# ⚙ AutoContour

Automated AI Contouring

AutoContour instantly generates OAR and planning structures to accelerate treatment planning. With 65 deep-learning structure models covering all major anatomical regions, plan-ready contours are just seconds away, available for immediate use out of the box. AutoContour is vendor-neutral, streamlining the contouring workflow in any environment.

✓ Quickly provides high-quality, AI-generated contours for reliable time savings and consistency

✓ Automates planning structures for faster planning prep with fewer clicks

✓ Launches with Eclipse scripting API or with the standalone application for seamless workflow integration

✓ Simplifies contour review with intuitive playback and editing tools
