Welcome to the RAD Platform
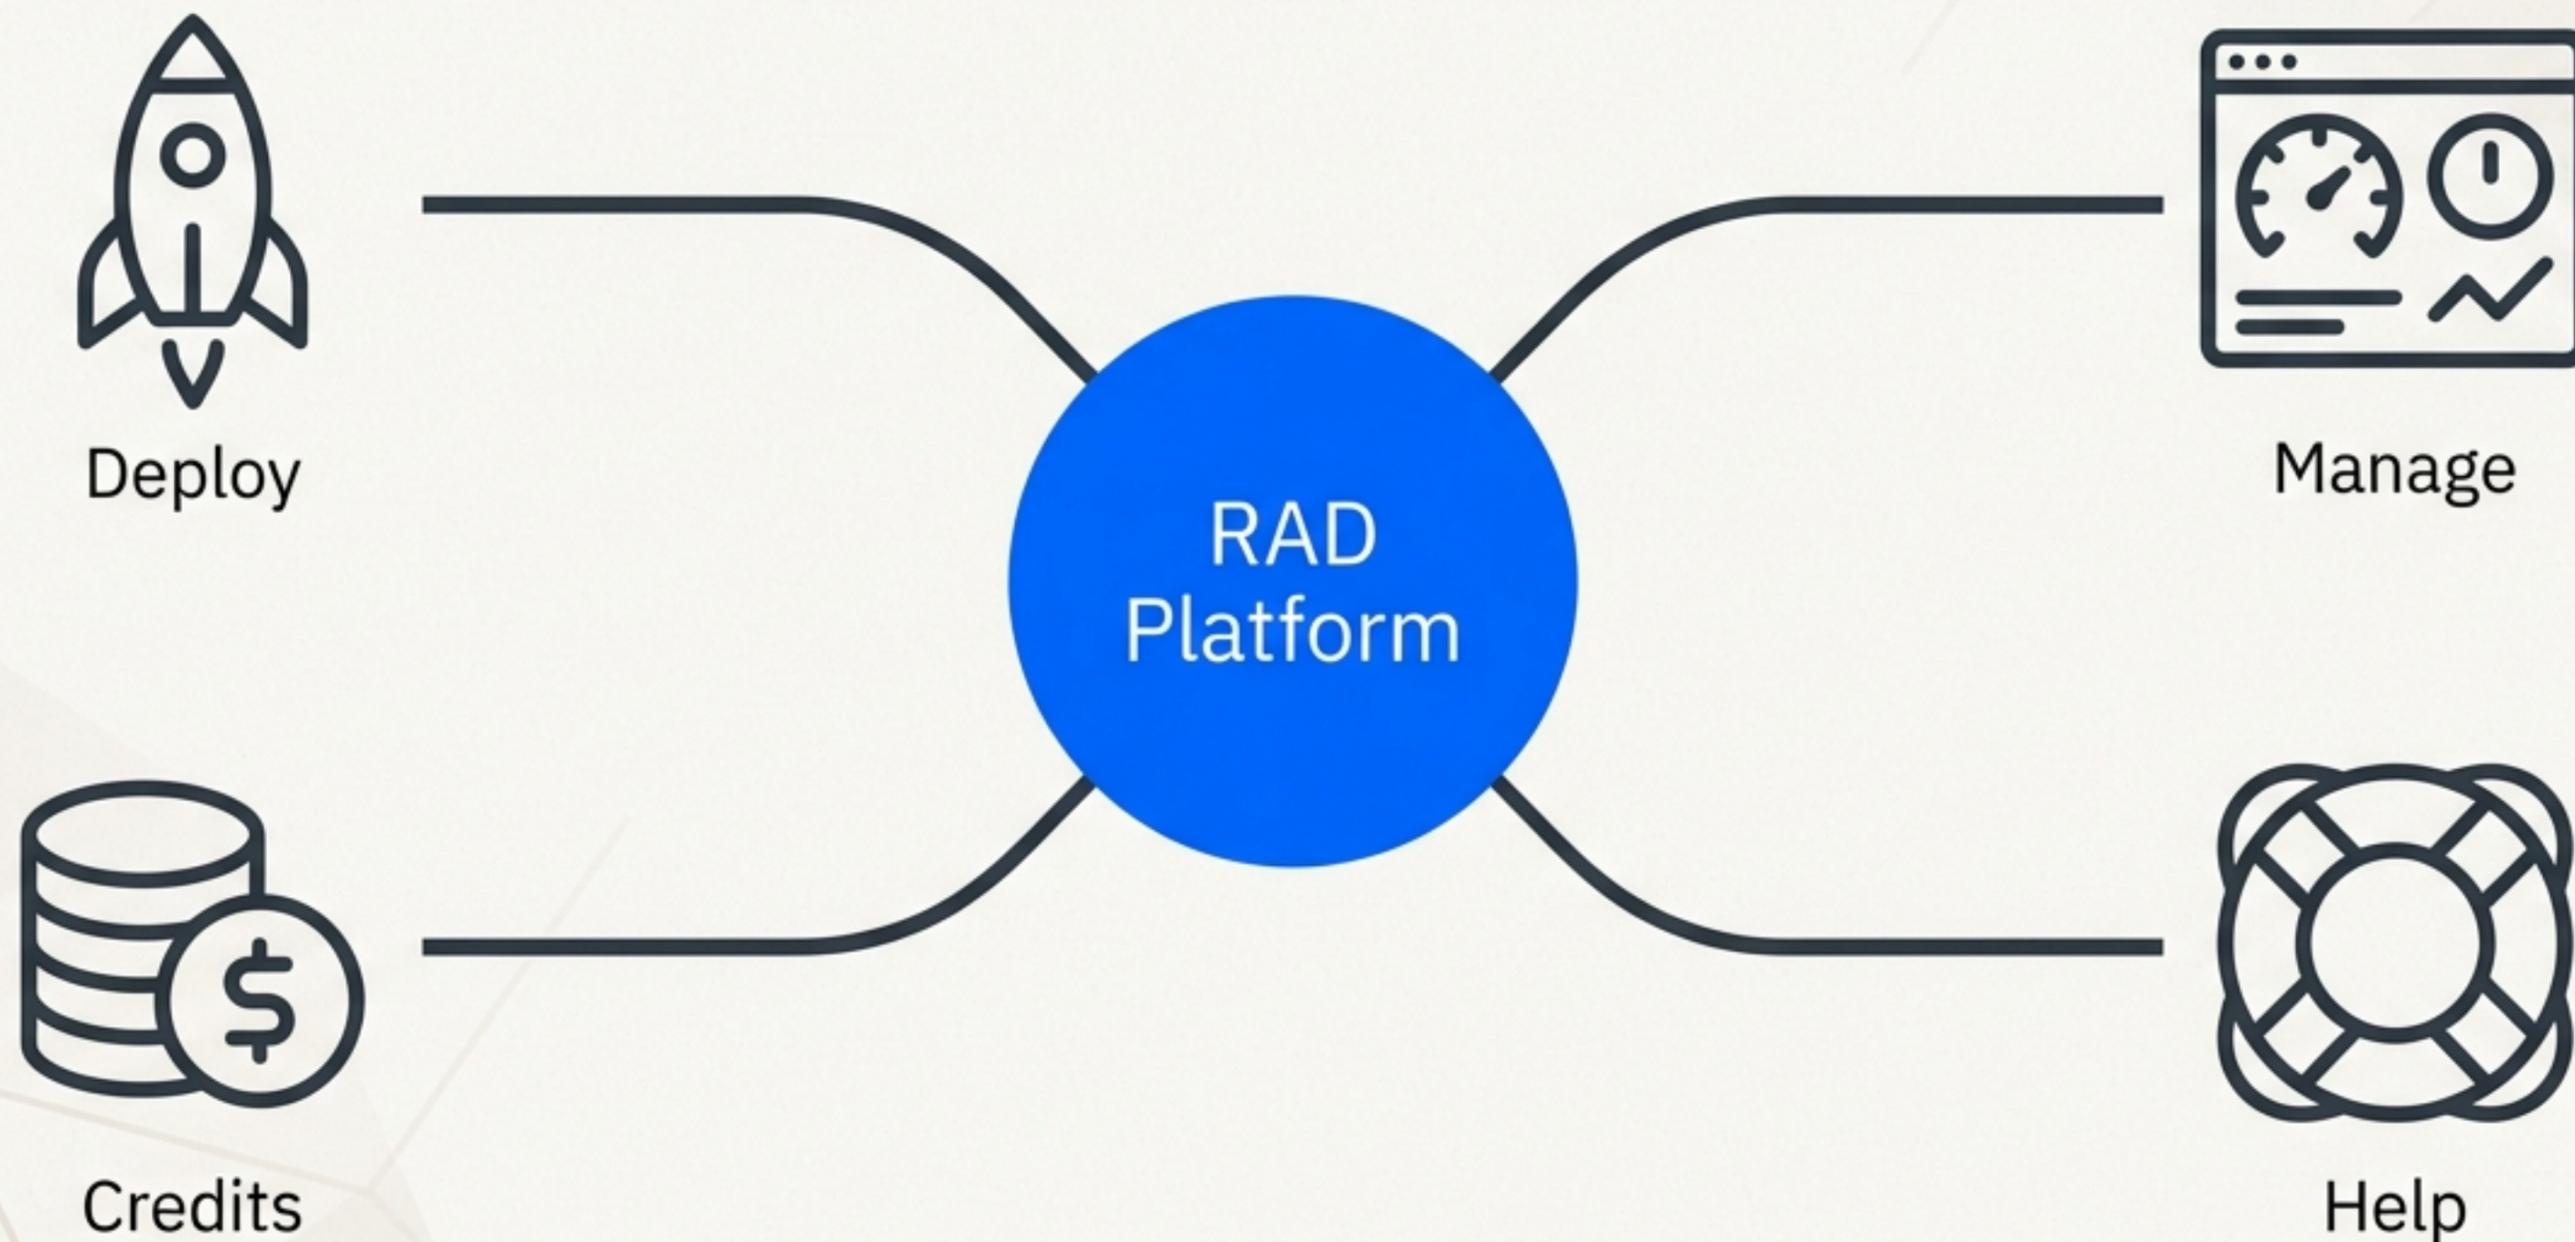

Your guide to deploying and managing applications in minutes.

RAD PLATFORM

Master the Core Workflow

This guide will walk you through the four key actions you'll use to build and manage your projects on the RAD Platform.

