of investment options may harm long-term investors. Policies may be in effect at the plan or the investment level to detect and deter exchanges that may be abusive. Such policies may require us to modify, restrict, suspend or terminate purchase or exchange privileges and impose redemption fees. Please refer to the prospectus, if available for the investment, for information on these potential restrictions and any applicable redemption fees. Otherwise, please contact your Representative.

Fees if applicable to this fund, compensate Prudential Retirement for selling the fund's shares and servicing your retirement plan. The fund's expense ratio includes these fees. Other investment options may generate more or less revenue than the fees associated with this fund. If the aggregate revenue from your plan exceeds our associated costs, we earn a profit. Otherwise, we incur a loss. Other share classes of this fund may have a lower expense ratio, but your plan's investment options do not include such shares to compensate us for distribution and plan servicing.

The performance quoted represents past performance. The investment value and return will fluctuate so that an investment, when redeemed, may be worth more or less than original cost. Past performance does not guarantee future results. Current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 1-877-778-2100. These performance results represent the change in net asset value of an investment over a stated period, assuming the reinvestment of dividends and capital gain distributions. Past performance is not indicative of future performance and short periods of performance may be particularly unrepresentative of long-term performance.

Indices are unmanaged and cannot be invested in directly. See User Guide for index definitions. The index shown, if applicable, in the Characteristics chart refers to the primary index.

Morningstar Rating™ (Open End Mutual Funds, Closed End Mutual Funds, or Variable Annuity Underlying Funds)

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a funds' monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five-, and ten-year (if applicable) Morningstar Rating metrics. Past performance is no guarantee of future results. **Investors should consider the fund's investment objectives, risks, charges and expenses before investing. The prospectus, and if available the summary prospectus, contain complete information about the investment options available through your plan. Please call 1-877-778-2100 for a free prospectus and if available, a summary prospectus that contain this and other information about the mutual funds. You should read the prospectus and the summary prospectus, if available, carefully before investing. It is possible to lose money when investing in securities.**

Securities products and services are offered through Prudential Investment Management Services LLC (PIMS), Newark, NJ, a Prudential Financial company.

Data presented is as of the period specified for this report, unless otherwise specified within a table heading. Data and expense ratios presented are the most current made available at the time of production. For mutual funds, the fund company may have more recent data available on its website. Price corrections that impact performance data may occur after production of this material.

12b-1 Fee An annual marketing or distribution fee on a mutual fund. The 12b-1 fee is considered an operational expense and, as such, is included in a fund's expense ratio. It is generally between 0.25-1% (the maximum allowed) of a fund's net assets.

3-Year Earnings Growth Rate (%) A measure of how a stock's earnings per share (EPS) has grown over the last three years. Morningstar uses EPS from continuing operations to calculate this growth rate. For portfolios, this data point is the share-weighted collective earnings growth for all stocks in the current portfolio. The historical earnings growth rate can tell investors how quickly a company's profits are growing.

Finders Fee A commission paid to an entity who served as the facilitator of a transaction.

Gross Expense Ratio The Total Gross Expense Ratio represents the percentage of fund assets paid for operating expenses and management fees. It typically includes the following types of fees: accounting, administrator, advisor, auditor, board of directors, custodial, distribution (12b-1), legal, organizational, professional, registration, shareholder reporting, sub-advisor, and transfer agency. The expense ratio does not reflect the fund's brokerage costs, fee waivers, or investor sales charges. Expense data is typically quoted with two decimal places; however, three decimal places will be displayed when values are available.

Net Assets Balance data presented is the most current data available at the time of receipt, however some information may be presented on a lag. The data is deemed reliable but the accuracy cannot be guaranteed. All balances are unaudited.

Other Service fee % Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Other Service fee (\$ per participant) Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Portfolio Allocation The pie chart illustrates how investment holdings breakdown into primary investment types.

Portfolio Manager The name of the person(s) who determines which stocks, bonds and cash equivalents belong in the investment portfolio.

Price/Book Ratio Calculated as a weighted average of the price/book ratios of all stocks in the portfolio. This ratio is used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share. A lower P/B ratio could mean that the stock is undervalued. However, it could also mean that something is fundamentally wrong with the company. As with most ratios, be aware that this varies by industry.

Price/Earnings Ratio (Forward) The price of a stock divided by next year's earnings per share estimate. P/E multiples enable investors to compare the relative value of stocks within a portfolio; they show how much an investor must pay for a company's earning power. A lower portfolio P/E ratio indicates that the stocks in a portfolio are not highly-valued relative to the market. Growth-oriented investments tend to have higher P/E ratios than value-oriented investments as investors expect higher earnings growth from the underlying companies and are therefore willing to pay a premium price.

Sub-accounting fee % Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Sub-accounting fee (\$ per participant) Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Weighted Geometric Market Cap (\$Bil) Calculated by raising the market capitalization of each stock to a power equal to that stock's weight in the portfolio. The resulting numbers multiplied together produce the geometric mean of the market caps of the stocks in the portfolio.

