Become an Empowered Member of Our Community: Learn How to "Stop the Bleed"

Launched in October of 2015 by the White House, "Stop the Bleed" is a national awareness campaign and a call to action. "Stop the Bleed" is intended to cultivate grassroots efforts that encourage bystanders in our community to become trained, equipped, and empowered to help in a bleeding emergency...becoming the beginning of the trauma care chain of survival.

Trauma is the leading cause of death in the United States for ages 1-44. Bystander intervention is crucial in these emergencies as someone can bleed to death in under 5 minutes, which is not enough time for an ambulance to arrive.

During this Stop the Bleed training, YOU will learn how to:

- Determine if an area is safe for you to proceed toward a victim to provide assistance
- Identify any nearby tools to assist you such as a publicly placed bleeding control kit or everyday items that can be used to control bleeding.
- Use your hands to apply direct pressure at the site of the wound to stop bleeding
- Pack a deep wound with cloth or gauze to control bleeding
- Correctly apply a tourniquet to an injured limb to stop bleeding
- Keep the victim calm until help arrives

At the successful completion of the Bleeding Control Basics training session, you will be certified by the American College of Surgeons.

Information about the purchase of a Stop the Bleed kit and components will be made available at the session.