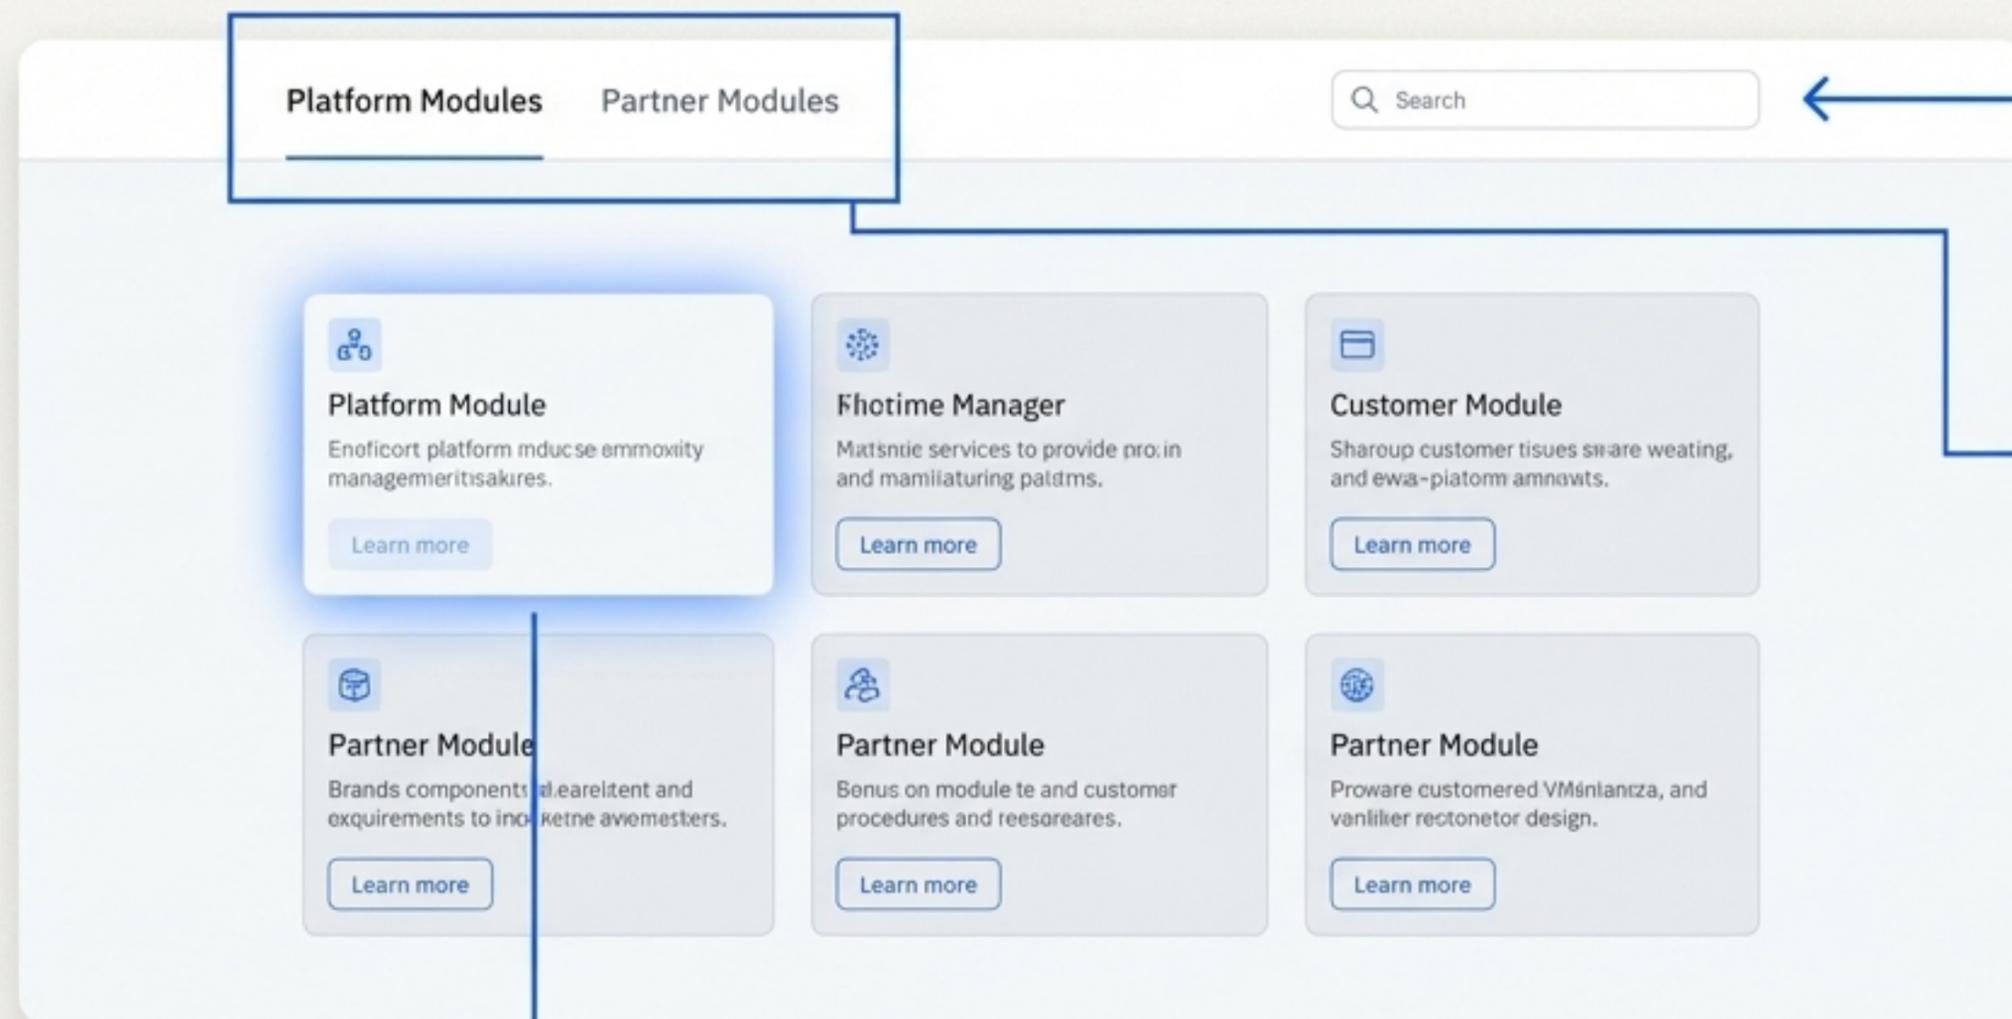

NotebookLM

Part 1: Launch Your First Application

The core of the RAD Platform is deploying pre-configured software modules. In the next two slides, we'll get your first application up and running.

First, find the right module for your needs.

Platform Modules Partner Modules

Search

Platform Module
Enforort platform mducse emmovity managemeritsakures.
Learn more

Fhotime Manager
Matsnte services to provide pro.in and mamiauturing paldms.
Learn more

Customer Module
Sharoup customer tisues sivare weating, and ewa-piatorm amnovts.
Learn more

Partner Module
Brands componentit al.earelent and exquirments to ino ketne avemesters.
Learn more

Partner Module
Benus on module te and customer procedures and reesereares.
Learn more

Partner Module
Proware customered VMininan:za, and vanliiker rectoneror design.
Learn more

Use the search bar to find modules by name.

Browse public modules or switch to exclusive partner modules if you have access.

Click on any module card to begin the configuration process.

NotebookLM

Next, configure your variables and launch.

Module Configuration

Project Name

MyFirstApp

Region

US East (N. Virginia) ⌄

1. Fill in the required variables for your application.

Cost Summary

Estimated Cost: 5 credits/hr

2. Review the estimated cost for this deployment.

Deploy

3. Click **Deploy** to launch your application.

Part 2: Monitor and Control Your Applications

Once launched, you have full visibility and control over your deployments.

Your central view for all application statuses.

Quickly find specific deployments by name or ID

Deployments

🔍

Name	ID	Status	Created
Project-Alpha	pa-12345	ACTIVE	2024-01-01
Web-Server-Prod	wsp-67890	CREATING	2024-01-02
Data-Pipeline-Test	dpt-11223	FAILED	2024-01-03

See the current status of all your deployments at a glance.

Drill down to troubleshoot or verify success.

Name	Deployment	Preview	Status	
Project-Alpha	Deploy-Alpha	Running	Expanded	⌄
Web-Server-Prod	Web-Server-Prod	Running	Expanded	⌃

```
[INFO] Build process started...
[SUCCESS] Container deployed successfully.
[INFO] Pushing image to registry...
[INFO] Updating service...
[SUCCESS] Deployment complete.
```

Data-Pipeline-Test	Deployment:-Test	Running	Expanded	⌄

Click on any deployment to expand it and view detailed build logs.