Description / Objective
 The investment seeks long-term capital appreciation. Under normal circumstances, at least 80% of the fund's assets will be invested in the equity securities of large, well-established companies. "Assets" means net assets, plus the amount of borrowings for investment purposes. Large, well-established companies are companies with market capitalizations equal to those within the universe of the Russell 1000® Growth Index at the time of purchase.
 There is no assurance the objectives will be met.
Investments in large cap funds are subject to market fluctuations and may lose value. The investment risks associated with these funds may be impacted by a variety of factors, including investment style, objective, holdings, and focus in particular industries. On average, investments in large cap funds may be considered more conservative than investments in small and mid-cap funds, potentially posing less overall volatility in exchange for less aggressive growth potential.

Description / Objective

The investment seeks long-term capital appreciation and income. The fund invests mainly in the stocks of mid-size U.S. companies, choosing stocks considered by an advisor to be undervalued. Undervalued stocks are generally those that are out of favor with investors and are trading at prices that the advisor believes are below average in relation to measures such as earnings and book value. These stocks often have above-average dividend yields. It uses multiple investment advisors.

There is no assurance the objectives will be met.

Small and mid-sized companies may present greater opportunities for capital appreciation, but may also involve greater risks than larger companies. As a result, the value of stocks issued by these companies may fluctuate more than stocks of larger issuers.

Past performance is no guarantee of future results. **Investors should consider the fund's investment objectives, risks, charges and expenses before investing. The prospectus, and if available the summary prospectus, contain complete information about the investment options available through your plan. Please call 1-877-778-2100 for a free prospectus and if available, a summary prospectus that contain this and other information about the mutual funds. You should read the prospectus and the summary prospectus, if available, carefully before investing. It is possible to lose money when investing in securities.**

Securities products and services are offered through Prudential Investment Management Services LLC (PIMS), Newark, NJ, a Prudential Financial company.

Data presented is as of the period specified for this report, unless otherwise specified within a table heading. Data and expense ratios presented are the most current made available at the time of production. For mutual funds, the fund company may have more recent data available on its website. Price corrections that impact performance data may occur after production of this material.

12b-1 Fee An annual marketing or distribution fee on a mutual fund. The 12b-1 fee is considered an operational expense and, as such, is included in a fund's expense ratio. It is generally between 0.25-1% (the maximum allowed) of a fund's net assets.

3-Year Earnings Growth Rate (%) A measure of how a stock's earnings per share (EPS) has grown over the last three years. Morningstar uses EPS from continuing operations to calculate this growth rate. For portfolios, this data point is the share-weighted collective earnings growth for all stocks in the current portfolio. The historical earnings growth rate can tell investors how quickly a company's profits are growing.

Finders Fee A commission paid to an entity who served as the facilitator of a transaction.

Gross Expense Ratio The Total Gross Expense Ratio represents the percentage of fund assets paid for operating expenses and management fees. It typically includes the following types of fees: accounting, administrator, advisor, auditor, board of directors, custodial, distribution (12b-1), legal, organizational, professional, registration, shareholder reporting, sub-advisor, and transfer agency. The expense ratio does not reflect the fund's brokerage costs, fee waivers, or investor sales charges. Expense data is typically quoted with two decimal places; however, three decimal places will be displayed when values are available.

Net Assets Balance data presented is the most current data available at the time of receipt, however some information may be presented on a lag. The data is deemed reliable but the accuracy cannot be guaranteed. All balances are unaudited.

Other Service fee % Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Other Service fee (\$ per participant) Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Portfolio Allocation The pie chart illustrates how investment holdings breakdown into primary investment types.

Portfolio Manager The name of the person(s) who determines which stocks, bonds and cash equivalents belong in the investment portfolio.

Price/Book Ratio Calculated as a weighted average of the price/book ratios of all stocks in the portfolio. This ratio is used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share. A lower P/B ratio could mean that the stock is undervalued. However, it could also mean that something is fundamentally wrong with the company. As with most ratios, be aware that this varies by industry.

Price/Earnings Ratio (Forward) The price of a stock divided by next year's earnings per share estimate. P/E multiples enable investors to compare the relative value of stocks within a portfolio; they show how much an investor must pay for a company's earning power. A lower portfolio P/E ratio indicates that the stocks in a portfolio are not highly-valued relative to the market. Growth-

oriented investments tend to have higher P/E ratios than value-oriented investments as investors expect higher earnings growth from the underlying companies and are therefore willing to pay a premium price.

Sub-accounting fee % Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Sub-accounting fee (\$ per participant) Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Weighted Geometric Market Cap (\$Bil) Calculated by raising the market capitalization of each stock to a power equal to that stock's weight in the portfolio. The resulting numbers multiplied together produce the geometric mean of the market caps of the stocks in the portfolio.

Morningstar Volatility Rank As of 03/31/2023

In the past, this investment has shown a wide range of price fluctuations relative to other investments. This investment may experience significant price increases in favorable markets or undergo large price declines in adverse markets. Some of this risk may be offset by owning other investments that follow different investment strategies.

Morningstar® Style Box™ As of 02/28/2023

investment style box: Value, Blend, or Growth style and Small, Medium, or Large geometric average market capitalization.

Description / Objective

The investment seeks to track the performance of the CRSP US Mid Cap Index that measures the investment return of mid-capitalization stocks. The fund employs an indexing investment approach designed to track the performance of the CRSP US Mid Cap Index, a broadly diversified index of stocks of mid-size U.S. companies. The advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

There is no assurance the objectives will be met.

Small and mid-sized companies may present greater opportunities for capital appreciation, but may also involve greater risks than larger companies. As a result, the value of stocks issued by these companies may fluctuate more than stocks of larger issuers.

