Staff Report

DATE: December 8, 2025

TO: Local Agency Formation Commission

FROM: Christina Love, Deputy Executive Officer

SUBJECT: LAFCO Project No. 2023-08 Solano Irrigation District Municipal Service Review – Draft for Public Comment

Recommendation:

1. **RECEIVE** the Solano Irrigation District Municipal Service Review Draft for Public Comment.
2. **ACKNOWLEDGE** the 30-day public comment period for the Draft MSR from December 3, 2025, through January 2, 2026.

Executive Summary:

Gov.Code §56425(a) requires LAFCO to develop and determine the sphere of influence of each city and each special district within the county in order to carry out its purposes and responsibilities for planning and shaping the logical and orderly development and coordination of local government agencies subject to the jurisdiction of the commission.

Gov. Code §56430(a) requires LAFCO to conduct a service review of the municipal services provided in order to prepare and update spheres of influence. Fundamental to every MSR and SOI study is that LAFCO will utilize this document as a critical resource, together with additional analysis where necessary, to pursue sphere, boundary, and governance changes if needed.

Solano LAFCO completed a municipal service review (MSR) of Solano Irrigation District (SID) and its water provision-related services in preparation for a subsequent sphere of influence review and update. This MSR will help to inform the subsequent SOI review and update. The SID MSR determined that SID is effectively and efficiently providing water within its current district boundaries. Any further District expansion requires an updated SOI..

This MSR has been published for public review and comment for a 30-day period from December 3, 2025, through January 2, 2026.

Discussion:

Staff and consultants began working together on the SID MSR in the summer of 2023. The Draft MSR represents the culmination of extensive efforts to gather and analyze data to inform determinations regarding SID's efficient and effective service delivery.

The following discussion is a summary of the SID MSR outlining (I.) MSR Project Description, (II.) Methodology Process, (III.) District Overview, (IV.) Project Analysis (CKH Seven Factor Analysis), (V.) California Environmental Quality Act consideration, and (VI.) Next Steps.

I. Municipal Service Review Project Description

This Municipal Service Review (MSR) focuses on the provision of irrigation water and municipal & industrial water services provided by the Solano Irrigation District (SID or District). This MSR is a necessary step in informing a subsequent sphere of influence update. Solano LAFCO contracted with Milani and Associates to prepare this MSR for a Sphere of Influence (SOI) update for the District, which was last updated in 2015. This MSR update addresses the Cortese-Knox-Hertzberg Local Government Reorganization Act (CKH) requirements and the MSR is divided into the five sections: 1) Introduction; 2) District Overview; 3) District Water Breakdown; 4) Municipal Service Review Factors and Determinations; 4) Sphere of Influence Considerations; and 5) Summary of Findings, Determinations, and Recommendations.

Upon completing this MSR, the Commission must make determinations on each of the mandated seven factors, consistent with CKH §56430. A summary of the seven factors is discussed in IV of this staff report.

II. Methodology Process

The MSR's seven factors require significant research and analysis in order to inform the seven determinations. The methodology employed involved data collection, several interviews, and extensive review of public documents related to operations, budgets, audits, and governance. Resources include:

- State Water law
- District formation documents
- services offered
- demographic demand trends
- water sources and supply
- annual budgets
- financial statements
- capital improvement plans,
- staff reports
- water supply and consumption trends,
- rate studies,
- water management plans,
- technical reports
- assessor parcel information
- census data
- land use research

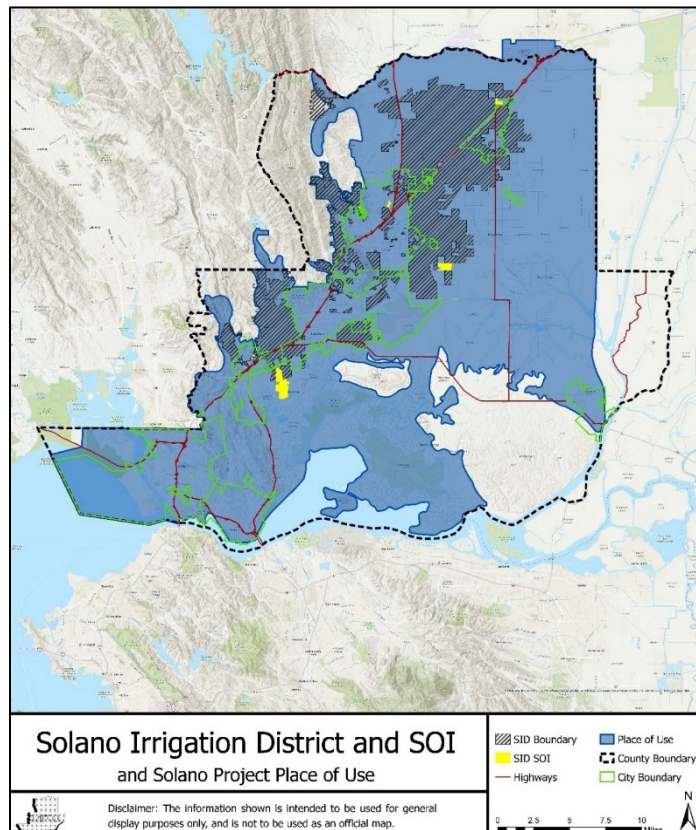

III. District Overview

Solano Irrigation District was formed in 1948 as an independent special district under the California Water Code for the purpose of securing Lake Berryessa water rights from the U.S. Bureau of Reclamation's Solano Project ("Solano Project") for agricultural, municipal,

industrial, and domestic consumption in a defined area of Solano County.¹

SID has annual entitlements for 141,000 acre-feet (AF) of Solano Project water for agricultural irrigation and municipal and industrial (M&I) purposes. The District also operates the Solano Project facilities,² which deliver Lake Berryessa water to four cities (Dixon, Fairfield, Suisun City, and Vacaville), the Maine Prairie Water District, and SID customers. Additionally, the district owns and operates the hydroelectric power plant at the base of Monticello Dam. Water released near the bottom of the dam is used to generate electricity from three generators with a combined capacity of 11,500 kilowatts. The electrical power produced is sold to PG&E under a long-term agreement that expires in 2031 and may be renegotiated.

The District covers approximately 74,166 gross acres. Land uses within the District are predominately agricultural lands (roughly 82%) with some rural residential and commercial uses. A portion of the District, approximately 13,712 acres, overlaps parts of the cities of Suisun City, Fairfield, Vacaville, and Dixon involving lands that were not detached when they were annexed into the cities. Areas that overlap with city boundaries typically include commercial, industrial, and urban residential uses. The District has a population of approximately 55,082 residents living within its service area, including 3,951 residents living in unincorporated areas, 29,873 residents served by the Suisun-Solano Water Authority, and 21,258 in areas that overlap with city boundaries.

IV. Project Analysis

Gov.Code 56425(e) lists the seven mandated factors for analysis within an MSR. The following is a summary the analysis of each of the seven factors within the SID MSR.

1. *Growth and population projections for the affected areas.*

The District's boundaries encompass a service territory covering 74,166 acres, the majority is rural unincorporated Solano County in agriculture use. Portions of the District (13,712 acres) overlap parts of the cities of Suisun City, Fairfield, Vacaville, and Dixon

¹ Solano Project water cannot be used outside the defined service area place of use without first amending the Water Service Contract with the Bureau and obtaining State Water Resources Control Board approval.

² Such as Monticello Dam hydroelectric dam, transmission canals, creeks, dams, weirs, metering points, etc.

where lands were not detached when they were annexed by the individual cities. Some of these lands are public rights-of-way and landscaping, other lands are pending development that will be detached upon development permits.

The District's population is estimated to be 55,082 residents based on the most recent census information. SID is comprised of 60,054 acres of unincorporated land that holds approximately 3,951 population in the M&I and agricultural area. Whereas 13,712 incorporated acres (the city overlap area and SSWA) holds approximately 51,131 population. According to projections by the California Department of Finance, the District's population could grow by approximately 2,754 to around 58,000 by 2030.

Current District Population Summary	
	Population
Agriculture	1,330
Municipal & Industrial (M&I)	2,621
Suisun-Solano Water Authority (SSWA)	29,873
Areas Overlapping Cities (landscaping/other)	21,258
Total	55,082

Given the District's agricultural nature, population is an insignificant factor when considering SID's service obligations and the 5-year projected population growth is nominal. Agricultural use is the primary driving force.

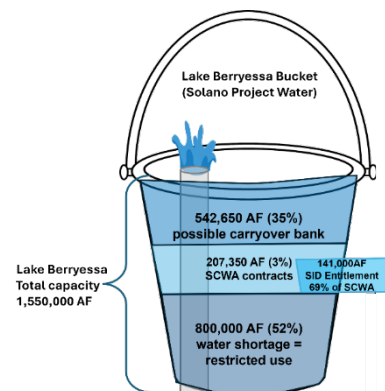

2. *The location and characteristics of any disadvantaged unincorporated communities within or contiguous to the sphere of influence.*

DUC's are defined as inhabited communities containing 12 or more registered voters within an unincorporated area of a county where the annual median household income is less than 80 percent of the statewide annual MHI.³

There are four unincorporated Census Designated Places in Solano County. However, all four are recorded to have household incomes that exceed the 80% threshold (\$73,524). Therefore, there are no DUCs within or contiguous to the SOI.

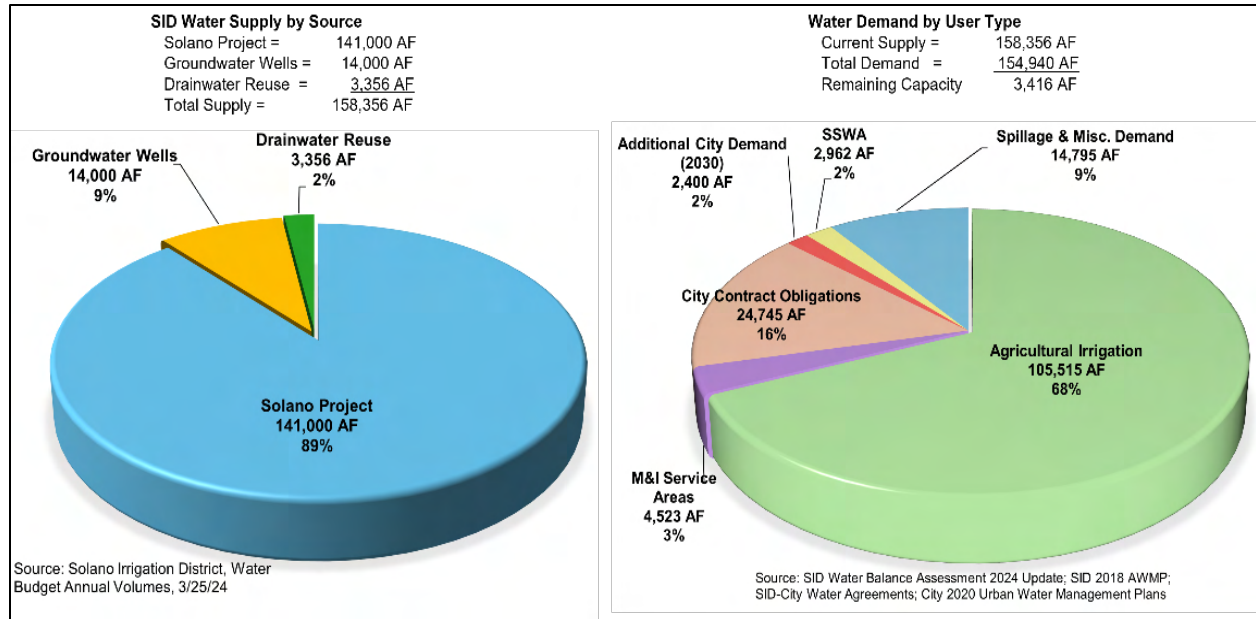

3. *Present and planned capacity of public facilities, adequacy of public services, and infrastructure needs or deficiencies including needs or deficiencies related to sewers, municipal and industrial water, and structure fire protection in any disadvantaged, unincorporated communities within or contiguous to the sphere of influence.*

Water Supply and Demand: SID has a total annual water supply of 158,356 AF from three sources: surface water, groundwater, and drain water reuse. SID has an average annual water demand of 154,940 AF. Based on this average, the District has committed approximately 98% of its available water supply leaving the remaining capacity of 3,416 for new customers. The primary water demand is for agricultural irrigation (~68%).

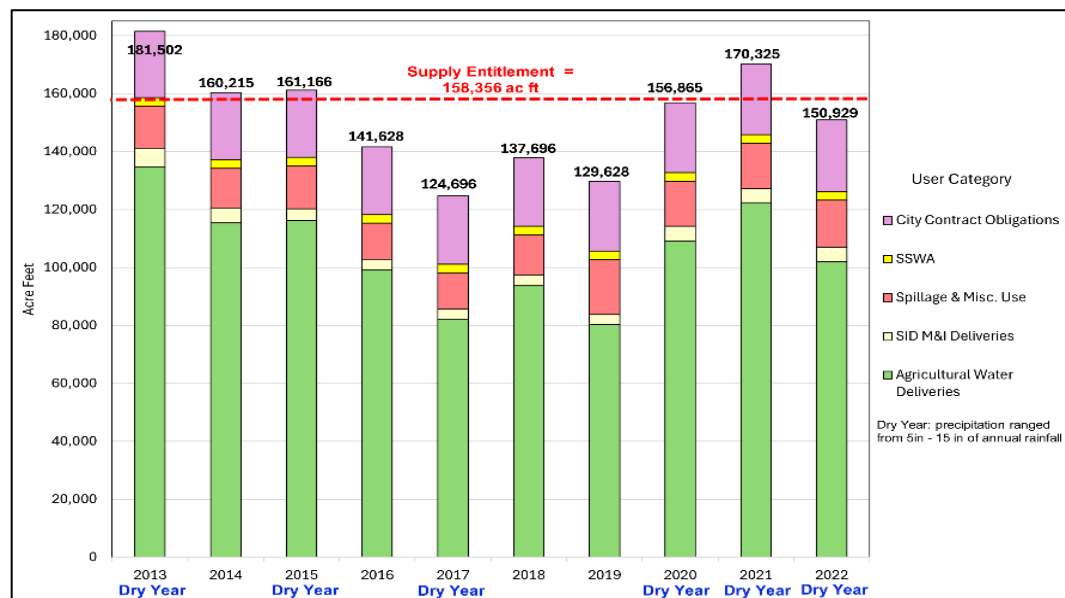

³ Census Designated Places from the U.S. Census Bureau's American Community Survey

Agenda Item 10.A LAFCO Project No. 2023-08: MSR for Solano Irrigation District Draft, Public Review

A long history of continued efforts to increase water conservation, enhanced irrigation techniques, evolution of crop types, and better techniques to capture and reuse water has supported SID's efforts to continue to effectively provide water to its users. However, an assessment of SID's water supplies reveals that water demand for agricultural and urban uses is likely to exceed its future water supply by 2035.⁴ This is especially true during multiple drought years and further ensured with the threat of the potential new Bay Delta Plan instream flow rules, but actual impacts are not yet known.

The following chart tracks SID's 10-year water supply/demand from 2013 to 2022.

⁴The contractual obligations with the city contracts continue to increase up to 2035, thereby increasing demand obligations.

Agenda Item 10.A LAFCO Project No. 2023-08: MSR for Solano Irrigation District Draft, Public Review

Water System Infrastructure: SID controls and maintains a complex system of canals, pipelines, and ditches controlled and monitored by weirs, dams, meters, and pumps. An engineering report completed after 2017 found that The Distribution Canal Efficiency ranged from 82 to 91 percent between 1991 and 2017. The District has taken measures recommended by the engineering report to maintain or increase efficiency, such as lining more canals.

The Putah South Canal (PSC) is the main canal that serves SID's irrigated area and provides M&I deliveries to the cities of Vacaville, Fairfield, Benicia, City of Suisun City and Vallejo as well as various smaller developments. The PSC runs generally south and is approximately 33 miles in length. Branching from the PSC are about 60 lateral headings and turnouts. The District delivers water through 272 miles of canals and lateral to about 47,000 irrigated acres within a total service area of more than 74,000 acres. The following table breaks down the various lateral headings and turnouts by miles.

Canal and Pipeline Lengths in the SID Distribution System

Type	Length (miles)	Percent
Canal - Unlined	88	24%
Canal - Lined	15	4%
Pipe	169	46%
Agricultural subtotal:	272	74%
Pipelines serving developments	97	26%
Total	369	100%
Total Lined or Pipelined	281	76%

Overall, SID has a stable total of available water⁵ to meet existing and projected water demands through 2035, barring any significant droughts or the threat of the Bay-Delta in-stream flow requirements. SID actively updates its Capital Improvement Plans and Strategic Plan priorities to ensure continued effective services. This MSR recommends completing updates to the District's Agricultural Water Management Plan, exploring opportunities to increase water storage to capture rainfall/runoff to supplement water sources, and explore opportunities to merge the small M&I systems. These recommendations should be considered prior to LAFCO making a recommendation on SID's sphere of influence.

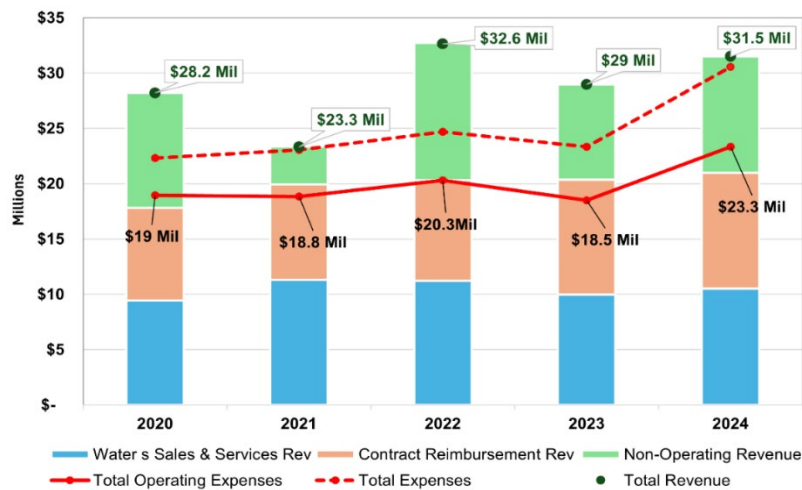

4. *Financial ability to agencies to provide services.*

Solano Irrigation District operates as an Enterprise Fund with their budget divided into two categories: operating and non-operating. Enterprise fund accounting is considered best practice in promoting and maintaining long-term financial sustainability. The District reports its accounting and financial activities in accordance with governmental Generally Accepted Accounting Principles (GAAP), which require operating revenues and expenditures to be reported separately from non-operating business activities on an agency's financial statement.

Revenues and Expenses: Between 2020-2024, SID total revenues consistently exceeded their total expenses. In two of the five years, their operating expenses exceeded their operating revenues. Both years reflect the tail end of the District's 5-year cycle of the fees and rates studies. Both years' expense gaps were covered by non-operating revenues and/or reserves, therefore the District remained solid. The following graph reflects this finding.

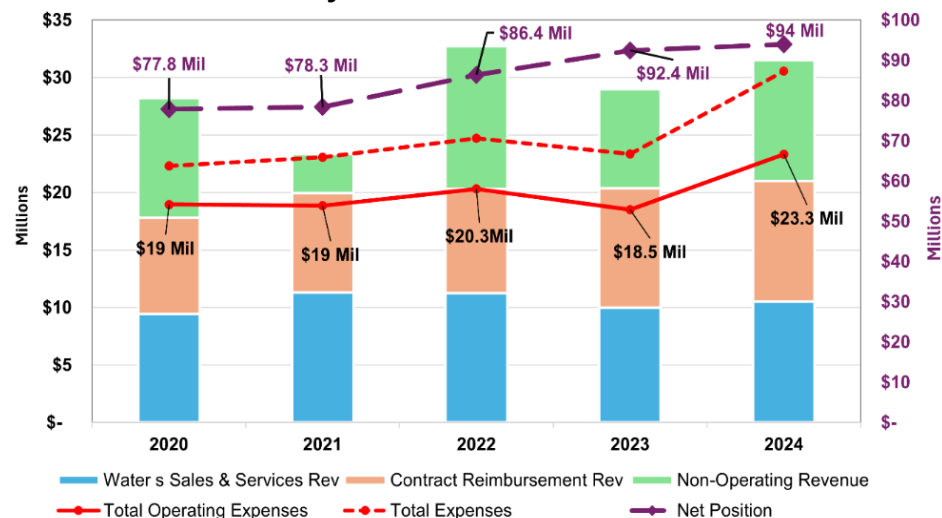

⁵ The stable water supply includes the 158,356 AF entitlements plus carryover amounts from previous years.

5-year Summary of SID Financials

The District's net position (the overall financial position for a government agency) has steadily increased over the past five years from \$77.8 million in 2020 to \$93.9 million in FY 2024. SID has consistently shown improvement in its net position due to revenue growth and cost management.

Five-year Net Position Trend

This MSR recommends that SID maintain their 5-year review cycle of all fees to ensure continued financial stability.

5. Status of, and opportunities for, shared facilities.

SID has worked cooperatively with local agencies for nearly 70 years on a myriad of water management initiatives and programs of local, regional and statewide importance. SID is contracted with several agencies to provide engineering services, maintenance and management services, and operational and reporting services. This MSR finds that SID effectively shares services and facilities.

One consideration this MSR recommends is that SID consider opportunities for consolidation/annexation with other rural water districts including Rural North Vacaville Water District (RNVWD) and Maine Prairie Water District (MPWD), which share common boundaries with SID.

6. *Accountability for community service needs, including governmental structure and operational efficiencies.*

SID's Board of Directors are elected by registered voters within the District. Board meetings are public and held on the third Tuesday of each month at the District's Offices located at 810 Vaca Valley Parkway in Vacaville. Agendas are available 72 hours prior to all regular Board meetings and are posted at a site accessible to the general public and on the District's website; all consistent with the Brown Act.

This MSR finds that SID exhibits the characteristics of a well-managed agency operating transparently and efficiently, serving its customers effectively with full-time professional staff with related expertise. The District's governance and management practices comply with state laws for water irrigation districts, transparency, and financial reporting.

7. *Any other matter related to effective or efficient service delivery, as required by commission policy.*

LAFCO's are guided to ensure the orderly and efficient arrangement of local government boundaries and to avoid duplication of services within a county. There can be several different factors or matters that may impact SID's current or future ability to effectively or efficiently provide services.

This MSR determines that SID is substantially in compliance with local policies. However, MSR recommendations include (1) SID to work with Solano LAFCO when considering any future Out of Agency Service connections or agreements to ensure that Gov.Code §56133 is not violated; and (2) that SID conduct further capacity studies and supply assessments prior to any expansion considerations to the District's sphere of influence.

V. **California Environmental Quality Act (CEQA)**

CEQA regulations and guidelines are housed in California Code of Regulations (CCR) Title 14, Division 6. Specifically, CCR §15378 defines a "project" to include an activity directly undertaken by any public agency including but not limited the adoption and amendment of local General Plans or elements thereof.⁶

General Plan laws in Gov.Code §65301 and §65919 refer to a city or county general plan's "planning area/planning review area" to include any other territory outside its boundaries that in its judgment bears relation to its planning. This area addresses the sphere of influence of a city. Under this definition, a sphere of influence is a project under CEQA.

However, a municipal service review is a study of municipal services provided within a

⁶ Gov.Code §65301 and §65919 refer to a city or county general plan's "planning area/planning review area" to include any other territory outside its boundaries that in its judgment bears relation to its planning. This area addresses the sphere of influence of a city.

defined geographical area in preparation and to support a determination for a sphere of influence. Therefore, MSRs fall under the CEQA categorical exemption under Gov. Code §15306 "Information Collection" as *"data collection, research, and resource evaluation activities which does not result in a serious or major disturbance to an environmental resource. These may be strictly for information gathering purposes, or as part of a study leading to an action which a public agency has not yet approved, adopted, or funded."*

VI. Next Steps

Final MSR:

When the public review and comment period closes for the Draft MSR, staff and the consultant will consider any public comments received and revise the draft as necessary. Staff will then return to the Commission with the Final MSR with any recorded revisions based on comment. Staff anticipates returning with the Final MSR at the February 2026 Commission meeting to consider adopting the Final MSR.

Sphere of Influence:

Should Solano Irrigation District wish to expand or amend their SOI, it will work to address recommendations from the Final MSR related to a new proposed SOI. SID has indicated that they intend on amending their SOI, but they are working on relevant studies and research to prepare a proposal. Staff anticipates SID will return with a proposed SOI in 2026. Should they not, staff may conduct a SOI analysis under §56425 factors to recommend reaffirming the last adopted SOI.

Conclusion and Recommendations

Staff recommends the Commission receive the Public Draft Municipal Service Review for the Solano Irrigation District and acknowledge the 30-day public comment period from December 3, 2025 – January 2, 2026.

Staff also welcomes any commissioner and public comments provided during the December public hearing.

Executive Summary

Introduction

A municipal service review is a comprehensive study designed to better inform Local Agency Formation Commission (LAFCO), local agencies, and the community about the provision of municipal service provided by the studied agency. Service review attempt to capture and analyze information about the governance structures and efficiencies of service providers, and to identify opportunities for greater coordination and cooperation between providers. The service review is also a prerequisite to a sphere of influence update and may lead a LAFCO to take other actions under its authority.

This Municipal Service Review (MSR) focuses on the provision of irrigation water and municipal & industrial water services provided by the Solano Irrigation District (SID or District). Solano LAFCO contracted with Milani and Associates to prepare this MSR for a Sphere of Influence (SOI) update for the District, which was last updated in 2015. This MSR update addresses the Cortese-Knox-Hertzberg Local Government Reorganization Act (CKH) requirements and the MSR is divided into the five sections: 1) Introduction; 2) District Overview; 3) District Water Breakdown; 4) Municipal Service Review Factors and Determinations; 4) Sphere of Influence Considerations; and 5) Summary of Findings, Determinations, and Recommendations.

Upon completing this MSR, the Commission must make determinations on each of the seven mandated factors, consistent with CKH §56430:

1. *Growth and population projections for the affected areas.*

The District's boundaries encompass a service territory covering 74,166 acres, the majority is rural unincorporated Solano County in agriculture use. Portions of the District (13,712 acres) overlap parts of the cities of Suisun City, Fairfield, Vacaville, and Dixon where lands were not detached when they were annexed by the individual cities. Some of these lands are public rights-of-way and landscaping, other lands are pending development that will be detached upon development permits.

The District's population is estimated to be 55,082 residents based on the most recent census information. SID is comprised of 60,054 acres of unincorporated land that holds approximately 3,951 population in the M&I and agricultural area. Whereas 13,712 incorporated acres (the city overlap area and SSWA) holds approximately 51,131 population. According to projections by the California Department of Finance, the District's population could grow by approximately 2,754 to around 58,000 by 2030.

Current District Population Summary

	Population
Agriculture	1,330
Municipal & Industrial (M&I)	2,621
Suisun-Solano Water Authority (SSWA)	29,873
Areas Overlapping Cities (landscaping/other)	21,258
Total	55,082

Given the District's agricultural nature, population is an insignificant factor when considering SID's service capabilities and the 5-year projected growth is nominal.

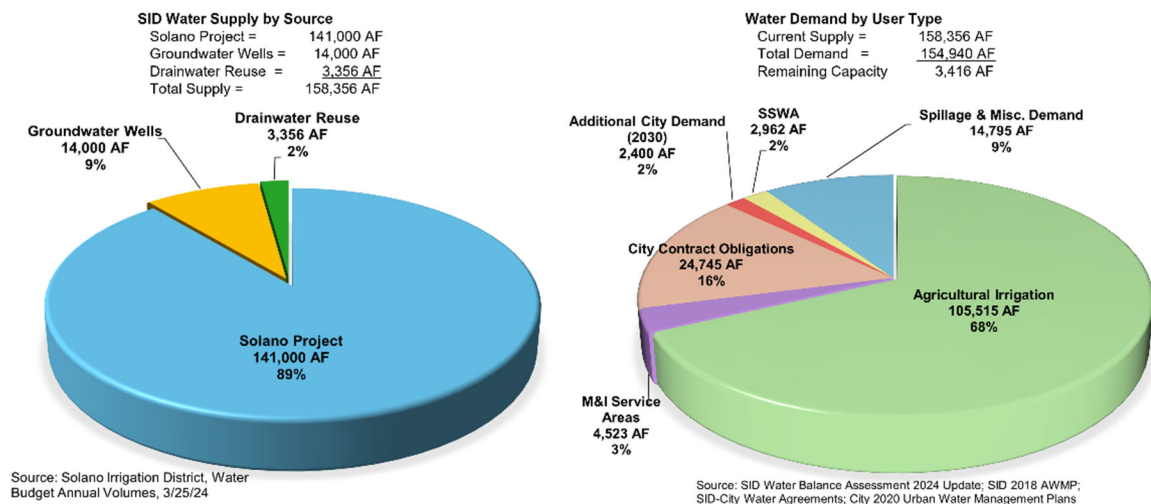

2. *The location and characteristics of any disadvantaged unincorporated communities within or contiguous to the sphere of influence.*

DUC's are defined as inhabited communities containing 12 or more registered voters within an unincorporated area of a county (Census Designated Places under from the U.S. Census Bureau's American Community Survey) where the annual median household income is less than 80 percent of the statewide annual MHI.

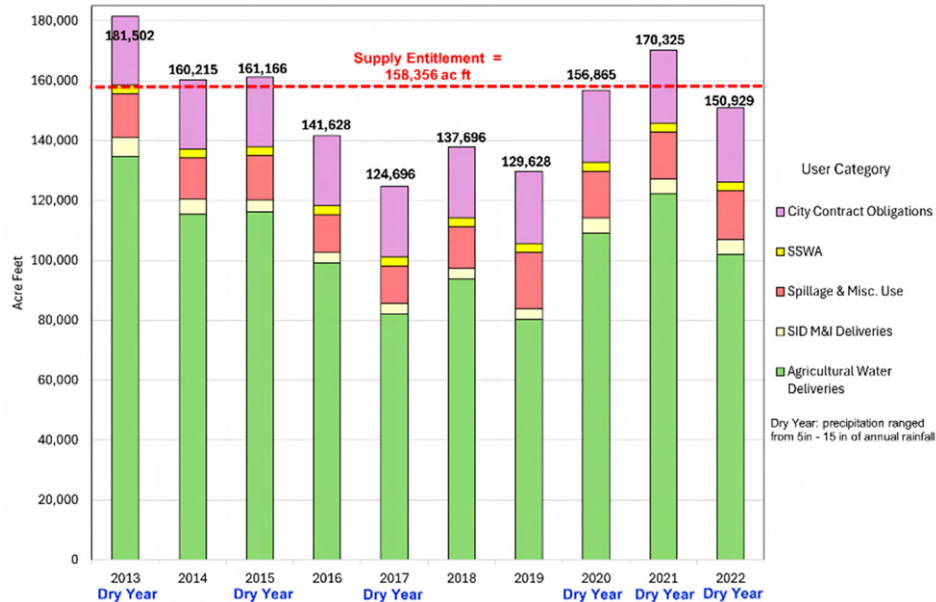

There are four unincorporated Census Designated Places in Solano County. However, all four are recorded to have household incomes that exceed the 80% threshold (\$73,524). Therefore, there are no DUCs within or contiguous to the SOI.

3. *Present and planned capacity of public facilities, adequacy of public services, and infrastructure needs or deficiencies including needs or deficiencies related to sewers, municipal and industrial water, and structure fire protection in any disadvantaged, unincorporated communities within or contiguous to the sphere of influence.*

Water Supply and Demand: SID has a total annual water supply of 158,356 AF from three sources: surface water, groundwater, and drain water reuse. SID has an average annual water demand of 154,940 AF. Based on this average, the District has committed approximately 98% of its available water supply leaving the remaining capacity of 3,416 for new customers. The primary water demand is for agricultural irrigation (~68%).

