• The Indiana-Purdue rivalry becomes the spotlight series during weekend No. 3 of Big Ten play for the second year in a row, with the Boilermakers hosting IU for a three-game set for just the second time since Alexander Field opened in 2013. Purdue has not played at home on a Monday since May 2010.

• The Hoosiers' Bart Kaufman Field also opened in 2013, meaning the rivals both moved into new stadiums during the same school year. Due to quirks in the Big Ten schedule related to league expansion coupled with the shutdown in 2020, 14 of the last 18 IU-Purdue games have been played in Bloomington, helping account for the Hoosiers' big advantage (13-5) in the series in recent years. Dating back to 2007, Purdue has won 15 of the last 19 meetings played away from Bloomington, including three of four at Alexander Field. The overall series in that same span is an even split at 20 wins apiece.

HEAD COACH GREG GOFF

Greg Goff joined Purdue baseball as an assistant coach in July 2017 and was promoted to head coach in June 2019. The 2022 season is his 17th as a collegiate head coach.

Previously a head coach at four universities, Goff succeeded his friend and longtime colleague Mark Wasikowski, who returned to the University of Oregon as the Ducks' new head coach in June 2019.

Goff has previously served as the head coach at Campbell University (2008-14), Louisiana Tech University (2015-16) and the University of Alabama (2017) as well as Division II University of Montevallo (2004-07). He also helped lead the Boilermakers to a memorable 38-win season in 2018, punctuated by the program's third NCAA Regional bid in program history. Purdue finished second in the Big Ten standings and was also the runner-up at the Big Ten Tournament in Goff's first year with the program.

The 2021 Boilermakers made the most of the unique conference-only campaign, winning three times in walk-off fashion (in three different stadiums), hitting four grand slams and becoming the first Big Ten team to sweep one of the league's three-team pods. Highlighted by a seven-run ninth inning that featured Mason Gavre's walk-off home run – the program's first walk-off blast since 2006 – in a March 27 home win vs. Rutgers, Purdue scored 41 runs in the ninth. The total ranked as the program's most since at least 2001 even while batting in the ninth only 36 times.

Along with bringing an upbeat personality to the dugout and contagious energy to his role as the first-base coach, Goff helped numerous Boilermakers develop offensively in 2018 and 2019 as an assistant coach. He played a leading role in coaching the base running and outfield defense.

Goff helped develop and organize new community events for the program like the preseason fan fest and first pitch dinner. During the 2019 fall semester, over 40 players logged at least 10 hours of community service as Purdue completed over 450 hours of community outreach as a team. The program renewed its commitment to service in the community in the fall of 2021, logging over 500 service hours as opportunities opened up again.

Goff and his wife, Tina, are the parents of four daughters: Kara, Kiley, Kolby and Kenzie. Kara (Louisiana Tech) and Kiley (Maryland) both play collegiate softball.

SIX 40-WIN SEASONS

- As a head coach, Goff's teams have won over 40 games six times. Campbell was one of only eight Division I programs to win 40-plus games for three straight years from 2012 to 2014, posting 131 total victories during that span. The Camels enjoyed a historic 49-10 campaign in 2013.
- He also won 42 games in his final season at Louisiana Tech, helping lead the Bulldogs to an NCAA Regional bid.
- Montevallo was a DII College World Series qualifier in 2006 under his guidance. As an assistant coach at Delta State, the Statesmen also qualified for the DII College World Series in 1994 and 1996.

ENDED NCAA REGIONAL DROUGHTS AT CAMPBELL & LOUISIANA TECH

- In Goff's final season at Campbell (2014), the Camels qualified for their first NCAA Regional in 24 years. Two years later, he led Louisiana Tech to its first Regional bid in 29 years. The 2014 Camels and 2016 Bulldogs both won at least one game in their Regionals, with La Tech coming through the loser's bracket to reach a Regional final at Mississippi State.

