

## CR SOUTH Virtual Learning Day

The schedule below is an example of how the high school day will look during virtual instruction. The high school will follow a Day 1/Day 2 schedule for alternate day classes.

Each class period will include approximately 20-30 minutes of synchronous instruction with the remainder as asynchronous time for independent practice. During asynchronous time, teachers may work with individual or small groups of students to support their learning. Exact amounts of synchronous time in each class will vary based on the lesson focus.
