

HISTORIC CHARM GOES MODERN

NEW

WESTCHESTER
DOUBLE HUNG WINDOWS

SIERRA
PACIFIC
WINDOWS

PG50 performance rating
on most standard sizes.

0.28 U-value with dual insulated
Lo-E, 366 and argon.

Thermally broken
sash construction.

Bottom sash tilt back
for easy cleaning.

60" x 108" maximum
size for 1 3/4" sash.

The tireless work of our engineers and designers has paid off. Introducing our new Westchester Double Hung windows, a huge improvement to a classic look.

Designed to bring back the original charm of windows hand-crafted over a century ago, they offer narrower check-rail sighthines with updated structural and thermal performance. You'll also find many new patent pending innovations, including a traditionally styled combination sash lock.

The Westchester is crafted with fully clad exteriors using durable extruded aluminum.

A RARE COMBINATION OF CHARM AND TECHNOLOGY.

Innovating improvements to a timeless design, the Westchester is one of our highest performers, with structural and thermal performance ratings rarely found in the Double Hung market. Yet each Westchester is built with historically accurate sash proportions, making it ideal for architecturally accurate renovations or for a touch of elegance in new construction projects.

Patent-pending air end caps and drainage system.

Use for both residential and commercial applications.

Integral aluminum rail fin.

Patent-pending multi-point lift latch.

Patent-pending traditionally styled combination sash lock.

Protected by CorGuard® Plus wood preservative.

EXTERIORS DESIGNED TO LAST.

Cled exteriors are fully encased in low maintenance, heavy-duty, extruded aluminum that's at least twice as thick as roll-form cladding.

What's more, nearly all color finishes feature our environmentally friendly AAMA 2605 powder-coating, which leads the industry in durability and environmental safety. Our Textured Collection uses AAMA 2604 powder-coating to retain its rich texture.

As for colors? An industry-leading 75 choices along with some sensational textures allow you to add warmth, a bright splash or a new statement to your designs. We'll also custom match any color you choose.

COLORS INSPIRED BY NATURE.

THE ELEGANT LOOK OF TRADITIONALLY STYLED SASH LOCKS.

Historic accuracy even makes its way into the patent-pending sash locks, which are designed to match the traditional charm that works so well in both residential and commercial applications.

IN TWELVE BEAUTIFUL FINISHES.

OPTIONAL HANDLES

OPTIONAL SASH LIFTS

Sierra Pacific is proud to be the only window company that manufactures its products with complete vertical integration. The full cycle makes use of every part of our wood resources, all the way down to bark and sawdust that's burned to create energy for the communities we call home.

THE AUTHENTICITY OF WOOD.

Rich, genuine wood give Westchester window interiors an authentic touch that makes a remarkable difference to interior spaces.

Choose from nine beautiful wood species to match your interiors perfectly. And if your design needs take you somewhere else, not to worry. As long as it's workable, we'll make your windows out of nearly any species you like.

THE CHARM OF YESTERDAY, CUSTOMIZED FOR TODAY.

The 24 Hours | 175 | 8 Miles | 1000 | 1000

Starting with a classic shape, we give you many ways to make Westchester your own. And all of them are constructed with the meticulous craftsmanship that makes this double hung window a lasting enhancement to any space.

SIMULATED DIVIDED LITE PROFILES

A classic look that's energy-efficient.

Your Westchester grilles can add a look as unique as you like, from our standard traditional and contemporary configurations to your choice of custom designs.

HIGHLY ENGINEERED FOR BETTER PERFORMANCE.

The Westchester maintains higher air, water and structural capabilities and improved thermal ratings even as we engineered larger sash sizes.

Triple glazed windows with argon have a U-value as low as .17. Dual glazed reach a U-value of .28 with Low-E366 and argon. Performance numbers like these demonstrate the rigorous engineering standards and technology that are built into the re-imagining of this classically designed window.

CHOOSE GLAZING PERFECT FOR YOUR ENVIRONMENT.

Low-E 366

Cardinal's triple layer silver product for superior performance. 85% UV protection. Solar heat gain coefficient of 0.27. Also available with Preserve* protective film or with Preserve and Heat* coating for a naturally clearer glass when selecting XL Edge or Endur Spacer.