HISTORY OF TURNAROUNDS

- Goff's teams have had a losing record only five times in his 14 years as a head coach. Four of those five seasons were his first at a respective university. He has led his teams to some impressive turnarounds.
- In just two seasons, Louisiana Tech went from 15-35 the year before Goff's arrival to 42-20 in 2016, ending a 29-year NCAA Regional drought in the process. At Campbell, he inherited a team that was 11-45 in 2007. But under Goff, the Camels posted a winning record (27-24) in his second season and won 40 games by his fifth year (2012).
- Purdue's win total also jumped from 29-27 in 2017 to 38-21 in Goff's first year on the staff in 2018.

COACHING HONORS

- Goff was named the South Central Region Coach of the Year by the American Baseball Coaches Association at both Louisiana Tech (2016) and Montevallo (2006). He was the 2013 Big South Coach of the Year at Campbell after leading his team to a school-record 49 wins and a conference title. Montevallo won a combined 100 games over his final two seasons, posting a new single-season record both years.

BEFORE BECOMING A HEAD COACH

- Goff has coached 10 future big leaguers and over 50 MLB Draft picks, highlighted by Cy Young award winner Brandon Webb while he was the pitching coach at Kentucky (2000-03). Longtime big leaguer and World Series champion Joe Blanton also pitched for Goff at Kentucky.
- Along with his years as the pitching coach at Kentucky, Goff served as an assistant at Southeast Missouri State (1998-99) and his alma mater Delta State (1994-97) before becoming a head coach for the first time in the summer of 2003 at Montevallo. It was at SEMO in the late 1990s where he first worked with Wasikowski. They helped lead the Redhawks to an NCAA Regional in 1998.

Purdue Baseball hopes Intel partnership will help Boilermakers become 'the fastest show on dirt'

Purdue is nation's first college baseball program to make use of Intel's innovative 3DAT human performance technology

By David Ching
Purdue Marketing & Communications

Purdue's baseball team aims to be "the fastest show on dirt." A partnership with Intel is helping the Boilermakers turn that aspirational motto into a realistic claim.

Purdue is the first college baseball program in the country to incorporate Intel's 3DAT (3D Athlete Tracking) video technology into its training regimen. By utilizing feedback from the 3DAT system, Purdue players are learning how to adjust their posture and technique to become faster, more efficient runners.

For a baseball program that wants to be aggressive on the base paths, any incremental increase in team speed can create a significant competitive advantage, whether stealing bases, legging out infield hits or tracking down fly balls in the outfield.

"That's one thing that we try to build off of: Speed is there every day," says **Greg Goff**, Purdue's head coach. "You might be able to hit some days. Some days you might be able to pitch. But speed is there every day, and it's something that I believe in as a coach.

"When we run our offense, we're trying to build players that can really run, that can be explosive on the baseball field."

Once they began experimenting with the 3DAT system last year, Purdue's players immediately noticed they were gaining the explosiveness their coach desires.

Outfielder **Cam Thompson** admits he was the team's slowest runner last season. After **Rance Terry**, the team's strength and conditioning coach, showed him the 3DAT data revealing that he crouched too low while running, however, Thompson corrected his posture to stand taller while accelerating.

That minor adjustment made a massive difference.

"He brought it to my attention, and it obviously changed my running in general and made me a whole lot faster where I'm close to the top of the fastest on the team now," says Thompson, a sophomore in organizational leadership.

Baseball is already in the midst of a data revolution that is changing the way the sport is played. Statistical probabilities frequently prompt infielders to shift to areas where batters are most likely to hit the ball. Information detailing spin rates of pitchers' curve balls and exit velocities of batters' hits help TV viewers better understand the game they enjoy watching.

The Boilermakers identify their 3DAT feedback as yet another step in this data revolution and recognize that they are only beginning to comprehend its many potential applications.

"Like the launch angles and the exit velos that you see during a game or on 'Baseball Tonight,' you're going to see information from this eventually," Terry says. "You're going to see his miles per hour as a runner rounding first and going to second. You're going to see his acceleration and everything else that this can do, because we're just scratching the surface of what those cameras can do."

