

Advanced Energy Rebuild

Incentives are available for property owners in Sonoma and Mendocino counties who are rebuilding homes lost in the October 2017 wildfires.

Receive incentives for including energy efficient features and equipment, renewable energy systems, electric vehicle charging stations, and water-efficient landscaping in your design.

The Bay Area Air Quality Management District, Pacific Gas and Electric Company (PG&E), and Sonoma Clean Power (SCP) have partnered together to offer an integrated incentive program that gives customers access to multiple funding sources through one application process.

Your home. Your choice. Choose from one of the preconfigured incentive options below.

1 Advanced Energy Home

Receive **\$7,500**

Construction equal to 20 percent above current energy code requirements OR choose from a menu of energy features including

- High performance walls or attics and advanced windows
- WaterSense efficient plumbing fixtures
- Water efficient landscaping
- 220V outlet at stove/range and clothes dryer
- Electric vehicle charging station (equipment free from Sonoma Clean Power)

(see website for full list)

2 All Electric Home

Receive **\$12,500**

Construction equal to 20 percent above current energy code requirements with all electric appliances OR choose from a menu of energy features including

- High performance walls and attics
- Insulation inspection
- "Cool" roof
- Verified enclosure sealing
- Electric heat pump hot water heater
- Smart thermostat
- Compact plumbing design
- Induction cooking
- Electric or heat pump clothes dryer

(see website for full list)

+ Plus \$5,000 for adding renewable energy

Solar panel system with sufficient battery storage to help offset annual electric usage or long-term participation in a 100 percent renewable power option rate.

Application Process

Below are the six steps necessary to receive incentives under the Advanced Energy Rebuild Program. Additional information on each step and the most up-to-date program information and application can be found on sonomacleanpower.org/advancedenergyrebuild.

- 1 Find a Certified Energy Analyst (CEA).** Your CEA will walk you through potential energy measures you can install in your new home and process the energy documentation required for your permit.
- 2 Complete an Energy Model.** Your CEA will create an energy model for your new home, which is also required for your construction permit.
- 3 Submit Program Application.** An online application and a list of required documentation can be found at sonomacleanpower.org/advancedenergyrebuild.
- 4 Receive 50 Percent of Total Incentive.** Upon application approval, you will receive an acceptance letter, an incentive request form to be completed at a later stage, and a check for 50 percent of the incentive.
- 5 Find a HERS Rater.** Every new home built in California requires a Home Energy Rating System (HERS) Rater to perform an energy analysis of the home's design. The HERS Rater will share documentation of your home's performance with Advanced Energy Rebuild.
- 6 Complete Incentive Request Form.** To receive the final 50 percent of total incentive, complete, sign, and date the incentive request form that was provided earlier and return as directed. Upon final review, a check will be issued for the balance of the incentive amount.

Program Requirements

Incentives are only available to SCP and PG&E customers for homes in Sonoma and Mendocino counties that were destroyed by the October 2017 wildfires.

A full list of program requirements can be found at sonomacleanpower.org/advancedenergyrebuild.
