# From Zero to Deployed

## Your First 5 Minutes on the RAD Platform

RAD Platform

Welcome. This guide will walk you through launching your first live application. Let's begin.

Your Mission Briefing

SIGN IN
Access your new command center.
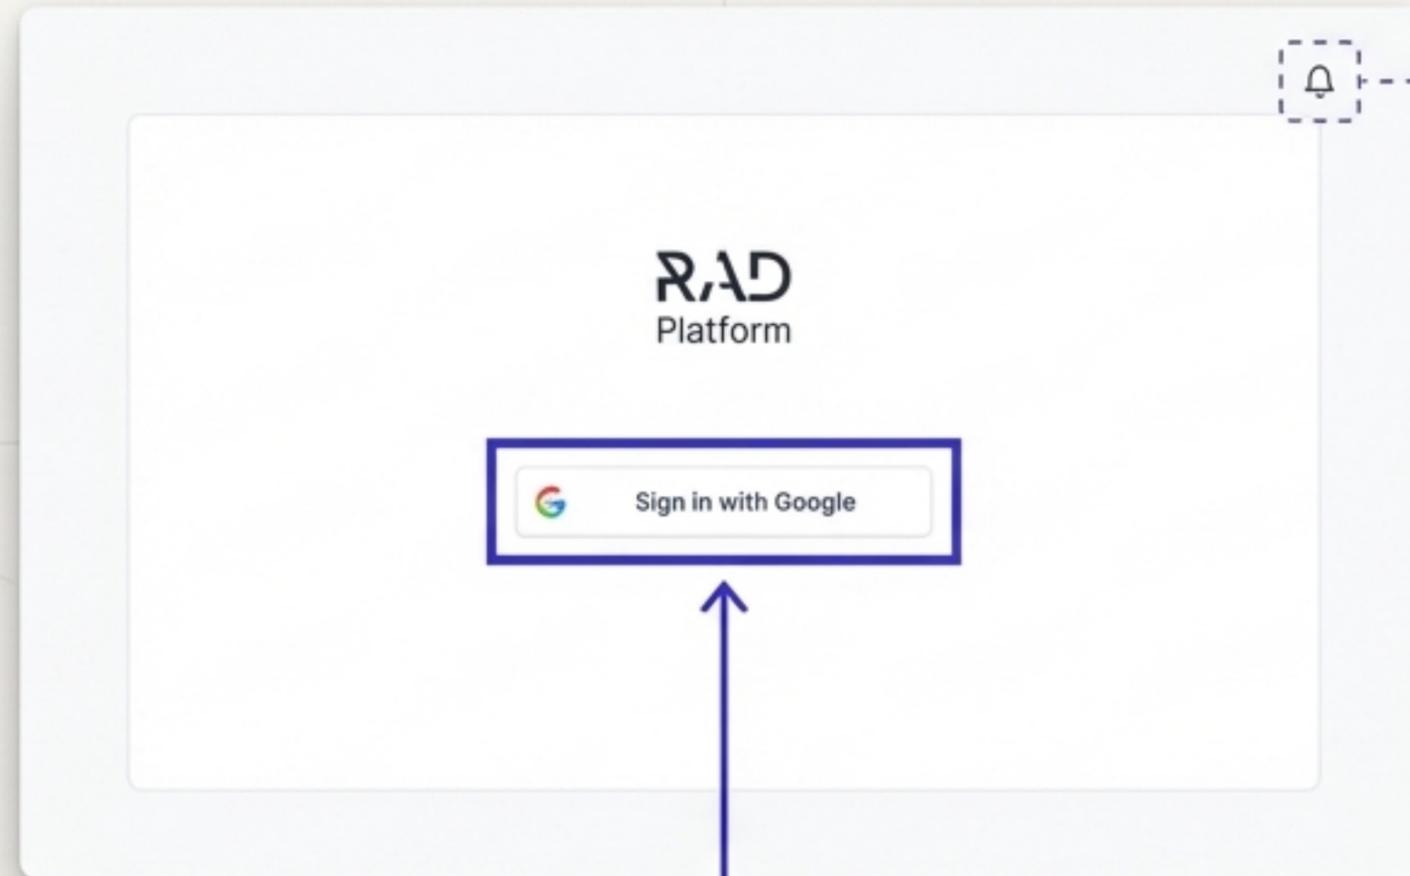

EXPLORE
Get familiar with the dashboard.

DEPLOY
Launch your first application.

MONITOR
Watch your app come to life.