MUTUALLY BENEFICIAL PARTNERSHIP

Intel initially developed the 3DAT system — which uses high-resolution camera footage, high-speed processors and artificial intelligence to analyze the biomechanics of athletes' movements — to enhance viewer experience during TV broadcasts of Olympic track and field events. NFL prospects also have used 3DAT to improve their running form while preparing for the scouting combine and pre-draft workouts.

The technology arrived at Purdue through a stroke of luck.

It started last year when **Breana Cappuccilli**, then a Purdue student who was preparing to complete a PhD in mechanical engineering in December 2021, cold emailed Intel's 3DAT director, **Jonathan Lee**. Cappuccilli's research interests include making biomechanical data more accessible to the masses, so she was intrigued by the innovative technology's potential beyond using it simply as a TV viewing aid.

As it turned out, Lee noticed Cappuccilli was a Purdue student and informed her that Intel was interested in collaborating on a project. She connected Lee with **Jason Pullara**, Purdue's director of strength and conditioning, which led to an Intel internship (and, as of January, full-time Intel employment) where Cappuccilli coordinated the partnership.

Rick Echevarria, vice president and general manager of Intel's Olympics and Paralympics program, also was a driving force behind the partnership. The 1988 Purdue industrial engineering graduate, who last year earned the College of Engineering's Distinguished Alumni award, met personally with Purdue's coaches and players to introduce the 3DAT system.

"Rick is a super-proud Purdue alum, so he has been driving the interest in Purdue," Cappuccilli says. "So when my boss, Jonathan, came to him and said, 'We have this opportunity to work with Purdue,' he said, 'Whatever is necessary to make that happen, let's make that happen.'"

The partnership was a perfect opportunity for both parties, allowing Intel to expand the utility of its technology while providing analytical insights to Purdue's coaches and athletes that they never would have been able to glean otherwise.

The camera system can analyze as many as 2,000 metrics in any video clip, so it's a matter of a user determining what they want to study and then honing in on the most insightful metrics.

"The technology is almost like a Swiss Army knife. It can solve a lot of different problems," Cappuccilli says. "I just need to know what that coaching staff needs so that I can turn it into the tool that they're looking for.

I'm not a baseball coach. I like baseball. I like to watch it, but I don't know what makes a great athlete, and they do. So, when you have technology that can augment the coaching, that's where I think you're going to see better use."

Purdue Baseball hopes Intel partnership will help Boilermakers become ‘the fastest show on dirt’

Purdue is nation's first college baseball program to make use of Intel's innovative 3DAT human performance technology

That's exactly what happened for the Boilermakers. Terry asked Cappuccilli to create a printout he could present to players after the 3DAT system filmed them sprinting during team workouts. The printout breaks down their posture and speeds achieved at various intervals during the run, additionally revealing how their metrics compare with teammates' results.

The feedback created valuable instructional opportunities for Terry and learning opportunities for the players.

"It got to a point that it was so clean that the second that we would run a test, I'd put it on the player's locker, and they'd come up to me and be like, 'OK, I see what I need to change. How are we fixing this? What are we doing to change it? What are we doing better?'" Terry says. "It's just grown from there, and it's getting better. The best thing about this system is the conversations that come from it."

The team's improvement occurred so rapidly that Cappuccilli had to double-check the data she was uploading to be sure she hadn't made a processing error. It was only after a conversation with Terry that she realized the players had used the 3DAT feedback to finally run with the necessary upright posture to reach full speed.

"By the fifth, sixth time that I was recording it, none of them were hunching anymore," Cappuccilli says. "I really had to go back and ask Rance, 'So, are they not hunching?' And he said, 'No, they changed it.' I said, 'Oh, OK.' I had to go back and check my own numbers because of the changes that I was seeing. I'm glad that the athletes are getting that benefit."

