John: At the last planning commission meeting some of the commissioners were asking for a thinner pole design with exterior mounted radios. CBR has prepared the attached photo-simulations showing a typical Sonoma light pole with a single exterior 20 Watt radio. The dimensions of the radio are 30in H x 10in W x 6in. D I also plan to send the design to two commissioners. Let me know if you have any thoughts or concerns. Thank you.

Paul

John: Here is the new photo simulations with the meter placed within the antenna shroud that I intended to include with my email of a few moments ago.
