Dear Prospect,

Warm Greetings. Here's introducing, Reading Right- an ed-tech startup into explanatory education and explanatory journalism. Owing to our innate understanding in explanatory journalism we have come around to build a product that takes explanatory education to unprecedented levels. With a stellar feedback from our clients in B2B & B2G, we are now hoping to drive growth beyond compare for which we need a team that is impeccable by all accords.

Who we seek in our team?

Our team comprises of the top talent of developers in the country & beyond- across various fields. We are looking for folks who are smart, creative and can think like no other. They should be willing to create highly engaging & novel technology and be willing to plug customer needs to better it real time. Moreover, they must have the foresight to build excellent features that solve problems which align with the vision of the organisation. We essentially want a tech genius who can take our work to newer benchmarks while we give them an opportunity to drive leadership roles and lead the way for the next generation.

Job Description

Technology Expert has either of the following roles & functions:

1. **Django Developer** - Handling backend for the internal tools as well as code using REST framework for RESTful API.
2. **CodeIgniter Developer** - Handling backend and creating APIs.
3. **Android/iOS App Developer** - Working with the app development team to deliver end user features.
4. **React JavaScript developer**- Designing and implementing user interface components for JavaScript-based web application using the React open-source library ecosystem. Being involved in all stages, right from interface component design to final testing.
5. **DevOps Engineer**- Maintaining AWS server, deployment and CI/CD

What are <u>some</u> of the skills we look for in you (as applicable to the role mentioned above) ?

1. Should know android using Java
2. Should know iOS using Swift
3. Should know PHP Codeigniter framework, preferably Codeigniter 4
4. Should have a sound knowledge in Firebase
5. Should be very comfortable with Python Django framework
6. Should be familiar and experienced with React JavaScript & ES6
7. Should know DevOps

What do you get by working with us?

First of all you get an opportunity to directly build the core product & be involved in the beta test to launch the final version of the app. You will be solving problems first hand while setting newer standards for the app.

Second, you get an internship certificate at the end of the internship along with a consideration for full-time roles (based on work performance). We are an early-stage startup looking for leaders to join us in this effort and we will most definitely give you opportunities to experience leadership positions.

Third, the tech team will also get opportunities to meet and pitch the tech product to the investors!

Fourth, you get to work with a team that we know to be the most dynamic tech and non-tech talent uncovered.

Now, If you are looking for an unprecedented experience and journey then you know what to do! But do not forget it all starts with Reading Right!

Compensation Structure:

Position Applying For	Role	Internship Period	Internship Stipend (INR/month)	Salary After Confirmation (Lakhs/Annum)
