

# You're Invited to Participate in a Sonoma Business Community Briefing Regarding PG&E's

## Public Safety Power Shutoff Program

As part of their Community Wildfire Safety Program, PG&E is implementing additional precautionary measures to help reduce the risk of wildfires. If extreme fire danger conditions threaten a portion of the electric system serving your community, it may be necessary for PG&E to turn off electricity in the interest of public safety. This is called a Public Safety Power Shutoff (PSPS).

Although it is an important safety tool, the PSPS program could impact our local businesses if there are extended outages.

We invite you to come learn about PSPS and how your business can be prepared.

*Thank you to our generous host!*