*Fees that Prudential Retirement and its affiliates may receive in connection with plan investments in this fund include:

	No	12b-1 Fee	0%
Finders Fee			
Sub-accounting fee (\$ per participant)	--	Sub-accounting fee %	0%
Other Service fee (\$ per participant)	--	Other Service fee %	0%

Fees if applicable to this fund, compensate Prudential Retirement for selling the fund's shares and servicing your retirement plan. The fund's expense ratio includes these fees. Other investment options may generate more or less revenue than the fees associated with this fund. If the aggregate revenue from your plan exceeds our associated costs, we earn a profit. Otherwise, we incur a loss. Other share classes of this fund may have a lower expense ratio, but your plan's investment options do not include such shares to compensate us for distribution and plan servicing.

The performance quoted represents past performance. The investment value and return will fluctuate so that an investment, when redeemed, may be worth more or less than original cost. Past performance does not guarantee future results. Current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 1-877-778-2100. These performance results represent the change in net asset value of an investment over a stated period, assuming the reinvestment of dividends and capital gain distributions. Past performance is not indicative of future performance and short periods of performance may be particularly unrepresentative of long-term performance.

Morningstar Rating™ (Open End Mutual Funds, Closed End Mutual Funds, or Variable Annuity Underlying Funds)

Vanguard Mid-Cap Index Fund Admiral Shares

A Mutual Fund

First Quarter 2023 Fund Fact Sheet - Page 2

Annual Performance			
	Fund	Primary Index	Broad Based Index
2022	-18.71%	-18.68%	-17.32%
2021	24.51%	24.52%	22.58%
2020	18.24%	18.24%	17.10%
2019	31.03%	31.09%	30.54%
2018	-9.23%	-9.22%	-9.06%

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a funds' monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five-, and ten-year (if applicable) Morningstar Rating metrics. Past performance is no guarantee of future results. **Investors should consider the fund's investment objectives, risks, charges and expenses before investing. The prospectus, and if available the summary prospectus, contain complete information about the investment options available through your plan. Please call 1-877-778-2100 for a free prospectus and if available, a summary prospectus that contain this and other information about the mutual funds. You should read the prospectus and the summary prospectus, if available, carefully before investing. It is possible to lose money when investing in securities.**

Market Timing: Frequent exchanging of investment options may harm long-term investors. Policies may be in effect at the plan or the investment level to detect and deter exchanges that may be abusive. Such policies may require us to modify, restrict, suspend or terminate purchase or exchange privileges and impose redemption fees. Please refer to the prospectus, if available for the investment, for information on these potential restrictions and any applicable redemption fees. Otherwise, please contact your Representative.

Securities products and services are offered through Prudential Investment Management Services LLC (PIMS), Newark, NJ, a Prudential Financial company.

Description / Objective
 The investment seeks long-term capital appreciation. The fund normally invests at least 80% of its net assets (including any borrowings for investment purposes) in a diversified portfolio of common stocks of mid-cap companies whose earnings T. Rowe Price expects to grow at a faster rate than the average company. The advisor defines mid-cap companies as those whose market capitalization falls within the range of either the S&P MidCap 400® Index or the Russell Midcap® Growth Index.
 There is no assurance the objectives will be met.
Small and mid-sized companies may present greater opportunities for capital appreciation, but may also involve greater risks than larger companies. As a result, the value of stocks issued by these companies may fluctuate more than stocks of larger issuers.

Description / Objective

The investment seeks long-term capital appreciation and current income. Under normal circumstances, at least 80% of the fund's net assets (plus the amount of any borrowings for investment purposes) are invested in equity securities of small market capitalization U.S. companies. These companies have market capitalizations of \$5 billion or less at the time of investment.

There is no assurance the objectives will be met.

Small and mid-sized companies may present greater opportunities for capital appreciation, but may also involve greater risks than larger companies. As a result, the value of stocks issued by these companies may fluctuate more than stocks of larger issuers.

Finders Fee	No	12b-1 Fee	0%
Sub-accounting fee (\$ per participant)	--	Sub-accounting fee %	0%
Other Service fee (\$ per participant)	--	Other Service fee %	0%

Market Timing: Frequent exchanging of investment options may harm long-term investors. Policies may be in effect at the plan or the investment level to detect and deter exchanges that may be abusive. Such policies may require us to modify, restrict, suspend or terminate purchase or exchange privileges and impose redemption fees. Please refer to the prospectus, if available for the investment, for information on these potential restrictions and any applicable redemption fees. Otherwise, please contact your Representative.

Fees if applicable to this fund, compensate Prudential Retirement for selling the fund's shares and servicing your retirement plan. The fund's expense ratio includes these fees. Other investment options may generate more or less revenue than the fees associated with this fund. If the aggregate revenue from your plan exceeds our associated costs, we earn a profit. Otherwise, we incur a loss. Other share classes of this fund may have a lower expense ratio, but your plan's investment options do not include such shares to compensate us for distribution and plan servicing.

Indices are unmanaged and cannot be invested in directly. See User Guide for index definitions. The index shown, if applicable, in the Characteristics chart refers to the primary index.

Performance displayed for periods beginning earlier than the "Inception Date" is based on the historical returns of the oldest share class of the fund, adjusted to reflect the fees and expenses of this share class. "Since Inception" performance when shown is based on the actual performance of this share class.