A long history of continued efforts to increase water conservation, enhanced irrigation techniques, evolution of crop types, and better techniques to capture and reuse water has supported SID's efforts to continue to effectively provide water to its users. However, an assessment of SID's water supplies reveals that water demand for agricultural and urban uses is likely to exceed its future water supply by 2035.

Agenda Item 10.A LAFCO Project No. 2023-08: MSR for Solano Irrigation District Draft, Public Review
Solano LAFCO

This is especially true during multiple drought years and further ensured with the threat of the potential new Bay Delta Plan instream flow rules, but actual impacts are not yet known.

Water System Infrastructure: SID controls and maintains a complex system of canals, pipelines, and ditches controlled and monitored by weirs, dams, meters, and pumps. An engineering report completed after 2017 found that The Distribution Canal Efficiency ranged from 82 to 91 percent between 1991 and 2017. The District has taken measures recommended by the report to maintain or increase efficiency, such as lining more canals.

The Putah South Canal (PSC) is the main canal that serves SID's irrigated area and provides M&I deliveries to the cities of Vacaville, Fairfield, Benicia, City of Suisun City and Vallejo as well as various smaller developments. The PSC runs generally south and is approximately 33 miles in length. Branching from the PSC are about 60 lateral headings and turnouts. The District delivers water through 272 miles of canals and lateral to about 47,000 irrigated acres within a total service area of more than 74,000 acres. The following table breaks down the various lateral headings and turnouts by miles.

Canal and Pipeline Lengths in the SID Distribution System

Type	Length (miles)	Percent
Canal - Unlined	88	24%
Canal - Lined	15	4%
Pipe	169	46%
Agricultural subtotal:	272	74%
Pipelines serving developments	97	26%
Total	369	100%
Total Lined or Pipelined	281	76%

Overall, SID has a stable total of available water to meet existing and projected water demands through 2035, barring any significant droughts or the threat of the Bay-Delta instream flow requirements. SID actively updates its Capital Improvement Plans and

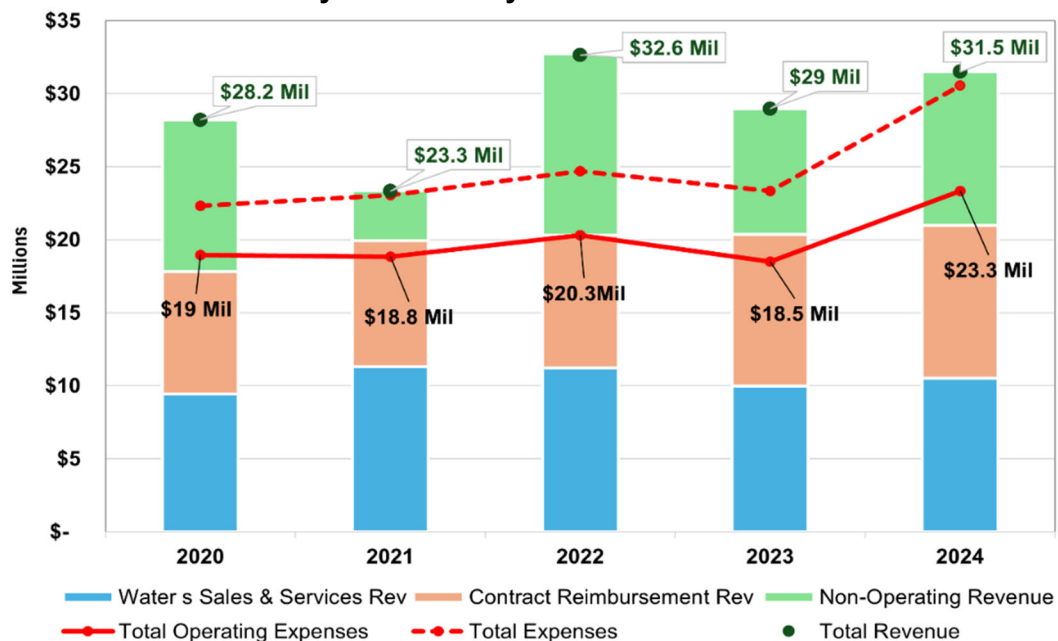

Strategic Plan priorities to ensure continued effective services. This MSR recommends completing updates to the District's Agricultural Water Management Plan, exploring opportunities to increase water storage to capture rainfall/runoff to supplement water sources, and explore opportunities to merge the small M&I systems. These recommendations should be considered prior to LAFCO making a recommendation on SID's sphere of influence.

4. *Financial ability to agencies to provide services.*

Solano Irrigation District operates as an Enterprise Fund with their budget divided into two categories: operating and non-operating. Enterprise fund accounting is considered best practice in promoting and maintaining long-term financial sustainability. The District reports its accounting and financial activities in accordance with governmental Generally Accepted Accounting Principles (GAAP), which require operating revenues and expenditures to be reported separately from non-operating business activities on an agency's financial statement.

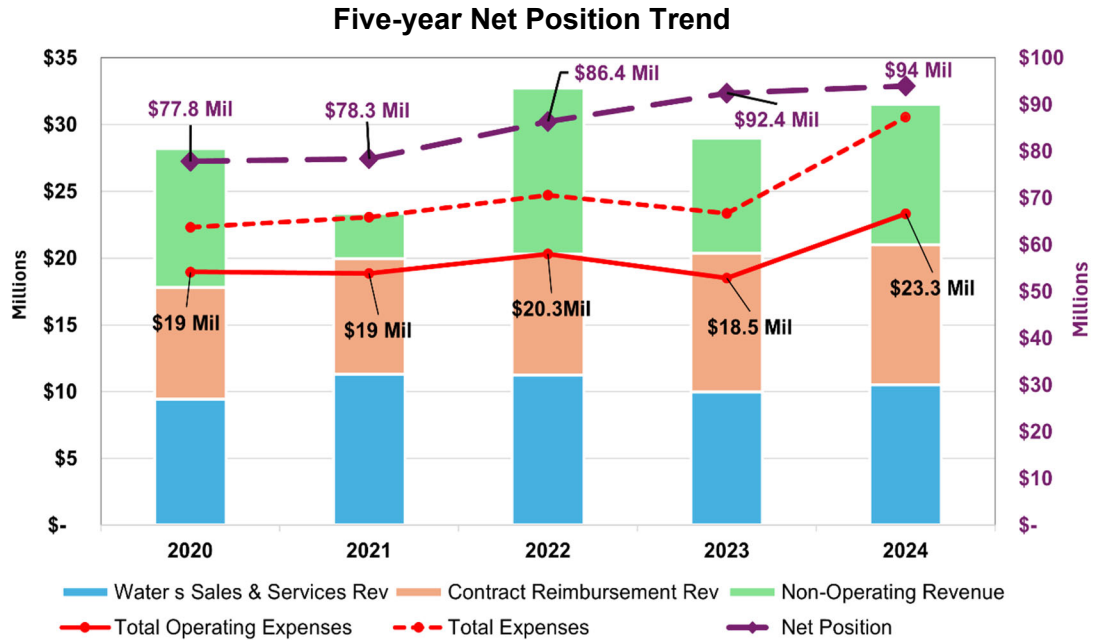

Revenues and Expenses: Between 2020-2024, SID consistently finished their fiscal years with more revenues than expenses. In two of the five years, their operating expenses exceeded their operating revenues. Both years reflect the tail end of the District's 5-year cycle of the fees and rates studies. Both years' expense gaps were covered by non-operating revenues and/or reserves, therefore the District remained solid. The following graph reflects this finding.

5-year Summary of SID Financials

The District's net position (the overall financial position for a government agency) has steadily increased over the past five years from \$77.8 million in 2020 to \$93.9 million in FY 2024. SID has consistently shown improvement in its net position due to revenue growth and cost management.

Financial Indicators: Financial indicators are quantitative metrics used to assess financial health, operational performance, guide budget development, and track long-term fiscal sustainability of agencies. Financial indicators are typically presented in ratios. For water and wastewater utilities, including irrigation districts, a ratio of 1.0 or higher is generally considered acceptable, with a target ratio often falling in the range of 1.2 to 2.0. A ratio below 1.0 could signal potential difficulty in meeting short-term financial obligations. A ratio greater than 2 is considered to be a high ratio and can indicate that the utility is not efficiently using its assets. It may be holding excessive cash that could be better invested in infrastructure.

This MSR considered the following financial indicators based on the 2024 audited financial reports and found SID to be in overall good financial health.

Financial Metric Name	Formula	Calculation	Ratio*
1. Operating Revenue Ratio	Operating Revenues / Operating Expenses	\$ 20,994,359 / \$ 23,328,001	0.90
2. Total Revenue Ratio	Total Revenues / Total Expenses**	\$ 31,513,997 / \$ 26,093,424	1.21
3. Solvency Indicator Ratio	Total Assets / Total Liabilities	\$156,781,235 / \$ 64,016,098	2.45
4. Liquidity Cash Ratio	Unrestricted Cash & Cash Equivalents / Current Liabilities	\$ 27,368,376 / \$ 5,019,946	5.45
5. Debt Service Coverage	Ag Rev – Maintenance & Op Costs / Principal & Interest Payments	\$ 1,761,358 / \$ 1,326,800	1.33
* Ratio greater than 1.0 indicates good financial health **excludes depreciation expenses			

This MSR recommends that SID maintain their 5-year review cycle of all fees to ensure continued financial stability.

5. *Status of, and opportunities for, shared facilities.*

SID has worked cooperatively with local agencies for nearly 70 years on a myriad of water management initiatives and programs of local, regional and statewide importance. SID is contracted with several agencies to provide engineering services, maintenance and management services, and operational and reporting services. This MSR finds that SID effectively shares services and facilities.

One consideration this MSR recommends is that SID consider opportunities for consolidation/annexation with other rural water districts including Rural North Vacaville Water District (RNVWD) and Maine Prairie Water District (MPWD), which share common boundaries with SID.

6. *Accountability for community service needs, including governmental structure and operational efficiencies.*

Special districts are primarily accountable to the voters who elect their boards of directors and the customers they serve. Independent special districts are governed by independent boards, most often directly elected by voters within the district. These boards have a high degree of autonomy.

SID's Board of Directors are elected by registered voters within the District. Board meetings are public and held on the third Tuesday of each month at the District's Offices located at 810 Vaca Valley Parkway in Vacaville. Agendas are available 72 hours prior to all regular Board meetings and are posted at a site accessible to the general public and on the District's website; all consistent with the Brown Act.

This MSR finds that SID exhibits the characteristics of a well-managed agency operating transparently and efficiently, serving its customers effectively with full-time professional staff with related expertise. The District's governance and management practices comply with state laws for water irrigation districts, transparency, and financial reporting.

7. *Any other matter related to effective or efficient service delivery, as required by commission policy.*

LAFCOs are tasked with balancing development and growth in a way that discourages sprawl, preserving open-space and prime agricultural lands, and support the effective and efficient extension of agency services. In doing so, LAFCO's are guided to ensure the orderly and efficient arrangement of local government boundaries and to avoid duplication of services within a county. There can be several different factors or matters that may impact SID's current or future ability to effectively or efficiently provide services.

This MSR determines that SID is substantially in compliance with local policies. However, MSR recommendations include (1) SID to work with Solano LAFCO when considering any future Out of Agency Service connections or agreements to ensure that Gov. Code §56133 is not violated; and (2) that SID conduct further capacity studies and supply assessments prior to any expansions to the District's sphere of influence.

Methodology

The MSR's seven factors require significant research and analysis in order to inform the seven determinations. The methodology employed involved data collection, interviews, and extensive review of public documents related to operations, budgets, audits, and governance. Resources include:

- State Water law
- District formation documents
- services offered
- demographic demand trends
- water sources and supply
- annual budgets
- financial statements
- capital improvement plans,
- water supply and
- consumption trends,
- rate studies,
- water management plans,
- technical reports
- assessor parcel information
- census data
- land use research
- staff reports

District Overview

Solano Irrigation District was formed in 1948 as an independent special district under the California Water Code for the purpose of securing Lake Berryessa water rights from the U.S. Bureau of Reclamation's Solano Project ("Solano Project") for agricultural, municipal, industrial, and domestic consumption in a defined area of Solano County. Solano Project water cannot be used outside the defined service area place of use without first amending the Water Service Contract with the Bureau and obtaining State Water Resources Control Board approval

SID has an entitlement for 141,000 AF of water from the Solano Project for services in Solano County each year.

SID has annual entitlements for 141,000 AF¹ of Solano Project water for agricultural irrigation and municipal and industrial purposes. The District also operates the Solano Project facilities, which delivers Lake Berryessa water to four cities (Dixon, Fairfield, Suisun City, and Vacaville), the Maine Prairie Water District, and SID customers. The district owns and operates the hydroelectric power plant at the base of Monticello Dam. Water released near the bottom of the dam is used to

generate electricity from three generators with a combined capacity of 11,500 kilowatts. The electrical power produced is sold to PG&E under a long-term agreement that expires in 2031 and may be renegotiated.

The District covers approximately 74,166 gross acres. Land uses within the District are predominately agricultural lands with some rural residential and commercial uses. A portion of the District, approximately 13,712 acres, overlaps parts of the cities of Suisun City, Fairfield, Vacaville, and Dixon involving lands that were not detached when they were annexed into the cities. Areas that overlap with city boundaries typically include commercial, industrial, and urban residential uses. The District has a population of approximately 55,082 residents living within its service area, including 3,951 residents living in unincorporated areas, 29,873 residents served by the Suisun-Solano Water Authority, and 21,258 in areas that overlap with city boundaries.

SID covers 74,166 gross acres and primarily serves the unincorporated areas of Solano County with raw water for agricultural irrigation.

¹ AF means "acre-foot" is which is a unit of volume used to measure large amounts of water, representing the amount of water needed to cover one acre of land with a depth of one foot.

Primary Findings

1. Population is not a significant factor when considering SID's service demand.
2. There are no disadvantaged unincorporated communities within or adjacent to SID.
3. SID's has a stable total available water entitlement supply is 158,356 AF. The 10-year average demand has been 154,940 AF. This leaves approximately 3,416 AF, on average, of available water for service growth.
4. The 2015 Water Supply Shortage Risk Assessment concluded that under the most challenging future conditions and when city contract obligations increase starting 2024, SID agricultural customers are forecast to experience water supply shortages 96 percent of the time, with maximum shortages of up to 60,000 AF, or 28 percent of total demand (agricultural and urban), in any given year.
5. If the trends for crops and acreage continue and the region does not experience several years of dry seasons, SID should have sufficient water to meet existing needs. However, if SID plans to expand its boundaries or crop trends change to increase demand, SID may be required to update the MSR analysis prior to any annexations.
6. SID completed their first Strategic Plan in 2014 and updated it in 2017. At its March 19, 2024, the Board updated and adopted its 5-Year priorities from the 2017 Strategic Plan. This was done in-lieu of a full Strategic Plan Update.
7. The State Water Resources Control Board (State Water Board) released a proposed San Francisco Bay-Delta Plan (Bay-Delta Plan) for the Sacramento Basin in September 2023. The July 2025 Draft Plan recommends an unimpaired flow of water of surface water from Lake Berryessa at minimum of 0% and up to 55%. It also mandates a minimum level of 900,000 AF in Lake Berryessa for cold water storage supply for the Sacramento River. Water Supply Adjustments accounted for in the recent draft of the plan may reduce or increase this minimum storage level for a given water year type.
8. Based on 20 years of hydrological and water delivery data, the current draft of the Bay-Delta Plan could result in zero water deliveries from Lake Berryessa in 20% of water years for Solano County customers and depending upon the Water Supply Adjustment criteria results in the remaining 80% of years with a significantly reduced (less than 50%) of allocation available to users. This would have catastrophic effects on the region's cites, farms, and economy.
9. The Bay-Delta Plan could have serious long-term consequences for Solano County's water supply.
10. Annexations of parcels with existing out-of-service area agreements and existing connections should be supported to encourage compliance with CKH. SID should not enter into any new out-of-agency service agreements without Solano LAFCO review and approval, under Gov Code 56233. Future annexations will require proof of a tax sharing agreement with any relevant, impacted agency.
11. SID could explore opportunities for additional water storage along the distribution system that can capture rainfall and runoff during the wet seasons to supplement irrigation water

in the dry season and provide for additional groundwater recharge, consistent with the Solano Subbasin GSP. SID should also continue its conservation efforts with the canals, meters, and pumps.

12. SID should work jointly with other water uses of the Solano Project/Lake Berryessa water; such as Solano County Water Agency, cities in Solano County, and Solano County departments; to carefully monitor and possible challenge the Bay-Delta Plan's unimpeded flow rule
13. The District's total revenues consistently increased each year for the last five years. In years where operating expenses were not covered by operating revenues, non-operating revenues were able to cover the gap.
14. The District is in a strong financial position and generates sufficient cash flow to meet its short-term obligations, fund operations, and invest in growth. Cash flow from operations has been positive over the past five years.
15. SID should maintain their 5-year review schedule of all fees to ensure the District's financial viability.
16. SID should propose a Sphere of Influence and boundary that accurately reflects its service population and future growth desires and needs.
17. SID should continue to look for opportunities to share services and facilities to continue to provide efficient and effective services.
18. SID will be asked to consider opportunities for consolidation or merger with other rural water districts including Rural North Vacaville Water District (RNVWD) and Maine Prairie Water District (MPWD), which share common boundaries with SID.
19. SID is aware of the substantial planned potential growth within its jurisdictional boundaries. However, the District understands that the planned potential growth is very speculative at the time of this MSR.
20. SID has existing and allows for more out-of-agency service agreements that may not be consistent with Gov.Code §56133.

Section 1: Introduction

The Introduction section briefly explains the regulatory responsibility and authority of LAFCOs and of the Solano Irrigation District.

1.1: *Role and Responsibility of LAFCO*

LAFCO's are governed by the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000 (CKH). LAFCO serves as an arm of the State that is responsible for the preparation and review of municipal service reviews (MSRs) and sphere of influences (SOIs) for cities and special districts. LAFCOs are hailed as being the watchdog of agencies, tasked to ensure regional coordination of land uses and the related municipal services that support orderly and logical growth. CKH establishes procedures for local government changes of organization, including city incorporations, annexations to a city or special district, and city and special district reorganizations.

MSRs and SOIs are tools created to empower LAFCOs to satisfy CKH's legislative charge of:

“discouraging urban sprawl, preserving open-space and prime agricultural lands, efficiently providing government services, and encouraging the orderly formation and development of local agencies based upon local conditions and circumstances.” (GC §56301)

LAFCOs do not regulate land use, dictate internal operations or administration of local agencies, or set service rates. However, LAFCOs are empowered to enact policies that indirectly affect land use decisions. On a regional level, LAFCOs promote communities' logical and orderly development as they consider and decide individual proposals. LAFCOs have a role in reconciling differences between agency plans so that the most efficient urban service arrangements are created for the benefit of current and future area residents and property owners.

1.2: *Municipal Service Review*

The municipal service review (MSR) is a means of identifying and evaluating public services relevant to existing and planned land uses in order to inform the governmental entity, LAFCO, the public, district property owners, and other interested parties about actions that could be taken to improve the efficient delivery of public services.

An MSR must be conducted prior to, or in conjunction with, a sphere of influence (SOI)² update. The MSR process does not require a LAFCO to initiate changes of organization based on the service review. It only requires that LAFCOs make findings and determinations regarding the current and future provision of public services. LAFCOs may subsequently use the findings and determinations from the analysis to consider whether to pursue changes to service delivery and/or government organization. The MSR analysis is also relied on to make findings and determinations for a SOI update or amendment.

Municipal Service Reviews are conducted in accordance with criteria established in California Government Code §56430 and include findings and written determinations made with respect to each of the following seven factors:

² GC §56430.

1. Growth and population projections for the affected area;
2. The location and characteristics of any disadvantaged unincorporated communities within or contiguous to the sphere of influence;
3. Present and planned capacity of public facilities, adequacy of public services, and infrastructure needs or deficiencies including needs or deficiencies related to sewers, municipal and industrial water, and structural fire protection in any disadvantaged, unincorporated communities within or contiguous to the sphere of influence;
4. The financial ability of agencies to provide services;
5. Status of, and opportunities for, shared facilities;
6. Accountability for community service needs, including governmental structure and operational efficiencies; and
7. Any other matter related to effective or efficient service delivery, as required by commission policy.

CKH gives LAFCO broad discretion in deciding how to conduct MSRs (GC §56375), including geographic focus, the scope of study, and the identification of alternatives for improving public service efficiency, cost-effectiveness, accountability, and reliability. As permitted by CKH, LAFCO has adopted standards and guidelines that identify that LAFCO will determine when MSRs are necessary. Generally, MSRs will be prepared before SOI updates. MSRs may be conducted independently of the SOI update based on several factors, including but not limited to, concerns of affected agencies, the public, or LAFCO; public demand for a service review; public health, safety, or welfare issues; service provision issues associated with areas of growth and/or development.

1.3: Sphere of Influence Considerations

A SOI is defined by the California Government Code §56076 as “a plan for the probable physical boundary and service area³ of a local agency, as determined by the Commission.” This means that the SOI is the agency’s plan for growth and expansion of its services and therefore should be based on land use assumptions.

The SOI is one of the most important tools used by LAFCO to ensure regionally coordinated planning and efficient provision of municipal services. Land cannot be annexed to an agency unless it is within that agency’s SOI and that agency’s MSR has demonstrated that that territory can be served efficiently by that agency.

CKH requires Solano LAFCO to review and update the SOI for each city and special district in the County every five years, as necessary.⁴ Findings and determinations for a SOI are supported by the analysis conducted in an MSR. Therefore, the planned land uses in an SOI must be part of the analysis within the MSR.

When adopting, amending or updating a SOI, LAFCO’s “shall consider and prepare a written statement of its determinations with respect to each of the following **five** factors:”

³ Service area means the agency’s jurisdictional boundary plus their Sphere of Influence areas.

⁴ GC §56425(g)

1. The present and planned land uses in the area, including agricultural and open space lands;
2. The present and probable need for public facilities and services in the area;
3. The present capacity of public facilities and adequacy of public services that the agency provides, or is authorized to provide;
4. The existence of any social or economic communities of interest in the area if the Commission determines that they are relevant to the agency; and
5. The present and probable need for public facilities and services of any disadvantaged unincorporated communities within the existing sphere of influence.

1.4: Methodology and Data Sources

Key tasks and activities required for preparation of this MSR involved data collection, interviews, and review of public documents to analyze and evaluate the District's governance, operation, and financial capacity to deliver services in a cost-effective and efficient manner. The evaluation included analysis of services offered, water sources and supply, annual budgets, financial statements, capital improvement plans, water demand and consumption trends, rate studies, water management plans, technical reports, and other information affecting SID's ability to provide adequate and efficient service to its current and future customers. The consultant team also reviewed District formation documents, State Water law, demographic demand trends, census data, assessor parcel information, land use, and other relevant information.

1.5: Compliance with State Laws (Principal Act)

Solano Irrigation District (SID or District) is an independent special district formed in 1948 as an irrigation district under the California Water Code, Division 11, Section §20500 (Principal Act). SID was formed for the purpose of securing surface freshwater supplies from the U.S. Bureau of Reclamation's Solano Project for agricultural irrigation and Municipal & Industrial (M&I) water users in Solano County.

The California Water Code⁵ gives irrigation districts broad authority to provide a wide range of water-related services. SID's authorized powers that were approved with formation are: (Appendix A is a summary of irrigation district powers)

- The right to sell and lease water for beneficial use;
- To levy and collect water delivery fees for irrigation;
- To provide municipal and industrial water service within their boundaries;
- To provide drainage made necessary by the irrigation provided;
- To operate and sell electrical power.

1.5: CEQA Consideration

Public Resources Code Section 21000, et seq., also known as the California Environmental Quality Act (CEQA), requires public agencies to evaluate the potential environmental effects of their actions. This MSR is exempt from CEQA under Class 6 categorical exemption. CEQA Guidelines Section 15306 states that "Class 6 consists of

⁵ §22075-§22186

Solano LAFCO

basic data collection, research, experimental management, and resource evaluation activities that do not result in a serious or major disturbance to an environmental resource.” Solano LAFCO finds that this MSR update does not have the potential for causing a significant effect on the environment and is exempt from CEQA.

CEQA considerations for an SOI are separate from an MSR. The SOI does not meet any categorical exemptions. As the tool for planned growth and expansion of services, the SOI can have a reasonably foreseeable impact on the environment. Therefore, the SOI is subject to CEQA analysis.

Section 2: District Overview

2.1: Formation and Mission

The Solano Irrigation District was voted into existence on February 28, 1948, for the purpose of obtaining water from the Bureau of Reclamation's new Solano Project.⁶ The original District area was 80,000 acres that was divided into five geographic areas for Board of Director representation. To finance its operations, the District can levy and collect water delivery fees, stand-by charges and ad valorem assessments. These revenues help the District meet its maintenance and operational costs as well as debt service payments.

The Solano Project consisted of the Monticello Dam as the main dam to create the Lake Berryessa Reservoir, and a diversion dam (Putah Diversion Dam) below Monticello Dam to create and hold Lake Solano.⁷ In 1981, SID took over the operation of the Monticello Dam and began work on the power-generator installation. The Monticello Dam began generating electricity in 1983.⁸

SID was not designed to take on the role of water wholesaler, and the Bureau did not want to deal with a lot of individual member units, the state legislature created the Solano County Flood Control and Water Conservation District in 1951 (later renamed Solano County Water Agency; SCWA). SCWA became the formal master contractor for its member agencies for Solano Project water.⁹

Today, SID encompasses 74,170 acres with a mission to *"provide safe and reliable water to our farms, families, and businesses. As stewards of our precious local water resources, we are committed to responsible environmental and fiscal management in order to protect and ensure those resources into the future."*

2.2: Principal Act: California Water Code Division 11

In California, the principal act governing irrigation districts is the California Irrigation District Law, found within the California Water Code, specifically Sections 20500 et seq.. This law outlines the powers, functions, and formation of irrigation districts, enabling them to manage and distribute water for various purposes. California Water Code Division 11 is known and is cited as the Irrigation District Law.¹⁰

These districts are formed to acquire, plan, construct, maintain, improve, operate, and keep in repair the infrastructure necessary for the production, storage, transmission, and distribution of water for various uses, including irrigation, domestic, industrial, and municipal purposes. Irrigation districts have broad powers, including selling and leasing water, operating sewage systems, providing fire protection, and managing recreational facilities.

⁶ Solano Irrigation District. *The Solano Water Story, A History of the Solano Irrigation District and the Solano Project*. 1988. Pg. 25.

⁷ id. Pg 128

⁸ id. Pg 124.

⁹ id. Pg 26.

¹⁰ Cal Water Code Section 20500.

When irrigation districts are formed, the formation documents identify what legally authorized powers would be activated and omit those that would not. Any unactive powers remain latent, unless and until a LAFCO processes a district's request to active the power. For SID, the following table identifies the District's active and latent powers:

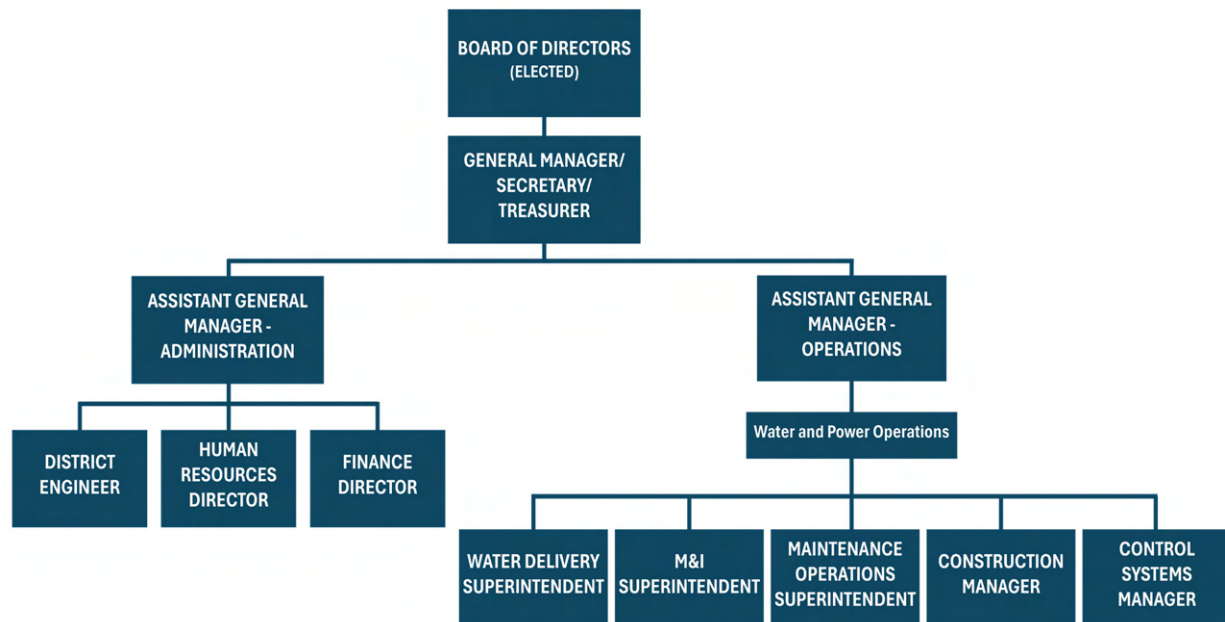

Table 2-1 SID Active/Latent Powers

Summary of California Water Code §22075-22186	Active / Latent
The right to sell and lease water for beneficial use;	Active
To levy and collect water delivery fees for irrigation;	Active
To provide municipal and industrial water services within their boundaries;	Active
<i>To operate sewage collection and disposal systems;</i>	<i>Latent</i>
<i>To deliver water for fire protection purposes;</i>	<i>Latent</i>
<i>To dispose and salvage sewage water;</i>	<i>Latent</i>
<i>To protect against damage from floods or overflow;</i>	<i>Latent</i>
To provide drainage made necessary by the irrigation provided;	Active
<i>To maintain recreational facilities in connection with any dams and reservoirs;</i>	<i>Latent</i>
To operate and sell electrical power.	Active

2.3: District Management and Governance

Solano Irrigation District is governed by a five-member Board of Directors, which are elected by registered voters living within the District's jurisdictional boundaries. The District's General Manager reports directly to the Board of Directors and oversees day-to-day operations with a staff of 87 employees, which includes 21 management and supervisory personnel. The key functions of the District are handled by four major departments with department heads reporting to the General Manager (see Figure 2.2). Major departments include:

- Engineering & Planning - Manages the planning, design, and implementation of the District's water systems and facilities;
- Finance/IT - Oversees the District's fiscal affairs and provides financial services;
- Human Resources - Responsible for the coordination of employment-related services including benefit administration, classification and compensation, labor and employee relations, recruitment and selection, safety and general liability, and workers' compensation;
- Water & Power Operations - Responsible for the operation, maintenance, and construction of the District's water systems and infrastructure.

