

Project Name: Broadway (SR 12) Pedestrian Safety Project
CIP Number: T-10

Project Description: State Route (SR) 12 is the “Main Street” within the City of Sonoma and surrounding communities, with significant vehicular and pedestrian traffic. The City’s General Plan Circulation Element identifies future roadway network improvements, with the objective to minimize needed improvements while promoting alternatives to automobile use. The Circulation Element recommends reducing the width of Broadway from MacArthur Street to West Napa Street. This segment of Broadway currently includes five lanes (two in each direction with a center turn lane). Based on projected traffic volumes, a single travel lane in each direction would be expected to function acceptably.

Highly visible enhanced pedestrian crossings would increase pedestrian safety at marked crosswalks (\$55,000 each). Proposed pedestrian safety improvements include:

Patten Street – Replace in-ground lights with enhanced crossing
 France/Andrieux Sts - Replace in-ground lights with enhanced crossing
 Malet St – Add enhanced crossing
 Clay St – Relocate crosswalk to north of Traintown parking lot, construct curb ramps (\$12,000), add enhanced crossing and relocate existing bus stop from southern driveway of Traintown parking lot to north of new crosswalk

Project Contact: Colleen Ferguson, Public Works Director/City Engineer

Estimated Construction: 2021

Estimated Cumulative Prior Expenditures: N/A

Estimated 2020-21 Carryover: N/A

Total Project Funding: \$232,000