NotebookLM

Access Granted: Your Entry Point

RAD
Platform

G Sign in with Google

Insider Tip: As a new user, you may have received free 'Sign-up Credits'. We'll show you where to check your balance in a moment.
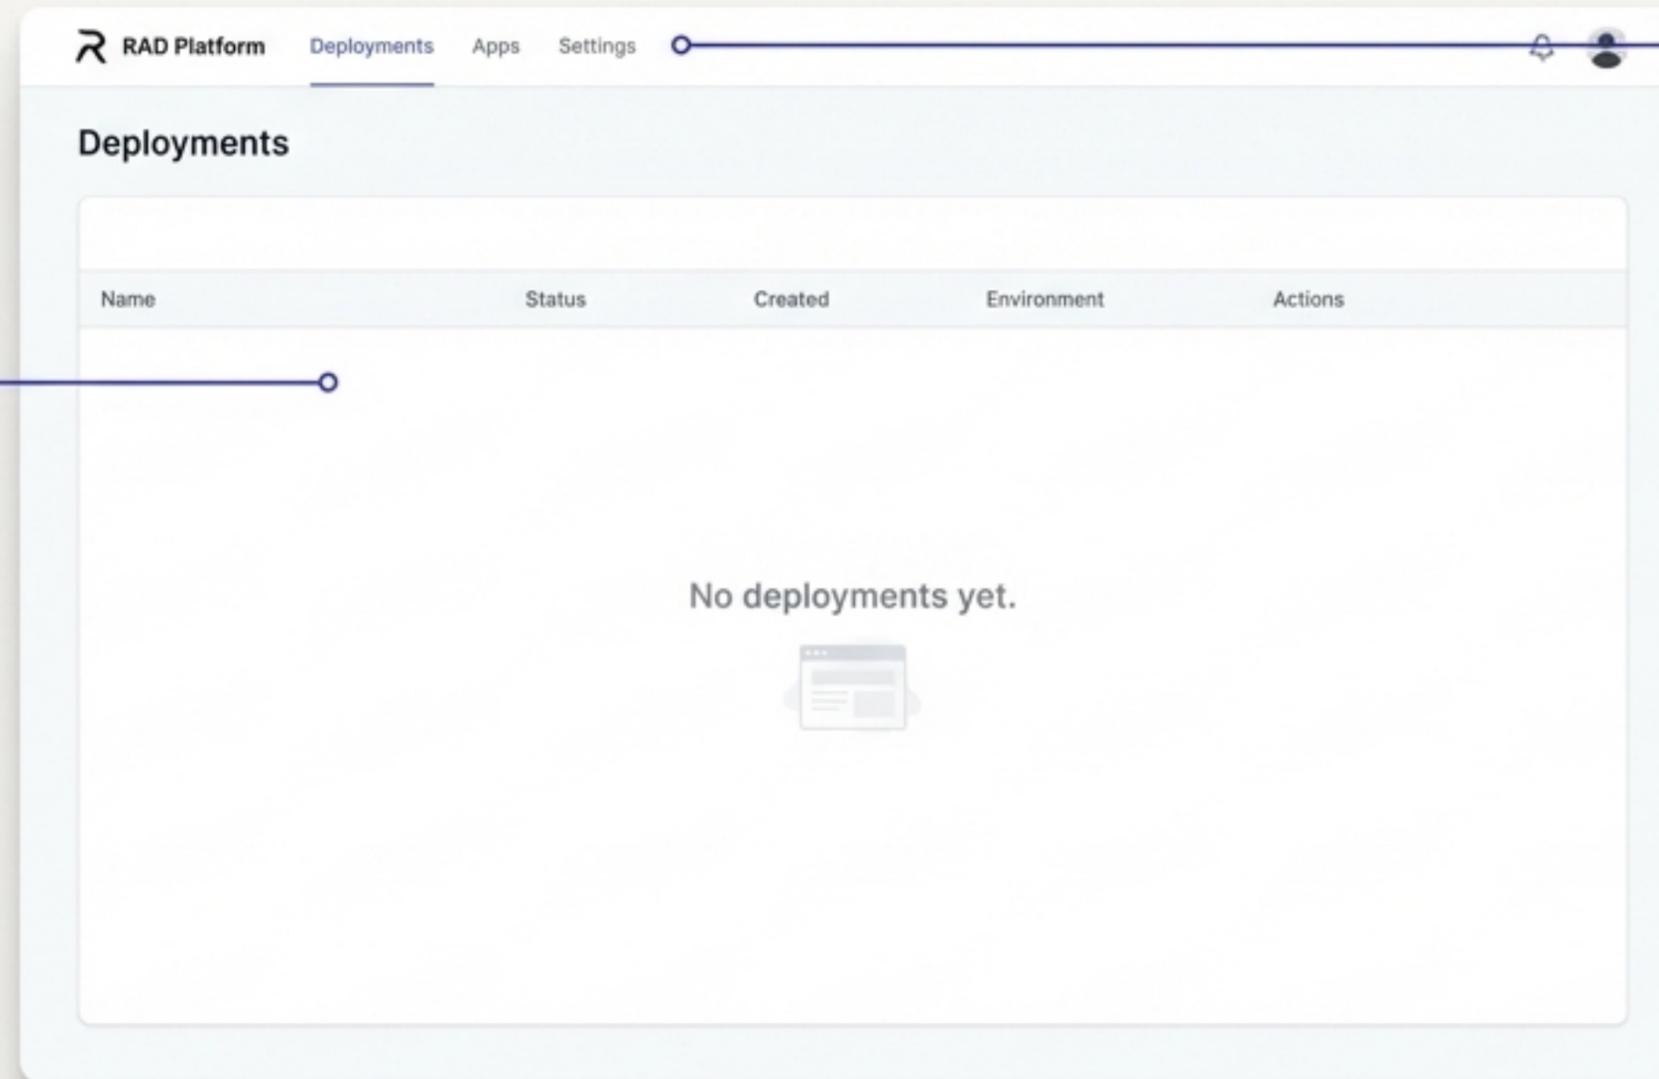