**Figure 2-1 Solano Irrigation District Organizational Chart**

2.4: Board Members and Terms

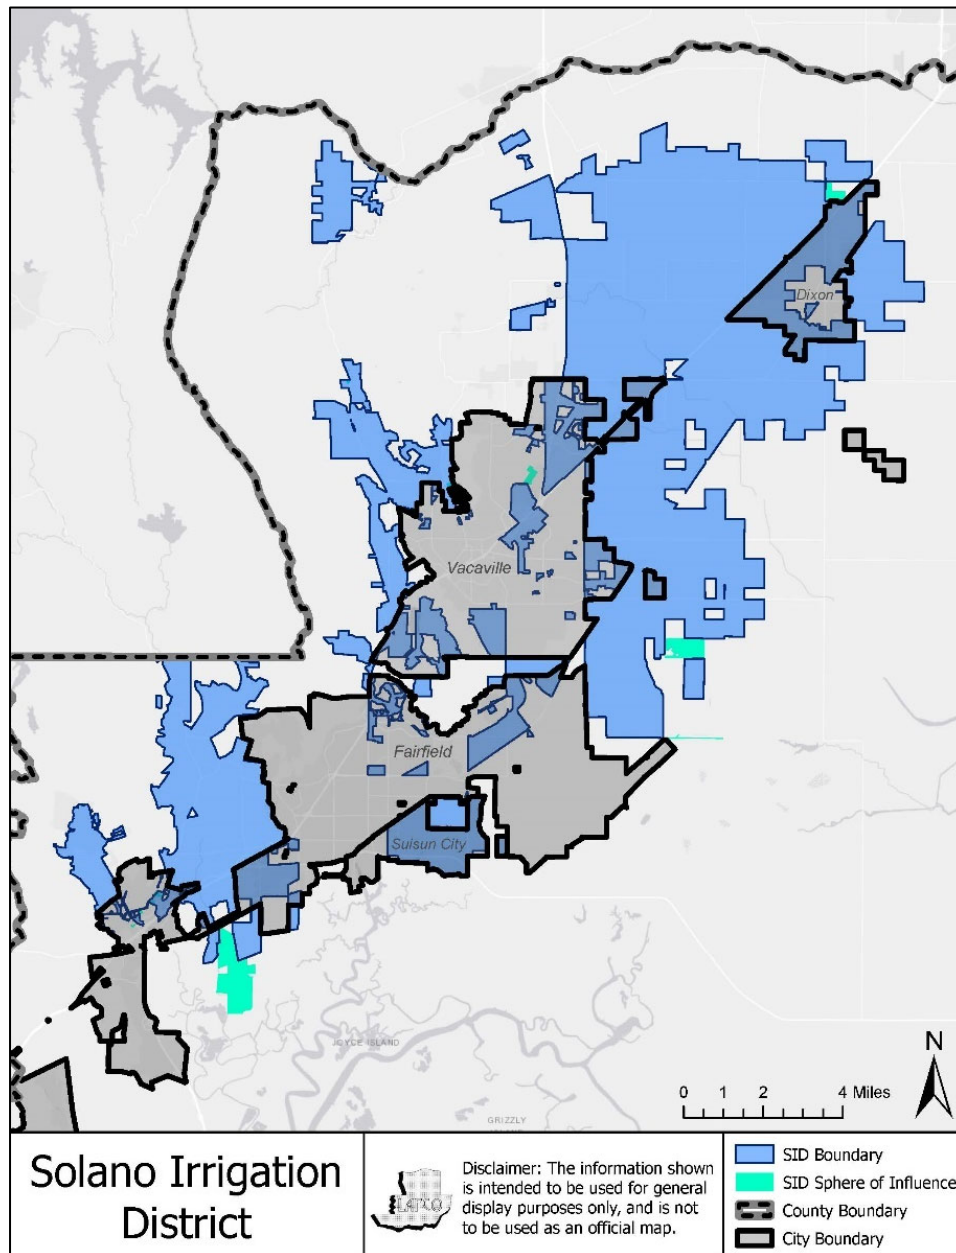

Board Members	Division	Position	Term Expiration Date
John D. Kluge	1	President	2026
William Brazelton	2	Director	2028
Michael Barrett	3	Director	2026
Pete Sanchez	4	Director	2028
Derrick Lum	5	Director	2026

2.5: Location & Size

SID's service area includes approximately 14,150 parcels covering approximately 74,170 acres located primarily in eastern Solano County. Roughly 82% of the District is unincorporated County land, primarily agricultural land. Approximately 13,720 acres, or 18%, of the District overlaps parts of the cities of Suisun City, Fairfield, Vacaville, and Dixon that were not detached when they were annexed into the cities. In most cases, SID continues to provide irrigation water in landscaped rights-of-way or in undeveloped lands that have remained agricultural.

The District extends from Fairfield in the southwest to Dixon in the northeast and includes part of the cities of Dixon, Vacaville, Suisun City, and Fairfield. The District's service area also includes pockets of land in several small valleys located between the Vaca Mountain Range and I-505/I-80 west and north of Fairfield and Vacaville, the largest being Green Valley, Vaca Valley, and Suisun Valley. The boundaries of the District are shown in Figure 2-2.

Figure 2-2 SID District Boundaries (2024)

Source: Solano County LAFCO

CHK does not include requirements that the boundaries of a special district be contiguous. Therefore, SID's boundaries are spread out with the intent to meet and provide for water needs within unincorporated Solano County and raw water for urban landscaping.

2.6: District Services

SID performs a variety of water related services authorized under its principle act that include supplying potable and non-potable water for agricultural irrigation, domestic uses, and commercial and industrial purposes. In addition to operating its own facilities, SID also provides facility management and operation services for several public water systems.

SID also operates and maintains the federal government's Solano Project water distribution system from Monticello Dam.

2.6.1 Agricultural Water Sales & Delivery

An average of 105,515 AF of water was used for agricultural purposes annually between 2013-2022, roughly 83% of SID's water demand. Annual use fluctuates based on crop types (referred to as cropping patterns), acreage under production, advances in irrigation technology, annual weather conditions, and evapotranspiration. The primary source of water is from Lake Berryessa with supplemental water pumped from groundwater wells, both SID and private.

Agricultural irrigation water is delivered to approximately 1,330 customers who are farming 50,000 irrigated acres in Solano County. Leading crops in Solano County are nursery stock, cattle and calves, processing tomatoes, alfalfa, hay, feeder lambs, wine grapes, milk, walnuts, dairy cows, and irrigated wheat. Since 2016, tree and vine crops have been the predominate crop in Solano County.

Tree and vine crops (grapes, berries, apples, peaches, cherries, pears, citrus crops, and tree nuts) have been the predominate crop since 2016. The average water requirement for a tree/vine crop is 3.5 AF of water per acre¹¹. With a ten-year average of 15,784 acres of tree/vine crops at roughly 3.5 AF of water, SID delivered approximately 55,118 AF of water to the top crop in their region. This is roughly 53% of the average acre-feet of water delivered to agricultural customers.

Table 2-2 Reported Crops within SID, 2013-2022

Year	Annual Crops	Corn	Grain	Pasture/ Hay	Tree/Vine	Fallow	Annual Ag. Water (AF)
2013	6,099	2,598	4,726	15,572	6,341	182	133,508
2014	10,749	1,634	1,910	16,366	10,119	126	114,267

2.6.2 Municipal & Industrial Water

Municipal and Industrial Water (M&I) refers to water used for human consumption (municipal use, potable water) or for commercial/industrial/landscaping uses (industrial use, non-potable water). Potable Water Systems (PWS) provide water for human consumption are classified as public water systems¹² (see Appendix B) and are regulated by the California Division of Drinking Water (DDW). Non-potable M&I water is used mainly for outdoor landscaping and industrial purposes and is not meant for human consumption since it has not been treated to drinking water standards.

SID owns and operates small potable and non-potable water systems serving approximately 1,225 billed customers in 19 service areas (see Table 2.1). SID also operates Non-Potable Water Systems (NPWS) that supply raw water to commercial and industrial users, as well as homes in remote areas.

Table 2-3 SID M&I Water Systems Service Areas

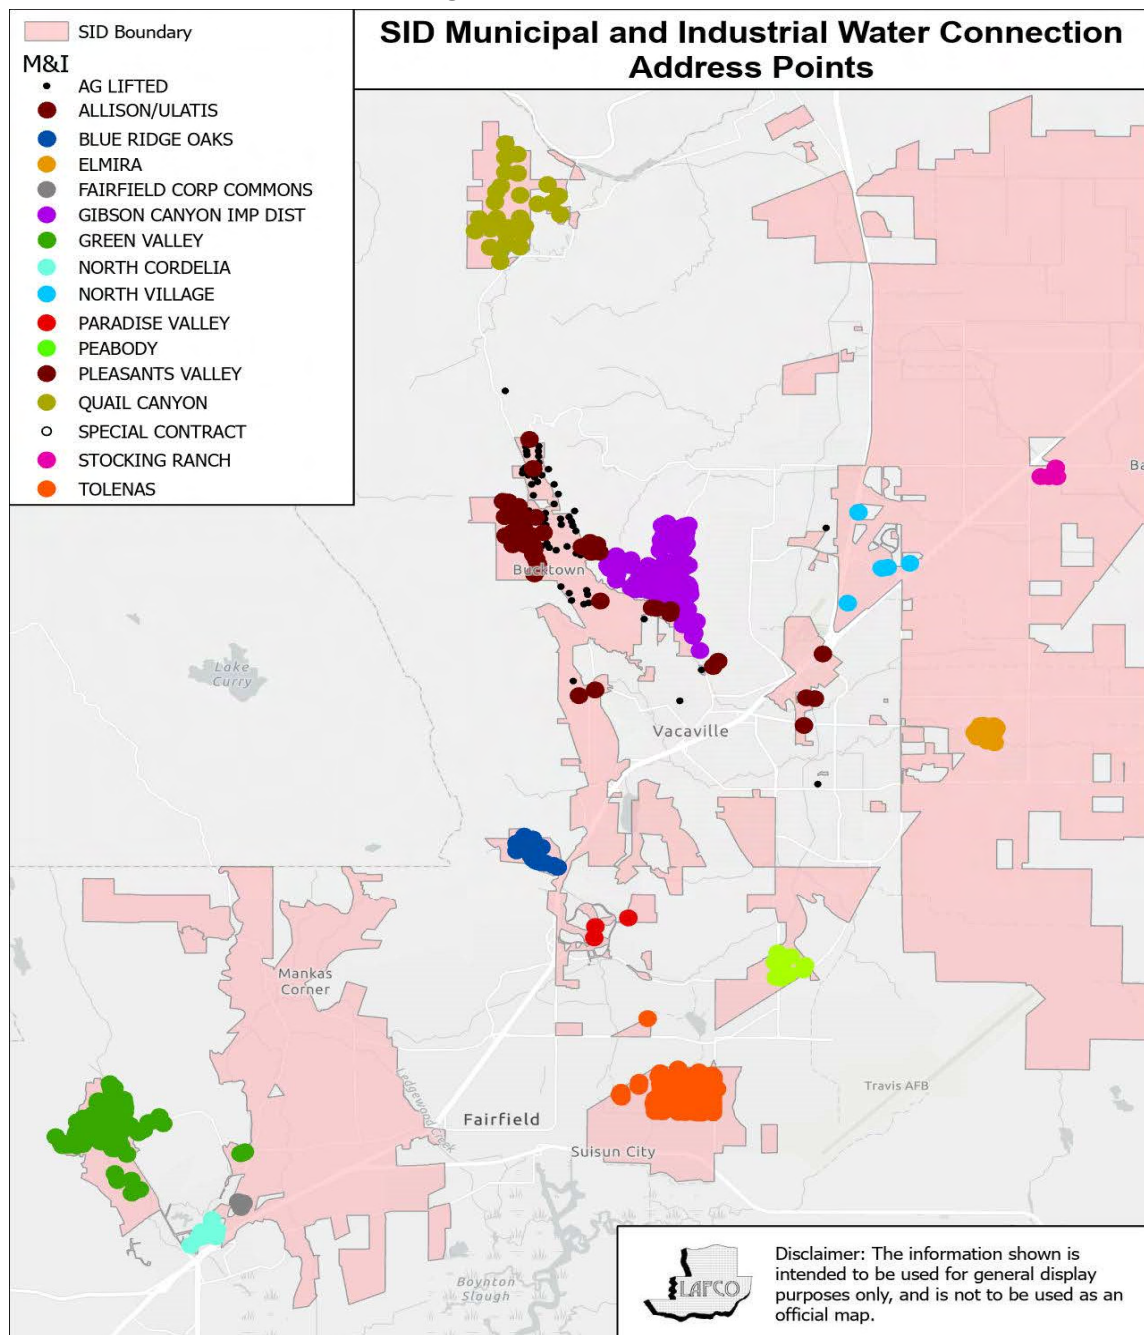

Service Area Name	Potable Water Service Area Connections	Non-Potable Water Service Area Connections	Water Source

¹² See Appendix B for details on public water systems.

SID acknowledges that these small systems are expensive to operate. Compared to larger systems, the small systems have few customers to share costs while the costs for maintenance and operations are the same as larger systems. These individual water systems have remained small and separate because they are generally geographically isolated. Extensions to new connections would have to be evaluated for economic and technical feasibility.

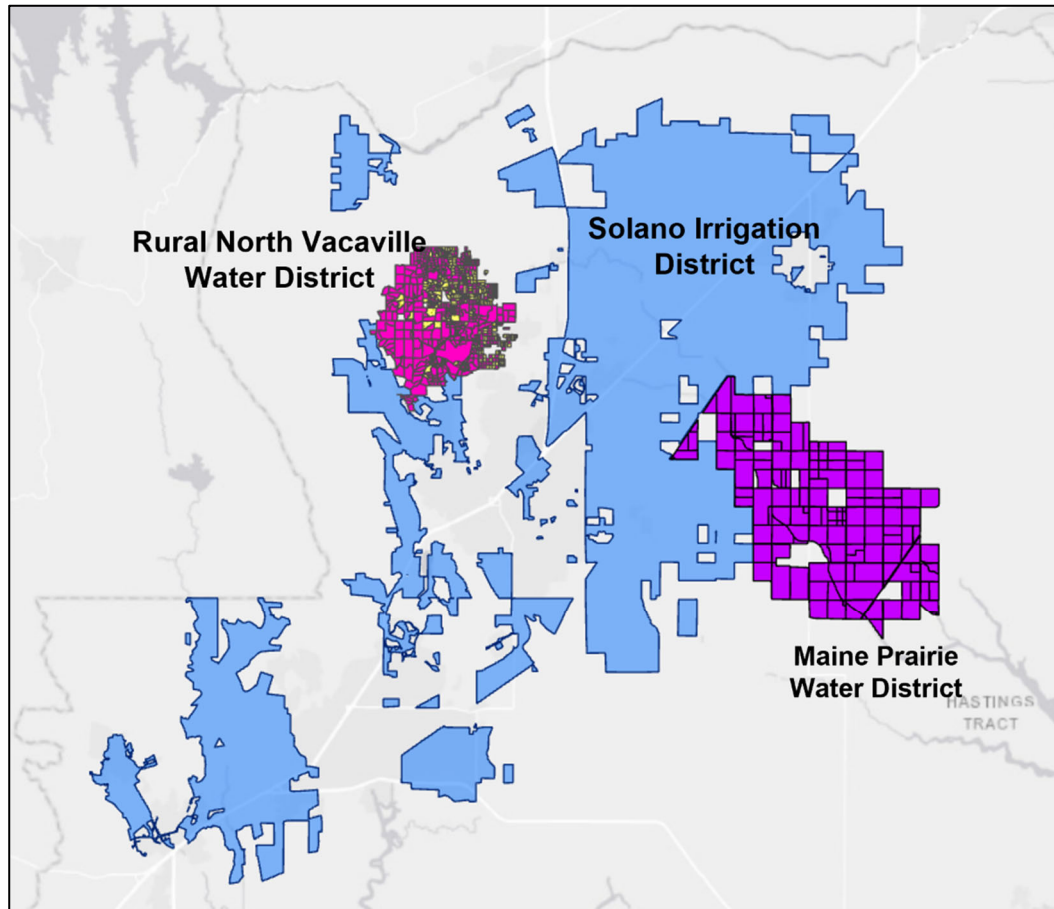

SID was asked to consider merging or attaching these independent M&I systems into a larger system or a nearby system. However, because of the geographic isolation of the various systems, SID determined this would be economically infeasible for the users.

Figure 2-3 SID M&I Map

SID was also asked to consider opportunities for consolidation or merger with other rural water districts including Rural North Vacaville Water District (RNVWD) and Maine Prairie Water District (MPWD), which share common boundaries with SID. SID declined further consideration because of the different purposes, functions, and governing boards of the two mentioned districts as compared to the SID.

Figure 2-4 Rural Water Districts Adjacent to SID

2.6.3 Wholesale Water Sales, Transfers, & Exchanges:

In addition to serving customers within its District boundaries, SID has various water supply and exchange agreements with other Solano County agencies. For the past several decades, SID has cooperated with Solano County cities and water districts in the sale, exchange, and transfer of water to meet the long-term needs and emergency supplies of the respective agencies. Water sales, transfers, and exchanges are important management tools for allocating and using water more efficiently to meet the critical needs of a region, especially during drought periods.

Water sales, transfers, and exchanges are important management tools for allocating and using water more efficiently to meet the critical needs of a region, especially during drought periods.

- 2019 SID Urban Water Management Plan

Longstanding agreements with the cities of Benicia, Fairfield, Vacaville, Suisun City, Vallejo, Suisun-Solano Water Agency, and Maine Prairie Water District. These agreements are in place to provide SID water as a supplement to other agency water supplies and provide for a more efficient use and reuse of a scarce resource. These agreements are addressed in each individual agency's Urban Water Management Plans¹³ (UWMP), which are updated periodically.

The UWMPs serve as a planning tool for water agencies in developing, managing, and delivering municipal water supplies to their water service areas. Water under contract with SID must be held by SID in trust to be delivered in part or in full upon request. Entitlement water can be stored and carried over if it is not used within that water year. If fully utilized, these Contractual Allocations commit SID to providing up to 27,145 AF of its Solano Project water allotment annually by 2030 (see Table 2.2).

Table 2-4 Solano Project Water Commitments Per

Year	Benicia	Fairfield	Vacaville	Total
2020	2,000	18,020	4,125	24,145
2025	2,000	18,020	5,625	25,645
2030	2,000	18,020	7,125	27,145
2035	2,000	18,020	8,625	28,645
2040	2,000	18,020	10,050	30,070
Source: Solano Irrigation District; SID-City Water Agreements; City 2020 Urban Water Management Plans; Benicia 2017 MSR				

SID currently has water agreements through contracts with the cities of Benicia, Fairfield, and Vacaville. SID also has a joint powers agreement with Suisun City that created the Suisun-Solano Water Agency (SSWA). Lastly, SID has a current water exchange agreement with Vallejo and previously had a water exchange agreement with Maine-Prairie Water District. Details regarding these agreements are explained below:

- a) Benicia Water Purchase Agreement:¹⁴ In March 2009, SID entered into a Water Allotment Transfer Agreement with the City of Benicia for up to a maximum of 2,000 AF of water annually. The water is used to supplement the City's needs during drought periods or to improve water quality.

SID delivers Solano Project water to Benicia from the Terminal Reservoir located in Green Valley. Water that is not used may be held in a carryover account for future use. Although there is no specified termination date, the agreement remains in effect as long as SID maintains its water rights with SCWA and the City continues to make payments to SID per the agreement.

¹³ UWMP is a long-term planning document that helps water suppliers ensure that enough water is available to meet current and future needs. UWMPs are required by California law to be prepared every five years by urban water suppliers.

¹⁴ SID/Benicia Solano Project Water Allotment Transfer Agreement, March 3, 2009; City of Benicia 2020 Urban Water Management Plan

- b) Fairfield Agreements:¹⁵ In 1974, SID and the City of Fairfield first entered into a Water Service Agreement. Additionally, in 1987, SID and Fairfield entered into a joint exercise of powers agreement (JEPA) for the purpose of entering into separate “water service sub-agreements.” As a result of the agreements, SID’s contractual allocation to Fairfield is a maximum of 18,020 AF annually.
- c) Vacaville Master Water Agreement:¹⁶ SID and the City of Vacaville entered into a Master Water Agreement in 1995 in which SID would supply Vacaville with 2,500-AF of water by 2010. A second amendment executed in 2010 provides for annual incremental increases of 300 AF per year. In addition, SID agreed to supply another 1,000 AF of water annually to assist the City with its economic development efforts. The Water Purchase Schedule within Amendment 2 obligates 5,325 AF of water to be supplied by SID in 2024 and increasing by 300 AF annually thereafter through 2050. The final contractual obligation to Vacaville is up to 13,050 AF annually in 2050. (Table 2.2 above depicts a 5-year schedule). Water not used in a given year can be held in a carryover account.
- d) Suisun-Solano Water Authority: In 1988, SID and the City of Suisun City entered into a Joint Exercise of Powers Agreement that created the Suisun-Solano Water Authority (SSWA) to provide potable water for domestic consumption and fire suppression in the city of Suisun City. Since then, the original agreement has been amended several times. The current amendment (Amendment #6) extended the Agreement through December 31, 2048, or until all revenue bonds issued by the Authority are paid in full.

Under the Agreement, SID is responsible for the planning, design, operation, maintenance, repair, and replacement of the SSWA water system. SID is also responsible for managing all water purification, storage, transmission, distribution and control facilities for SSWA. SID provides field service, capital maintenance, and water delivery services, and operates a water treatment plant on Suisun City’s behalf.

Separately, the City has water rights to both Solano Project and State Water Project (SWP) North Bay Aqueduct entitlements. The City has an entitlement of 1,300 AF of SWP water. The City is unable to directly utilize their SWP entitlement from the North Bay Aqueduct since it does not have the facilities to convey or treat SWP water. However, the City has the ability to exchange their SWP entitlement with other Solano County water users with access to the North Bay Aqueduct during periods of water shortage.¹⁷

- e) Vallejo Exchange Agreement: SID and the City of Vallejo have an unwritten exchange arrangement in which Vallejo provides raw water from its Sacramento River watershed assets to serve SID’s Tolenas service area. In exchange, SID delivers an equal amount of its Solano Project water to Vallejo’s Lake System Green Valley Treatment Plant.

¹⁵ SID/Fairfield Water Service Agreements, 1974; Joint Exercise of Powers Agreement, 1987; Second Amended Agreement, 2002; City of Fairfield 2020 Urban Water Management Plan

¹⁶ SID/Vacaville Master Water Agreement, 1995; City of Vacaville 2020 Urban Water Management Plan

¹⁷ Suisun-Solano Water Authority 2020 Urban Water Management Plan, p61

- f) Maine Prairie Water District Exchange Agreement (not in effect since 2023): SID and Maine Prairie Water District (MPWD) had a partnership for the exchange of water starting in 1983. The original Agreement was extended several times including in 2002, 2013, and 2018. The most recent Agreement expired in 2023 but is under renegotiations. The former agreement allowed SID to provide up to 20,000 AF of tailwater from its distribution system in exchange for 10,000 AF of MPWD's Solano Project allocation. This gave MPWD 5,000 AF of Solano Project water, and 20,000 AF of tailwater from SID.

MPWD has its own annual entitlement of 15,000 AF of surface water from the Solano Project through Solano County Water Agency (SCWA). However, it is not sufficient to meet the district's crop needs. Therefore, under the current arrangement between SID and MPWD, both parties have agreed to continue to work together where SID sells supplemental and drain water to MPWD if available and if necessary.

MPWD's Solano Project water main delivery point is at Sweeney Creek. SID, through the cooperative arrangement provides targeted deliveries to MPWD through SID's conveyance system.

2.7: Contract Services

SID earns non-operating income by performing contract services for other entities. These activities are not related to their core business operations. Non-operating income activities include operating and maintenance services for:

- a) Rural North Vacaville Water District (RNVWD): RNVWD is a small public water system supplying potable water from two groundwater wells to about 533 customers within unincorporated Solano County. SID is under contract with RNVWD for engineering services and the operation and maintenance of the RNVWD's water distribution system. SID performs all of the required functions to keep the water system in good working order in compliance with federal, state, and local standards.

SID is contracted to do all operations, maintenance, and engineering-reviews for RNVWD. Therefore, the possibility of merging RNVWD with SID's adjacent service areas should be explored. Such an arrangement may provide a more efficient operation with a reliable water supply and affordable options for both Districts. Refer to Figure 2-4. SID has historically declined to consider a merger.

- b) Solano Project Operation and Maintenance: SID provides contract services to the Solano County Water Agency for operation and maintenance of the U.S. Bureau of Reclamation's Solano Project conveyance facilities, including Monticello Dam, Putah Diversion Dam and Reservoir, and the Putah South Canal. The Bureau and SCWA recently renewed their long-term Operation, Maintenance, and Replacement Agreement as of March 1, 2024. SID, under contract with SCWA, operates and maintains the Solano Project on SCWA's behalf for the Bureau.

2.8: *Hydro-Electric Power Generation*

In addition to managing water distribution facilities, SID owns and operates the hydro-electric power plant located at the base of Monticello Dam. In 1981, SID received a license from the Federal Energy Regulatory Commission for the construction and operation of the power plant. Water is released near the bottom of the dam and used to generate electricity from three generators which have a combined capacity of 11,500 Kilowatts (this can power 6,000-11,000 homes).

PG&E has agreed to buy all the energy produced and pay all expenses to operate the plant under a long-term agreement that expires in 2031. After 2031, SID anticipates that the District will be able to openly sell the power on the open market.

Figure 2-5 SID Power SID Generation Plant at Monticello Dam

Section 3: District Water Breakdown

3.1: Water Sources and Supply

Solano Irrigation District has several water supply sources including:

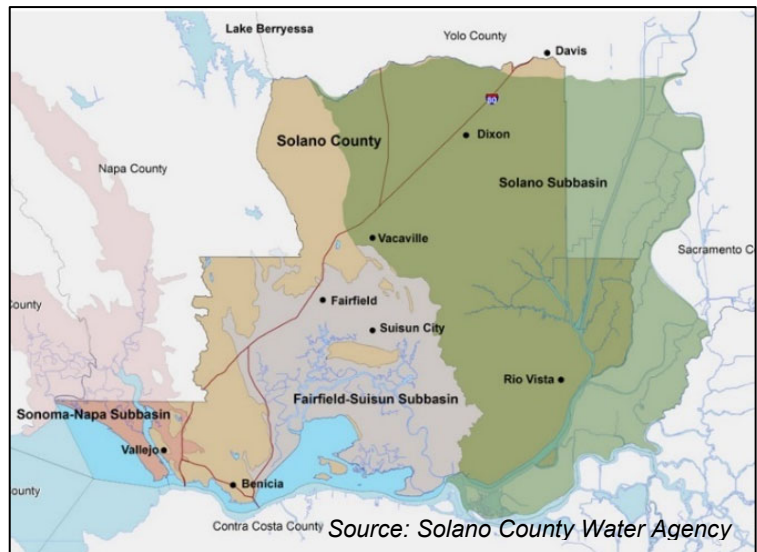

Surface Water: Lake Berryessa, created by the Monticello Dam¹⁸, is the District's primary source of water. SID has an annual contractual entitlement to receive 141,000 AF from the Solano Project. Water that is not used in any one year is added to a voluntary carryover account¹⁹ and may be used in any water year (March 1 – February 28) subsequent to the water year in which it was added. The voluntary carryover account is proportionally reduced when the reservoir spills. Carryover amounts are managed and tracked by SCWA, but SID carefully follows their account for water management.

Groundwater: In addition to its Solano Project water allocation, SID owns and operates 28 deep groundwater production wells to supplement its surface water supply up to 14,000 AF of ground water. SID's service area overlies two groundwater basins: the Solano Groundwater Sub-basin and the Fairfield-Suisun Groundwater Basin (see Figure 2.4). Groundwater is pulled from wells in both sub-basins. The District practices conjunctive use to decrease reliance on groundwater wells by using surface water when it is available.²⁰

Figure 3-1 Solano County Groundwater Sub-Basins

The California Sustainable Groundwater Management Act of 2014 ("SGMA") requires groundwater sub-basins to be managed on a sustainable basis. In 2017, the District formed a Groundwater Sustainability Agency ("SID GSA") to manage its groundwater resources in compliance with SGMA.

SID actively works with other GSAs within the County to achieve long-term groundwater sustainability by identifying ways to maximize local water supplies, enhance conjunctive management practices, and to recharge the groundwater system. An analysis undertaken by SID shows

¹⁸ Solano Irrigation District. *The Solano Water Story, A History of the Solano Irrigation District and the Solano Project*. 1988.

¹⁹ "Volunteer carryover account" is a virtual, accounting procedure that tracks unused water from the previous year for use in the next year.

²⁰ Conjunctive use of water, also known as conjunctive management, is the coordinated and planned use of both surface water and groundwater resources to maximize water supply reliability and availability. The California Department of Water Resources (DWR) is actively involved in promoting and supporting conjunctive water management strategies, particularly in the context of sustainable groundwater management and drought resilience.

that seepage and deep percolation from the District's surface-water deliveries serve as a significant source of recharge to both groundwater subbasins. As a result, a substantial portion of the groundwater pumped and used by other parties within these subbasins is derived from the District's management of surface-water resources for its irrigation customers. This demonstrates that ongoing groundwater availability in these subbasins is directly supported by the District's continued operation and delivery of surface water, underscoring the importance of maintaining those supplies.²¹

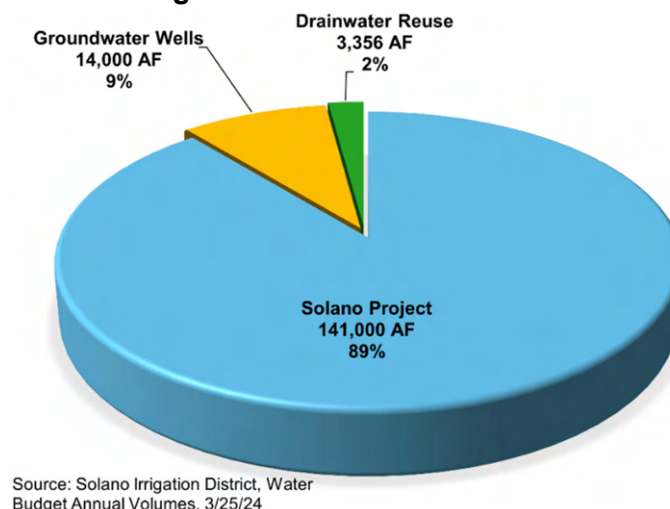

Drain Water Recovery and Reuse: The capture and reuse of drain water (also known as runoff or tailwater²²) provides an additional source of water that is available for agricultural irrigation. Six creeks enter the District from the west and flow easterly through 52 miles of unlined and unregulated drainage channels to the Sacramento River or southerly to the San Joaquin River Delta.

During the irrigation season, irrigation runoff from farm fields and operational spills enter these drainage channels. Pumps installed at various locations recover the drain water and discharge it back into the District's distribution system to augment its water supply. Drain water that is not recovered within the District travels southeasterly for use by Maine Prairie Water District. Any flows not recaptured eventually discharge into the Sacramento River Delta. Between 2013 and 2022, drain water recovered by SID averaged approximately 2,318 AF annually. Drain water outflows from the District during the same time period averaged 25,252 AF per year, which represents an opportunity for better capture and reuse of additional drain water.

SID has plans to construct various outflow recovery projects at the confluences of drainage pathways to better recover surface water and redistribute it within the District's boundaries.

Other Sources: Other sources, such as rainwater and seepage, accounts for approximately 112 AF annually.

Figure 3-2 SID Water Sources

²¹ Per SID General Manager and Assistant General Manager, November 13, 2025

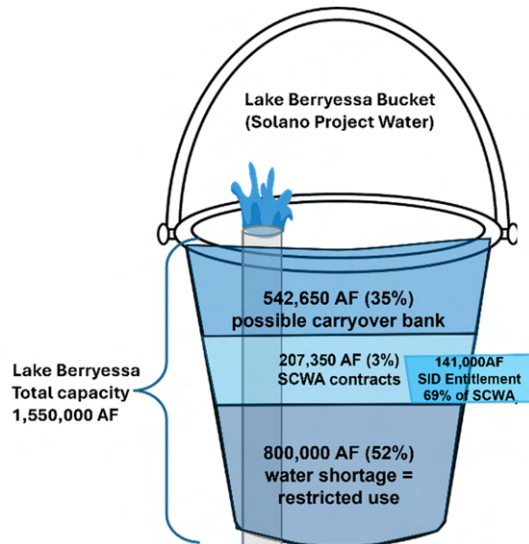

²² Tailwater is water that is located downstream of a hydraulic structure, such as a dam, culvert, bridge, or spillway. The height or depth of tailwater depends on the topography downstream and other factors.