The performance quoted represents past performance. The investment value and return will fluctuate so that an investment, when redeemed, may be worth more or less than original cost. Past performance does not guarantee future results. Current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 1-877-778-2100. These performance results represent the change in net asset value of an investment over a stated period, assuming the reinvestment of dividends and capital gain distributions. Past performance is not indicative of future performance and short periods of performance may be particularly unrepresentative of long-term performance.

Morningstar Rating™ (Open End Mutual Funds, Closed End Mutual Funds, or Variable Annuity Underlying Funds)

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a funds' monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five-, and ten-year (if applicable) Morningstar Rating metrics. Past performance is no guarantee of future results. **Investors should consider the fund's investment objectives, risks, charges and expenses before investing. The prospectus, and if available the summary prospectus, contain complete information about the investment options available through your plan. Please call 1-877-778-2100 for a free prospectus and if available, a summary prospectus that contain this and other information about the mutual funds. You should read the prospectus and the summary prospectus, if available, carefully before investing. It is possible to lose money when investing in securities.**

Securities products and services are offered through Prudential Investment Management Services LLC (PIMS), Newark, NJ, a Prudential Financial company.

Data presented is as of the period specified for this report, unless otherwise specified within a table heading. Data and expense ratios presented are the most current made available at the time of production. For mutual funds, the fund company may have more recent data available on its website. Price corrections that impact performance data may occur after production of this material.

12b-1 Fee An annual marketing or distribution fee on a mutual fund. The 12b-1 fee is considered an operational expense and, as such, is included in a fund's expense ratio. It is generally between 0.25-1% (the maximum allowed) of a fund's net assets.

3-Year Earnings Growth Rate (%) A measure of how a stock's earnings per share (EPS) has grown over the last three years. Morningstar uses EPS from continuing operations to calculate this growth rate. For portfolios, this data point is the share-weighted collective earnings growth for all stocks in the current portfolio. The historical earnings growth rate can tell investors how quickly a company's profits are growing.

Finders Fee A commission paid to an entity who served as the facilitator of a transaction.

Gross Expense Ratio The Total Gross Expense Ratio represents the percentage of fund assets paid for operating expenses and management fees. It typically includes the following types of fees: accounting, administrator, advisor, auditor, board of directors, custodial, distribution (12b-1), legal, organizational, professional, registration, shareholder reporting, sub-advisor, and transfer agency. The expense ratio does not reflect the fund's brokerage costs, fee waivers, or investor sales charges. Expense data is typically quoted with two decimal places; however, three decimal places will be displayed when values are available.

Net Assets Balance data presented is the most current data available at the time of receipt, however some information may be presented on a lag. The data is deemed reliable but the accuracy cannot be guaranteed. All balances are unaudited.

Other Service fee % Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Other Service fee (\$ per participant) Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Portfolio Allocation The pie chart illustrates how investment holdings breakdown into primary investment types.

Portfolio Manager The name of the person(s) who determines which stocks, bonds and cash equivalents belong in the investment portfolio.

Price/Book Ratio Calculated as a weighted average of the price/book ratios of all stocks in the portfolio. This ratio is used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share. A lower P/B ratio could mean that the stock is undervalued. However, it could also mean that something is fundamentally wrong with the company. As with most ratios, be aware that this varies by industry.

Price/Earnings Ratio (Forward) The price of a stock divided by next year's earnings per share estimate. P/E multiples enable investors to compare the relative value of stocks within a portfolio; they show how much an investor must pay for a company's earning power. A lower portfolio P/E ratio indicates that the stocks in a portfolio are not highly-valued relative to the market. Growth-oriented investments tend to have higher P/E ratios than value-oriented investments as investors expect higher earnings growth from the underlying companies and are therefore willing to pay a premium price.

Sub-accounting fee % Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Sub-accounting fee (\$ per participant) Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Weighted Geometric Market Cap (\$Bil) Calculated by raising the market capitalization of each stock to a power equal to that stock's weight in the portfolio. The resulting numbers multiplied together produce the geometric mean of the market caps of the stocks in the portfolio.

Gross Expense Ratio	0.27%
Morningstar Category	Small Blend
Morningstar Overall Rating™	★★★★
Overall # of Funds in Morningstar Category	589
Portfolio Manager(s)	Jed S. Fogdall; Joel P. Schneider; Marc C. Leblond

Description / Objective
 The investment seeks long-term capital appreciation. The fund, using a market capitalization weighted approach, purchases a broad and diverse group of readily marketable securities of U.S. small cap companies. A company's market capitalization is the number of its shares outstanding times its price per share. Under a market capitalization weighted approach, companies with higher market capitalizations generally represent a larger proportion of the fund than companies with relatively lower market capitalizations.
 There is no assurance the objectives will be met.
Small and mid-sized companies may present greater opportunities for capital appreciation, but may also involve greater risks than larger companies. As a result, the value of stocks issued by these companies may fluctuate more than stocks of larger issuers.

Overall Morningstar Rating as of quarter ending 3/31/2023. The Morningstar Rating shown is for the share class of this fund only; other classes may have different performance characteristics. ©2023 Morningstar, Inc. All Rights Reserved. Additional Morningstar information is available in this factsheet.