Click here to begin. Use your standard Google credentials.

Welcome to Your Control Center

The Deployments page is your main hub for managing all your applications.

RAD Platform Deployments Apps Settings

Deployments

Name	Status	Created	Environment	Actions

No deployments yet.

Navigation Bar

Your primary toolkit for creating and managing apps.

My Deployments

This is where your running applications will appear. It's currently empty, but not for long.

Navigating the Hub
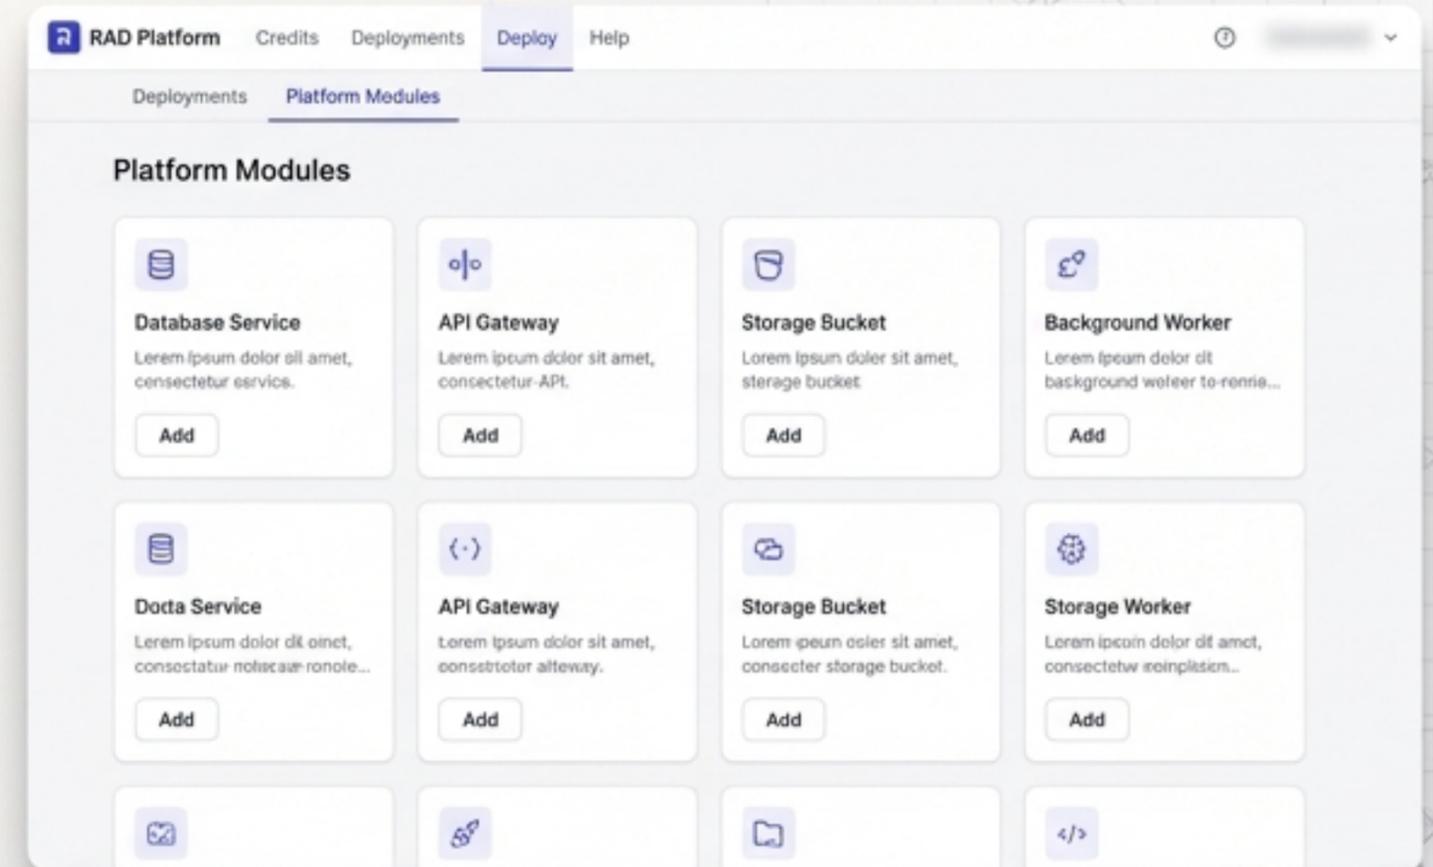

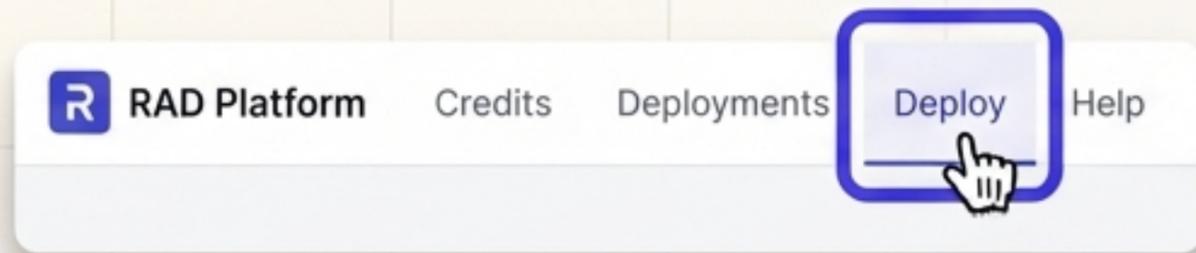

View your credit balance and transaction history.

Return to your main hub to manage running apps and view logs.

R RAD Platform | Credits | Deployments | Deploy | Help

The launch button. Go here to deploy new apps from our module library.

Access guides, tutorials, and support resources.

Access guides, tutorials, and support resources.

