Applerouth Online Program for Marietta City Schools Students

Applerouth Online is a state of the art, immersive and interactive platform for mastering SAT and ACT content and strategy.

Includes: Video lessons, skill-building practice questions, and problem sets that speak to the full range of difficulty present in the actual exam.

Marietta City Schools and Applerouth have designed a comprehensive, multi-year program to prepare students for the SAT and ACT. Applerouth has created an online account for each MCS student in grades 8-12 along with a curriculum customized for the student's grade. Through their Applerouth portals, students will be able to access online lessons; watch animated videos about topics relevant to the standardized tests; register for full-length, in-person practice tests at their schools; and view their score reports so they can track their progress over time.

Claim your online account using your student ID and grad year at:
