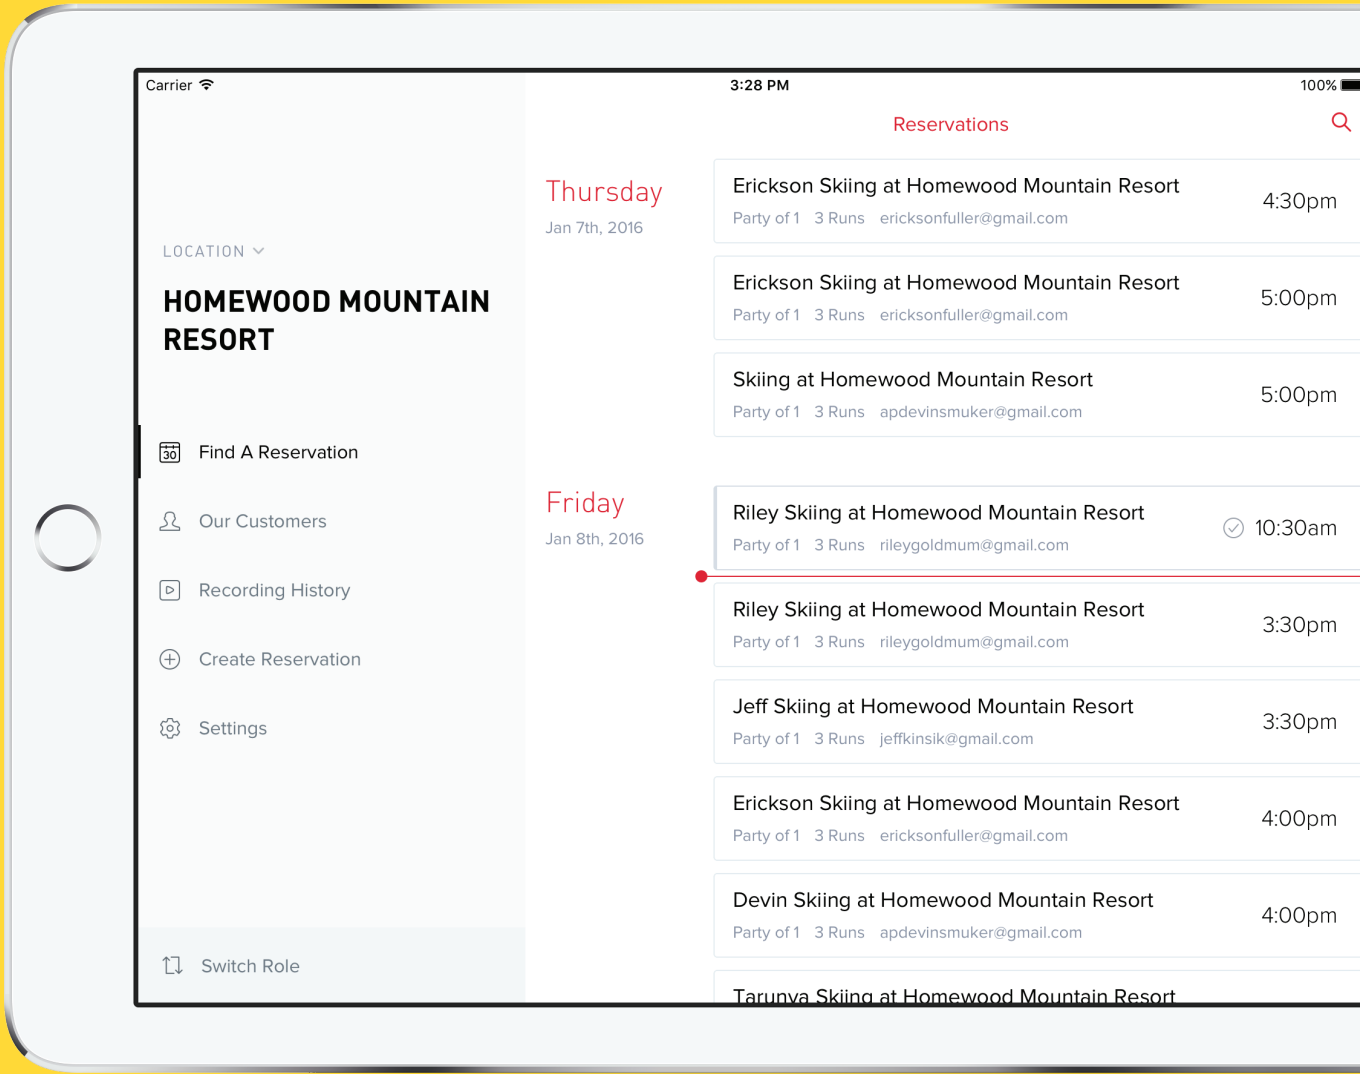
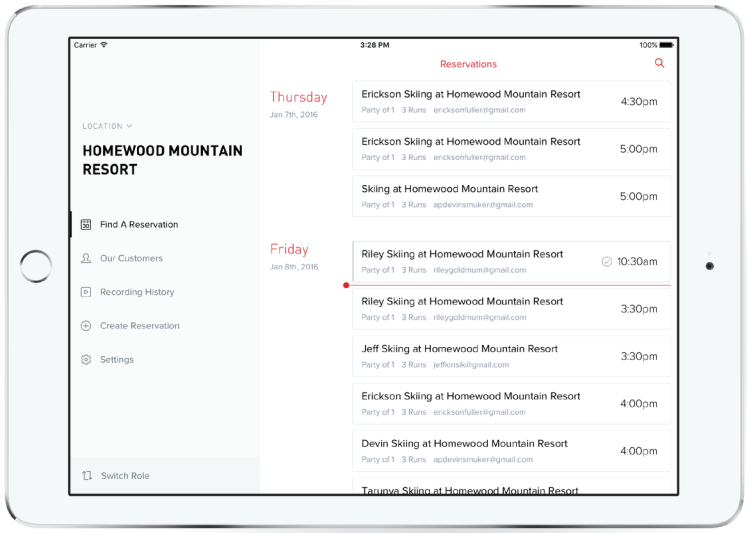
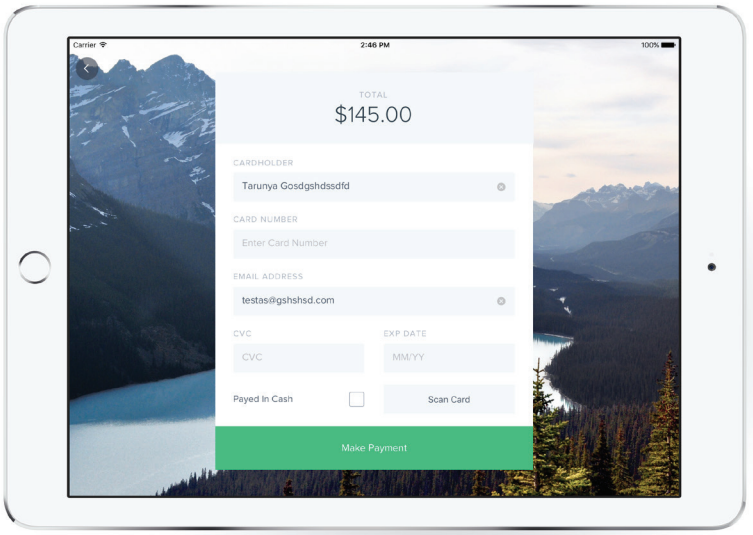
Cape
The Drone Video Service



punch

Cape Kiosk App





PROBLEM AT HAND

After the first winter oparting the steps Cape took to get a customer from signed up and filmed were daunting. They were going in between apps trying to collect payment, get a signiture, ect. Ultimatly wasting their's and the customers time.

This lead Cape to bring on Punch as apart of there team to re-imagine the experience their users and customers would have with their drone video service. With just a few short months to launch we were able to build them a full scale CRM, handheld camera operator, and drone operator native app all from scratch.

During this project we also worked with Cape to get there web backend service up and running that allowed them to process media uploads that occured from the app in the field.