3.2: Solano Project Water Entitlement ²³

SID's principal water source comes from the U.S. Bureau of Reclamation's (Bureau) "Solano Project." The Solano Project was built to supply water primarily for agricultural irrigation and secondarily for Municipal and Industrial (M&I) uses in Solano County. The Solano Project consists of the Monticello Dam and Reservoir (Lake Berryessa), Putah Diversion Dam and Reservoir (Lake Solano), Putah South Canal, and Terminal Reservoir.

SCWA entered into a Master Agreement for Solano Project Water with the Bureau of Reclamation on March 7, 1955. The Agreement was renewed on February 28, 1999, and again March 1, 2024, for a 25-year term expiring February 28, 2049. Renewal of the Master Contract did not result in any substantive changes (i.e., no changes to water releases, delivery, or use) other than extending the contract term.

As the master contractor, SCWA has executed long-term water rights agreements with its participating member agencies. The nine Participating Member Agencies receiving water from the Solano Project through agreements with SCWA include:

- Solano Irrigation District
- Maine Prairie Water District
- UC Davis
- Reclamation District 2068
- Cities of Vacaville, Fairfield, Suisun City, Vallejo, and Benicia

Water is delivered to Participating Member Agencies via conveyance facilities owned by the Bureau and managed and maintained by SID under contract with SCWA, including Monticello Dam, Putah Diversion Dam, Lake Solano, and the Putah South Canal.

SID's entitlement portion is 141,000 ac. ft.²⁴ of Solano Project Water.

Place of Use

Solano County Water Agency adopted a Water Transfer and Exchange Policy on July 8, 2021, that codified terms in the Solano Project contract with the Bureau of Reclamation. The SCWA policy states the following:

Solano Project Water: The Solano Project is a federal project that stores water in Lake Berryessa for delivery to users within the Place of Use. SCWA holds, as executors, long-term master water supply contracts with U.S. Bureau of Reclamation (USBR). Solano Project water cannot be transferred or exchanged outside its "Place of Use."

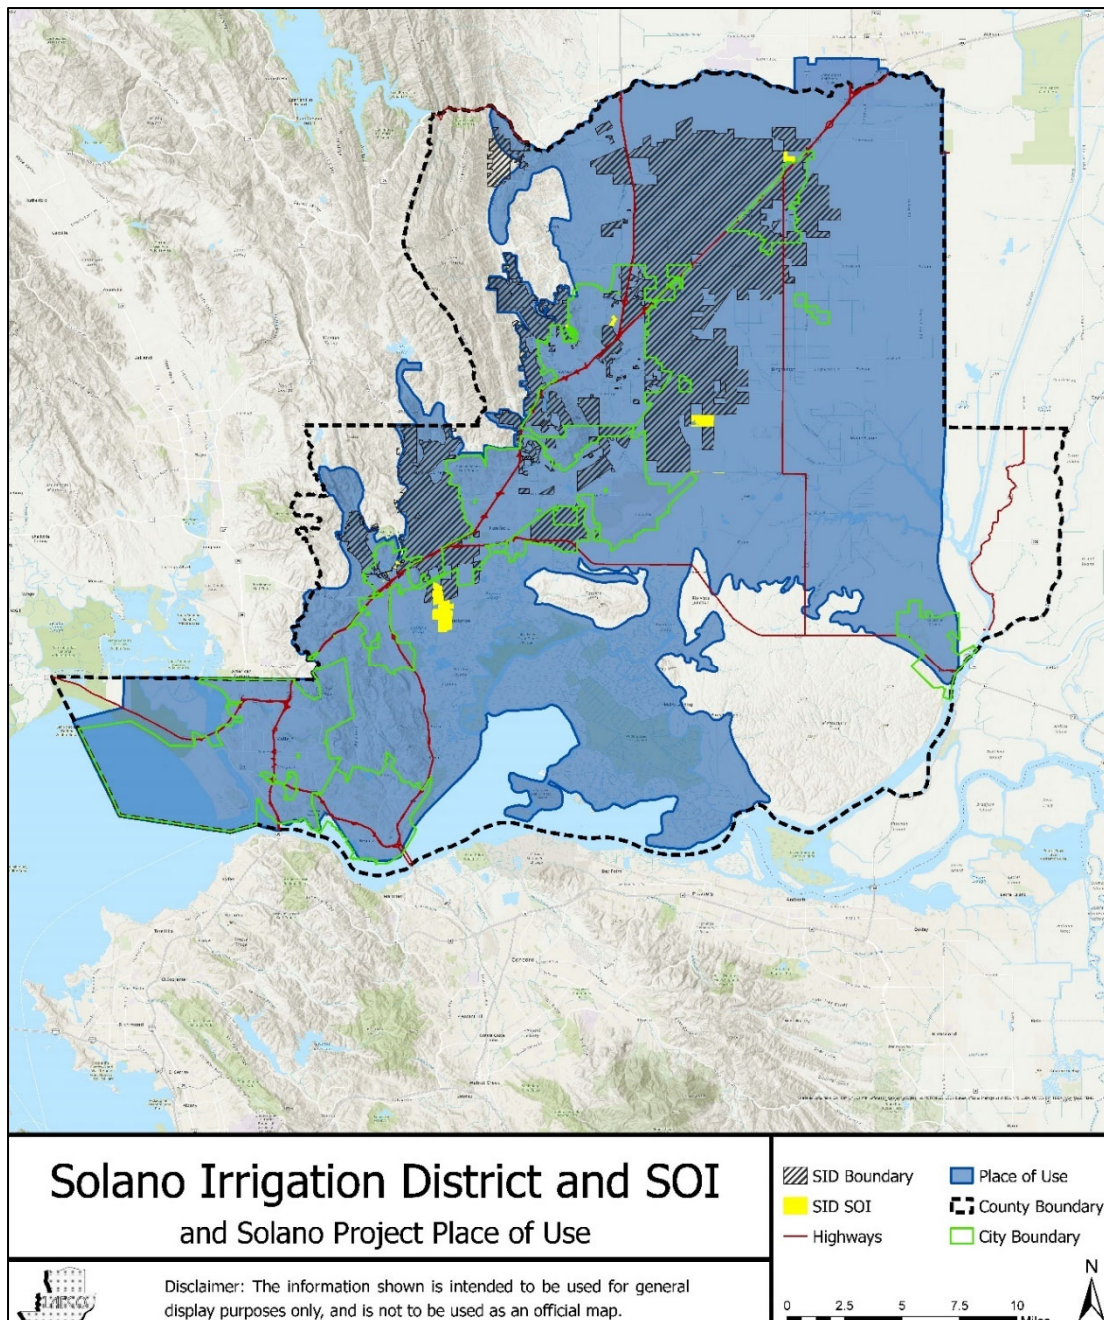

²³ For purposes of this document, an "entitlement" is a permanent legal right to share/access a specific amount of water from a water source. An "allocation" refers to the specific amount/volume of water that can be taken in a given year.

²⁴ ac. ft. = acre foot which means the amount of water it takes to cover one acre of land with one foot of water. One acre foot equals 325,851 gallons.

Place of Use: Geographical area that Solano Project water can be transferred or exchanged within. Place of Use is limited to Solano County (except Montezuma Hills), UC Davis and a small part of Yolo County as authorized by the State Water Board.

Therefore, Solano Project Water is prohibited from being served and used outside the defined Place of Use boundary. As SID's primary source of water is Solano Project Water, their water provision services are generally limited to the Place of Use boundary, unless a new groundwater well or another source is used.

Figure 3-3 Solano Project Water Place of Use Limits

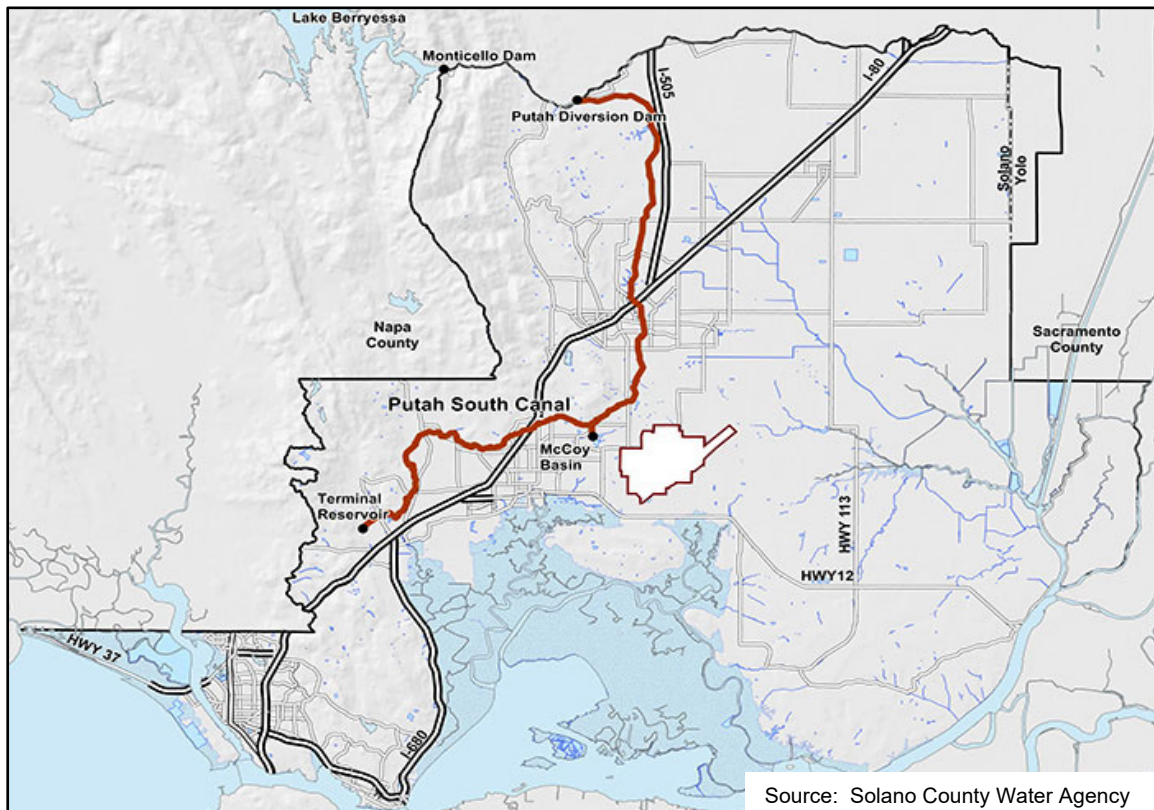

3.3: Solano Project Conveyance Facilities

Conveyance facilities in this MSR refer to the system of structures designed to transport water throughout SID boundaries. Solano Project conveyance facilities deliver surface water from Lake Berryessa to users in Solano County (see Figure 2.3).

The Bureau and SCWA signed a long-term Operation, Maintenance, and Replacement Agreement (generally referred to as the O&M Agreement) for the operation and maintenance of the Solano Project conveyance facilities. SID, under contract with SCWA, operates and maintains these facilities on SCWA's behalf for the Bureau.

The system starts with surface water from Lake Berryessa being released below Monticello Dam into Putah Creek then flowing for approximately 6 miles before encountering the Putah Diversion Dam forming Lake Solano. At the Putah Diversion Dam, water is diverted into the Putah South Canal (PSC), while the rest continues through Putah Creek. SID has hundreds of smaller canals that move and deliver water throughout their district.

Figure 3-4 Solano Project Facilities

The Putah South Canal (PSC) is approximately 33 miles in length and runs southward from Putah Creek near the city of Winters to Terminal Reservoir in Green Valley near Cordelia Junction. PSC supplies water by gravity flow to 60 lateral headings and turnouts²⁵ and is capable of handling flow rates up to 956 cubic feet per second (cfs). Most of the

²⁵ A water lateral is a permanent channel that carries irrigation water from a source to an irrigated area. A water turnout structure is a device that delivers water from a main canal to a water user via a lateral canal, pipeline, or pump well

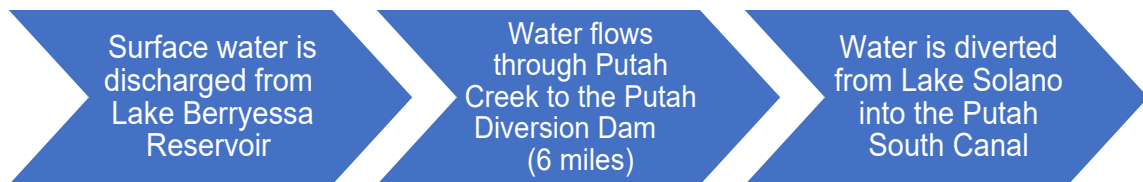

area served by PSC is by gravity flow except for lands in the upper Vaca Valley, Suisun Valley, and Green Valley that are at a higher elevation than the PSC. These areas are served by pump lift systems.

Putah South Canal is the main canal that delivers Lake Berryessa surface water to SID's irrigated lands. It also provides M&I deliveries to the cities of Vacaville, Fairfield, Benicia, Suisun City and Vallejo, as well as to various smaller rural-residential development service areas²⁶.

Lake Solano is operated in coordination with Lake Berryessa to maintain a specific flow rate for Putah Creek riparian habitat and to meet hydro-electric power generation requirements.

Figure 3-5 Solano Project Conveyance

²⁶ Refer to Table 2-3 M&I Water System Service Areas for the various service areas.

Section 4: MSR Factors and Determinations

A MSR is a comprehensive review of an agency's ability to provide service(s) to those people and businesses within its current boundaries. LAFCO Municipal Service Review (MSR) factors are the key areas that LAFCOs are required to evaluate when reviewing the services provided by local agencies. These factors help LAFCOs assess the adequacy and efficiency of services, inform sphere of influence (SOI) updates, and make decisions about boundary changes. By systematically addressing these factors, MSRs provide a comprehensive analysis of public service provision and guide efforts toward efficient and responsive governance in California communities.

The Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000 (CKH Act) mandates the analysis of several factors in MSRs. According to the law, these are:

1. Growth and population projections: Evaluating present and future service needs based on demographic trends.
2. Location and characteristics of disadvantaged unincorporated communities: Considering the specific needs of these areas within or near the SOI.
3. Present and planned capacity of public facilities and adequacy of public services: Assessing the infrastructure and service delivery capabilities, identifying any deficiencies.
4. Financial ability of agencies to provide services: Analyzing the resources available to fund services and any associated constraints.
5. Status of and opportunities for shared facilities: Identifying potential for collaboration to improve efficiency and reduce costs.
6. Accountability for community service needs: Examining governmental structure and operational efficiencies.
7. Any other matter related to effective or efficient service delivery: Allowing for the inclusion of additional relevant factors unique to the specific review.

4.1: *Growth and Population of the District*

The District's boundaries encompass a service territory covering 74,166 acres, the majority is rural unincorporated Solano County in agriculture use. Portions of the District (13,712 acres) overlap parts of the cities of Suisun City, Fairfield, Vacaville, and Dixon where lands were not detached when they were annexed by the individual cities. Some of these lands are public rights-of-way and landscaping, other lands are pending development that may be detached upon obtaining development permits.

Solano County is a "city-centered growth" region meaning the population growth and development occurs in cities, while county land is designated for agricultural purposes. Solano County development is further restricted by the Orderly Growth Initiative, or

Measure A, approved by voters in 1984.²⁷ The Orderly Growth Initiative is carefully enforced by the long-time watchdog of Orderly Growth Committee. Their advocacy promotes restricting urban growth to the seven cities in Solano County, protecting farmlands, and preserving natural lands.

Being a “city-centered growth” region means that population growth is driven by city growth and development. With SID’s function and services focused on agricultural uses, growth and population it is not the main driver for SID. While the cities may grow, the small portion of SID water supplies contracted for city purchase is supplemental to the cities’ other water sources.

The fact that most of SID’s area is unincorporated county land that is restricted from substantial growth is relevant when considering growth and population because the rate of growth in rural areas is lower than that of cities.

4.1.1 District Population:

Resident Population: The District’s population is estimated to be 55,082 residents based on the most recent census information (see Appendix C). While the majority of the District’s land area is designated for rural agricultural use, the majority of SID’s population lies in the densely populated urban areas within the limits of a city (see Table 4-1).

SID is comprised of 60,054 acres of unincorporated land that holds approximately 3,951 population in the M&I and agricultural area. Whereas 13,712 acres of incorporated land (the city overlap area and SSWA) holds approximately 51,131 population. This means that 86% of SID’s water serves agricultural irrigation and M&I customers, which hold 7% of the population within the SID boundary. However, 93% of the population lies in the city areas that overlap with SID, and in SSWA serving the City of Suisun.

Table 4-1 Current District Population Summary

	Population
Suisun-Solano Water Authority (SSWA)	29,873
Municipal & Industrial (M&I)	2,621
Areas Overlapping Cities (landscaping/other)	21,258
Agriculture	1,330
Total	55,082

According to projections by the California Department of Finance, the District’s population could grow by approximately 2,754 to around 58,000 by 2030. It is expected that future population growth will occur on District lands located adjacent to a city that will be annexed for future urban development. The rural areas of the District are not expected to see much growth because of the agricultural requirements under the 2008 Solano County General Plan.

Portion of Population Served: The District’s primary purpose and customer is for agricultural irrigation. Of the 74,166 acres in the District, over 45,000 acres are irrigated

²⁷ <https://solanoorderlygrowth.org/about-us>

agriculture with a population of approximately 1,330 customer connections. The M&I service population is 32,494 (see Table 3.2). The District's financial plan does not expect much growth for services in its existing agricultural base, and only modest growth of M&I customers. A potential sphere of influence expansion to increase agriculturally based users and customers may help SID service growth and increase revenues lost by conversion of agriculture land to urban development.

4.1 Growth and Population of the District

Findings

F-4.1-1: 2% of the District population is in agricultural areas. 80% of SID water is for agricultural irrigation.

F-4.1-2: The California Department of Finance projects the District's population to increase by approximately 2,754 (5%) by 2030.

Determinations

D-4.1-1: Population is an insignificant factor when considering SID's service demand.

D-4.1-2: Projected population growth is nominal for the next 5 years.

4.2: *Location and Characteristics of Disadvantaged Unincorporated Communities within or Contiguous to the District*

When preparing municipal service reviews, LAFCO's are required to consider the needs of disadvantaged unincorporated communities (DUC) within or contiguous to an agency's sphere of influence, in particular, water, wastewater, and structural fire protection services.

DUC's are defined as inhabited communities containing 12 or more registered voters within an unincorporated area of a county where the annual median household income (MHI) is less than 80 percent of the statewide annual MHI (see Appendix D). According to the most recent figures from the U.S. Census Bureau's American Community Survey, the Statewide MHI is \$91,905. Eighty percent (80%) of the state MHI yields an income threshold of \$73,524 for defining a DUC.

There are four unincorporated Census Designated Places (CDP) in Solano County. All four CDPs are located within or contiguous to SID's service territory. The median household income for each of these four communities is higher than the statewide MHI; therefore, they do not qualify as a disadvantaged unincorporated community.

**Table 4-2 Solano County Unincorporated Communities (2022)**

Census Designated Place	Population	Median Household Income	% of State's MHI (\$91,905)
Allendale CDP	1,752	\$105,250	114.5%
Elmira CDP	141	\$98,720	107.4%
Green Valley CDP	1,586	\$135,729	147.6%
Hartley CDP	2,807	\$139,904	152.2%
Source: U.S. Census Bureau, American Community Survey 2022, 5-year estimate, Tables S0101 & B19013;			

4.2 Disadvantaged Unincorporated Communities

Findings

- F-4.2-1: A disadvantaged unincorporated communities (DUC) is a community that is equal to or less than 80% of the Statewide Median Household Income.
- F-4.2-2: According to the 2022 U.S. Census Bureau's American Community Survey, the Statewide MHI was \$91,905.
- F-4.2-3: 80% of the state MHI yields an income threshold of \$73,524 for defining a DUC.
- F-4.2-4: There are four unincorporated Census Designated Places (CDP) in Solano County. All four CDP household incomes exceed the 80% threshold.

Determinations

- D-4.2-1: There are no disadvantaged unincorporated communities within or adjacent to SID.

4.3: *Present and Planned Capacity of Public Facilities, Adequacy of Public Services, and Infrastructure Needs or Deficiencies*

SID has undertaken several studies²⁸ over the past ten years to evaluate the adequacy of its water supplies. These studies look at the changing cropping patterns and irrigation practices, growing M&I water demands, and climate change impacts. As an agricultural water supplier, SID is required to prepare and adopt an Agricultural Water Management Plan (AWMP) that is updated every five years.²⁹ SID last updated its AWMP³⁰ in 2018 and was in the process of updating the document as of July 2025. The AWMP

<i>Current Supply=</i>	<i>158,356 AF</i>
<i>Total Demand=</i>	<i>154,940 AF</i>
<i>Remaining Capacity=</i>	<i>3,416 AF</i>

²⁸ System Optimization Review Report (2015); Water Supply Shortage Risk Assessment (2015); 1991 – 2014 Water Balance Description and Results (2015)

²⁹ in compliance with the California Water Conservation Act of 2009 and the USBR Mid-Pacific Region In-Stream Flow Requirements

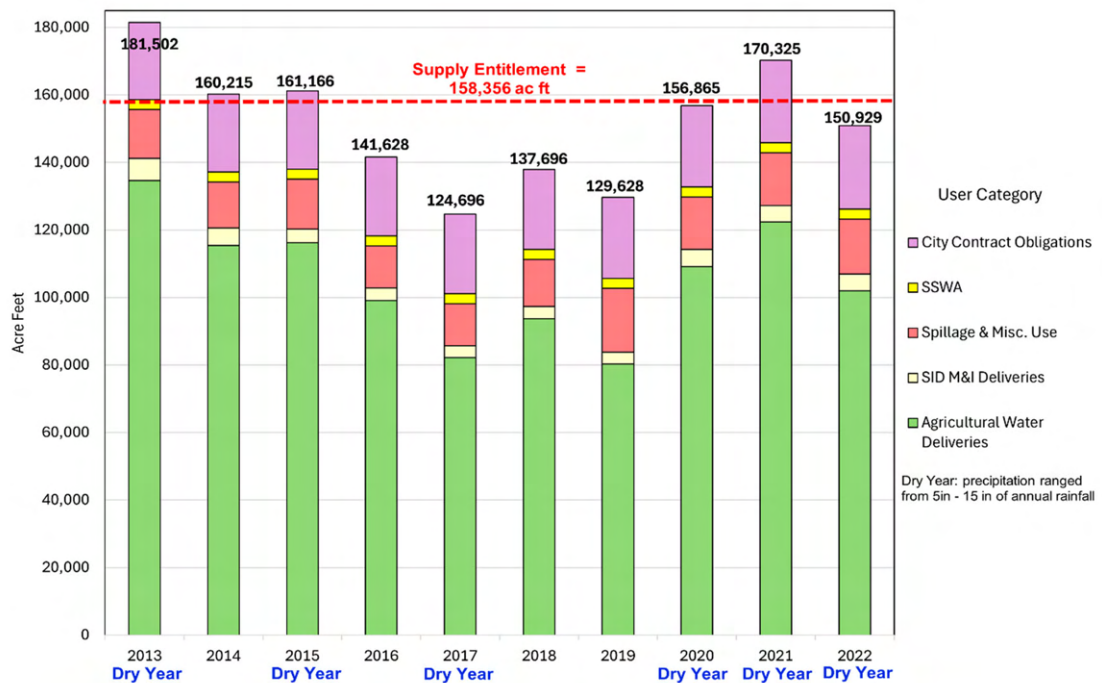

³⁰ Davids Engineering Inc, "Solano Irrigation District, 2018 Water Management Plan," November 2018

includes a detailed evaluation of the District's water management practices and actions taken to implement mandatory and cost-effective water conservation measures. The update of the AWMP also includes an assessment of water inflows and outflows (see Appendix E).

The AWMP is a key resource for this MSR Factor. This section analyzes present water supply, present water demand, water supply/demand balance, water conservation, water system infrastructure needs, water quality, water supply reliability, potential impacts of climate changes, and threats to water supply.

Figure 4-1 SID Water Demand and Supply Overview (2013-2022)

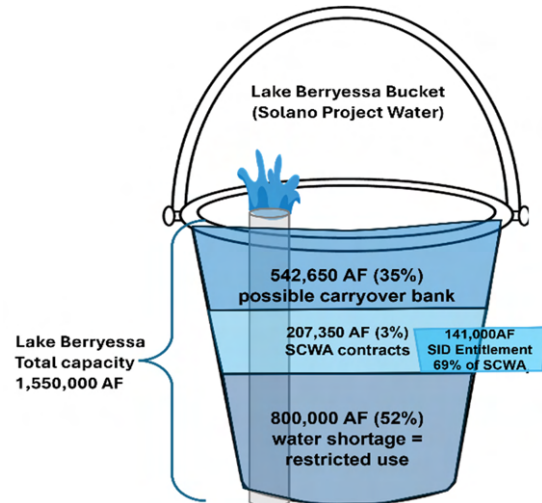

4.3.1: Present Water Supply

SID's AWMP identified four general categories of water supply sources: surface water, groundwater, drain water (reuse), and seepage/precipitation (recovery).

The District's total water supply, or firm yield, is 158,356 AF if it fully utilizes all its water sources, including surface water contractual entitlement, groundwater well production capacity, and recovered drain water. The available supply in any given year may be increased by a variable carryover if the allocation is not used and the water is available in Lake Berryessa. The supply may also be reduced for environmental protection needs.

Below is a breakdown of these sources.

1. Surface Water: SID's primary water source is surface water from the Solano Project, which created Lake Berryessa. A Water Service Agreement between the USBR and SCWA grants SCWA rights to use or assign use of water in Lake Berryessa. This Water Service Agreement was renewed in February 2024 for a 25-year period expiring February 28, 2049.

The District has a contractual entitlement with SCWA for 141,000 AF per year. Water that is not used is held in a carryover account and is reserved for subsequent years, so long as storage space is available in Lake Berryessa. SCWA is contractually committed to delivering the full allocation of water to its Participating Member Agencies unless the water supply does not physically exist. SID's water allotment can be proportionally reduced when water needs to be released from Lake Berryessa reservoir due to the lack of storage capacity, for environmental purposes, and other reasons.

Depending on customer demand in each season, the District may not deliver the entirety of its allocated Solano Project water. That unused amount may become "carryover" for use in the next year's water season, thus increasing the total available supply for the next year. The 1999 Drought Measures Agreement establishes two carryover storage accounts: voluntary and restricted. Voluntary carryover storage allows the District to retain any unutilized portion of the District's annual entitlement in the District's voluntary carryover storage account in Lake Berryessa.³¹ Restricted carryover is triggered in times of water shortages, and the amount and use is limited based on detailed tiered factors stated in the Agreement.

Since the amount of carryover water varies from year-to-year, SID's available water supply can also vary beyond the entitled 141,000 AF. If there is better than average rainfall, and/or demand for irrigation water is lower, there is a potential for more carryover. Conversely, SID has less carryover in seasons with lower rainfall totals and/or higher water demand. There also exists a third scenario, in years with excessive rainfall, where Lake Berryessa fills enough to spill down the world-famous "Morning Glory" spillway, effectively making SID "lose" carryover.³² The carryover water is the first volume of water that is lost when the water enters the spillway.

To better understand restraints on Lake Berryessa water, it helps to understand why the lake was designed so large. Lake Berryessa was intentionally designed to be a large reservoir, holding a capacity of 1.55 million AF because of its limited recharge. The Lake Berryessa watershed is solely fed by rainfall during the wet seasons, no delayed source from melting snowpack. Therefore, the size of the Lake needed to

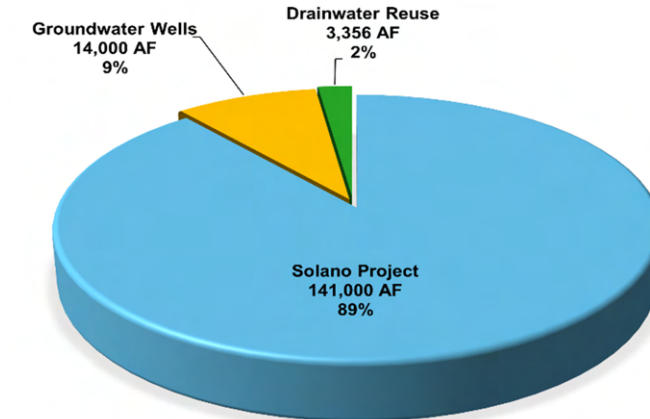

³¹ 2015 Agricultural Water Management Plan. chrome-extension://efaidnbmnnnibpcajpcglclefindmkaj/https://www.sidwater.org/DocumentCenter/View/1490/SID-2015-Agricultural-Water-Management-Plan?bidId=

³² Solano Irrigation District Quarterly Newsletter: Spring 2023.

anticipate significant multi-year droughts. The average inflow over the last 20 years is approximately 250,000 AF; ranging from a minimum of 15,000 AF (recorded in 2021) to a maximum of 790,000 AF (recorded in 2017). Lake Berryessa’s “glory hole” has only spilled 5 times since 2000.³³

Further restraints include evaporative losses of the large surface area, and Lower Putah Creek mandated deliveries to meet the 2000 Accord flow to support Salmon habitat. These pressures impact the Lake’s total storage and the Solano Project members’ limited annual water supply share of 207,350 AF.³⁴

Figure 4-2 SID Water Supply by Source (2013-2022) (Acre Feet)

Source: Solano Irrigation District, Water Budget Annual Volumes, 3/25/24

2. Groundwater: In addition to its surface water entitlement, SID owns and operates 28 groundwater production wells with a combined production capacity of 14,000 AF of water annually. The District manages its groundwater supply conjunctively with its surface water to optimize the water supply/demand balance during drought periods.
3. Drain Water Recovery and Reuse: SID’s third source of water is the recovery and reuse of drain water from the District’s distribution system. Inflows into the drainage system include:
 - Weir (barrier) Spillage Recovery: SID’s ability to track and recover water that spills or flows over any designed barrier within their system.
 - Tailwater from Irrigated Lands: tailwater is the formal term for irrigation water runoff from land into SID’s canal system.
 - Precipitation Runoff: another form of runoff water from land into the canal system, but this is caused by rainfall and flow.
 - Seepage Recovery and Direct Precipitation: Seepage is the slow, gradual movement of water through soil or other porous materials. It can occur naturally or because of human activities, such as water storage in dams or mining operations. Direct precipitation refers to rainwater that lands directly into SID’s canal system. These are nominal sources.

³³ Sacramento Bee, February 7, 2025. <https://www.sacbee.com/news/california/article299927679.html>

³⁴ Per SID General Manager and Assistant General Manager, November 13, 2025.

Drain water is suitable for agriculture purposes and is available for use by Maine Prairie Water District which is downstream from SID. Several drains crisscrossing the District capture the runoff and deliver it to irrigated lands, distribution canals, or discharge it to the District's canal system. The capture and reuse of drain water represents an opportunity for the District to conserve water and better serve its users through improved efficiency. Drain water recovered and reused by SID has averaged 3,356 AF annually over ten years.

Table 4-3 SID Water Supply by Source (2013-2022)

Source	Acre Feet	Total Percentage
Solano Project	141,000	89.1%
Groundwater Wells (28)	14,000	8.8%
Drainwater Reuse	3,356	2.1%
Total Supply	158,356	100.0%

4.3.2: Present Water Demand

SID supplies irrigation water for agriculture as well as water for urban consumption. The District is the operator of the Solano Project, which supplies water from Lake Berryessa through the District's distribution system to its various users.