CREATING CHAOS ON THE BASES

Goff lets out a hearty laugh when asked what baseball players of his generation were instructed to do to improve their speed. "Oh boy," says Goff, who pitched at Delta State University in the early 1990s.

"Go run up some hills."

Old-school training methods like running up hills might help players get faster, but not nearly as much as fine-tuning their mechanics when they run. That's where the Intel system creates instructional opportunities that baseball coaches of previous generations likely never even fathomed.

"It's just things that you would never know," Goff says. "The visual eye couldn't see those things, and now we have a setup to where we can break it down."

The feedback is universally beneficial, whether being presented to a previously slow-footed baserunner like Thompson or a speedster like **Curtis Washington Jr.**, who ranked third nationally among all junior college players last year with 46 stolen bases at Wabash Valley College.

"My goal is to steal as many bags as possible, whether that be 40, 30, 35, it doesn't matter," says Washington, a junior in sociology. "I just want to be leading the country in stolen bases, put it that way. And this technology right here is going to help me get my best jumps, (improve) the way I can turn, all that. I just feel like it's going to help me tremendously."

Last season, Purdue's 48 stolen bases ranked fourth in the Big Ten, with leadoff man **Mike Bolton Jr.** going a perfect 17-for-17 on stolen-base attempts. Goff and his coaches are optimistic they can build upon that performance after seeing how many Boilermakers made immediate improvements once the 3DAT system showed them how to reach top speed faster.

"We're going to be able to do things that other teams aren't going to be able to do," Thompson says. "We're going to get better pitches to hit, we're going to be able to be aggressive, to be able to just score more runs and put pressure on the opposition."

Washington agrees, adding, "speed kills and causes chaos on the base paths. If you get in the pitcher's mind, you never know what could happen. Hitters start getting more fastballs to hit. When there's speedsters on base, then that's what happens."

LOOKING TOWARD THE FUTURE

In addition to the competitive advantage the partnership creates for the team, it will be a powerful development tool available to every individual Purdue player.

"Just knowing that this is the only school in the country that has this technology to help me as a player and will help build me up throughout my years here, definitely it's a big-time tool," Thompson says.

And this is only the beginning of the program's 3DAT utilization. Opportunities to become more well-rounded athletes matter not only to current Boilermakers, but to recruits who have a desire to advance past collegiate baseball to the professional level. Those players might use it to improve their pitching or hitting mechanics in addition to their speed.

"That recruit that maybe wasn't thinking about Purdue now can see what we can do for them if they come here and play for the next three to four years and give them an opportunity to advance their skills," Goff says.

Cappuccilli envisions a market for the 3DAT product that extends across sports and within a variety of applications, including assessments that help injured athletes understand when it's safe to return to competition and additional TV viewing implementation.

Purdue is already investigating how the technology might benefit its men's basketball program. And a 3D visualization application that Cappuccilli helped develop during her Intel internship could soon make the technology accessible to athletes who want to improve their biomechanical technique at home.

She also expects that it will revolutionize the way teams analyze live practice and game footage now that it's possible to create 3D visuals without the reflective marker-covered bodysuits that special effects artists traditionally used to create CGI footage for movies, TV shows and video games.

The possibilities are seemingly endless, and Intel's innovative partnership with Purdue will provide valuable direction on where 3DAT analytics might be most useful to future customers. "I'm a big believer in technology and that biomechanics is something that should be part of everyday life," Cappuccilli says. "So, I think technology like this is going to really revolutionize sport."

RECENT TRENDS IN THE INDIANA-PURDUE SERIES – PART 1 (SINCE 2007)

- Games Played in Bloomington: 21 – Indiana leads 16-5
- Games Played in West Lafayette: 14 – Purdue leads 11-3
- Neutral-Site Games: 5 – Purdue leads 4-1
- Games Played AWAY from Bloomington: 19 – Purdue leads 15-4
- Games Played AWAY from West Lafayette: 26 – Indiana leads 17-9
- All Games: 40 – Tied 20-20

RECENT TRENDS IN THE INDIANA-PURDUE SERIES – PART 2 (SINCE 2013)

Alexander Field & Bart Kaufman Field both opened in 2013

- Games Played in Bloomington: 14 – Indiana leads 12-2
 - Games Played in West Lafayette: 4 – Purdue leads 3-1
 - Neutral-Site Games: None
 - All Games: 18 – Indiana leads 13-5
- Entering the season, among Big Ten teams only Maryland – which like IU was also scheduled to visit West Lafayette in 2020 – has played fewer games at Alexander Field than Indiana.

