**Science:** Saba Ansari [sansari@LPSFrisco.com](mailto:sansari@LPSFrisco.com)

We are investigating and explaining how internal structures of organisms have adaptations that allow specific functions to occur. We can explain variation within a population or species by comparing external features, behaviors, or physiology of organisms that enhance their survival. We can also identify changes in genetic traits that have occurred over several generations through natural selection and selective breeding. We will also examine organisms or their structures and use dichotomous keys for identification. The Adaptations Unit Test(Science 7) is coming up and will be either on the 11th or 15th of April.