Agricultural irrigation is the primary water use in SID. SID also provides Municipal & Industrial water through small water systems directly to customers. The District further contracts with four cities (Fairfield, Vacaville, Benicia, and Vallejo), Maine Prairie Water District, and partners with Suisun City in water delivery.³⁵ Lastly, while not a "demand" per se, water loss through spillage, seepage/percolation, and evapotranspiration are draws on SID's water supply. The following is a breakdown of the water demand users by type:

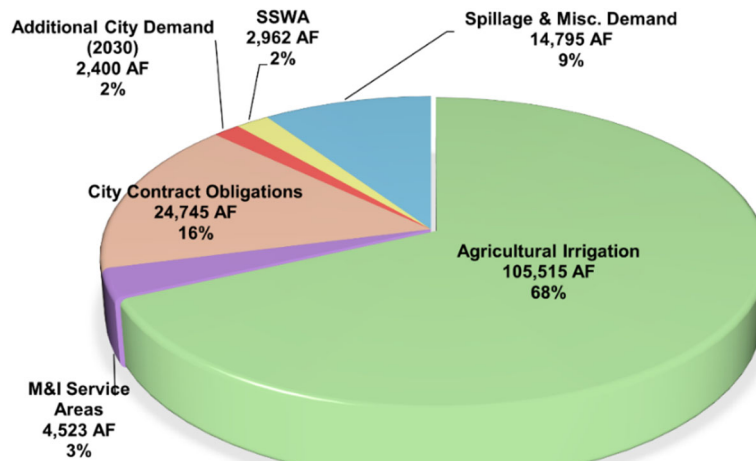

Table 4-4 SID Water Demand by User (2013-2022)

User Type	Ave. AF	Percent
Agricultural Irrigation	105,515	67%
M&I Service Areas	4,523	3%
City Contract Obligations	24,745	16%
<i>Additional City Demand (2035)</i>	2,400	2%
SSWA	2,962	2%
Spillage & Misc. Demand	14,796	9%
Total Demand	154,941	100%

³⁵ 2018 SID AWMP. p 5-14.

Figure 4-3 SID Water Demand (2013-2022) (Acre Feet)

Source: SID Water Balance Assessment 2024 Update; SID 2018 AWMP; SID-City Water Agreements; City 2020 Urban Water Management Plans

1. **Agricultural Irrigation:** Agricultural irrigation is the primary water use in SID. Demand for agricultural irrigation water has averaged 105,515 AF annually between 2013-2022, ranging from 79,583 to 133,508 AF per year. Irrigated crop land within the same time frame averaged about 43,895 acres annually, ranging from 35,519 to 47,822 acres. Overall, irrigated crop acreage has trended downward, while the types of crops grown have become less water intensive (see Table E-1 in Appendix).

The amount of water required to meet the needs of the crops grown within its service area varies based on several factors that influence water needs. Those factors include:

- Crop rotation: the practice of planting different crops in a specific field sequentially over a series of growing seasons to improve soil health, manage pests and diseases, and optimize nutrient use. This means some acres may not be planted for the growing season.³⁶
- Type of crop planted (thirsty crops, growing season): some types of crops require more water than others. For example, hay requires an average of 5 AF of water per acre, whereas corn uses about 1.2 AF per acre. Additionally, some crops have a longer growth season and therefore require water for a longer period.
- Climate region and Weather patterns: Climate regions significantly impact water usage due to variations in temperature, precipitation, and evaporation rates. Arid regions face water scarcity, while humid regions may experience issues with water quality due to increased runoff and potential flooding.³⁷ Hotter, drier areas tend to have a higher issue with evapotranspiration.

³⁶ Rodale Institute. *Crop Rotations*. <https://rodaleinstitute.org/why-organic/organic-farming-practices/crop-rotations/#:~:text=Crop%20rotation%20is%20the%20practice,combat%20pest%20and%20weed%20pressure.>

³⁷ US EPA. *Climate Impacts on Water Resources*. https://19january2017snapshot.epa.gov/climate-impacts/climate-impacts-water-resources_.html#:~:text=In%20many%20areas%2C%20climate%20change,excess%20precipitation%20on%20other%20areas.

Additionally, late spring rains provide “free” water early in the season, thereby reducing water needs at the start.

- Soil type: Soil type significantly impacts water usage due to variations in water retention and infiltration rates. Sandy soil drains quickly and hold less water, requiring more frequent irrigation, while clay soils retain water well but can become waterlogged. Loam soils offer a balance between the two, making them ideal for many applications.³⁸
- Irrigation methods: Different irrigation methods significantly impact water usage in agriculture. Some methods, like flood irrigation, are far less efficient and can lead to significant water waste through evaporation, runoff, and deep percolation. More efficient methods, such as drip irrigation, deliver water directly to plant roots, minimizing losses and maximizing water use efficiency.³⁹

The dominant crop within the District was pasture/hay between 2000-2015. From 2016-2022, the predominant crop switched to trees/vines. Since 2023, tree/vine crops and annual crops have shared the top crop position. According to the crop acreage reported by SID, the average total acres that water was delivered to was 43,895 between 2013 - 2022. Within the same time frame, the average delivered water totaled 105,515 AF. Dividing the average delivered water by the average irrigated acreage results in approximately 2.41 AF of water per irrigated acre per year. Table 4-4 depicts the crop trends and agricultural water demand.

According to DWR data by the Pacific Institute,⁴⁰ pastures require approximately 4.92 AF/acre, making it the most water-intensive crop. Next is nuts and alfalfa, requiring 4.49 and 4.48 AF/acre respectively. Whereas deciduous fruits (apples, apricots, walnuts, cherries, peaches, nectarines, pears, plums, prunes, figs, kiwis) require 3.7 AF/acre, and vineyards require 2.85 AF/acre; making them the least water-intensive crops. The change in predominate crops from pasture to tree/vine in large part explains the drop in agricultural water demand beginning in 2016. Other contributing factors include “dry years” with less rainfall, and increased conservation efforts with enhanced irrigation technologies.

If the trends for crops and acreage continue and the region does not experience several years of dry seasons, SID should have sufficient water to meet existing needs. However, if SID plans to expand its boundaries or crop trends change to increase demand, SID may be required to update the MSR analysis prior to any annexations. Prior to a sphere of influence expansion and any annexation, SID shall update the District AWMP.

Figure 4-4 SID Crop Acreage and Agricultural Water Demand (2013-2022)

2. Municipal & Industrial (M&I) Service Areas: In addition to agricultural irrigation, SID also supplies potable (for human consumption) and non-potable (not safe to drink) water for M&I purposes to approximately 2,621 customers in 19 service areas. The District owns and operates eight potable water systems serving the unincorporated communities of Elmira, Quail Canyon, Blue Ridge Oaks, Peabody Road, Gibson Canyon, Stocking Ranch, and Pleasant Hills Ranch Estates. Non-potable water is provided to service areas located in the Green Valley, Fairfield, Cordelia, and Vacaville areas for landscape irrigation and business/industry needs.

SID M&I service areas consumed about 4,523 AF of water annually on average over the past 10 years, ranging from 3,507 AF to 6,536 AF per year. M&I water demand has been consistent due to a stable population base and restrictions limiting residential development under the Solano County General Plan. However, M&I water deliveries have trended downward from their peak of 9,508-acre feet in 2011 to 5,048-acre feet in 2022 due to state mandated water conservation efforts, such as water efficient landscaping and low-flow appliances. (Appendix F displays M&I water deliveries)

Table 4-5 M&I Connections and Population

Potable Water Systems (PWS)	M&I Service Connections	Population
Blue Ridge Oaks	19	63

<i>Total NPWS</i>	<i>925</i>	<i>1,269</i>

3. **City Contract Obligations + Increases:** To reduce reliance on groundwater and address the water supply needs of the urban areas in the region, SID has contracts with neighboring cities and local developments to supplement urban needs with surface water. SID supplies bulk water sales under adopted contracts/agreements to the cities of Vacaville, Fairfield, and Benicia to augment their water supplies. SID also has an exchange agreement with the city of Vallejo.

Under these contracts, SID is obligated to deliver a cumulative total up to 27,145 AF annually of its Solano Project water allotment by 2035.⁴¹ Under the various contracts, the cities pay for their full allotment each year. Thereby making SID contractually obligated and required to hold the full contract allotment amount for the cities in trust for the life of the contracts. If the cities choose not to use their full contractual allotment, the unused may be held in a carryover account for use in later years or may be sold back to SID.

⁴¹ Refer to Table 2-4 Solano Project Water Commitments.

While intended to improve water delivery efficiencies and supplement supply for the cities, contractual obligations have the potential to increase the demand on SID water supplies, especially during multiple dry years.

4. Solano-Suisun Water Authority (SSWA): SID, through Joint Exercise of Power Authority with the City of Suisun, created SSWA to treat and deliver drinking water to commercial, industrial, and residential customers within the city. SID also serves as the Water Conservation Coordinator, prepares the Water Management Plans, and submits monthly and annual water use reports for Suisun. SSWA uses 2,962 AF on average of SID water in addition to the 1,600 AF of Suisun's Solano Project water annually.

Suisun City development projects: In 2022, SSWA tentatively agreed to a water swap with the City of Suisun related to two future city development sites. Under this agreement, Suisun will trade their 1,300 AF of North Bay Delta Water allocation to SID in exchange for 240 AF of Solano Project Water. Suisun identified a need for the water swap because of two warehouse development project applications. This swap provides a reliable amount of Solano Project supply (up to 240 AF) in return for an unreliable State Water Project allocation.

5. Spillage & Misc. Demand: Losses from the distribution canals include canal seepage, evaporation, and spillage. 14,796 AF, about 9%, between 2013-2022 ten-year time frame. SID has taken action to reduce losses, including expanding the TruePoint water ordering and delivery tracking software, installing new Rubicon gates at various headings, expansion of the TCC project and continued drainage outflow recovery project. However, loss through seepage and percolation is considered acceptable because it is key to groundwater recharge.

Other incidental uses of water within SID include watering of roads for dust abatement, agricultural spraying, and stock watering by SID water users. The volume of water used for such purposes is small relative to other uses and has not been quantified.

4.3.3: Future Water Supply/Demand Balance

A water balance accounts for all water entering and leaving a 3-dimensional volume over a defined period. For a water balance to yield meaningful results, its spatial and temporal boundaries must be clearly and strategically defined, and all flows across the defined boundaries and any changes in water storage within the boundaries must be accounted for during the selected period of analysis. This generally includes surface water, groundwater, rainfall, and exchanges with the underlying groundwater system via pumping and deep percolation.⁴²

Historically, SID has had an adequate water supply to meet the demands of its users. Based on the analysis of this MSR, SID is anticipated to continue to have adequate water supply for the next five to ten years, under normal conditions. Annual water demand and distribution, however, fluctuates from year to year depending on the amount of precipitation, acreage under irrigation, and cropping patterns (as discussed in Section 4.3). While the District's water supply historically has been adequate to meet customer

⁴² Davids Engineering, "Water Supply Shortage Risk Assessment", June 2015. p6

demands, risk assessments predict potential water shortages in future years due to climate change and city commitments.

SID's reliable supply of water is 158,356 AF when all entitlements and allocations are available. SID may deliver (supply) more if/when carryover water is available. In the ten-year period of 2013-2022, the District delivered about 83% of its water supply capacity. This 10-year time frame included relatively wet and dry years, meaning it did not have a severe drought (five consecutive dry years). Therefore, the water supply was stable and reliable. However, projecting SID's future water demands is inherently uncertain because those demands depend on a variety of policy, economic, and climatological factors that are impossible to confidently predict.

Prompted primarily by obvious, rapidly changing cropping patterns and irrigation practices in its service area, particularly the rapid expansion of almonds and walnuts, the District initiated a 2-phase analysis to assess the adequacy of its water supplies. The initial phase was simply to quantify historical agricultural water demands. The second phase involved development of a district water balance as a means of characterizing on-farm and SID distribution system efficiencies, developing projections of future agricultural water demands, and comparing SID's available water supplies to the sum of SID's projected future agricultural water demands and urban water supply obligations.⁴³

The 2015 Risk Assessment revealed that water shortages were likely to occur during periods of multiple dry years unless actions were taken to minimize or avoid the impacts.

This Water Supply Shortage Risk Assessment assessed the adequacy of its water supplies to meet future agricultural and other demands from 2015 through 2059. The Assessment developed seven scenarios that compared agricultural water demands and urban water obligations with the District's available water supply. It revealed that water shortages were likely to occur during multiple dry years (drought), which would deplete possible carryover water, unless actions were taken to minimize or avoid the impacts. A similar conclusion was reached by SID's 2018 Agricultural Water Management Plan.

While future shortages are likely to occur, exactly when they will begin is uncertain depending on SID actions, the rate at which on-farm practices and climate change occur and on weather conditions. The Assessment also recognized that an important underlying policy principle is that SID's current and future agricultural water demands should be met with sufficient reliability to ensure that groundwater supplies within the district are managed sustainably. This means that groundwater use must not cause groundwater levels to decline over the long term, consistent with the Sustainable Groundwater Management Act (SGMA).

The seven scenarios were developed according to assumptions made to describe possible future SID cropping patterns, on-farm and SID distribution system efficiencies, permanent crop water use intensity, climate change and urban water supply obligations. Specifically, the scenarios can be described as follows:⁴⁴

⁴³ id. p1

⁴⁴ id. p12-14

Scenario 1: Represents no change from existing conditions (demand, supply, irrigation measures, crop types and acreage, etc.) as they were recorded in 2015. This scenario set a status quo baseline but was determined to be unrealistic depiction of the future based on past trends and changes.

Scenario 2: Builds on Scenario 1 by implementing new system conservation measures. The conservation efforts were assumed to increase efficiency by 5%, thereby reducing demand by 5%.

Scenario 3: Assumed cropping patterns would continue to change based on trends showing increased permanent crops to 63% of the total irrigated acreage, increased irrigated areas by 4,000 acres, increased on-farm irrigation efficiency by 8%, but no new system conservation projects. This scenario was considered to be reasonable and may even have under-estimated SID future irrigated area.

Scenario 4: Builds on Scenario 3 by including Scenario 2's system conservation measures that increase efficiency by 5%. This scenario was regarded as the "most likely" representation of future conditions.

Scenario 4 (2024): a variation of Scenario 4 was included to account for water demand increases that are built into the city contract obligations. The contractual obligation increases began in 2024. This became the seventh scenario.

Scenario 5&6: Both scenarios build on Scenario 4 except that agricultural demands are increased to reflect the possible effects of climate change to simulate crop evapotranspiration (ET). Impact models used the projected temperature, and precipitation results to develop projected ET. The two plausible climate change scenarios that were selected were (1) Low Increase: 1.5 percent increase in ETaw and no change for precipitation; (2) High Increase: 3.4 percent increase in ETaw and no change for precipitation.

Results: The Low Increase resulted in a demand increase of 2,135 AF to Scenario 4 and was used for Scenario 5. The High Increase resulted in a demand increase of 4,839 AF to Scenario 4 and was used for Scenario 6.

The Assessment concluded that under the most challenging future conditions and when city contract obligations increase starting 2024, SID agricultural customers are forecast to experience water supply shortages 96 percent of the time, with maximum shortages of up to 60,000 AF, or 28 percent of total demand (agricultural and urban), in any given year.⁴⁵

The 2015 Water Supply Shortage Risk Assessment recommended actions that SID could take to address this issue. The recommendations included the following:

1. Identify the most cost-effective conservation projects and pursue grant and other funding to implement those projects.
2. Assess the sources of uncertainty associated with the water balance and identify measurement and recordkeeping improvements that could be implemented to improve

⁴⁵ id. p19.

- data quality and the associated reliability of the water balance, including measures to more accurately quantify groundwater pumping in the district.
3. Define the limits of sustainable groundwater management, in collaboration with neighboring local agencies, that would provide the basis for a comprehensive conjunctive water use program that ensures a high level of water supply reliability and long-term sustainability.
 4. Track changes in on-farm conditions to provide a basis for anticipating changes in water demands.
 5. Should not increase the urban water supply obligations without first defining a regime of sustainable conjunctive water management and include provisions in urban water supply agreements that give priority to agricultural water users.

Any future annexation that adds new users or increases demand will require detailed analysis and evidence to show that SID has a sufficient available water supply. Annexations of parcels with existing out-of-service agreements and existing connections should be supported to encourage compliance with CKH. SID should not enter into any new out-of-agency service agreements without Solano LAFCO review and approval, under Gov Code 56233. Future annexations will require proof of a tax sharing agreement with any relevant, impacted agency.

4.3.4 Water System Infrastructure

SID's Engineering Department is responsible for managing the planning, design, and information of Solano Irrigation District's water systems and facilities. To track, guide, and budget for improvements, SID maintains a 10-Year Capital Improvement Program (CIP). The Program is comprised of a Solano Project Rehabilitation and Betterment Plan (Plan) and capital improvement projects for four (4) different groups: the District, Improvement Districts/Areas, and Suisun-Solano Water Authority.

Vaughn Distribution Canal

Capital Improvement Program (CIP): The Program is a functional incremental projection tool to be used for the coordinated effort to systematically replace and improve the District's aging infrastructure. The Program looks forward 10 years and is reviewed annually.

The 10-year CIP schedule is divided into three (3) levels of scheduling confidence:

- 1-3 years: These projects are firm in scheduling and necessity but allow minor reshuffling in years 2 and 3.

Vaughn Canal Headworks metering

- 4-6 years: These projects are less firm in their scheduling but still require replacement or construction. They could be moved up or down due to their probability of failure, and on annual maintenance and repair needs.
- 7-10 years: These projects are “horizon projects”. These could include large capital projects that require additional funding or other projects to be completed prior to their replacement or construction.

Solano Project Rehabilitation and Betterment Plan (Plan): The Plan implementation includes regular monitoring and evaluation by SCWA staff in collaboration with SID staff because SID is the 3rd party contractor tasked with Operations and Maintenance of the Putah South Canal. The Plan itself is evaluated every five to ten years to remain a long-term planning tool.⁴⁶ The Plan works to reduce water losses through measures that include installing pipeline and lining canals with concrete, adding automatic control gates, and installing supervisory control and data acquisition (SCADA) systems.

For the FY 2024/2025, there are ten (10) projects scheduled, with a total budget of \$865,000 allocated for their implementation. On average \$1.2 million is proposed to be spent annually on capital improvement projects.⁴⁷

The District has implemented a number of measures to reduce water losses, including concrete lining of canals, automatic control gates, systems to monitor water delivery and reduce spillage, and installation of micro-spray and drip irrigation systems to meet state and federal water conservation standards. Delivery records indicate that approximately half of SID irrigated lands are served by pressurized systems with the remaining balance served by flood and furrow irrigation. Continued improvement in water efficiency practices will help reduce the amount of water required to meet the District’s agricultural water needs.

Strategic Plan: The District also completed their first Strategic Plan in 2014. This first Strategic Plan identified key one-time goals, strategies and objectives. In future Strategic Plans, the District will optimize operations, infrastructure investments, and look for ways to use new technology and adapt to evolving demographic and workforce trends. The Strategic Plan focused on identifying the critical issues facing the District in the future and determining how best to address them.

The Strategic Plan created a Tier 1 and Tier 2 priority list for programs with strategies & objectives. In 2017, the District updated the priority list with program status updates and new programs. The District has not published an update to the Strategic Plan since 2017. It is recommended that the District do so prior to a sphere of influence amendment.

⁴⁶ id.

⁴⁷ Solano County Water Agency. *Solano Project Rehabilitation and Betterment Plan*. October 2024. p ii. chrome-extension://efaidnbmnnnibpcajpcgclefindmkaj/https://scwa2.com/wp-content/uploads/2025/05/FINAL_SP-RB-Plan_20240924-ID-345560.pdf

Canals and pipelines: The Putah South Canal (PSC) is the main canal that serves SID's irrigated area and provides M&I deliveries to the cities of Vacaville, Fairfield, Benicia, City of Suisun City and Vallejo as well as various smaller developments. The PSC runs generally south and is approximately 33 miles in length.

Branching from the PSC are about 60 lateral headings and turnouts. The District delivers water through 272 miles of canals and lateral to about 47,000 irrigated acres within a total service area of 71,000 acres. The canals and laterals include 88 miles of unlined canals, 15 miles of lined canals, and 169 miles of pipelines. An additional 97 miles of pipeline serves urban areas for a total of 369 miles of distribution system the District operates and maintains. A portion of District lands served in upper Vaca Valley, Suisun Valley, and Green Valley are at an elevation greater than the Putah South Canal and are served with pump lift systems.⁴⁸ Outflows from the distribution canals include farm deliveries, M&I deliveries, and deliveries to MPWD.

Table 4-6 Canal and Pipeline Lengths in the SID Distribution System

Type	Length (miles)	Percent
Canal - Unlined	88	24%
Canal - Lined	15	4%
Pipe	169	46%
Agricultural subtotal:	272	74%
Pipelines serving developments	97	26%
Total	369	100%
Total Lined or Pipelined	281	76%

The Distribution Canal Efficiency ranged from 82 to 91 percent between 1991 and 2017. Approximately 13 percent of the available water supply is lost to seepage, evaporation, and spillage.⁴⁹ While the District has undertaken the lining of its largest earthen canals that deliver most of the surface water, there are still some unlined stretches that are planned to be lined in the future. Lining canals helps reduce seepage and increase supply capacity. However, seepage losses provide beneficial groundwater recharge and are recoverable within the basin. This may prove to be a vital component in the development of a sustainable groundwater management plan for the Solano sub-basin.

McCune Creek Drain Recovery Pump

Reduction in operational spills and the recovery and reuse of drain water are also factors affecting SID's water delivery efficiency. Spillage losses are recoverable by downgradient water users, but losses to evaporation are irrecoverable.

SID operates several independent potable and non-potable M&I water systems serving approximately 2,621 customers in 19 service areas. The M&I service areas are generally miles apart and have their own stand-alone

⁴⁸ Davids Engineering, "Water Supply Shortage Risk Assessment", June 2015. p3-4

⁴⁹ id. p5-27

infrastructure and distribution systems. These small independent systems are inefficient and expensive to operate because of higher maintenance and operation costs are shared amongst a smaller group of users. SID should consider consolidating or merging these service areas, possibly with other adjacent rural water districts.

Water Conservation: The California Water Conservation Act of 2009 requires water suppliers to increase their water use efficiency and to implement water conservation best practices. SID has made improvements to its water delivery system including concrete lining of canals to reduce seepage losses, installing automatic control gates, and Supervisory Control and Data Acquisition (SCADA) systems to better monitor operational spills and reduce unnecessary water supply losses. Farmers have also installed micro spray and drip irrigation systems that help reduce their water demand. Continued improvements in water delivery efficiency will further reduce the amount of water required to meet the District's annual agricultural water needs.

SID should consider continuing and expanding their water conservation and recovery efforts to extend their water supply. This is also consistent with the State's encouragement.

4.3.5: Water Quality

SID conducts water quality annual groundwater testing and surface water quality testing every five to ten years. SID also operates nine public water systems, for which water quality reports are prepared annually.

Groundwater: SID tests groundwater quality for alkalinity, boron, calcium, chloride, pH, magnesium, nitrate nitrogen, potassium, sodium, sulfate, EC, TDS, and SAR. The results of these tests are evaluated based on "*FAO Irrigation and Drainage Paper 29, Water Quality for Agriculture*"⁵⁰ and have been found to be suitable for irrigation of crops grown in SID under all parameters tested.

Surface Water: Every five to ten years, SID collects and tests the water in the PSC for alkalinity, boron, calcium, chloride, acidity (pH), magnesium, nitrate nitrogen, potassium, sodium, sulfate, electroconductivity (EC), total dissolved solids (TDS), and sodium adsorption ratio (SAR). Like groundwater, the results are evaluated based on "*FAO Irrigation and Drainage Paper 29, Water Quality for Agriculture*" and have been found to be suitable for irrigation of crops grown in SID under all parameters tested.

M&I Water: SID collects water samples and tests water quality for the public water systems they operate and makes the results available in an annual water quality report available on the SID website. Annual water quality reports for each of the District's potable water systems indicate that they meet or exceed all health-related standards for drinking water as established by the California Division of Drinking Water (DDW) and the U.S. Environmental Protection Agency. The Reports are sent to the District's customers and made available on the District's website.

Several of the District's non-potable water systems are operating under a compliance agreement with the California Department of Public Health due to old Point of Entry treatment devices that do not meet current drinking water standards. These M&I

⁵⁰ This paper is intended to provide guidance to farm and project managers, consultants and engineers in evaluating and identifying potential problems related to water quality.

customers are required to be on the District's bottled water program and certify that they purchase the requisite volume of water per person on a regular basis. Non-potable water customers, who only use water for landscaping, livestock, and other uses not involving human consumption, are not required to participate in the Bottled Water Program. The Compliance Agreement allows bottled water to be consumed for cooking and drinking inside the home, with no new growth allowed.

4.3.6: Potential Impacts of Climate Change

SID has a climate typical of the Central Valley of California, having mild winters with moderate precipitation and warm, dry summers. Average daily maximum temperatures range from a low of about 55°F in December and January to a high of 91°F in July. Average annual precipitation is 17.7 inches, with 15.0 inches, or approximately 85 percent, occurring in the five-month period from November through March.

Climate change has the potential to impact both the District's surface water and groundwater supplies. Several potential effects of climate change have been identified by the scientific community, including reduced winter snowpack, more variable and extreme weather conditions, shorter winters, and increased evaporative demand.

Models developed by USBR and DWR predict the possibility of a slight decrease in precipitation of 0.1 to 0.6 percent between 2020 and 2080. Changes in precipitation and the resulting runoff have the potential to impact surface water supply. Such impacts could be mitigated with sufficient storage to retain winter runoff until it is needed to meet irrigation demands and to provide carryover storage from wet years to dry years. However, the District's flexibility in storing and delivering water is constrained by the amount of runoff in the watershed, available storage in the reservoir, and in-stream flow requirements⁵¹.

Climate-induced changes are also playing an increasing role in the rate of evapotranspiration.⁵² As temperatures increase, the atmosphere can hold more moisture creating a vapor pressure difference that draws moisture from plant and soil surfaces. Strategies to mitigate climate change impacts have been identified by DWR including actions set forth in the California Water Plan and the California Climate Adaptation Strategy. Mitigation measures include more efficient water use, capturing stormwater runoff, reducing spillage, increasing groundwater recharge during wet years, and promoting conservation and water efficiency practices. Many of these strategies are already being implemented by SID.

SID could explore opportunities for additional water storage along the distribution system that can capture rainfall and runoff during the wet seasons to supplement irrigation water in the dry season. SID should also continue its conservation efforts with the canals, meters, and pumps.

⁵¹ In-stream flow is the water the water remaining in a river or stream channel to support the health and function of the aquatic ecosystem.

⁵² The amount of water a plant needs is determined by the rate of evaporation from soil and plant surfaces and water absorbed by plant roots that is released through the leaves as a vapor.

4.3.7: Water Supply Reliability

SID requires a reliable water supply to meet crop irrigation and M&I demands. SID's water supply is considered to be reliable. Due to the high-water supply reliability of the Solano Project, SID has not historically considered the potential of importing water from others.

The District has a long-term water supply agreement with SCWA, which was recently renewed for a 25-year period expiring in 2049. Under the Agreement, SID has an annual allotment of Solano Project surface water for 141,000 AF. SCWA is contractually committed to delivering the maximum allotment unless the water supply does not physically exist. To date there has been no reduction in deliveries of Solano Project surface water since operations began in 1959. Water is stored behind Monticello Dam in Lake Berryessa, which has a capacity of approximately 1.6 million AF providing a multi-year supply allowing for fluctuations in annual deliveries to be regulated through available storage. Water that is not delivered in wet years can be stored in a virtual carryover account for use during dry periods.

The main factor affecting Solano Project surface water reliability is the frequency and duration of droughts lasting for multiple years that could result in a major draw down of water from Lake Berryessa.

As mentioned in 4.3.1, Solano Project water reliability is affected by Lake Berryessa's limited watershed feed (rainfall only, no snowpack), evaporation losses from the large surface area, and mandated deliveries to Lower Putah Creek for salmon habitat. Major drawdown of Lake Berryessa is further compounded by the frequency and duration of multi-year droughts. However, historically, Solano Project water has been a consistent and stable source of water.

SID also incorporates groundwater, which requires recharging otherwise the source dries up. The application of surface water is important for groundwater recharge. Seepage and deep percolation of SID's surface water serves as a primary source of recharge to the groundwater sub-basins that underlay the District. A significant portion of the groundwater used by SID and others is due to agricultural irrigation. The District enjoys relatively stable groundwater conditions in part due to stable surface water supplies.

Due to the high-water supply reliability of the Solano Project, SID has not historically considered the potential of augmenting or importing water from others. Based on the historical record it is highly unlikely that additional supplies would be available for import if the District were short. Even if an alternate supply could be identified, there would be a significant barrier to acquiring the supplies as they would likely be cost prohibitive.⁵³

4.3.8: Potential Reduction in Water Supply Due to Bay-Delta In-Stream Flow Requirements

The San Francisco/Sacramento-San Joaquin Delta (Bay-Delta) watershed includes the Sacramento and San Joaquin River systems, the Delta, Suisun Marsh, and San Francisco Bay. The Sacramento and San Joaquin River systems, including their tributaries, drain water from about 40% of California's land area, supporting a variety of beneficial uses, including fish and wildlife, agricultural, and municipal. The State Water Board and Regional Water Quality Control Boards (collectively Water Boards) prepare water quality

⁵³ 2018 SID Water Management Plan. pL-4

control plans, or basin plans, to protect beneficial uses of water in the state pursuant to state and federal law.

The State Water Resources Control Board (State Water Board) released a proposed San Francisco Bay-Delta Plan (Bay-Delta Plan) for the Sacramento Basin in September 2023.⁵⁴ The Bay-Delta Plan could have serious long-term consequences for Solano County's water supply. In October 2024, the State Water Board released a broader *Plan of Implementation* covering the Sacramento-San Joaquin Bay-Delta system.

As currently written, the Draft Bay-Delta Plan would be devastating for Solano County.

The recommended update to the Bay Delta Plan calls for an increase in the unimpaired flow of water from streams and rivers to the Sacramento River. This means that the amount of water that naturally flows in the Putah Creek system without any human-made alterations or diversion. The stated intent being that this unimpaired flow is to support fish and wildlife.

According to the July 2025⁵⁵ Draft, the unimpaired flow of surface water from Lake Berryessa will be up to 55% but may be as little as 35% and reduces to 0% when Lake levels drop below 57% capacity. The range may be possible through a "watershed-wide water supply adjustment" (WSA) and is contingent on a complicated mix of factors that include wet/dry years, thresholds calculated from the "four river index"⁵⁶, and varying time frames. The lengthy proposed rule is detailed beginning on page 46 of the July 2025 draft.

Remaining flows could be stored or diverted for consumptive purposes for agriculture, municipal and other uses. The recommendation also mandates a minimum level of 900,000 AF in Lake Berryessa for cold water storage supply for the Sacramento River, leaving Solano County cities and agriculture with even less water in drought years.

Based on 20 years of hydrological and water delivery data, the current draft of the Bay-Delta Plan could result in zero water deliveries from Lake Berryessa in 20% of water years for Solano County customers and depending upon the Water Supply Adjustment criteria results in the remaining 80% of years with a significantly reduced (less than 50%) of allocation available to users.⁵⁷ This would have catastrophic effects on the region's cities, farms, and economy.

⁵⁴ State Water Resources Control Board. Sacramento/Delta Update to the Bay-Delta Plan: 2023 Draft Staff Report. https://www.waterboards.ca.gov/waterrights/water_issues/programs/bay_delta/staff_report.html.

