

Wastewater Operator Position

We are seeking a dedicated and skilled Wastewater Operator to join our team. The ideal candidate will play a crucial role in the operation and maintenance of wastewater treatment facilities at a level 3 plant or have the foreseeable ability to test into a grade 3 operation. The Wastewater Operator will ensure that all processes comply with environmental regulations and safety standards while maintaining efficient operations. Experience in water treatment and distribution is a plus.

Responsibilities

- Operate and monitor wastewater treatment processes to ensure compliance with regulatory standards.
- Maintain and troubleshoot equipment including pumps, valves, and motors.
- Utilize basic math skills for calculations related to chemical dosing and flow rates.
- Inspections and preventive maintenance on treatment equipment.
- Build and repair mechanical systems as needed to ensure optimal performance.
- Document operational data, maintenance activities, and compliance reports accurately.

Experience

- Proven experience in wastewater treatment at level 3 preferred or the ability to test momentarily.
- Basic understanding of math principles relevant to the industry.
- Ability to work effectively in a team environment while demonstrating strong problem-solving skills.
- Commitment to safety protocols and environmental regulations is essential.

Join us in making a difference through effective wastewater management while developing your skills in a supportive environment.
