GENERAL QUESTIONS:

Have you ever attended a meeting of the Commission to which you are applying? If so, how many?

PROS Commission. Sonoma's Future Vision Gathering.

What is your understanding of the role and responsibility of this Commission?

To assist in analysis and decision making recommendations regarding all manner of issues, potential impacts and positive results related to parks, recreational sites, design and implementation for the various other City Council members and organizations in Sonoma county.

What would be your goal(s) as a Commissioner?

Finding and working along side like minded and community spirited individuals seeking to make a difference with all walks of life by participating in an area of the environment I love which is the trees, vegetation, parks and all manner walkways and their resulting positive effects on the hearts and souls of Sonoma's fine community.

I am seeking ways to apply my never-ending passion for the outdoors and all positive things related to the environment with my career strengths in helping others to solve a myriad of problems involving every aspect of potential issues arising in ones life and to assist others in helping and reinforcing our communitys ability to become one of the most beautiful, safest and desireable places to live, play and enjoy life to the fullest.

Is there anything else you would like us to consider when reviewing your application?

In owning a vineyard for almost a decade, I became intimately familiar with the challenges and methods of growing and maintaining land, vegetation and the potential positive and negative results that can occur when making decisions. I hope and believe that the same might happen by participating with this particular commission but in the end....I simply want to find a way to help my Sonoma community, neighbors and friends.

Elemeno Health | Oakland, CA

May 2017 – March 2023

I joined Elemeno when it was little more than an inspired concept, with two visionary founders (a physician and a game developer), one employee, and very little funding. The concept, while still in its infancy, was so compelling to me that I began as a volunteer. I initially focused on implementation and client success, taking on operational responsibilities as we grew.

Elemeno Health's web-based application makes hospital quality and safety a team sport. Our platform collects institutional knowledge and delivers bite-sized microlearning to healthcare providers when and where they need it most-- in context, at the point of care. Best practices are delivered in the form of guidelines, smart checklists, and concise how-to videos. Through social drivers of recognition and gamification, Elemeno's application drives the adoption of targeted best practices. Personal performance metrics are displayed, with real-time benchmarking to peer groups. It's a demonstrated process improvement cycle, accessible from any device, at any time.