⁵⁵ chrome-extension://efaidnbmnnnibpcjpcglclefindmkaj/https://www.waterboards.ca.gov/waterrights/water_issues/programs/bay_delta/bay_delta_plan/docs/rev-draft-sacdelta-bdplan-updates.pdf

⁵⁶ The four river index refers to the sum of the unimpaired runoff as published in the DWR Bulletin 120 for the following locations: Sacramento River flow at Bend Bridge, near Red Bluff; Feather River, total inflow to Oroville Reservoir; Yuba River flow at Smartville; American River, total inflow to Folsom Reservoir.

⁵⁷ SID Newsletter, Fall 2025. <https://www.sidwater.org/DocumentCenter/View/2816/2025-Q4-Fall-Newsletter-v4---85x11-Final---web>

**4.3 Present and Planned Capacity of Public Facilities, Adequacy of Public Services, and Infrastructure Needs or Deficiencies****Findings**

- F-4.3-1: SID's has a stable total available water entitlement supply is 158,356 AF. The 10-year average demand has been 154,940 AF. This leaves approximately 3,416 AF, on average, of available water for service growth.
- F-4.3-2: SID has been able to meet water demand for the last 10 years, with assistance of carryover water during dry years.
- F-4.3-3: SID averaged 43,895 acres of irrigation crop land in the last 10 years with consistent change in cropping patterns, with a steady change from pasture/hay crops to tree/vine crops.
- F-4.3-4: SID has 19 municipal & industrial (M&I) service areas with separate, individual small potable or non-potable water systems.
- F-4.3-5: SID holds water supply contracts or agreements with seven cities for surface water supply, in part to reduce reliance on ground water.
- F-4.3-6: The 2015 Water Supply Shortage Risk Assessment concluded that under the most challenging future conditions and when city contract obligations increase starting 2024, SID agricultural customers are forecast to experience water supply shortages 96 percent of the time, with maximum shortages of up to 60,000 AF, or 28 percent of total demand (agricultural and urban), in any given year.
- F-4.3-7: SID's 2015 Risk Assessment Report recommended several actions to improve water recovery and reuse. SID has implemented some of those recommendations, such as expanding the TruePoint water ordering and delivery tracking software, installing new Rubicon gates at various headings, expansion of the TCC project and continued drainage outflow recovery project.
- F-4.3-8: SID maintains a 10-year Capital Improvement Program along with a Solano Project Rehabilitation and Betterment Plan jointly with Solano County Water Agency. Both are regularly updated at public meetings.
- F-4.3-9: SID completed their first Strategic Plan in 2014 and updated it in 2017. At its March 19, 2024, the Board updated and adopted its 5-Year priorities from the 2017 Strategic Plan. This was done in-lieu of a full Strategic Plan Update.
- F-4.3-10: The Putah South Canal is the main canal that SID uses to transmit water and runs generally south for approximately 33 miles in length. Branching from the PSC are about 60 lateral headings and turnouts. The District delivers water through 272 miles of canals and lateral to about 47,000 irrigated acres within a total service area of 71,000 acres.
- F-4.3-11: SID conducts water quality annual groundwater testing and surface water quality testing every five to ten years, and nine public water systems with annual water quality reports.

F-4.3-12: The State Water Resources Control Board (State Water Board) released a proposed San Francisco Bay-Delta Plan (Bay-Delta Plan) for the Sacramento Basin in September 2023. The July 2025 Draft Plan recommends an unimpaired flow of water of surface water from Lake Berryessa at minimum of 0% and up to 55%. It also mandates a minimum level of 900,000 AF in Lake Berryessa for cold water storage supply for the Sacramento River. Water Supply Adjustments accounted for in the recent draft of the plan may reduce or increase this minimum storage level for a given water year type.

Determinations

- D-4.3-1: If the trends for crops and acreage continue and the region does not experience several years of dry seasons, SID should have sufficient water to meet existing needs. However, if SID plans to expand its boundaries or crop trends change to increase demand, SID may be required to update the MSR analysis prior to any annexations.
- D-4.3-2: The 19 individual M&I services areas are costly to maintain individually. However, because the systems are geographically isolated, they cannot be consolidated or combined.
- D-4.3-3: Any future annexation that adds new users or increases demand will require detailed analysis and evidence to show that SID has a sufficient available water supply.
- D-4.3-4: The 2015 Risk Assessment found that the Distribution Canal Efficiency of the canals ranged from 82 to 91 percent between 1991 and 2017. The efficiency of the system is reasonably high. Since the Assessment SID has made further improvements that increased efficiency but was not measured.
- D-4.3-5: SID meets and complies with the State water quality reporting requirements.
- D-4.3-6: SID's water supply is considered to be reliable. Due to the high-water supply reliability of the Solano Project, SID has not historically considered the potential of importing water from others.
- D-4.3-7: The main factor affecting Solano Project surface water reliability is the frequency and duration of droughts lasting for multiple years that could result in a major draw down of water from Lake Berryessa.
- D-4.3-8: The Bay-Delta Plan could have serious long-term consequences for Solano County's water supply.
- D-4.3-9: Based on 20 years of hydrological and water delivery data, the current draft of the Bay-Delta Plan could result in zero water deliveries from Lake Berryessa in 20% of water years for Solano County customers and depending upon the Water Supply Adjustment criteria results in the remaining 80% of years with a significantly reduced (less than 50%) of allocation available to users. This would have catastrophic effects on the region's cities, farms, and economy.

Recommendations

- R-4.3-1: Prior to a sphere of influence expansion and any annexation, SID shall update the District AWMP.
- R-4.3-2: SID should explore and consider other opportunities or possibilities to merge the small M&I systems with other systems, expanding the small systems for more use or other means of reducing costs for the users.
- R-4.3-3: Annexations of parcels with existing out-of-service area agreements and existing connections should be supported to encourage compliance with CKH. SID should not enter into any new out-of-agency service agreements without Solano LAFCO review and approval, under Gov Code 56233. Future annexations will require proof of a tax sharing agreement with any relevant, impacted agency.
- R-4.3-4: SID should update the Strategic Plan prior to any sphere of influence amendments that changes water demand assumptions or analysis.
- R-4.3-5: SID should consider continuing and expanding their water conservation and recovery efforts to extend their water supply. This is also consistent to the State's encouragement.
- R-4.3-6: SID could explore opportunities for additional water storage along the distribution system that can capture rainfall and runoff during the wet seasons to supplement irrigation water in the dry season and provide for additional groundwater recharge, consistent with the Solano Subbasin GSP. SID should also continue its conservation efforts with the canals, meters, and pumps.
- R-4.3-7: SID should work jointly with other water uses of the Solano Project/Lake Berryessa water, such as Solano County Water Agency, cities in Solano County, and Solano County departments; to carefully monitor and possibly challenge the Bay-Delta Plan's unimpeded flow rule.

SID Concrete Lined Canal

4.4 Financial Ability to Provide Services

This fourth factor provides an analysis and determination of the District's financial health and its capacity to fund and deliver services by examining its (1) revenues (operating & non-operating), (2) expenditures (operating & non-operating), (3) cash flow, (4) financial indicators (current ratio, liquidity, debt service, etc.), and (5) unfunded accrued liability.

Solano Irrigation District operates as an Enterprise Fund⁵⁸ with their budget divided into two categories: operating and non-operating. The District reports its accounting and financial activities in accordance with governmental Generally Accepted Accounting Principles (GAAP), which requires operating revenues and expenditures to be reported separately from non-operating business activities on an agency's financial statement.

This section considered the *Financial Plan, Water Rate Study & Capital Replacement Charge Study* for 2021-2025, and that for 2026-2030; and the independent Annual Financial Reports (audits). This section also considered the CalPERS valuations and annual adopted working budgets. Findings, determinations, and recommendations are made based on the following analysis of these sources. Appendix H summarizes the District's budget numbers.

Transparency and Accountability

Enterprise fund accounting is considered best practice in promoting and maintaining long-term financial sustainability. The District's financial position is reported annually on its audited financial statements in accordance with Government Auditing Standards. The State Controller's Office is responsible for establishing uniform accounting procedures.⁵⁹

The District has adopted various financial policies and practices to ensure it operates consistently with "best practices" in all facets of its operations. The District's Debt Management Policy addresses guidelines for issuing debt, type of debt permitted, and the use of debt for capital improvements and other purposes. An Investment Policy addresses cash reserves that are invested in the Local Agency Investment Fund (LAIF) managed by the State Treasurers Office.

The District conducts an annual audit of its financial statements using an outside independent auditor CJ Brown & Company CPAs. Audited financial statements are posted on the District's website. The District also submits an annual Financial Transaction Report to the State Controller's Office in compliance with state law. The most recent audited financial statement noted no material weaknesses in financial reporting or operations.

Reserve Policies: The District has maintained a goal to maintain a minimum balance within the Operating Fund equal to at least 50 percent of annual operating and maintenance expenses.⁶⁰ The District has policies for four reserve funds:

⁵⁸ Enterprise Funds are considered self-supporting in that the services they render are generally financed through user charges or fees on a cost reimbursement basis similar to a private business. SID reports its accounting and financial activities as an enterprise fund in accordance with governmental Generally Accepted Accounting Principles (GAAP)

⁵⁹ State of California, "Special District Uniform Accounting and Reporting Procedures", 2023 Edition

⁶⁰ chrome-extension://efaidnbmnnnibpcajpcglclefindmkaj/https://www.sidwater.org/DocumentCenter/View/456/2012-Financial-Plan?bidId=

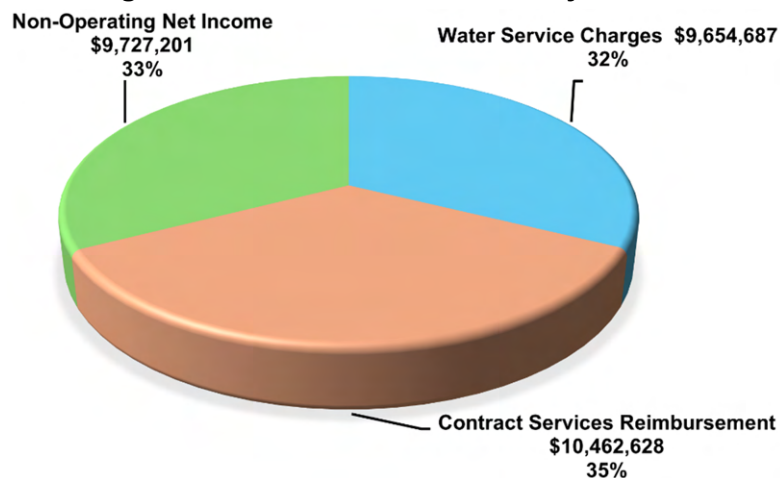

- (1) Operating Reserve – The Board of Directors have adopted an operating cash reserves requirement for the Agricultural water system of 50% of operating costs, and for 40% of operating expenses for each of the 19 M&I water systems.⁶¹ Operating cash reserves are available for any unexpected cost related to the unique water system, such as unanticipated repairs, or other operating costs.
- (2) Rehabilitation and Betterment Reserve⁶² – this fund is maintained through annual assessments and has been historically used for agricultural capital improvements.
- (3) Rate Stabilization Reserve – this fund was created in 2015 with a cap of \$250,000. The reserve funds are occasionally used to supplement the M&I operating reserves when reserves fall below the minimum 40%. They are used in an effort to prevent significant rate increases in the various 19 M&I systems. Funds are replenished through the M&I rate surplus revenues.
- (4) Capital Asset Fund Reserve – this fund was created in 2015 with a cap of \$1,399,243. The reserve funds are occasionally used if/when operating reserves are used for unanticipated repairs or replacement. Funds are replenished through rate surplus revenues.

4.4.1 Revenues

In 2024, SID had a total revenue of \$31,513,997, which was an increase from the year prior. SID has two basic types of revenue: *Operating revenues* (subcategorized as water sales & service fees and contract services reimbursement revenues) and *Non-operating net revenues* (combination of property tax & assessments, investing earnings, and power plant revenues, and other fees and expenses which derive a net calculation).

Figure 4-5 2024 Total Revenues by Source

⁶¹ Solano Irrigation District Financial Plan, Water Rate Study & Capital Replacement Charge Study: 2026-2030. p.1

⁶² id.

Agenda Item 10.A LAFCO Project No. 2023-08: MSR for Solano Irrigation District Draft, Public Review
Solano LAFCO

The District's combination of operating and non-operating revenues are generally tracked by user function in the District's budget, such as:

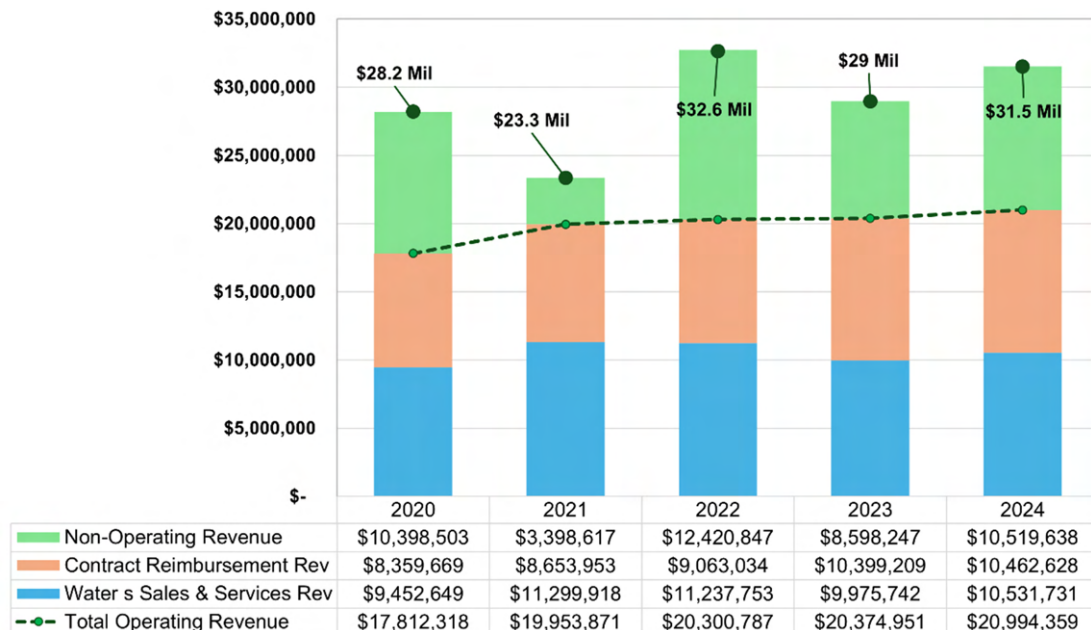

- *Revenue from water sales to Ag customers.* Agricultural water sales represent the largest revenue from sales but fluctuate from year to year depending on the amount of rainfall, cropping patterns, and the adoption of water efficiency practices.
- *Revenue from water sales to M&I customers.* The District also generates revenue by supplying potable and non-potable water to M&I customers in 19 service areas.
- *City Water Transfers (city contract water).* SID holds contracts with several cities for Solano Project water allocations. The cities pay for their allocation amount in a bulk water purchase each year.
- *Other – non-water sales:* Mix of operating and non-operating revenues, but not derived from sales, such as reimbursement for services provided under contracts, ad valorem property tax and other assessments, and investment income.

Operating Revenues:

Over the five-year period of 2020–2024, SID's operating revenues generally increased. Total operating revenues grew from \$17.8 million in 2020 to almost \$21 million in 2024. This increase in revenue was driven primarily by higher water rates and fees after SID completed a fee study, as done every five years, to review and update all fees and rates. This consistent review has supported SID's efforts to ensure that operating revenues will cover operating costs.

Over the same five years, the District's total revenue from operating and non-operating sources grew by 11.7%. This increase was primarily driven by increases in non-operating revenues from the issuance of revenue bonds, investment earnings, water sales to cities, and reimbursement for contract services performed for other entities.

Figure 4-6 Five-year Total Revenues

*Water Sales and Service Fees:*

Water sales revenues are determined by the rates and fees for services, which are in turn determined by the rate and user fee reports conducted every five years. The regularly updated reports help ensure that sufficient revenue is generated to cover the costs of providing agricultural and M&I water services. Drought and water conservation efforts can affect revenues from water sales because water supply may be less, or water demand is less (respectively).

User fees account for just over half of the District's operating revenue. The rate schedule being applied in 2025 was adopted in August 2021 and is effective through December 2025.⁶³ Appendix G is the 2021-2025 adopted rate schedules.

Charges for Contract Reimbursement Services:

The District performs contract services on a cost reimbursement basis for maintaining and operating water delivery systems for third parties. For example, SID maintains and operates the Monticello Power Plant, Solano Project water transmissions, Rural North Vacaville Water District engineering services, and Suisun-Solano Water Authority joint operations. Grants and work completed for others are also important revenue generators under this category.

Non-Operating Net Revenue:

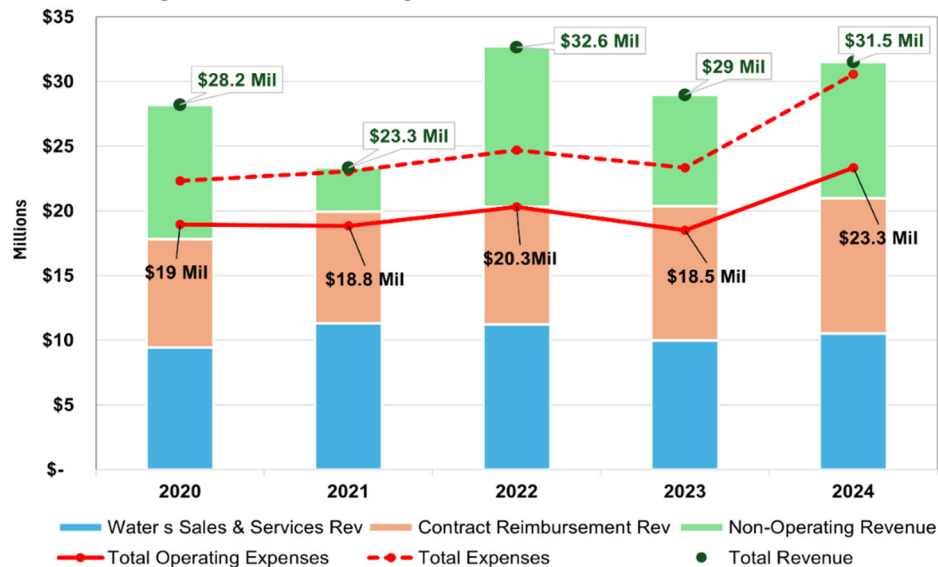

In addition to operating revenue, the District receives non-operating net revenue from several sources, but mostly from:

- Property taxes & Assessments
- Power Plant Revenue
- Investment Earnings
- Other (i.e.: detachment, annexation, easement/title fees)

Property taxes and assessments account for roughly half of the non-operating net revenues and are a reasonably reliable source of revenue. However, the remainder sources are susceptible to market changes and needs. SID should maintain their 5-year review schedule of all fees to ensure the District's financial viability. SID should also propose a Sphere of Influence and boundary that accurately reflects its service population and future growth desires and needs.

⁶³ SID is currently undergoing public hearings to adopt an updated fee schedule that will be effective January 1, 2026. Agricultural Water Rates May 2021 through Dec. 2025. Municipal & Industrial (M&I) Water Rates May 2021 through Dec. 2025. Capital Replacement Charge May 2021 through Dec. 2025. Five-year Financial Plan, Water Rate Study, with Capital Replacement Charges dated January 16, 2021

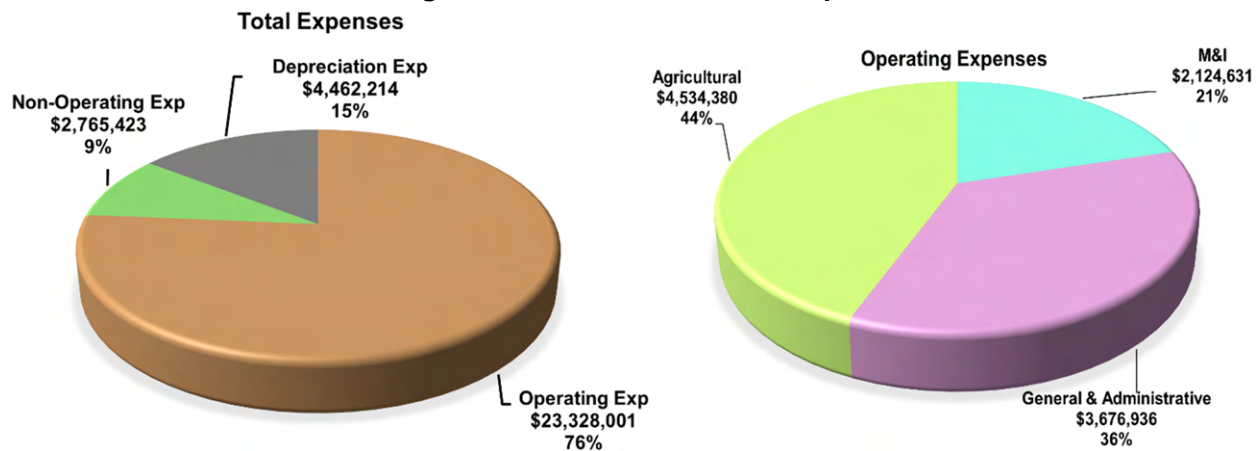

Figure 4-7 Operating Expenses vs. Total Expenses

4.4.2 Expenses

For Fiscal Year 2024, operating expenses account for 76% of the District's total annual expenditure. Non-operating expenses account for 9% of the total, and the remaining 15% are from depreciation expenses.⁶⁴ Seventy-six percent of the District's operating expenses are for salaries and benefits, and general & administrative expenses. Agricultural irrigation functions account for 46% of the District's operating costs with water operations, finance, management, and engineering departments being the largest line items. (Figure 4-8 below)

Figure 4-8 Fiscal Year 2024 Expenses

Expenses have remained relatively consistent over the past five years. In 2023, the District's operating expenses decreased due to lower costs for materials and supplies. However, they increased by 26% in 2024 compared to the prior year due primarily to

⁶⁴ Depreciation expenses are non-cash expenses that represent the cost of a physical asset, like machine or building, spread over its useful life. Because this is a non-cash expense, depreciation is not a factor relating to cash flow or operations. Therefore, this MSR does not consider depreciation a financial health component.

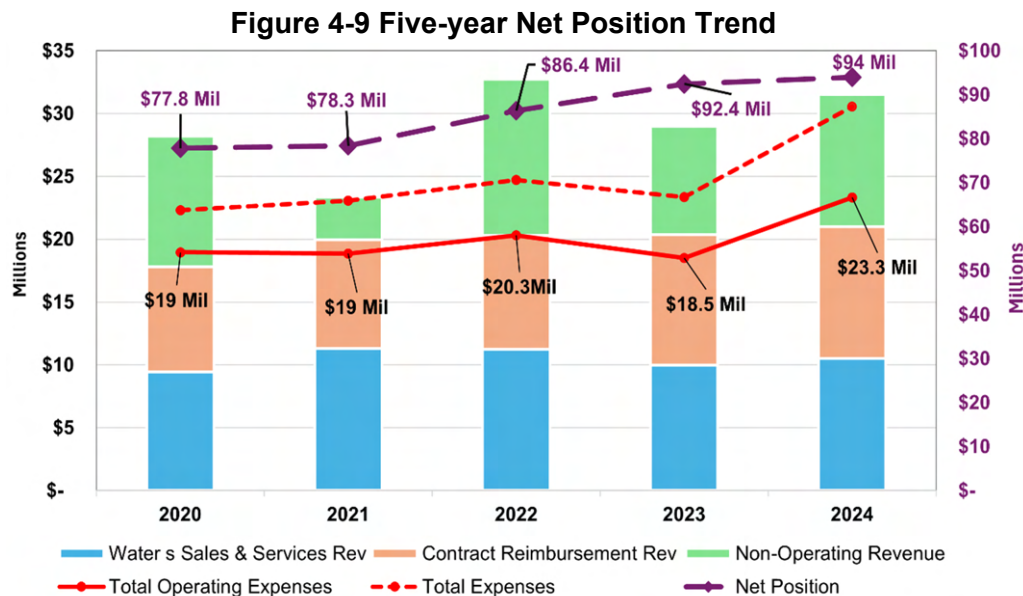

higher operating costs and employee benefits. Specifically, non-operating expenses jumped because of a CalPERS adjustment in actuarial pension expenses.

In 2020 and in 2024, SID's operating expenses exceeded the operating revenue. Both years reflect the tail end of the District's 5-year cycle of the fees and rates studies. Both years' expense gap was covered by non-operating revenues and/or reserves, therefore the District remained solid. These trends can be seen in Figure 4-9.

Net Position: The net position of SID is illustrated as the purple line in Figure 4-9 above. Net position represents the overall financial position for government-wide and proprietary fund statements and is categorized into three components: Net Investment in Capital Assets, Restricted, and Unrestricted. Net position provides a comprehensive view of a government's financial health and sustainability by showing the residual amount remaining after all other financial elements are accounted for. Net position is determined by the following formula, as presented in the Statement of Net Position:

$$\text{Assets (+) Deferred Outflows (-) Liabilities (-) Deferred Inflows} = \text{Net Position}$$

The District's Net Position has steadily increased over the past five years from \$77.8 million in 2020 to \$93.9 million in FY 2024. SID has consistently shown improvement in its net position due to revenue growth and cost management. The largest portion of the District's net position reflects its investments in non-current assets including joint powers authorities and capital assets (e.g., infrastructure and equipment). Approximately 9.5% of the District's net position represents financial resources that are subject to external restrictions to cover debt service. The remaining balance of \$17,872,590 is unrestricted and may be used to meet the District's ongoing obligations to its customers and creditors. The District's total liabilities to total assets ratio indicates the district is financially solvent with ample resources to cover its short term and long-term obligations.

4.4.3 Cash Flow

Cash flow tracks the movement of cash and cash equivalents into and out of an agency during the fiscal year. Analyzing cash inflows and outflows helps determine if the agency has enough cash to cover its immediate expenses. The “cash” relied on for the obligations can be “restricted” funds (such as bonds and bond repayments) or “unrestricted” (everything else).

Analyzing cash inflows and outflows helps determine if the agency has enough cash to cover its immediate expenses. The District is in a strong financial position and generates sufficient cash flow to meet its short-term obligations, fund operations, and invest in growth. Cash flow from operations has been positive over the past five years, as supported by the financial indicators discussed next.

Figure 4-6 shows that SID did not meet service obligations solely with operating revenues for three of the last five years, non-operating revenues were more than sufficient to cover the shortfalls. This reflects the District’s need to update their fee study (which they successfully did in September 2025).

4.4.4 Financial indicators

Financial indicators are quantitative metrics used to assess financial health, operational performance, guide budget development, and track long-term fiscal sustainability of agencies. Financial indicators are typically presented in ratios. For water and wastewater utilities, including irrigation districts, a ratio of 1.0 or higher is generally considered acceptable, with a target ratio often falling in the range of 1.2 to 2.0. A ratio below 1.0 could signal potential difficulty in meeting short-term financial obligations. A ratio greater than 2 is considered to be a high ratio and can indicate that the utility is not efficiently using its assets. It may be holding excessive cash that could be better invested in infrastructure.

There are several dozen financial indicators, though some become redundant and others do not present a helpful assessment of government agencies. Table 4-7 below summarizes the indicators applied to SID’s audited financials for this MSR.

Table 4-7 Financial Indicators based on 2024 Audited Financials

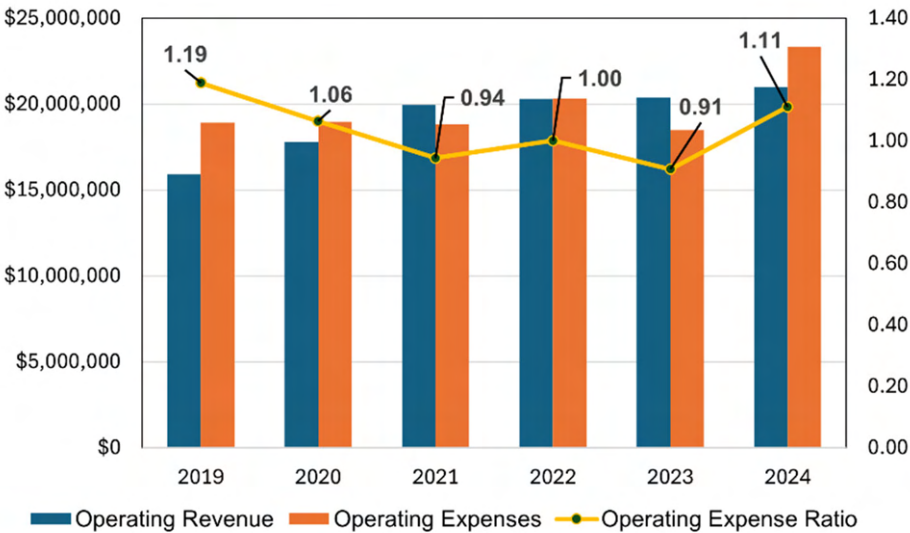

Financial Metric Name	Formula	Calculation	Ratio*
1. Operating Revenue Ratio	Operating Revenues / Operating Expenses	\$ 20,994,359 / \$ 23,328,001	0.90
2. Total Revenue Ratio	Total Revenues / Total Expenses**	\$ 31,513,997 / \$ 26,093,424	1.21
3. Solvency Indicator Ratio	Total Assets / Total Liabilities	\$156,781,235 / \$ 64,016,098	2.45

4. Liquidity Cash Ratio	Unrestricted Cash & Cash Equivalents / Current Liabilities	\$ 27,368,376 / \$ 5,019,946	5.45
5. Debt Service Coverage	Ag Rev – Maintenance & Op Costs / Principal & Interest Payments	\$ 1,761,358 / \$ 1,326,800	1.33
* Ratio greater than 1.0 indicates good financial health **excludes depreciation expenses			

1. Operating Revenue Ratio: Generally, agencies have operating expenses that are expected to be covered by their operating revenues Greater than 1.0 indicates a revenue surplus while less than 1.0 indicates a revenue shortfall. SID has operating expenses/revenues and non-operating expenses/revenues. This ratio focuses on the balance of the operating expenses to revenues. Where the operating expenses exceeded the operating revenues, SID relies on the non-operating revenues (property taxes/assessments and investment earnings) to bridge the gap.

Figure 4-10 Operating Expense Ratio 5-year Trend (2019-2024)

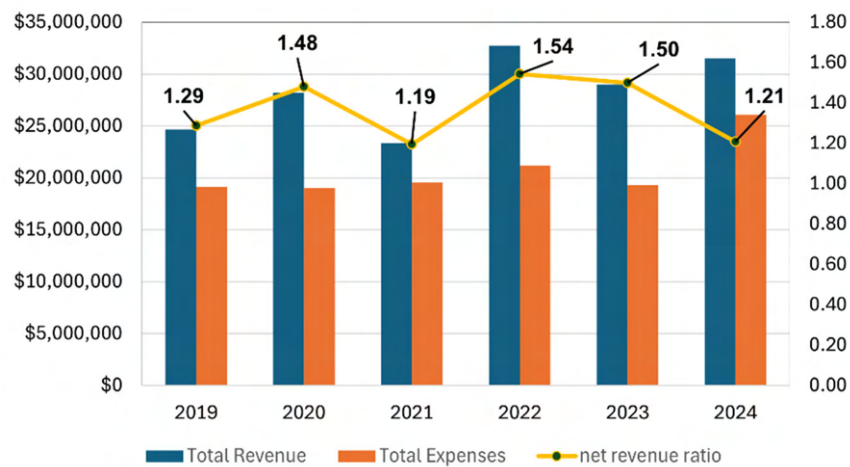

2. **Total Revenue Ratio:** The Total Expense Ratio assess if the agency closes a year with sufficient revenues to cover expenses. This differs from the Operating Expense Ratio because SID has two different expenses/revenues: operating and non-operating. This ratio helps to show that SID has sufficient revenues to cover expenses, but for some years that means the non-operating revenues cover gaps in operating revenues.