In the past, this investment has shown a wide range of price fluctuations relative to other investments. This investment may experience significant price increases in favorable markets or undergo large price declines in adverse markets. Some of this risk may be offset by owning other investments that follow different investment strategies.

Morningstar Volatility Rank As of 03/31/2023

In the past, this investment has shown a wide range of price fluctuations relative to other investments. This investment may experience significant price increases in favorable markets or undergo large price declines in adverse markets. Some of this risk may be offset by owning other investments that follow different investment strategies.

Morningstar® Style Box™ As of 02/28/2023

Domestic equity funds are placed in a category based on the style and size of the stocks they typically own. The style and size parameters are based on the divisions used in the investment style box: Value, Blend, or Growth style and Small, Medium, or Large geometric average market capitalization.

Description / Objective
The investment seeks to track the performance of the CRSP US Small Cap Index that measures the investment return of small-capitalization stocks. The fund employs an indexing investment approach designed to track the performance of the CRSP US Small Cap Index, a broadly diversified index of stocks of small U.S. companies. The advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index. There is no assurance the objectives will be met. *Small and mid-sized companies may present greater opportunities for capital appreciation, but may also involve greater risks than larger companies. As a result, the value of stocks issued by these companies may fluctuate more than stocks of larger issuers.*

It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share. A lower P/B ratio could mean that the stock is undervalued. However, it could also mean that something is fundamentally wrong with the company. As with most ratios, be aware that this varies by industry.

Price/Earnings Ratio (Forward) The price of a stock divided by next year's earnings per share estimate. P/E multiples enable investors to compare the relative value of stocks within a portfolio; they show how much an investor must pay for a company's earning power. A lower portfolio P/E ratio indicates that the stocks in a portfolio are not highly-valued relative to the market. Growth-oriented investments tend to have higher P/E ratios than value-oriented investments as investors

Indices are unmanaged and cannot be invested in directly. See User Guide for index definitions. The index shown, if applicable, in the Characteristics chart refers to the primary index.

expect higher earnings growth from the underlying companies and are therefore willing to pay a premium price.

Sub-accounting fee % Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Sub-accounting fee (\$ per participant) Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Weighted Geometric Market Cap (\$Bil) Calculated by raising the market capitalization of each stock to a power equal to that stock's weight in the portfolio. The resulting numbers multiplied together produce the geometric mean of the market caps of the stocks in the portfolio.

Gross Expense Ratio	0.79%
Morningstar Category	Small Growth
Morningstar Overall Rating™	★★★
Overall # of Funds in Morningstar Category	576
Portfolio Manager(s)	Clay Manley CFA; Justin Sander CFA; Juan R. Hartsfield CFA

Description / Objective
The investment seeks long-term growth of capital. The fund invests, under normal circumstances, at least 80% of its net assets (plus any borrowings for investment purposes) in securities of small-capitalization issuers. It invests primarily in equity securities. The principal type of equity security in which the fund invests is common stock. The fund's manager considers an issuer to be a small-capitalization issuer if it has a market capitalization, at the time of purchase, no larger than the largest capitalized issuer included in the Russell 2000® Index.

There is no assurance the objectives will be met.

Small and mid-sized companies may present greater opportunities for capital appreciation, but may also involve greater risks than larger companies. As a result, the value of stocks issued by these companies may fluctuate more than stocks of larger issuers.

*Fees that Prudential Retirement and its affiliates may receive in connection with plan investments in this fund include:

Finders Fee	No	12b-1 Fee	0%
Sub-accounting fee (\$ per participant)	--	Sub-accounting fee %	0.10%
Other Service fee (\$ per participant)	--	Other Service fee %	0.25%

Fees if applicable to this fund, compensate Prudential Retirement for selling the fund's shares and servicing your retirement plan. The fund's expense ratio includes these fees. Other investment options may generate more or less revenue than the fees associated with this fund. If the aggregate revenue from your plan exceeds our associated costs, we earn a profit. Otherwise, we incur a loss. Other share classes of this fund may have a lower expense ratio, but your plan's investment options do not include such shares to compensate us for distribution and plan servicing.

The performance quoted represents past performance. The investment value and return will fluctuate so that an investment, when redeemed, may be worth more or less than original cost. Past performance does not guarantee future results. Current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 1-877-778-2100. These performance results represent the change in net asset value of an investment over a stated period, assuming the reinvestment of dividends and capital gain distributions. Past performance is not indicative of future performance and short periods of performance may be particularly unrepresentative of long-term performance.

Morningstar Rating™ (Open End Mutual Funds, Closed End Mutual Funds, or Variable Annuity Underlying Funds)

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™

Invesco Small Cap Growth Fund R5 Class

A Mutual Fund

First Quarter 2023 Fund Fact Sheet - Page 2

Annual Performance		
	Fund	Primary Index
2022	-35.39%	-26.36%
2021	7.71%	2.83%
2020	57.56%	34.63%
2019	24.75%	28.48%
2018	-8.69%	-9.31%

Market Timing: Frequent exchanging of investment options may harm long-term investors. Policies may be in effect at the plan or the investment level to detect and deter exchanges that may be abusive. Such policies may require us to modify, restrict, suspend or terminate purchase or exchange privileges and impose redemption fees. Please refer to the prospectus, if available for the investment, for information on these potential restrictions and any applicable redemption fees. Otherwise, please contact your Representative.

