Legend

- Data not collected. Reasons for no data collection at sites include: raining (natural dust suppression) and site not yet or no longer being tested
- Below Target Criteria
- * One of three perimeter monitors exceeded target
- ** Two of three perimeter monitors exceeded target
- Exceeds Target
- DC Dust control measures were increased due to exceedances (watering and street cleaning). Contractor attributes exceedances to increased vehicle traffic in the area. Maximum concentrations were all below targets and the maximum 3-hour averages did not exceed action levels.