Initiate the Launch Sequence

Click **Deploy** in the top navigation to open the library of available Platform Modules.
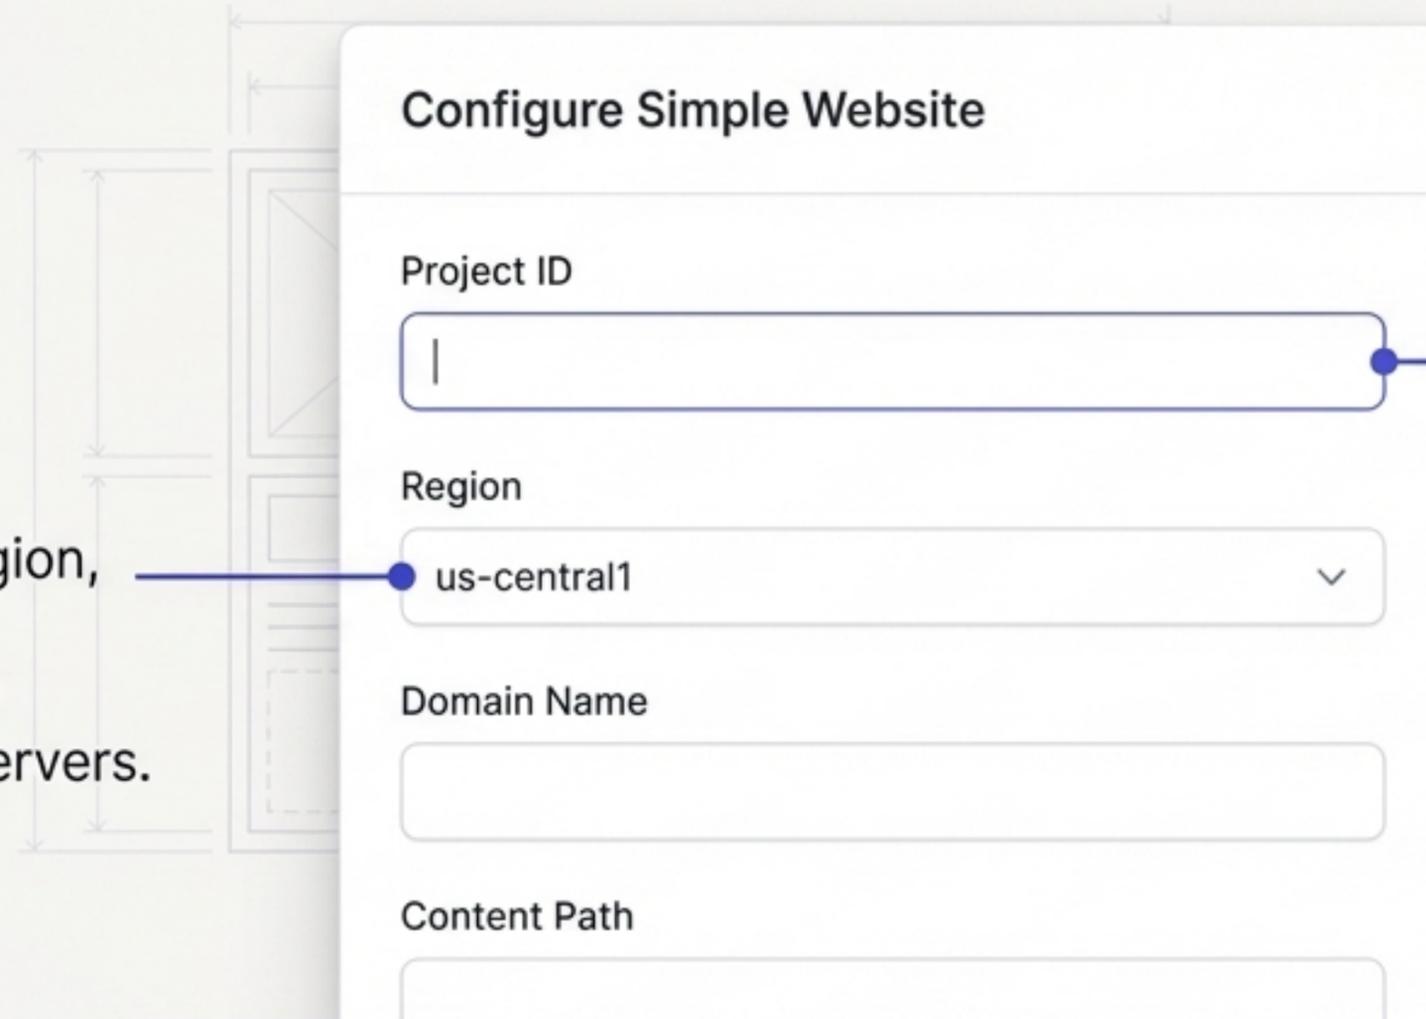

Choose Your Application Module

You can browse the available applications or use the Search bar to find a specific one. For this tutorial, let's deploy a 'Simple Website'. Click its card to begin configuration.

Set Your Coordinates: Configuration

Configure Simple Website

Project ID

Enter a unique identifier for your project. This helps you organize your deployments.

Region

us-central1

Select a deployment region, like `**us-central1**`. This determines the physical location of your app's servers.

Domain Name

Content Path

Note: Some forms have multiple steps. Simply click `**Next**` to proceed through them.

NotebookLM

Commit: Final Confirmation

After submitting your configuration, the platform will show you a final summary. Review the credit cost, and when you're ready, click `Confirm` to launch.

Mission Control: Awaiting a Live Status

RAD Platform

Deployments

ID	Project Name	Status	Created
d-73k9j2a	Simple Website	WORKING	Just now

Click the ID to open the details view, see more information, and watch real-time logs.

Deployment Successful. Your App is Live.

Deployments

Project Name	Status
Simple Website d-73k9j2a	● SUCCESS

Your Journey on RAD Begins Now

Congratulations! You've successfully deployed your first application and are officially a RAD user.

What's Next?

🌐 **Visit your live application:** Find the public URL in the deployment's detail view.

📄 **Review the build logs:** See exactly how the platform brought your app to life.

➕ **Deploy another module:** Explore the library and launch another service.

❓ **Visit the Help section:** Find in-depth guides and advanced tutorials.