Low-E 368

The same superior performance as regular Low-E 366, but with the addition of IR coating on the interior surface to increase insulating value and reduce solar heat gain. Meets even the most extreme requirements in the majority of the Canadian Energy Star zones. Also available with Preserve* protective film or with Preserve and Heat* coating for a naturally clearer glass when selecting XL Edge or Endur Spacer.

Low-E 340

Cardinal's nearest clearing innovation. It has an amazingly low 0.8 * solar heat gain coefficient to keep out the heat even in the blazing sun. Slightly tinted. Blocks 88% of UV rays. Less heat gain when it's hot, less heat loss when it's cold, and the best glare control under the sun. Also available with Preserve* protective film or with Preserve and Heat* coating for a naturally clearer glass when selecting XL Edge or Endur Spacer.

Low-E 180

A very high (0.87) solar heat gain coefficient. Reducing your heating bills in colder climates. Superior insulation value blocks cold and keeps in the heat. Also available with Preserve* protective film or with Preserve and Heat* coating for a naturally clearer glass when selecting XL Edge or Endur Spacer.

Low-E 180 Passive Solar

The same superior performance as regular Low-E 180, but with the addition of IR coating on the interior surface to increase insulating value. Meets even the most extreme requirements in the majority of the Canadian Energy Star zones. Also available with Preserve* protective film or with Preserve and Heat* coating for a naturally clearer glass when selecting XL Edge or Endur Spacer.

Dual Pane Low-E

Insulated for improved energy efficiency. Single surface Low-E coating to reduce solar heat gain and block UV rays.

Triple Pane Low-E

Available in a variety of Low-E coating combinations for superior insulation and energy performance.

Insulated Glass

For moderate climates. Basic glazing with basic performance.

Sound Control

Reduces outside noise by as much as 50% while blocking 80% of damaging UV rays. Laminated for shatter resistance. Available insulated or non-insulated.

*All values shown are based on standard conditions. **These are typical values. See literature for specific performance data. All values are based on standard conditions. ***These values are based on standard conditions. ****These values are based on standard conditions. *****These values are based on standard conditions.

No-Metal TrueWarm® Edge Spacer.

THE ADVANTAGE OF NO-METAL SPACERS.

One of the technological advances that makes our Westchester windows perform so well are patented No-Metal TrueWarm® Edge spacers.

Many window manufacturers use aluminum spacers between their panes of glass. These conduct cold and heat, and that's not good for thermal performance.

Our no-metal warm edge spacers are 100% polymer structural foam, for excellent thermal performance and a superior seal.

ADD DECORATIVE GLASS.

Further customize your Westchester windows with tinted, patterned, obscure or other specialty glass. It's a smart choice for privacy, security or just design preference.

EXTERIOR TRIM PROFILES AS IMPRESSIVE AS THE WINDOWS.

The Westchester exterior trim profile system comes in four available styles that snap in place on the frame with a clip system. No through-frame anchors or excessive nail holes, leaving you an integrated frame that gives homeowners the flexibility to choose the aesthetic they want.

SEVERAL SCREEN CHOICES

Screens have an aluminum frame which matches the exterior clad color. You can choose your screen mesh, from standard fiberglass to the improved visibility and even smaller insect barrier of BetterVue® or UltraVue®.

Standard metal screen.

Standard

BETTERVUE®

ULTRAVUE®

FLEXSCREEN

Hidden and beautifully simple, FlexScreen is the first screen of its kind made of flexible spring steel to fit firmly into screen tracks. No screen frames, no hardware, just refreshingly easy installation.

EARTH-FRIENDLY. MORE
THAN AN APPROACH,
AN OBLIGATION.

All materials in the production of Sierra Pacific windows and doors are highly valued and responsibly used. This includes the select wood that comes from over 2 million acres of forestland owned by our parent company, Sierra Pacific Industries. Thanks to advancements in "sustained yield" forest management and timber harvesting, we will nearly triple the amount of wood growing on our lands in the next 100 years.