Total Expense Ratio from operating and non-operating activities was positive for each of the past five years with total revenues exceeding total expenses. The District receives significant non-operating revenue from property taxes/assessment and investment earnings that boost the District's ability to meet its service obligations. The District's reserves (or savings) are adequate to cover unexpected expenses or revenue shortfalls. Greater than 1.0 indicates a revenue shortfall while less than 1.0 indicates a revenue surplus. As displayed in the following graph, SID consistently ended the last five fiscal years with a ratio greater than 1.

Figure 4-11 Net Revenues Ratio 5-year Trend (2019-2024)

The District maintains several reserve accounts to meet specific needs of the District. Separate reserve accounts are set-up for each water system, whereas prior accounting practices commingled reserves. Cash reserves for the agricultural water system are maintained in an amount equal to at least 50% of the District's annual operating expenses. Cash reserves are also set aside for various long-term projects and costs, with the top three categories being: employee retirement benefits, capital assets, and the Vaca Valley M&I Master Plan study.

3. **Solvency Indicator Ratio:** Solvency indicators assess a company's long-term financial stability and its ability to meet long-term debt obligations. Metrics such as debt-to-equity ratio, interest coverage ratio, and debt service coverage ratio gauge the company's leverage and its capacity to service debt obligations over time. This indicator includes unfunded liabilities (UAL), bonds, and other debt. SID's tremendous assets more than cover their total liabilities, including their ability to pay their UAL. SID holds more value in assets than in liabilities, indicating the District is solvent.

4. Liquidity Cash Ratio: Liquidity indicators evaluate a company's ability to meet short-term financial obligations and manage cash flow effectively. Metrics such as current ratio, quick ratio, and operating cash flow ratio measure the company's liquidity position and its ability to cover short-term liabilities with liquid assets. SID's cash & cash equivalents (cash on hand) amply cover their current short-term liabilities (bills and other invoices). As of FY 2024, the District had 5.48 times more cash and cash equivalents than its current liabilities.
5. Debt Service Ratio: The Debt Service Ratio represents the District's ability to pay its obligations from its operating cash flow. Debt service coverage is defined as net revenues divided by the annual debt service payments. The District is required to maintain a minimum debt coverage of 1.20 as a condition of their lenders. The higher projected debt coverage ratio provides a greater margin of safety to bondholders and enhances the credit rating on bonds. Exceeding the minimum 1.20 ratio can benefit rate payers by reducing the cost of borrowing.⁶⁵

The District's debt service coverage ratio of 1.33 indicates that the District is not highly leveraged and has sufficient operating income to meet its annual principal and interest debt payments.

In 2021, the District paid off an existing loan from DWR related to the construction and development of the State Water Project. However, in early 2021 the District issued a \$26 million revenue bond; with \$23.7 million of the bond proceeds use to upgrade the agricultural electrical system and pipeline infrastructure. The remaining \$2.3 million is for an increase to treated water storage for the Gibson Canyon PWS. The debt is secured by liens on the net revenues and capital replacement charges received from users of each system.

In addition, the District makes lease payments for several pieces of equipment that it purchased in 2018 and 2021. The earlier leases were fully paid off in 2023. A final lump sum payment on the remaining lease is due in 2025. At the end of FY 2024, the District had outstanding long-term debt of approximately \$25.56 million, most of which is associated with the 2021 bond issuance.

4.4.5 Retirement Unfunded Accrued Liability

SID is a CalPERS member and holds three member plans for employees, based on hire date.⁶⁶ Those plans are the CalPERS Classic,⁶⁷ CalPERS New Classic,⁶⁸ and CalPERS PEPR⁶⁹ plans. The accumulated long term unfunded accrued liabilities associated with post-retirement health insurance. As of December 31, 2024, the District's unfunded post-retirement health insurance liability was \$10,655,995. SID has set up a reserve fund to manage this liability. Benefit payments are recognized when due and payable. The District consistently pays their contribution and UAL in full and on time.

⁶⁵ id. p.34

⁶⁶ 2024 Financial Audit, p 35. CalPERS benefit plan hire dates and rates are determined by California State Legislation.

⁶⁷ Hired before January 1, 2011

⁶⁸ Hired between January 1, 2011 – December 31, 2012

⁶⁹ Hired after January 1, 2013

4.4 Financial Ability to Provide Services

Findings

- F-4.4-1: The District reports its accounting and financial activities in accordance with governmental Generally Accepted Accounting Principles (GAAP).
- F-4.4-2: The District's financial position is reported annually on its audited financial statements in accordance with Government Auditing Standards with annual third-party audits.
- F-4.4-3: The District has several policies and reserve funds to guide and manage finances; such as Debt Management Policy, Investment Policy, Operating Reserve, Rehabilitation and Betterment Reserve, Rate Stabilization Reserve, and Capital Asset Fund Reserve.
- F-4.4-4: SID conducts a fee and rate study every five years.
- F-4.4-5: The District's total revenues consistently increased each year for the last five years. In years where operating expenses were not covered by operating revenues, non-operating revenues were able to cover the gap.
- F-4.4-6: The District's Net Position has steadily increased over the past five years from \$77.8 million in 2020 to \$93.9 million in FY 2024.
- F-4.4-7: The District's solvency indicator ratio in 2024 was 2.45; and had a liquidity cash ratio of 5.45.
- F-4.4-8: The District is required to maintain a minimum debt coverage of 1.20 as a condition of their lenders. The District's debt service coverage ratio of 1.33.
- F-4.4-9: As of December 31, 2024, the District's unfunded accrued liability was \$10,655,995. SID has set up a reserve fund to manage this liability.

Determinations

- D-4.4-1: District complies with Generally Accepted Accounting Principles (GAAP) and Government Auditing Standards for financial reporting and financial statements.
- D-4.4-2: The District has adopted various financial policies and practices to ensure it operates consistently with "best practices" in all facets of its operations.
- D-4.4-3: SID did not meet service obligations solely with operating revenues for three of the last five years, non-operating revenues were more than sufficient to cover the shortfalls. The 5-year cycle review of fees and rates assists SID in ensuring operational revenues cover operational expenses.
- D-4.4-4: The District's net position steadily increased over the past five years through consistent revenue growth and cost management.

D-4.4-5: The District is in a strong financial position and generates sufficient cash flow to meet its short-term obligations, fund operations, and invest in growth. Cash flow from operations has been positive over the past five years.

D-4.4-6: SID holds more value in assets than in liabilities, indicating the District is solvent.

D-4.4-7: SID's cash & cash equivalents (cash on hand) amply cover their current short-term liabilities (bills and other invoices), indicating they are liquid.

D-4.4-8: The District's debt service coverage ratio of 1.33 indicates that the District is not highly leveraged and has sufficient operating income to meet its annual principal and interest debt payments.

D-4.4-9: The District consistently pays their contribution and unfunded accrued liability in full and on time; and can continue to do so.

Recommendations:

R-4.4-1: SID should maintain their 5-year review schedule of all fees to ensure the District's financial viability.

R-4.4-2: SID should propose a Sphere of Influence and boundary that accurately reflects its service population and future growth desires and needs.

4.5: Status and Opportunity for Shared Facilities

SID has worked cooperatively with local agencies for nearly 70 years on a myriad of water management initiatives and programs of local, regional, and statewide importance. SID is contracted with several agencies to provide engineering services, maintenance and management services, and operational and reporting services. Such shared opportunities are: (Appendix J includes maps the display water purveyors in norther Solano County)

- *Solano Project facilities:* The District manages, on SCWA and USBR's behalf, the Solano Project facilities shared by ten Participating Member Agencies.
- *Maine Prairie Water District:* The District utilizes its conveyance facilities to provide targeted deliveries of Solano Project water and drain water to Maine Prairie Water District.
- *Rural North Vacaville Water District:* The District provides contract services to RNVWD for operation and maintenance of their facilities that result in management and operational efficiencies.

SID has not formally considered consolidation or merger with other rural water districts including Rural North Vacaville Water District (RNVWD) and Maine Prairie Water District (MPWD), which share common boundaries with SID. because of the different purposes, functions, and governing boards of the two mentioned districts as compared to the SID

- *City Contracts:* Water service agreements with various cities provide for more efficient utilization of available water resources.

- *Solano-Suisun Water Authority:* As part of a joint powers authority with Suisun City the District provides potable water for domestic consumption and fire suppression and is responsible for the planning, engineering, maintenance, and operation of the Suisun-Solano Water Authority water system.

Additionally, Suisun has a water entitlement of 1,300 AF of State Water Project water from the North Bay Aqueduct. However, the City does not have the facilities to convey or treat SWP water but can exchange the water. SSWA tentatively agreed to a water swap with the City of Suisun related to two future city development sites. Under this agreement, Suisun will trade their 1,300 AF of North Bay Delta Water allocation to SID in exchange for 240 AF of Solano Project Water. This swap provides a reliable amount of Solano Project supply (up to 240 AF) in return for an unreliable State Water Project allocation.

- *M&I Systems:* The M&I systems are geographically isolated from each other and are separately assessed for service needs and costs. There does not appear to be an opportunity to share facilities amongst the 19 M&I systems.
- *Other:*
 - SID also shares facilities with other entities including the provision of office space for the USBR and sharing warehouse space and Board Room with SCWA.
 - As a member of the Solano Collaborative, SID works with other Groundwater Sustainability Agencies to develop and implement a single Groundwater Sustainability Plan for the Solano Groundwater Sub-basin.
 - The District also serves on various committees, such as SCWA's Agricultural Water Conservation Committee, along with representatives from other water agencies, to assist growers in Solano County with irrigation management and water use efficiency at the farm level.

4.5 Status and Opportunity for shared Facilities

Findings

F-4.5-1: SID shares services and facilities with several different agencies through various contracts and agreements.

Determinations

D-4.5-1: SID should continue to look for opportunities to share services and facilities to continue to provide efficient and effective services.

Recommendations:

R-4.5-1: SID could consider absorbing or merging smaller water facilities and systems where fiscally and effectively sound.

R-4.5-2: SID will be asked to consider opportunities for consolidation or merger with other rural water districts including Rural North Vacaville Water District (RNVWD) and Maine Prairie Water District (MPWD), which share common boundaries with SID.

4.6: Accountability for Community Service Needs, including Governmental Structure and Operational Efficiencies

4.6.1: Governance and Accountability

Special districts are primarily accountable to the voters who elect their boards of directors and the customers they serve. Independent special districts are governed by independent boards, most often directly elected by voters within the district. These boards have a high degree of autonomy.

General Structure: SID maintains a website located at <http://www.sidwater.org> as required by SB 929 and posts meeting agendas, minutes, Board policies, water quality, irrigation, and technical reports, and links to other relevant information. Solano Irrigation District is an independent special district governed by a five-member Board of Directors that is elected to overlapping four-year terms by registered voters residing within the district. The Board is responsible for setting District policy, approving annual budgets, and establishing long-range goals to ensure the efficient and effective operation of the district. Daily operations are led by an appointed General Manager with a full-time staff of approximately 90 employees.

Board of Directors: Members of the Board of Directors do not receive a salary but are paid for services rendered under their “Board member” title. Compensation is set at \$100 per day for each day’s service, with a maximum of \$600 per month regardless of the number of meetings, workshops, and committees they participate in.

Board Meetings: Board meetings are public meeting and held on the third Tuesday of each month at the District’s Offices located at 810 Vaca Valley Parkway in Vacaville. The General Manager, in cooperation with the Board President, prepares the agenda for each regular and special meetings of the Board in accordance with the Brown Act. Agendas are available 72 hours prior to all regular Board meetings and are posted at a site accessible to the general public and on the District’s website. Members of the public may request email notifications of meetings upon the completion and submission of a “Consent to E-Mail Notice” form.

LAFCO staff observed that public meetings and noticing policies and procedures are conducted in compliance with the Brown Act and with the District’s adopted Rule of Order for Board Meetings and Public Hearings.⁷⁰ The website contains an Annual Disclosure of Board Member Compensation as required per Government Code Section 53065.5 and the posting of meeting agendas.

The District maintains a policy manual with a comprehensive listing of the Board’s current policies and rules and regulations. The Board has also adopted a Code of Conduct, Code of Ethics,⁷¹ and Conflict of Interest Code. The District’s governance and management practices comply with the requirements of its Principal Act and applicable state laws affecting the governance of special districts in general and include many best practices

⁷⁰ SID Board Policies: chrome-extension://efaidnbmnnnibpcajpcglclefindmkaj/https://www.sidwater.org/DocumentCenter/View/586/SID-Board-Policies?bidId=

⁷¹ SID Code of Ethics: chrome-extension://efaidnbmnnnibpcajpcglclefindmkaj/https://www.sidwater.org/DocumentCenter/View/580/SID-Board-Code-of-Ethics?bidId=

for high performing special districts found on the Special District Leadership Foundation's website.

Appendix I includes the direct language from various laws that SID is subject to and complies with.

4.6.2: Transparency

Agency transparency refers to the degree to which an agency is open, honest, and forthcoming about its operations, processes, and decision-making. In California, special districts are required to be transparent with the public about their operations, finances, and decision-making processes.

Solano Irrigation District strives to operate in such a way that it is easy to see what actions are being taken and that the District's decision-making processes are transparent. This includes providing detailed information regarding annual compensation, district financials, disclosure of enterprise information systems, water management policies and reports, and water quality reports. SID has made accessing their information simple by providing direct links through a singular page on their website at <https://www.sidwater.org/353/Transparency>.

Financial records are audited annually by an outside independent auditor and posted on the District's website. Annual financial transaction reports are filed with the State Controller's Office as required by State law. A link is provided on the district's website so that the public can download a copy of the report from the SCO. The District also posts information about reimbursement of expenses, which are filed with the State Controller's Office (SCO) and posted on the District's website.

California Senate Bill 272 (SB 272), signed into law in 2015, mandated the creation of a catalog of enterprise systems for local agencies. Specifically, it requires agencies to publicly disclose information about their enterprise systems.⁷² The catalog must be posted on the agency's website and updated annually. Vendors and product listings are posted on its website as required by SB 272. The website with address and agency contact information, publication of a semi-annual newsletter, and properly noticed public meetings allows the District to communicate and be transparent with its all members of the public.

4.6.3: Management and Operational Efficiencies

SID exhibits the characteristics of a well-managed agency operating efficiently and serving its customers effectively with a full-time professional staff that is assigned to specific departments based on job function and expertise with department heads reporting to the general manager. The District maintains and updates a strategic plan with actions spelled out in a series of master plans, business plans, and a capital improvement program that is reviewed annually to meet the District's current and future infrastructure needs. The District also conducts periodic rate reviews and cost studies to ensure that it has adequate financial resources to meet its operational and capital needs. The current water rate study was adopted in 2025. An indirect cost study was prepared in 2015 and should be updated. The District operates several independent water systems with its own unique water

⁷² Enterprise systems are multi-departmental software applications or computer systems that collect, store, exchange, and analyze information.

treatment and delivery system that should be evaluated for potential consolidation or merger to achieve cost effective operational efficiencies.

4.6 Accountability for Community Service Needs, including Governmental Structure and Operational Efficiencies

Findings

- F-4.6-1: SID maintains a website located at <http://www.sidwater.org> as required by SB 929 and posts meeting agendas, minutes, Board policies, water quality, irrigation, and technical reports, and links to other relevant information.
- F-4.6-2: Solano Irrigation District is an independent special district governed by a five-member Board of Directors that is elected to overlapping four-year terms by registered voters residing within the district.
- F-4.6-3: Members of the Board of Directors do not receive a salary but are paid for services rendered under their "Board member" title.
- F-4.6-4: Board meetings are public and held on the third Tuesday of each month at the District's Offices located at 810 Vaca Valley Parkway in Vacaville.
- F-4.6-5: The General Manager prepares the agenda for each regular and special meetings of the Board and makes the agenda publicly available online and onsite 72 hours prior to regular meetings, in accordance with the Brown Act.
- F-4.6-6: Annual financial transaction reports are filed with the State Controller's Office as required by State law.
- F-4.6-7: SID has made accessing their information; such as annual compensation, district financials, disclosure of enterprise information systems, water management policies and reports, and water quality reports; simple by providing direct links through a singular page on their website at <https://www.sidwater.org/353/Transparency>.

Determinations

- D-4.6-1: LAFCO staff observed that public meetings and noticing policies and procedures are conducted in compliance with the Brown Act and with the District's adopted Rule of Order for Board Meetings and Public Hearings.
- D-4.6-2: The District's governance and management practices comply with the requirements of its Principal Act and applicable state laws affecting the governance of special districts in general and include many best practices for high performing special districts found on the Special District Leadership Foundation's website.
- D-4.6-3: The website with address and agency contact information, publication of a quarterly newsletter, and properly noticed public meetings allows the District to communicate and be transparent with all its members of the public.
- D-4.6-4: SID exhibits the characteristics of a well-managed agency operating efficiently and serving its customers effectively with a full-time professional staff that is assigned to specific departments based on job function and expertise with department heads reporting to the general manager.

4.7: Other Matters Related to Effective or Efficient Service Delivery, as Required by Commission Policy

LAFCOs are tasked with balancing development and growth in a way that discourages sprawl, preserving open-space and prime agricultural lands, and support the effective and efficient extension of agency services. In doing so, LAFCOs are guided to ensure the orderly and efficient arrangement of local government boundaries and to avoid duplication of services within a county. There can be several different factors or matters that may impact SID's current or future ability to effectively or efficiently provide services.

Activate Latent Powers: SID's primary function is the delivery of agricultural irrigation water. However, SID can provide a broad range of services under its Principal Act that it is not currently performing, such as wastewater treatment. Activation of these "latent" powers requires LAFCO approval.

At this time, SID is not planning to provide any new or different services beyond what they are currently offering. Should SID decide at a later date to launch a new service authorized by their Principle Act the District would work with Solano LAFCO to identify the need and logical service area.

Out of District Service Agreements: SID often receives requests to provide services outside its existing service area. SID policy does not allow water to be used on lands outside of the District, except where agreed upon through an annual Out of District Service Agreement.⁷³ LAFCO policy requires "will serve" letters from the affected agency stating that it has the capacity to furnish the required services in a cost-effective manner.

Service extensions outside a district's jurisdictional boundaries require LAFCO approval under Gov. Code 56133. Solano LAFCO policy allows service extensions within an SOI in anticipation of future annexation and outside an SOI in response to an existing or impending threat to public health and safety, consistent with Gov. Code 56133. However, as explained in Section 4.4, Solano Project Water is not allowed to be served or used outside of the Place of Use boundary.

Land Detachments from the District: SID is primarily a purveyor of agricultural water, with allowances for limited municipal and industrial water or city-contracted water. As stated in Section 2.5, more than 80% of SID's district is unincorporated agricultural lands. When a city is approved to annex land, land that is approved for residential development is removed from SID's boundary, and thereby from property tax revenues for SID. SID established a detachment fee in 1985 in an effort to capture some of the lost revenues. This fee should be reviewed and updated as needed. The District's Strategic Plan recognizes the need to update fees for land detachments on a regular basis.⁷⁴

Known City Growth Plans: SID is considering some areas that are consistent with their existing services, such as additional agricultural land, increased unincorporated municipal & industrial development, or areas that may permit new wells to increase groundwater

⁷³ Out of District Service Agreements, "Rules and Regulations Governing the Operation and Distribution of Irrigation Water within the Solano Irrigation District", November 20, 2012

⁷⁴ "Priority Update from April 18, 2017 Strategic Plan Review", May 16, 2017

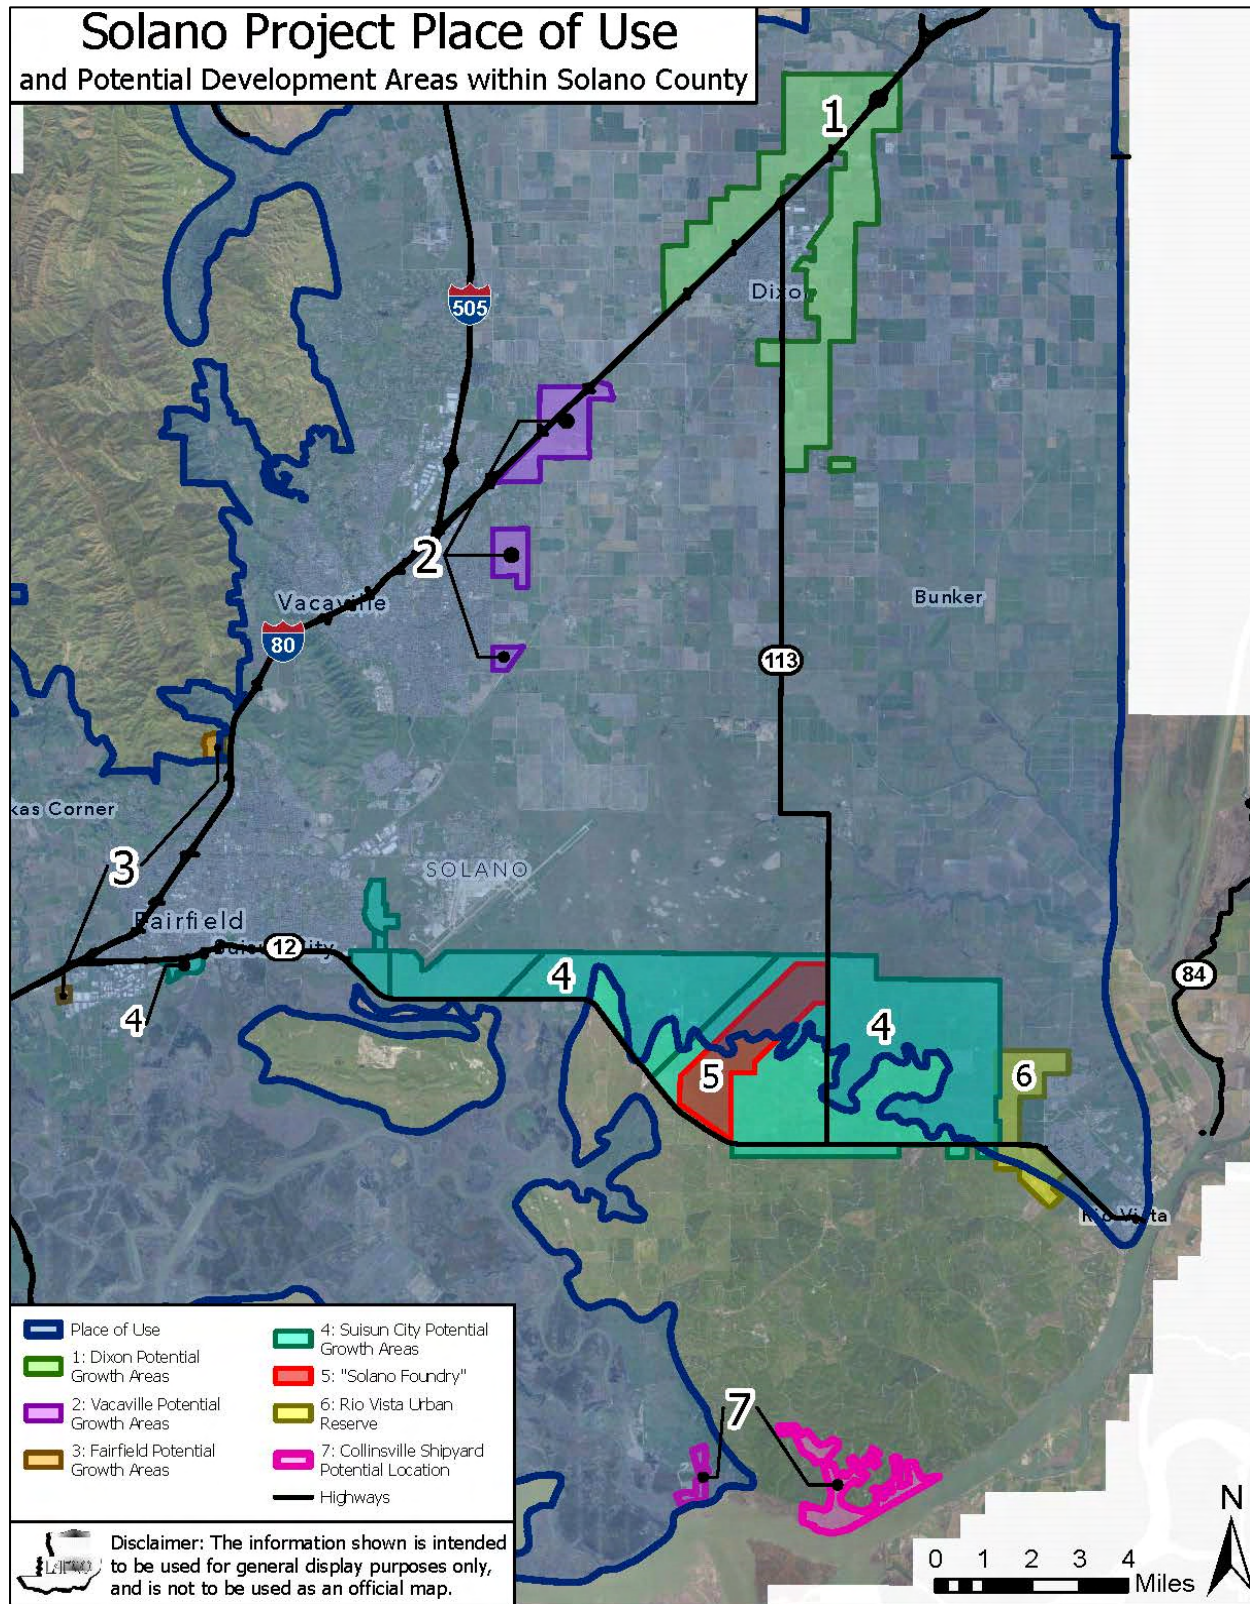

supply. However, another factor that LAFCO and the District would also need to consider are outside demands vying for SID, such as anticipated growth of adjacent cities.

Approximately 30,000 AF of the District's total 141,000 AF Solano Project water is contracted to the cities of Vacaville, Fairfield, Vallejo, and Suisun. SID's boundary also includes the city of Dixon (typically excepting the California Water Service area), though Dixon is not a contract user of SID's water. However, being in the District's boundary allows for a reasonable possibility that they could request an allocation. Of these five cities, four of them have introduced substantial plans for growth and development. These plans are all in the very early stages of conceptual designs and speculative potential impacts. Therefore, this MSR is aware but does not include any consideration or analysis of these conceptual plans. Figure 4-12 depicts the following conceptual projects.

- Dixon: While Dixon does not currently contract with SID for water supply, Dixon's conceptual plans for growth are substantial and may lead to a request for a new water agreement. In August, Dixon began exploration and preliminary work on substantial general plan amendments that include more than 7,000 acres of potential mixed urban development. There are no details available to reasonably rely on, therefore this MSR does not include any considerations regarding the Dixon conceptual plans because they are speculative.
- Fairfield: The City adopted their General Plan 2050 in December of 2024. The General Plan focused on eight infill areas and three growth/annexation areas with projected speculative growth that may require changes to their water demand and allocation. The General Plan anticipates 3,630 new dwelling units, 974,610 sq ft of new retail, 1,443,000 sq ft of new office space/use, and 4,780,130 sq ft of new industrial. However, all the plans are speculative and therefore not considered in this MSR.
- Suisun: In 2025, the City conducted an Economic Development Strategy and Implementation Plan and began to explore substantial growth through land annexations. According to available information, exploration is in a state of preliminary research and speculative concepts. Suisun's plan is centered around coordinating with California Forever and a potential annexation of 23,000 acres for mixed urban development. However, plans are purely speculative as of July 2025 therefore this MSR does not include or account for any potential water service or supply impacts. Further, roughly half of the California Forever site is outside of the Place of Use for Solano Project Water provisions.
- Vacaville: The City's 2015 General Plan identified future growth areas but did not include land use assumptions to help project service's needs. In 2025, the City began to analyze potential land use changes within the area referred to as *East of Leisure Town* (ELT). The ELT area includes roughly 850 acres and may have up to roughly 6,000 new residential units with some commercial and park space. The City began the project analysis in June 2025 but are still in the very early stages with only speculative assumptions. Therefore, this MSR does not include any considerations for the Vacaville developments.
- Other Speculative Developments: Recent (2025) news articles have spoken to a speculative "shipbuilding yard" in the Collinsville area. SID is aware of the conversational project and is open to the potential to provide water services. However, all conversations are highly speculative and therefore not considered in this MSR.

Figure 4-12 Potential Development in Place of Use

4.7 Other Matters Related to Effective or Efficient Service Delivery, as Required by Commission Policy

Findings

- F-4.7-1: SID has latent powers that may be activated, should the District choose to, but they are not at this time.
- F-4.7-2: SID has a policy that allows for out-of-agency service agreements through an annual Out of District Service Agreement.
- F-4.7-3: SID's Strategic Plan recognizes the need to update fees for land detachments on a regular basis to mitigate for lost property tax and service charge revenues.
- F-4.7-4: SID anticipates updating their sphere of influence after the completion of this MSR. SID is aware that any updates or revisions must be supported by this MSR.
- F-4.7-5: SID is aware of the substantial planned potential growth within its jurisdictional boundaries. However, the District understands that the planned potential growth is very speculative at the time of this MSR.

Determinations

- D-4.7-1: SID has existing and allows for more out-of-agency service agreements that may not be consistent with Gov.Code §56133.
- D-4.7-2: SID consistently updates their fees through a 5-year fee study to ensure costs for services are covered by fees and other revenues.
- D-4.7-3: This MSR does not include analysis of the speculative planned potential growth within the boundaries of SID and therefore no annexations or new promises of water supply can be made based on this MSR.

Recommendations:

- R-4.7-1: SID should work with Solano LAFCO to ensure that their Out of District Service Agreement policy is consistent and complies with Gov.Code §56133.

Section 4: Sphere of Influence Review

The CKH Act requires LAFCOs to periodically review and update an agency's Sphere of Influence (SOI).⁷⁵ Government Code §56425(e) lists the required factors that LAFCO must consider and prepare a written statement of its determinations. The determinations must be supported by the analysis and determination of an MSR.⁷⁶

The SOI factors are:

1. *Present and Planned Land Uses*
2. *Present and Probable Need for Public Facilities/Services*
3. *Present Capacity and Adequacy of Public Facilities/Services*
4. *Existence of Social or Economic Communities of Interest*
5. *Need for Public Facilities and Services in DUCs*

The commission shall adopt, amend, or update spheres of influence after a public hearing called and held for that purpose.⁷⁷ Amendments to a SOI are subject to the California Environmental Quality Act (CEQA).⁷⁸ Generally, the results of updating a sphere of influence include:

1. Reaffirming the previously approved SOI.
2. Amending a sphere to be coterminous with agency's jurisdictional boundaries. This indicates plans for growth at this time.
3. Amending a sphere to include expansion based on analyzed plans for growth of the agency. This supports the plans and allows for annexations for boundary growth.
4. Establishing a zero-sphere. This would indicate that an agency may be suffering in its ability to provide existing and future services.

SID's SOI: SID's SOI was last updated in 2014 through LAFCO Resolution No. 14-04, dated June 9, 2014. Since it was approved there have been no changes in the District's sphere. SID's service territory encompasses more than 71,000 total acres with a sphere of influence that is mostly coterminous, except for 2,335 acres that extend beyond the District's current boundaries (see Appendix K).

SID has expressed an intent to amend or expand its 2014 SOI. Establishing the appropriate sphere will depend on future needs and the District's capacity to serve. Where possible, SID should be supported for agricultural use growth because it aligns with LAFCO's directive of protecting agricultural uses. SID is conducting their own studies and outreach to identify areas that are likely to request SID services for potential future annexations.