FEWEST GAMES AT ALEXANDER AMONG BIG TEN TEAMS (SINCE 2013)			
Team	Games	Opponent Record	Last Visit
Maryland	3	3-0	April 2015
Indiana	4	1-3	April 2018
Illinois	6	3-3	April 2021
Michigan State	6	4-2	May 2019
Nebraska	6	6-0	March 2016

- Indiana and Purdue both enter the weekend looking to right the ship. The Hoosiers have lost 10 of their last 15, including two of three vs. Northwestern at home last weekend after winning the series opener. The Boilermakers have dropped five of their last six since opening the season 18-1, suffering a sweep at the hands of Illinois last weekend in Champaign. Whichever team loses the series this weekend will officially be chasing it going forward in the race to qualify for the Big Ten Tournament (top 8 teams).

WEEKEND NUMBER 3 OF BIG TEN PLAY

- Rutgers at Nebraska
 - Maryland at Minnesota
 - Indiana at Purdue – Saturday-Monday
 - Michigan State at Ohio State – Saturday-Monday
 - Illinois at Iowa – Saturday Doubleheader
 - Penn State at Northwestern – Saturday Doubleheader
 - Cal State Fullerton at Michigan – Non-Conference
- Purdue's **Cam Thompson** and IU's Matthew Ellis have emerged as two of the top sluggers in the league. Thompson leads the Big Ten with 39 RBI thanks in part to nine home runs and a 1.230 OPS, ranking third in both categories. Ellis has connected for a league-leading 13 home runs and ranks second with 35 RBI.
- Thompson's 13-game RBI streak ended April 1 at Illinois. It was the longest by a Boilermaker in the last 20 years. Now the first baseman is in position to become the fastest Boilermaker (in terms of date on the calendar) in the last 20 years to reach the 40-RBI mark. One more home run would also make Thompson just the fifth Boilermaker since 2001 to hit his 10th home run before May 1.

MORE BOILERMAKERS TO HIT 10+ HOME RUNS (Since 2001)

- Daniel Underwood – 12 in 2003
- Ryne White – 12 in 2008
- *Only Wood & McGowan have done it in the BBCOR bat era (2011-present)*
- Connections among the pitching staffs for Indiana and Purdue feature Kokomo High School teammates and the return of Boilermaker **Dustin Glant**, IU's first-year pitching coach. The Hoosiers' staff ace **Jack Perkins**, a transfer from Louisville, is close friends with Purdue's **Kyle Wade**. Along with being standouts on the diamond, as the starting quarterback (Wade) and running back (Perkins) they helped lead KHS to the 2017 IHSAA Class 5A state title game on the gridiron. Wade threw a 19-yard touchdown pass to Perkins in the 42-28 loss to Columbus East.
- Glant was a relief pitcher for Purdue from 2001 to 2003 before being selected in the seventh round of the 2003 MLB Draft by the Arizona Diamondbacks. His coaching career has featured two stops at Ball State (2013, 2017-19) as well as two years in the New York Yankees farm system.
- Meanwhile, the Boilermakers have an IU transfer starting in their infield for the second year in a row. **Paul Toetz** crossed the rivalry line this past summer, joining his sister Haley – Purdue's academic advisor – in West Lafayette. Toetz led the Big Ten in doubles as a Collegiate Baseball Freshman All-American for the Hoosiers last season. Toetz has started each of the first 25 games this season as a Boilermaker, all but one at second base.