Indices are unmanaged and cannot be invested in directly. See User Guide for index definitions. The index shown, if applicable, in the Characteristics chart refers to the primary index.

based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a funds' monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five-, and ten-year (if applicable) Morningstar Rating metrics. Past performance is no guarantee of future results. **Investors should consider the fund's investment objectives, risks, charges and expenses before investing. The prospectus, and if available the summary prospectus, contain complete information about the investment options available through your plan. Please call 1-877-778-2100 for a free prospectus and if available, a summary prospectus that contain this and other information about the mutual funds. You should read the prospectus and the summary prospectus, if available, carefully before investing. It is possible to lose money when investing in securities.**

Securities products and services are offered through Prudential Investment Management Services LLC (PIMS), Newark, NJ, a Prudential Financial company.

Data presented is as of the period specified for this report, unless otherwise specified within a table heading. Data and expense ratios presented are the most current made available at the time of production. For mutual funds, the fund company may have more recent data available on its website. Price corrections that impact performance data may occur after production of this material.

12b-1 Fee An annual marketing or distribution fee on a mutual fund. The 12b-1 fee is considered an operational expense and, as such, is included in a fund's expense ratio. It is generally between 0.25-1% (the maximum allowed) of a fund's net assets.

3-Year Earnings Growth Rate (%) A measure of how a stock's earnings per share (EPS) has grown over the last three years. Morningstar uses EPS from continuing operations to calculate this growth rate. For portfolios, this data point is the share-weighted collective earnings growth for all stocks in the current portfolio. The historical earnings growth rate can tell investors how quickly a company's profits are growing.

Finders Fee A commission paid to an entity who served as the facilitator of a transaction.

Gross Expense Ratio The Total Gross Expense Ratio represents the percentage of fund assets paid for operating expenses and management fees. It typically includes the following types of fees: accounting, administrator, advisor, auditor, board of directors, custodial, distribution (12b-1), legal, organizational, professional, registration, shareholder reporting, sub-advisor, and transfer agency. The expense ratio does not reflect the fund's brokerage costs, fee waivers, or investor sales charges. Expense data is typically quoted with two decimal places; however, three decimal places will be displayed when values are available.

Net Assets Balance data presented is the most current data available at the time of receipt, however some information may be presented on a lag. The data is deemed reliable but the accuracy cannot be guaranteed. All balances are unaudited.

Other Service fee % Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Other Service fee (\$ per participant) Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Portfolio Allocation The pie chart illustrates how investment holdings breakdown into primary investment types.

Portfolio Manager The name of the person(s) who determines which stocks, bonds and cash equivalents belong in the investment portfolio.

Price/Book Ratio Calculated as a weighted average of the price/book ratios of all stocks in the portfolio. This ratio is used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share. A lower P/B ratio could mean that the stock is undervalued. However, it could also mean that something is fundamentally wrong with the company. As with most ratios, be aware that this varies by industry.

Price/Earnings Ratio (Forward) The price of a stock divided by next year's earnings per share estimate. P/E multiples enable investors to compare the relative value of stocks within a portfolio; they show how much an investor must pay for a company's earning power. A lower portfolio P/E ratio indicates that the stocks in a portfolio are not highly-valued relative to the market. Growth-

oriented investments tend to have higher P/E ratios than value-oriented investments as investors expect higher earnings growth from the underlying companies and are therefore willing to pay a premium price.

Sub-accounting fee % Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Sub-accounting fee (\$ per participant) Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Weighted Geometric Market Cap (\$Bil) Calculated by raising the market capitalization of each stock to a power equal to that stock's weight in the portfolio. The resulting numbers multiplied together produce the geometric mean of the market caps of the stocks in the portfolio.

Description / Objective

The investment seeks long-term growth of capital. The fund invests primarily in common stocks of issuers in Europe and the Pacific Basin that the investment adviser believes have the potential for growth. Growth stocks are stocks that the investment adviser believes have the potential for above-average capital appreciation. It normally will invest at least 80% of its net assets in securities of issuers in Europe and the Pacific Basin. The fund may invest a portion of its assets in common stocks and other securities of companies in emerging markets.

There is no assurance the objectives will be met.

Investments in large cap funds are subject to market fluctuations and may lose value. The investment risks associated with these funds may be impacted by a variety of factors, including investment style, objective, holdings, and focus in particular industries. On average, investments in large cap funds may be considered more conservative than investments in small and mid-cap funds, potentially posing less overall volatility in exchange for less aggressive growth potential.

Investing in foreign securities presents certain unique risks not associated with domestic investments, such as currency fluctuation and political and economic changes. This may result in greater share price volatility.

Overall Morningstar Rating as of quarter ending 3/31/2023. Market Timing: Frequent exchanging of investment options may harm long-term investors. Policies may be in effect at the plan or the investment level to detect and deter exchanges that may be abusive. Such policies may require us to modify, restrict, suspend or terminate purchase or exchange privileges and impose redemption fees. Please refer to the prospectus, if available for the investment, for information on these potential restrictions and any applicable redemption fees. Otherwise, please contact your Representative.

Fees if applicable to this fund, compensate Prudential Retirement for selling the fund's shares and servicing your retirement plan. The fund's expense ratio includes these fees. Other investment options may generate more or less revenue than the fees associated with this fund. If the aggregate revenue from your plan exceeds our associated costs, we earn a profit. Otherwise, we incur a loss. Other share classes of this fund may have a lower expense ratio, but your plan's investment options do not include such shares to compensate us for distribution and plan servicing.