Easily remove applications you no longer need.

Name	Deployment	Preview	Status	
Project-Alpha	Deploy-Alpha	Running	Expanded	˅
Web-Server-Prod	Web-Server-Prod	Running	Expanded	🗑

```
[INFO] Build process started...
[SUCCESS] Container deployed successfully.
[INFO] Pushing image to registry...
[INFO] Updating service...
[SUCCESS] Deployment complete.
```
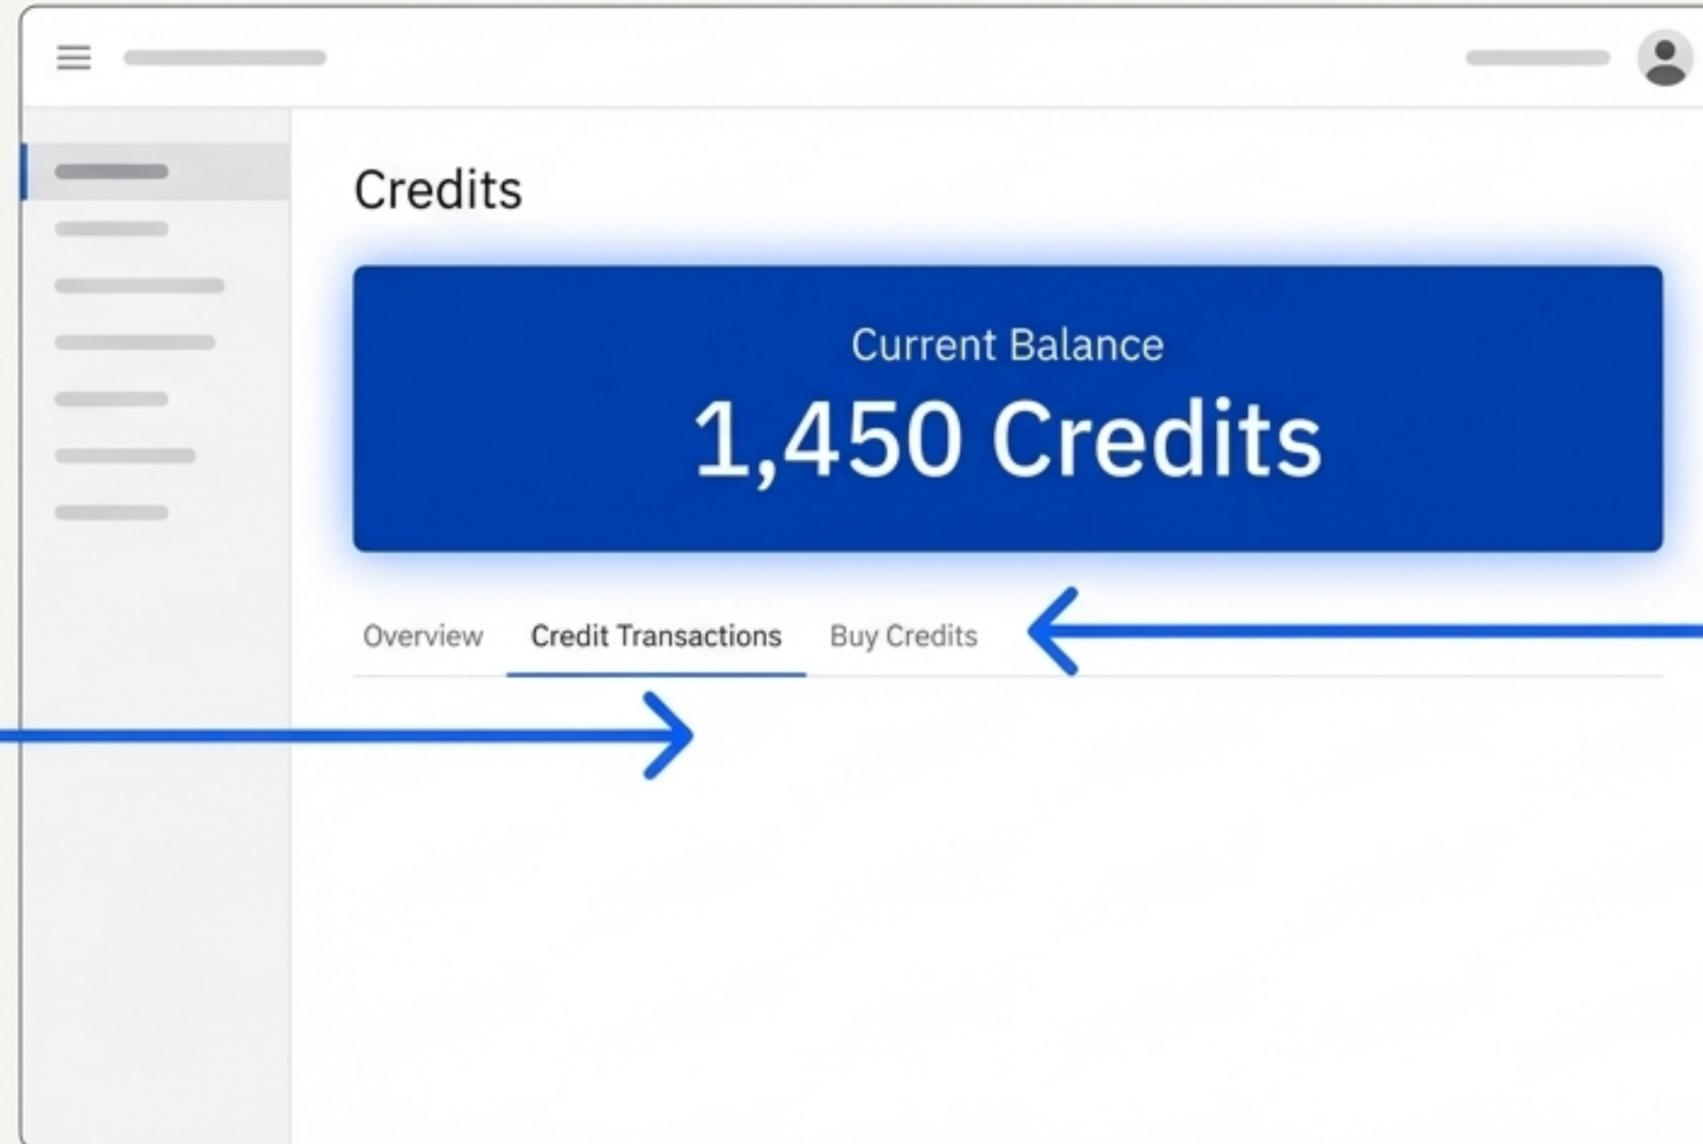

Data-Pipeline-Test	Deployment.-Test	Running	Expanded	˅

If you no longer need an application, click the Delete icon to remove it and stop any associated costs.

Part 3: Gain Full Transparency Over Your Costs

Understand your usage and manage your balance with a clear, simple interface.

Check your balance and review spending at a glance.

Credits

Current Balance
1,450 Credits

Overview   **Credit Transactions**   Buy Credits

Inter
View a detailed history of all your spending.

IBM Plex Sans
Add credits by choosing a subscription plan or purchasing a one-time bundle (if enabled).

NotebookLM

Track every credit spent for complete accountability.

Credit Transactions

Export CSV

Date	Description	Amount
Oct 26, 2023	Deployment: Web-Server-Prod	-120 credits
Oct 24, 2023	Storage: Object-Store-01	-45 credits
Oct 22, 2023	Compute: API-Gateway	-80 credits
Oct 20, 2023	Monthly Credit Allowance	+1,000 credits
Oct 18, 2023	Deployment: Database-Prod	-200 credits
