Mental Well-Being is Essential to Learning: An Overview of Mental Health Supports in CHCCS
Sponsored by the CHCCS Student Services Division
August 7, 2020 at 12:00 PM

Please join us for a webinar to learn more about how our school district supports the mental well-being of students and how parents/caregivers can assess services during the 2020-2021 school year. If you have specific questions that you would like for us to address during this webinar, please feel free to use this link for your questions.
We are ALL in this together

“Creating a healthy mindset is an investment in your overall well-being.”
Rationale for Why Mental Health in Schools

It is important to understand that nearly **one in five** North Carolina students have at least one emotional, behavioral or developmental disability (Splett, 2014). Moreover, the trauma experienced by students during the COVID-19 outbreak has the potential to exacerbate this already significant issue. Therefore, it is critical that school leaders carefully consider allocation of resources to prevent and respond to Social-Emotional Learning (SEL) and student mental health issues during the reopening of NC’s public schools.

8 Reasons for Mental Health in CHCCS

• Foster partnerships among families and students, educators and mental health professionals.

• Reduce stigma surrounding children’s mental health issues.

• Promote a better understanding of the impact of mental health on academic performance and school success.

• Improve availability of and access to outpatient treatment services that’s designed for all students who need care and mental health supports.

• Enhance support and consultation for school-based staff to enable them to engage in early identification of student concerns.

• Build on existing school programs, services, and strategies.

• Focus on all students, both general and special education.

• Involve a full array of programs, services, and strategies- mental health education and promotion through intensive intervention.
Brief Overview: What is Mental Health?

- **Mental health wellness** is more than the absence of mental illness – it refers to a positive state of functioning resulting in feeling good emotionally and functioning well in everyday life. The ability to perform needed tasks, interact with peers/adults, and have the ability to adapt to everyday challenges. Mental health is one aspect of overall health.

- **Mental health problems** refers to common issues such as anxiety and depression which may be less severe and shorter duration but, if left unattended may develop in a more serious condition.

- **Mental illness** is a diagnosable psychiatric condition that significantly interfere with a person’s functioning such as bipolar disorder and schizophrenia.
Multiple Tiers of Systems of Support

A continuum of services and supports for students to ensure academic and behavioral success.

**CORE INSTRUCTION**

Teacher continues to provide personalized supports
Classroom and Schoolwide Initiatives

**TARGETED SUPPORTS**

Facilitated by teachers, administrators, student support team
Interventions assigned to a specific group of students meeting a specific criteria

**INTENSE SUPPORTS**

Facilitated by student support team, specialists, community partners
Individualized Interventions
**Multiple Tiers of Systems of Support**

A continuum of services and supports for students to ensure academic and behavioral success.

- Career counseling
- Referral: Telehealth Co-Located Mental Health Outpatient Services
- Child and Family team meetings
- Student Assistant Program (SAP)-Secondary Only
- Referral to other services needed

Mental Health throughout Tiers I, II, and III
What is Co-Located Outpatient Mental Health Services?

What is a Co-Located Service?
• Co-location refers to services that are located in the same physical space (e.g. office, building, school) though not necessarily fully integrated with one another or at their designated agency building that’s located off-site.

Why Co-Located Mental Health Services in CHCCS?
• Access to mental health services can be one confusing and at times hard system to navigate. It is one of the biggest barriers today for children, adolescents and their families seeking mental health services.

Who pays for Co-Located Mental Health services?
• The provider/agencies directly bills the family’s insurance or makes other payment arrangements with the family same as if they were seen at that providers own mental health office.

What if instead of ‘falling behind’, this group of lockdown kids are actually ahead? Hear me out...

What if they have more empathy, enjoy family connection, can be more creative and entertain themselves, love to read, love to express themselves in writing?

What if they enjoy the simple things, like their own garden and sitting near a window in the quiet? What if they notice the birds and the dates the different flowers emerge, and the calming renewal of a gentle rain shower?

What if this generation are the ones to learn to cook, organise their space, do their laundry and keep a well-run home?

What if they learn to ride a bike, play a board game, do simple crafts, learn to bake, climb a tree, play without a screen?

What if they learn to understand the value of money, what’s important and how to live with less? What if they learn to plan shopping trips and meals at home?

What if they learn the value of eating together as a family and finding the good to share in the small delights of the everyday?

What if they learn to just be: to be resilient, to be content?

What if they are the ones to place great value on our teachers and educational professionals, librarians, public servants and the previously invisible essential support workers?

What if, among these children, a great leader emerges who had the benefit of a slower pace and a simpler life to truly learn what really matters in this life?