The performance quoted represents past performance. The investment value and return will fluctuate so that an investment, when redeemed, may be worth more or less than original cost. Past performance does not guarantee future results. Current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 1-877-778-2100. These performance results represent the change in net asset value of an investment over a stated period, assuming the reinvestment of dividends and capital gain distributions. Past performance is not indicative of future performance and short periods of performance may be particularly unrepresentative of long-term performance.

Indices are unmanaged and cannot be invested in directly. See User Guide for index definitions. The index shown, if applicable, in the Characteristics chart refers to the primary index.

Morningstar Rating™ (Open End Mutual Funds, Closed End Mutual Funds, or Variable Annuity Underlying Funds)

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a funds' monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five-, and ten-year (if applicable) Morningstar Rating metrics. Past performance is no guarantee of future results. **Investors should consider the fund's investment objectives, risks, charges and expenses before investing. The prospectus, and if available the summary prospectus, contain complete information about the investment options available through your plan. Please call 1-877-778-2100 for a free prospectus and if available, a summary prospectus that contain this and other information about the mutual funds. You should read the prospectus and the summary prospectus, if available, carefully before investing. It is possible to lose money when investing in securities.**

Securities products and services are offered through Prudential Investment Management Services LLC (PIMS), Newark, NJ, a Prudential Financial company.

Data presented is as of the period specified for this report, unless otherwise specified within a table heading. Data and expense ratios presented are the most current made available at the time of production. For mutual funds, the fund company may have more recent data available on its website. Price corrections that impact performance data may occur after production of this material.

12b-1 Fee An annual marketing or distribution fee on a mutual fund. The 12b-1 fee is considered an operational expense and, as such, is included in a fund's expense ratio. It is generally between 0.25-1% (the maximum allowed) of a fund's net assets.

3-Year Earnings Growth Rate (%) A measure of how a stock's earnings per share (EPS) has grown over the last three years. Morningstar uses EPS from continuing operations to calculate this growth rate. For portfolios, this data point is the share-weighted collective earnings growth for all stocks in the current portfolio. The historical earnings growth rate can tell investors how quickly a company's profits are growing.

Finders Fee A commission paid to an entity who served as the facilitator of a transaction.

Gross Expense Ratio The Total Gross Expense Ratio represents the percentage of fund assets paid for operating expenses and management fees. It typically includes the following types of fees: accounting, administrator, advisor, auditor, board of directors, custodial, distribution (12b-1), legal, organizational, professional, registration, shareholder reporting, sub-advisor, and transfer agency. The expense ratio does not reflect the fund's brokerage costs, fee waivers, or investor sales charges. Expense data is typically quoted with two decimal places; however, three decimal places will be displayed when values are available.

Net Assets Balance data presented is the most current data available at the time of receipt, however some information may be presented on a lag. The data is deemed reliable but the accuracy cannot be guaranteed. All balances are unaudited.

Other Service fee % Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Other Service fee (\$ per participant) Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Portfolio Allocation The pie chart illustrates how investment holdings breakdown into primary investment types.

Portfolio Manager The name of the person(s) who determines which stocks, bonds and cash equivalents belong in the investment portfolio.

Price/Book Ratio Calculated as a weighted average of the price/book ratios of all stocks in the portfolio. This ratio is used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share. A lower P/B ratio could mean that the stock is undervalued. However, it could also mean that something is fundamentally wrong with the company. As with most ratios, be aware that this varies by industry.

Price/Earnings Ratio (Forward) The price of a stock divided by next year's earnings per share estimate. P/E multiples enable investors to compare the relative value of stocks within a portfolio; they show how much an investor must pay for a company's earning power. A lower portfolio P/E ratio indicates that the stocks in a portfolio are not highly-valued relative to the market. Growth-oriented investments tend to have higher P/E ratios than value-oriented investments as investors expect higher earnings growth from the underlying companies and are therefore willing to pay a premium price.

Sub-accounting fee % Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Sub-accounting fee (\$ per participant) Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Weighted Geometric Market Cap (\$Bil) Calculated by raising the market capitalization of each stock to a power equal to that stock's weight in the portfolio. The resulting numbers multiplied together produce the geometric mean of the market caps of the stocks in the portfolio.

MFS International Intrinsic Value Fund Class R4

A Mutual Fund

First Quarter 2023 Fund Fact Sheet

Key Facts		Description / Objective
Investment Advisor	Massachusetts Financial Services Company	<p>The investment seeks capital appreciation. The fund normally invests its assets primarily in foreign equity securities, including emerging market equity securities. Equity securities include common stocks and other securities that represent an ownership interest (or right to acquire an ownership interest) in a company or other issuer. The advisor focuses on investing the fund's assets in the stocks of companies that the advisor believes are undervalued compared to their intrinsic value. There is no assurance the objectives will be met.</p> <p><i>Investments in large cap funds are subject to market fluctuations and may lose value. The investment risks associated with these funds may be impacted by a variety of factors, including investment style, objective, holdings, and focus in particular industries. On average, investments in large cap funds may be considered more conservative than investments in small and mid-cap funds, potentially posing less overall volatility in exchange for less aggressive growth potential.</i></p> <p><i>Investing in foreign securities presents certain unique risks not associated with domestic investments, such as currency fluctuation and political and economic changes. This may result in greater share price volatility.</i></p>

Market Timing: Frequent exchanging of investment options may harm long-term investors. Policies may be in effect at the plan or the investment level to detect and deter exchanges that may be abusive. Such policies may require us to modify, restrict, suspend or terminate purchase or exchange privileges and impose redemption fees. Please refer to the prospectus, if available for the investment, for information on these potential restrictions and any applicable redemption fees. Otherwise, please contact your Representative.