Solano LAFCO policies require adequate services to be available to areas proposed for a city change of organization/reorganization. Water Supply/Demand Studies conducted for SID indicate

⁷⁵ An SOI is defined by statute as a "plan for the probable physical boundary and service area of a local government agency as determined by the commission" (GC §56076). A sphere represents the appropriate and probable future service area for the agency.

⁷⁶ Gov. Code §56430(a)

⁷⁷ Gov. Code §56427

⁷⁸ Gov. Code §56428(b)

Solano LAFCO

that the District's current water supply may not be adequate to meet future demands during drought periods with multiple dry years. (refer to Section 4.4) SID may not be able to expand the District's sphere of influence without first updating its water balance studies and agricultural water management plan. The District should not enter into future water service agreements with local cities or water agencies without first updating said studies either. All city water supply agreements with SID should continue to include terms and requirements that give priority to agricultural water needs.

Section 5: Findings, Determinations, & Recommendations

4.1 Growth and Population of the District

Findings

F-4.1-1: 2% of the District population is in agricultural areas. 80% of SID water is for agricultural irrigation.

F-4.1-2: The California Department of Finance projects the District's population to increase by approximately 2,754 (5%) by 2030.

Determinations

D-4.1-1: Population is an insignificant factor when considering SID's service demand.

D-4.1-2: Projected population growth is nominal for the next 5 years.

4.2 Disadvantaged Unincorporated Communities

Findings

F-4.2-1: A disadvantaged unincorporated communities (DUC) is a community that is equal to or less than 80% of the Statewide Median Household Income.

F-4.2-2: According to the 2022 U.S. Census Bureau's American Community Survey, the Statewide MHI was \$91,905.

F-4.2-3: 80% of the state MHI yields an income threshold of \$73,524 for defining a DUC.

F-4.2-4: There are four unincorporated Census Designated Places (CDP) in Solano County. All four CDP household incomes exceed the 80% threshold.

Determinations

D-4.2-1: There are no disadvantaged unincorporated communities within or adjacent to SID.

**4.3 Present and Planned Capacity of Public Facilities, Adequacy of Public Services, and Infrastructure Needs or Deficiencies****Findings**

- F-4.3-1: SID's has a stable total available water entitlement supply is 158,356 AF. The 10-year average demand has been 154,940 AF. This leaves approximately 3,416 AF, on average, of available water for service growth.
- F-4.3-2: SID has been able to meet water demand for the last 10 years, with assistance of carryover water during dry years.
- F-4.3-3: SID averaged 43,895 acres of irrigation crop land in the last 10 years with consistent change in cropping patterns, with a steady change from pasture/hay crops to tree/vine crops.
- F-4.3-4: SID has 19 municipal & industrial (M&I) service areas with separate, individual small potable or non-potable water systems.
- F-4.3-5: SID holds water supply contracts or agreements with seven cities for surface water supply, in part to reduce reliance on ground water.
- F-4.3-6: The 2015 Water Supply Shortage Risk Assessment concluded that under the most challenging future conditions and when city contract obligations increase starting 2024, SID agricultural customers are forecast to experience water supply shortages 96 percent of the time, with maximum shortages of up to 60,000 AF, or 28 percent of total demand (agricultural and urban), in any given year.
- F-4.3-7: SID's 2015 Risk Assessment Report recommended several actions to improve water recovery and reuse. SID has implemented some of those recommendations, such as expanding the TruePoint water ordering and delivery tracking software, installing new Rubicon gates at various headings, expansion of the TCC project and continued drainage outflow recovery project.
- F-4.3-8: SID maintains a 10-year Capital Improvement Program along with a Solano Project Rehabilitation and Betterment Plan jointly with Solano County Water Agency. Both are regularly updated at public meetings.
- F-4.3-9: SID completed their first Strategic Plan in 2014 and updated it in 2017. At its March 19, 2024 the Board updated and adopted its 5-Year priorities from the 2017 Strategic Plan. This was done in-lieu of a full Strategic Plan Update.
- F-4.3-10: The Putah South Canal is the main canal that SID uses to transmit water and runs generally south for approximately 33 miles in length. Branching from the PSC are about 60 lateral headings and turnouts. The District delivers water through 272 miles of canals and lateral to about 47,000 irrigated acres within a total service area of 71,000 acres.
- F-4.3-11: SID conducts water quality annual groundwater testing and surface water quality testing every five to ten years, and nine public water systems with annual water quality reports.

F-4.3-12: The State Water Resources Control Board (State Water Board) released a proposed San Francisco Bay-Delta Plan (Bay-Delta Plan) for the Sacramento Basin in September 2023. The July 2025 Draft Plan recommends an unimpaired flow of water of surface water from Lake Berryessa at minimum of 0% and up to 55%. It also mandates a minimum level of 900,000 AF in Lake Berryessa for cold water storage supply for the Sacramento River. Water Supply Adjustments accounted for in the recent draft of the plan may reduce or increase this minimum storage level for a given water year type.

Determinations

D-4.3-1: If the trends for crops and acreage continue and the region does not experience several years of dry seasons, SID should have sufficient water to meet existing needs. However, if SID plans to expand its boundaries or crop trends change to increase demand, SID may be required to update the MSR analysis prior to any annexations.

D-4.3-2: The 19 individual M&I services areas are costly to maintain individually. However, because the systems are geographically isolated, they cannot be consolidated or combined.

D-4.3-3: Any future annexation that adds new users or increases demand will require detailed analysis and evidence to show that SID has a sufficient available water supply.

D-4.3-4: The 2015 Risk Assessment found that the Distribution Canal Efficiency of the canals ranged from 82 to 91 percent between 1991 and 2017. The efficiency of the system is reasonably high. Since the Assessment SID has made further improvements that increased efficiency but was not measured.

D-4.3-5: SID meets and complies with the State water quality reporting requirements.

D-4.3-6: SID's water supply is considered to be reliable. Due to the high-water supply reliability of the Solano Project, SID has not historically considered the potential of importing water from others.

D-4.3-7: The main factor affecting Solano Project surface water reliability is the frequency and duration of droughts lasting for multiple years that could result in a major draw down of water from Lake Berryessa.

D-4.3-8: The Bay-Delta Plan could have serious long-term consequences for Solano County's water supply.

D-4.3-9: Based on 20 years of hydrological and water delivery data, the current draft of the Bay-Delta Plan could result in zero water deliveries from Lake Berryessa in 20% of water years for Solano County customers and depending upon the Water Supply Adjustment criteria results in the remaining 80% of years with a significantly reduced (less than 50%) of allocation available to users. This would have catastrophic effects on the region's cities, farms, and economy.

Recommendations

- R-4.3-1: Prior to a sphere of influence expansion and any annexation, SID shall update the District AWMP.
- R-4.3-2: SID should explore and consider other opportunities or possibilities to merge the small M&I systems with other systems, expanding the small systems for more use or other means of reducing costs for the users.
- R-4.3-3: Annexations of parcels with existing out-of-service area agreements and existing connections should be supported to encourage compliance with CKH. SID should not enter into any new out-of-agency service agreements without Solano LAFCO review and approval, under Gov Code 56233. Future annexations will require proof of a tax sharing agreement with any relevant, impacted agency.
- R-4.3-4: SID should update the Strategic Plan prior to any sphere of influence amendments that changes water demand assumptions or analysis.
- R-4.3-5: SID should consider continuing and expanding their water conservation and recovery efforts to extend their water supply. This is also consistent to the State's encouragement.
- R-4.3-6: SID could explore opportunities for additional water storage along the distribution system that can capture rainfall and runoff during the wet seasons to supplement irrigation water in the dry season and provide for additional groundwater recharge, consistent with the Solano Subbasin GSP. SID should also continue its conservation efforts with the canals, meters, and pumps.
- R-4.3-7: SID should work jointly with other water uses of the Solano Project/Lake Berryessa water; such as Solano Count Water Agency, cities in Solano County, and Solano County departments; to carefully monitor and possible challenge the Bay-Delta Plan's unimpeded flow rule.

4.4 Financial Ability to Provide Services

Findings

- F-4.4-1: The District reports its accounting and financial activities in accordance with governmental Generally Accepted Accounting Principles (GAAP).
- F-4.4-2: The District's financial position is reported annually on its audited financial statements in accordance with Government Auditing Standards with annual third-party audits.
- F-4.4-3: The District has several policies and reserve funds to guide and manage finances; such as Debt Management Policy, Investment Policy, Operating Reserve, Rehabilitation and Betterment Reserve, Rate Stabilization Reserve, and Capital Asset Fund Reserve.
- F-4.4-4: SID conducts a fee and rate study every five years.

F-4.4-5: The District's total revenues consistently increased each year for the last five years. In years where operating expenses were not covered by operating revenues, non-operating revenues were able to cover the gap.

F-4.4-6: The District's Net Position has steadily increased over the past five years from \$77.8 million in 2020 to \$93.9 million in FY 2024.

F-4.4-7: The District's solvency indicator ratio in 2024 was 2.45; and had a liquidity cash ratio of 5.45.

F-4.4-8: The District is required to maintain a minimum debt coverage of 1.20 as a condition of their lenders. The District's debt service coverage ratio of 1.33.

F-4.4-9: As of December 31, 2024, the District's unfunded accrued liability was \$10,655,995. SID has set up a reserve fund to manage this liability.

Determinations

D-4.4-1: District complies with Generally Accepted Accounting Principles (GAAP) and Government Auditing Standards for financial reporting and financial statements.

D-4.4-2: The District has adopted various financial policies and practices to ensure it operates consistently with "best practices" in all facets of its operations.

D-4.4-3: SID did not meet service obligations solely with operating revenues for three of the last five years, non-operating revenues were more than sufficient to cover the shortfalls. The 5-year cycle review of fees and rates assists SID in ensuring operational revenues cover operational expenses.

D-4.4-4: The District's net position steadily increased over the past five years through consistent revenue growth and cost management.

D-4.4-5: The District is in a strong financial position and generates sufficient cash flow to meet its short-term obligations, fund operations, and invest in growth. Cash flow from operations has been positive over the past five years.

D-4.4-6: SID holds more value in assets than in liabilities, indicating the District is solvent.

D-4.4-7: SID's cash & cash equivalents (cash on hand) amply cover their current short-term liabilities (bills and other invoices), indicating they are liquid.

D-4.4-8: The District's debt service coverage ratio of 1.33 indicates that the District is not highly leveraged and has sufficient operating income to meet its annual principal and interest debt payments.

D-4.4-9: The District consistently pays their contribution and unfunded accrued liability in full and on time; and can continue to do so.

Recommendations:

R-4.4-1: SID should maintain their 5-year review schedule of all fees to ensure the District's financial viability.

R-4.4-2: SID should propose a Sphere of Influence and boundary that accurately reflects its service population and future growth desires and needs.

4.5 Status and Opportunity for shared Facilities

Findings

F-4.5-1: SID shares services and facilities with several different agencies through various contracts and agreements.

Determinations

D-4.5-1: SID should continue to look for opportunities to share services and facilities to continue to provide efficient and effective services.

Recommendations:

R-4.5-1: SID could consider absorbing or merging smaller water facilities and systems where fiscally and effectively sound.

R-4.5-2: SID will be asked to consider opportunities for consolidation or merger with other rural water districts including Rural North Vacaville Water District (RNVWD) and Maine Prairie Water District (MPWD), which share common boundaries with SID.

4.6 Accountability for Community Service Needs, including Governmental Structure and Operational Efficiencies

Findings

F-4.6-1: SID maintains a website located at <http://www.sidwater.org> as required by SB 929 and posts meeting agendas, minutes, Board policies, water quality, irrigation, and technical reports, and links to other relevant information.

F-4.6-2: Solano Irrigation District is an independent special district governed by a five-member Board of Directors that is elected to overlapping four-year terms by registered voters residing within the district.

F-4.6-3: Members of the Board of Directors do not receive a salary but are paid for services rendered under their "Board member" title.

F-4.6-4: Board meetings are public meeting and held on the first Tuesday of each month at the District's Offices located at 810 Vaca Valley Parkway in Vacaville.

F-4.6-5: The General Manager prepares the agenda for each regular and special meetings of the Board and makes the agendas publicly available online and onsite 72 hours prior to the meetings, in accordance with the Brown Act.

F-4.6-6: Annual financial transaction reports are filed with the State Controller's Office as required by State law.

F-4.6-7: SID has made accessing their information; such as annual compensation, district financials, disclosure of enterprise information systems, water management policies and reports, and water quality reports; simple by providing direct links through a singular page on their website at <https://www.sidwater.org/353/Transparency>.

Determinations

D-4.6-1: LAFCO staff observed that public meetings and noticing policies and procedures are conducted in compliance with the Brown Act and with the District's adopted Rule of Order for Board Meetings and Public Hearings.

D-4.6-2: The District's governance and management practices comply with the requirements of its Principal Act and applicable state laws affecting the governance of special districts in general and include many best practices for high performing special districts found on the Special District Leadership Foundation's website.

D-4.6-3: The website with address and agency contacts information, publication of a semi-annual newsletter, and properly noticed public meetings allows the District to communicate and be transparent with its all members of the public.

D-4.6-4: SID exhibits the characteristics of a well-managed agency operating efficiently and serving its customers effectively with a full-time professional staff that is assigned to specific departments based on job function and expertise with department heads reporting to the general manager.

4.7 Other Matters Related to Effective or Efficient Service Delivery, as Required by Commission Policy

Findings

F-4.7-1: SID has latent powers that may be activated, should the District chose to, but they are not at this time.

F-4.7-2: SID has a policy that allows for out-of-agency service agreements through an annual Out of District Service Agreement.

F-4.7-3: SID's Strategic Plan recognizes the need to update fees for land detachments on a regular basis to mitigate for lost property tax and service charge revenues.

F-4.7-4: SID anticipates updating their sphere of influence after the completion of this MSR. SID is aware that any updates or revisions must be supported by this MSR.

F-4.7-5: SID is aware of the substantial planned potential growth within it's jurisdictional boundaries. However, the District understands that the planned potential growth is very speculative at the time of this MSR.

Determinations

D-4.7-1: SID has existing and allows for more out-of-agency service agreements that may not be consistent with Gov.Code §56133.

Agenda Item 10.A LAFCO Project No. 2023-08: MSR for Solano Irrigation District Draft, Public Review
Solano LAFCO

D-4.7-2: SID consistently updates their fees through a 5-year fee study to ensure costs for services are covered by fees and other revenues.

D-4.7-3: This MSR does not include analysis of the speculative planned potential growth within the boundaries of SID and therefore no annexations or new promises of water supply can be made based on this MSR.

Recommendations:

R-4.7-1: SID should work with Solano LAFCO to ensure that their Out of District Service Agreement policy is consistent and complies with Gov.Code §56133.

APPENDIX

Appendix A

IRRIGATION DISTRICT POWERS

Principle Enabling Act

California Water Code, Division 11 Irrigation Districts
Part 5 – Powers and Purposes, Chapter 1 - Powers and Purposes Generally
Article 1: Water, Section 22075.

Legal Authority: Irrigation Districts are established in accordance with Irrigation District Law, California Water Code, Section §20500 et seq.

Formation: Any land capable of irrigation; includes land used for residential or business purposes susceptible of receiving water for domestic or agriculture purposes; need not be contiguous.

General Powers (§22075): Under California Water Law Irrigation Districts are authorized to provide a wide range of water-related services including:

- Sell and lease water;
- Operate sewage collection and disposal system;
- Deliver water for fire protection;
- Dispose and salvage sewage water; protect against damage from flood or overflow;
- Provide drainage made necessary by the irrigation provided;
- Maintain recreational facilities in connection with any dams, reservoirs, etc.;
- Operate and sell electrical power.

Latent Powers

In addition to its general powers, an Irrigation District has the following powers:

- Furnish water in the district for any beneficial use, including fire protection purposes (§22075; 22077).
- Control, distribute, store, spread, sink, treat, purify, recapture, and salvage any water (including but not limited to sewage waters) for the beneficial use of the district or its inhabitants or the owners of rights to waters therein (§22078).
- Provide any drainage necessary by reason of irrigation provided for by the district (§22095).
- Acquire, lease, and operate plants for generation, transmission, distribution and sale of electric power (§22115).
- Provide for, maintain and operate works within or without the district to protect land and property within the district from damage by flood or overflow (§22160).
- Acquire, construct, maintain and operate facilities for the collection and disposal of sewage subject to approval by a majority of the voters of the district (§22170; 22176).
- Fix and collect charges for any service furnished by the district including sale of water (with standby charges), connections to new pipelines or extensions of existing pipelines, use of water for groundwater recharge, use of water for power purposes and sale of electric power (§22280).

**Appendix B****PUBLIC WATER SYSTEMS**

A public water system is defined as a system that provides water for human consumption to 15 or more connections or regularly serves 25 or more people daily for at least 60 days out of the year. Public water systems include:

- (1) Any collection, treatment, storage, and distribution facilities under control of the operator of the system that are used primarily in connection with the system.
- (2) Any collection or pretreatment storage facilities not under the control of the operator that are used primarily in connection with the system.
- (3) Any water system that treats water on behalf of one or more public water systems for the purpose of rendering it safe for human consumption.

All public water systems are subject to the same health standards and laws. Drinking water regulations impose the most stringent monitoring requirements on community and non-transient non- community water systems because the people they serve obtain all or much of their water from that system each day.

SID Public Water Systems

Public Water System	Population Served
Blue Ridge Oaks	63
Elmira	290
Gibson Canyon	535
Peabody	56
Pleasant Hills Ranch	89
Quail Canyon	132
Stocking Ranch	<u>53</u>
PWS Total	1,218
Suisun-Solano WA	29,530

**Appendix D****DISADVANTAGED UNINCORPORATED COMMUNITIES**

Senate Bill 244 (2012), requires Local Agency Formation Commissions to consider the presence of Disadvantaged Unincorporated Communities when preparing a Municipal Service Review for agencies that provide water, wastewater or structural fire protection services. SB 244 created several definitions related to DUCs, in both LAFCO and planning law, including the following:

1. Community - an inhabited area within a city or county that is comprised of no less than 10 dwellings adjacent to or in close proximity to one another;
2. Unincorporated fringe community - any inhabited or unincorporated territory within a city's SOI;
3. Unincorporated island community - any inhabited and unincorporated territory that is surrounded or substantially surrounded by one or more cities or by one or more cities and a county boundary or the Pacific Ocean;
4. Unincorporated legacy community - a geographically isolated community that is inhabited and has existed for at least 50 years; and
5. Disadvantaged Unincorporated Community – an inhabited territory of 12 or more registered voters that constitutes all or a portion of a community with an annual MHI that is less than 80 percent of the statewide annual MHI.

A “disadvantaged community” is defined in Water Code Section 79505.5(a) as a community with an annual median household income less than 80 percent of the statewide MHI. The statutory definition of DUCs comes from Government Code Section 56033.5, which is defined as an “inhabited territory” that constitutes all or a portion of a “disadvantaged community”. “Inhabited territory” is defined by Government Code Section 56046 as having at least 12 registered voters, or it can be determined by commission policy.

LAFCOs must be compliant with Senate Bill 244, which requires LAFCOs to identify DUCs when making municipal service review determinations (GC Section 56430(a)), and sphere of influence determinations (GC Section 56425(e)(5)). The CKH Act requires LAFCO to make a determination regarding the location and characteristics of any disadvantaged unincorporated communities within or contiguous to the sphere of influence in order to ensure that the needs of unincorporated communities are met when considering service extensions and/or annexations, in particular, water, wastewater, drainage, and structural fire protection services. Solano LAFCO's policy also requires written determinations with respect to the location and characteristics of any DUCs within or contiguous to an agency's SOI.

There are four unincorporated Census Designated Places (CDP) in Solano County (see Table 3.3). All four CDP's are located within or contiguous to SID's service territory. The median household income for each of these four communities in 2022 was higher than the statewide MHI; therefore they do not qualify as a disadvantaged unincorporated community.

For the five year period from 2015 through 2019 the median household income for each of the four communities was above 80% of the statewide MHI. Between 2019 and 2020 Elmira's MHI fell below the statewide 80% threshold due to the fact that the State's MHI rose much faster. Between 2020 and 2021 Elmira's population declined by 13.7%, while its median household income grew 4.13%, but fell below the statewide threshold. Between 2021 and 2022 the population of Elmira declined from 202 to 141, but its median household income grew from \$64,574 to \$98,720, which is above the statewide MHI threshold.

In 2022, the Elmira CDP had a population of 141 residents with a median age of 47.4 years and a median household income of \$98,720, which was above the statewide average. The community is predominately white (78%) with a smaller Hispanic population and other races making up the balance of the population.

Elmira is partly located inside of Vacaville's SOI and is served with water, wastewater, and fire protection services from several agencies. Solano Irrigation District provides potable water service to 88 customers in Elmira that complies with public drinking water standards. The City of Vacaville provides sewer collection and treatment and the Vacaville Fire Protection District Station 65 is located in Elmira provides structural fire protection services to properties in the community.

Census tract data from the most recent American Community Survey (2022) was analyzed to identify other geographic areas that met the criteria for defining a DUC. None of the census tracts identified (see Table 3.4) was located within the unincorporated area of the County. These census tracts, while meeting the income threshold for a DUC, are located inside the boundaries or SOI of Fairfield, Suisun City, and Vacaville, or Travis AFB and receive services from the cities and/or other governmental agencies.

Several on-line mapping tools were also used to verify the presence of disadvantaged communities within or adjacent to the District. These mapping tools from the California Department of Water Resources ⁷⁹ and Cal LAFCO ⁸⁰ use older data (2015-2020) from the American Community Survey to identify census tracts and block groups that qualify as a disadvantaged community. Both mapping tools confirmed that the census tracts and block groups meeting the criteria for a disadvantaged community are all located within incorporated areas of Fairfield/Suisun, Vacaville, and Travis AFB. Since there are no disadvantaged unincorporated communities within or contiguous to the District's boundaries or SOI, the provisions of Senate Bill 244 do not apply.

Table D-1: Census Tracts with Household Incomes Below 80% State MHI

Census Tract	Population	Median Household Income	% of State's MHI (\$84,097)
2531.07	5,659	\$ 70,679	61.9%
2526.07	3,818	\$ 53,517	54.9%
2526.06	5,959	\$ 50,804	59.8%
2526.05	6,046	\$ 59,909	57.8%
2526.08	5,244	\$ 68,239	65.2%
2525.02	1,768	\$ 61,094	61.8%
2525.01	2,998	\$ 54,554	51.8%

SID RATE SCHEDULES (2021-2025)

Agricultural Service	As of				
	May 1, 2021	Jan. 1, 2022	Jan. 1, 2023	Jan. 1, 2024	Jan. 1, 2025
Percentage Increase	25.0%	3.5%	3.5%	3.5%	3.5%
Adopted Water Rates					
Ag Water- Gravity, per Acre Foot (AF)	\$47.90	\$49.58	\$51.31	\$53.11	\$54.97
Ag Water- Lifted, per AF	\$79.84	\$82.63	\$85.52	\$88.52	\$91.62
Deep well Water, per AF	\$120.13	\$124.33	\$128.68	\$133.18	\$137.85
Rotational Water - Gravity per Acre (a)	\$153.33	\$158.69	\$164.25	\$169.99	\$175.94
Rotational Water - Lifted per Acre (a)	\$255.49	\$264.43	\$273.68	\$283.26	\$293.18
Stock Water (to 30 head), per year	\$95.83	\$99.18	\$102.65	\$106.24	\$109.96
Stock Water (> 30 head), per year	\$119.78	\$123.97	\$128.31	\$132.80	\$137.44
Lambert Lateral F Water , per AF (b)	\$83.59	\$86.51	\$89.54	\$92.67	\$95.92
Raw Water - Public, per AF	\$454.80	\$470.72	\$487.19	\$504.24	\$521.89
Raw Water - Non-Public, per AF	\$323.75	\$335.08	\$346.81	\$358.95	\$371.51
(a) Billed at minimum of two acres.					
(b) Ag Lifted rate plus \$3.00 additional per acre foot.

Appendix I

COMPLIANCE WITH STATE LAWS⁸¹

In addition to operating according to the Principal Act to establish Irrigation Districts, they must also comply with applicable state laws affecting the governance of all special districts. Penalties for non-compliance can lead to the invalidation of a special district's actions, financial penalties, and in some cases criminal prosecution. Relevant acts pertinent to special districts and Irrigation District's include:

1. **Ralph M. Brown Act** – As public agencies, special districts must comply with the Brown Act, requiring meetings of governing boards to be publicly announced and open to the public. Agencies must post agendas containing a brief general description of each item to be discussed at the meeting in a location that is accessible to members of the public at least 72 hours before a regular meeting.
2. **Public Records Act** – GC §6250 thru §6270.5 requires inspection or disclosure of governmental records to the public upon request, unless exempted by law. To implement the Public Records Act, Senate Bill 272 (2015) requires public agencies to create a catalog of “enterprise systems” utilized by the agency and post the list on their website or make it publicly available upon request.
3. **Financial Transaction Reports** – Local agencies must submit an annual financial transaction report within seven months after the close of each fiscal year to the State Controller's Office. Special districts are also required to either post the financial report on their website or provide copies of the report upon request. Agencies that do not comply are subject to financial and legal penalties pursuant to GC §53895.
4. **Independent Financial Audit** – All special districts must conduct an annual independent financial audit or request permission from the County Auditor-Controller and be approved by the Board of Supervisors for a biennial audit or a five-year audit period if the district's annual revenues do not exceed \$60,000 in each year being reported.
5. **District Website** – Special districts must establish and maintain an Internet-based website in accordance with SB 929, unless the district's governing board has adopted a resolution declaring that to do so would constitute a hardship due to inadequate broadband access, significantly limited financial resources, and/or insufficient staff resources. The website must contain information on annual compensation of officers and employees and the posting of meeting agendas as required by the Brown Act.
6. **Compensation Report Filing** – Special districts are required to submit the annual compensation of its elected officials, officers, and employees to the State Controller's Office by April 30.
7. **Annual Disclosure** – Special districts are required to annually disclose payments made to its employees or board members for reimbursement of individual charges in excess of \$100 made in the immediately preceding fiscal year and to publish or print reimbursement information in a document which is made available for public inspection. Reports must be posted annually by the district for the previous fiscal year no later than December 31st (GC §53065.5).

⁸¹ State Controller's Office, “Special District Uniform Accounting and Reporting Procedures”, December 2018, https://www.sco.ca.gov/pubs_guides.html

Solano LAFCO

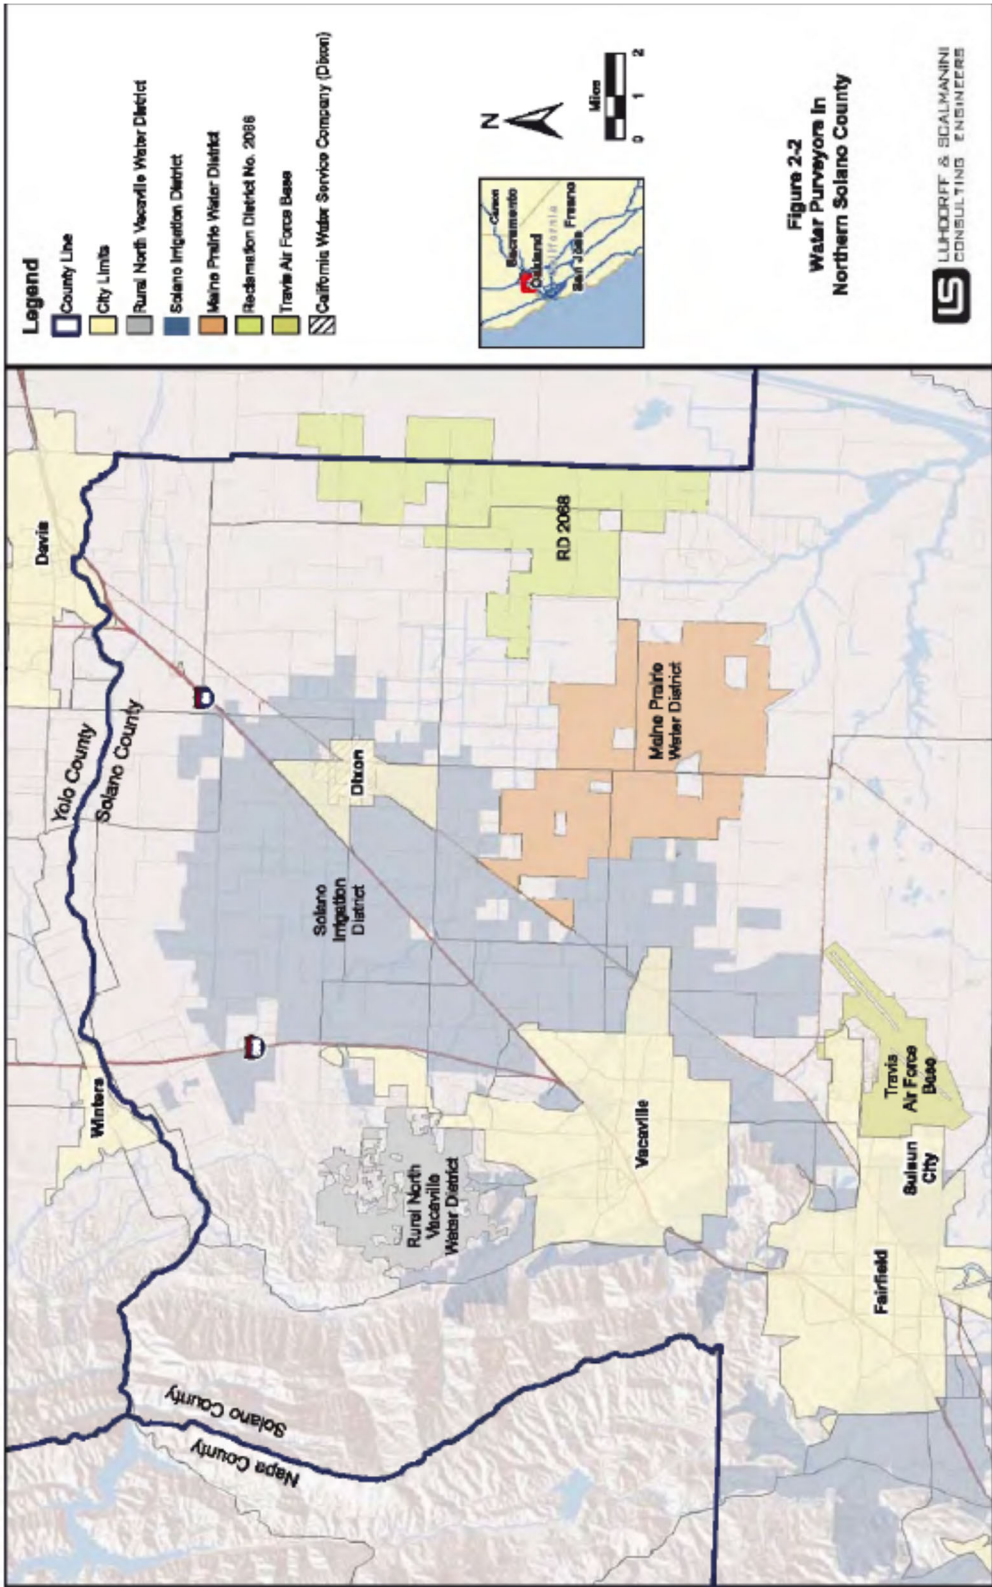

- 8. Ethics Policy** - Elected officials and other key officials designated by the local board (typically management) are required to take an ethics training course if the official receives compensation or reimbursement from a local government agency, even if the official does not actually receive compensation or reimbursement, but the district's enabling act simply allows for such. Affected officials must take the course once every two years and the district must establish a written policy on reimbursements (GC §53234, et seq. GC §53232.1-5323.2).