Fees if applicable to this fund, compensate Prudential Retirement for selling the fund's shares and servicing your retirement plan. The fund's expense ratio includes these fees. Other investment options may generate more or less revenue than the fees associated with this fund. If the aggregate revenue from your plan exceeds our associated costs, we earn a profit. Otherwise, we incur a loss. Other share classes of this fund may have a lower expense ratio, but your plan's investment options do not include such shares to compensate us for distribution and plan servicing.

The performance quoted represents past performance. The investment value and return will fluctuate so that an investment, when redeemed, may be worth more or less than original cost. Past performance does not guarantee future results. Current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 1-877-778-2100. These performance results represent the change in net asset value of an investment over a stated period, assuming the reinvestment of dividends and capital gain distributions. Past performance is not indicative of future performance and short periods of performance may be particularly unrepresentative of long-term performance.

Indices are unmanaged and cannot be invested in directly. See User Guide for index definitions. The index shown, if applicable, in the Characteristics chart refers to the primary index.

Morningstar Rating™ (Open End Mutual Funds, Closed End Mutual Funds, or Variable Annuity Underlying Funds)

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a funds' monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five-, and ten-year (if applicable) Morningstar Rating metrics. Past performance is no guarantee of future results. **Investors should consider the fund's investment objectives, risks, charges and expenses before investing. You should read the prospectus and the summary prospectus, if available, carefully before investing. It is possible to lose money when investing in securities.**

Securities products and services are offered through Prudential Investment Management Services LLC (PIMS), Newark, NJ, a Prudential Financial company.

Data presented is as of the period specified for this report, unless otherwise specified within a table heading. Data and expense ratios presented are the most current made available at the time of production. For mutual funds, the fund company may have more recent data available on its website. Price corrections that impact performance data may occur after production of this material.

12b-1 Fee An annual marketing or distribution fee on a mutual fund. The 12b-1 fee is considered an operational expense and, as such, is included in a fund's expense ratio. It is generally between 0.25-1% (the maximum allowed) of a fund's net assets.

3-Year Earnings Growth Rate (%) A measure of how a stock's earnings per share (EPS) has grown over the last three years. Morningstar uses EPS from continuing operations to calculate this growth rate. For portfolios, this data point is the share-weighted collective earnings growth for all stocks in the current portfolio. The historical earnings growth rate can tell investors how quickly a company's profits are growing.

Finders Fee A commission paid to an entity who served as the facilitator of a transaction.

Gross Expense Ratio The Total Gross Expense Ratio represents the percentage of fund assets paid for operating expenses and management fees. It typically includes the following types of fees: accounting, administrator, advisor, auditor, board of directors, custodial, distribution (12b-1), legal, organizational, professional, registration, shareholder reporting, sub-advisor, and transfer agency. The expense ratio does not reflect the fund's brokerage costs, fee waivers, or investor sales charges. Expense data is typically quoted with two decimal places; however, three decimal places will be displayed when values are available.

Net Assets Balance data presented is the most current data available at the time of receipt, however some information may be presented on a lag. The data is deemed reliable but the accuracy cannot be guaranteed. All balances are unaudited.

Other Service fee % Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Other Service fee (\$ per participant) Additional fees paid by the fund company to the entity servicing investors within their fund(s).

Portfolio Allocation The pie chart illustrates how investment holdings breakdown into primary investment types.

Portfolio Manager The name of the person(s) who determines which stocks, bonds and cash equivalents belong in the investment portfolio.

Price/Book Ratio Calculated as a weighted average of the price/book ratios of all stocks in the portfolio. This ratio is used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share. A lower P/B ratio could mean that the stock is undervalued. However, it could also mean that something is fundamentally wrong with the company. As with most ratios, be aware that this varies by industry.

Price/Earnings Ratio (Forward) The price of a stock divided by next year's earnings per share estimate. P/E multiples enable investors to compare the relative value of stocks within a portfolio; they show how much an investor must pay for a company's earning power. A lower portfolio P/E ratio indicates that the stocks in a portfolio are not highly-valued relative to the market. Growth-oriented investments tend to have higher P/E ratios than value-oriented investments as investors expect higher earnings growth from the underlying companies and are therefore willing to pay a premium price.

Sub-accounting fee % Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Sub-accounting fee (\$ per participant) Encompasses sub-transfer agent, administrative, sub-accounting, and other shareholder servicing fees. These fees are associated with mutual funds or their service providers entering into arrangements with financial intermediaries to compensate them for providing typical transfer agent services for fund investors whose shares are held in an omnibus account, and may offer other services to shareholders.

Weighted Geometric Market Cap (\$Bil) Calculated by raising the market capitalization of each stock to a power equal to that stock's weight in the portfolio. The resulting numbers multiplied together produce the geometric mean of the market caps of the stocks in the portfolio.
