

ENDNOTES

HUGH ROSS, PHD

The
CREATOR
and the
COSMOS

HOW THE LATEST
SCIENTIFIC DISCOVERIES
REVEAL GOD

Covina, CA

Notes

Chapter 1 – The Awe-Inspiring Night Sky

1. George Roche, *A World without Heroes: The Modern Tragedy* (Hillsdale, MI: Hillsdale College Press, 1987), 120.
2. Hugh Ross, “Biblical Forecasts of Scientific Discoveries,” *Reasons to Believe*, reasons.org/explore/publications/tnr/b/read/tnr/b/1976/01/01/biblical-forecasts-of-scientific-discoveries.

Chapter 2 – My Skeptical Inquiry

1. The details of this calculation are presented in my paper titled “Fulfilled Prophecy: Evidence for the Reliability of the Bible,” *Reasons to Believe*, reasons.org/explore/publications/tnr/b/read/tnr/b/2003/08/22/fulfilled-prophecy-evidence-for-the-reliability-of-the-bible.
2. A detailed account of my personal search for truth is given in *Meet Hugh Ross* (Covina, CA: Reasons to Believe, 2013), DVD.
3. *Meet Hugh Ross* (Covina, CA: Reasons to Believe, 2013), DVD.

Chapter 3 – Big Bang: The Bible Taught It First!

1. Arno A. Penzias and Robert W. Wilson, “A Measurement of Excess Antenna Temperature at 4080 Mc/s,” *Astrophysical Journal* 142 (July 1965): 419–41, doi:10.1086/148307.
2. George Gamow, “Expanding Universe and the Origin of Elements,” *Physical Review* 70 (October 1, 1946): 572–73, doi:10.1103/PhysRev.70.572.2.
3. Vesto Slipher, “The Radial Velocity of the Andromeda Nebula,” *Lowell Observatory Bulletin* 1 (September 1912), 56–57.
4. Edwin Hubble, “A Relation between Distance and Radial Velocity among Extra-Galactic Nebulae,” *Proceedings of the National Academy of Sciences, USA* 15 (March 15, 1929): 168–73, doi:10.1073/pnas.15.3.168.
5. Georges Lemaitre, “A Homogeneous Universe of Constant Mass and Increasing Radius Accounting for the Radial Velocity of Extra-Galactic Nebulae,” *Monthly Notices of the Royal Astronomical Society* 91 (March 13, 1931): 483–90, doi:10.1093/mnras/91.5.483. The original paper appears in French in *Annales de la Société Scientifique de Bruxelles, Tome XLVII, Serie A, Premiere Partie* (April 1927): 49.
6. Albert Einstein, “Die Grundlage der allgemeinen Relativitätstheorie,” *Annalen der Physik* 354 (1916): 769–22, doi:10.1002/andp.19163540702. The English translation is in *The Principle of Relativity* by H. A. Lorentz, A. Einstein, H. Minkowski, and H. Weyl with notes by A. Sommerfeld and translated by W. Perrett and G. B. Jeffrey (London: Methuen and Co., 1923), 109–64.
7. R. Laird Harris, Gleason L. Archer, and Bruce K. Waltke, *Theological Wordbook of the Old Testament*, vol. 1 (Chicago: Moody, 1980), 127.
8. Harris, Archer, and Waltke, vol. 2, 916.
9. Harris, Archer, and Waltke, vol. 2, 935.
10. Jack J. Lissauer, “It’s Not Easy to Make the Moon,” *Nature* 389 (September 25, 1997): 327–28, doi:10.1038/38596; Shigeru Ida, Robin M. Canup, and Glen R. Stewart, “Lunar Accretion from an Impact-Generated Disk,” *Nature* 389 (September 25, 1997): 353–57, doi:10.1038/38669; P. Jonathan Patchett, “Scum of the Earth After All,” *Nature* 382 (August 29, 1996): 758–59, doi:10.1038/382758a0; Hugh Ross, *The Genesis Question: Scientific Advances and the Accuracy of Genesis* (Colorado Springs, CO: NavPress, 1998), 31–33.
11. Fred Hoyle, “A New Model for the Expanding Universe,” *Monthly Notices of the Royal Astronomical Society* 108 (October 1, 1948): 372, doi:10.1093/mnras/108.5.372.

Chapter 4 – The Discovery of the Twentieth Century

1. Nigel Hawkes, “Hunt on for Dark Secret of Universe,” *London Times* 25 (April 1992), 1.
2. Hawkes, “Dark Secret of Universe.”
3. Associated Press, “U.S. Scientists Find a ‘Holy Grail’: Ripples at Edge of the Universe,” *International Herald Tribune* (London), (April 24, 1992), 1.
4. Associated Press, 1.
5. Thomas H. Maugh II, “Relics of ‘Big Bang’ Seen for First Time,” *Los Angeles Times*, April 24, 1992.
6. David Briggs, “Science, Religion, Are Discovering Commonality in Big Bang Theory,” *Los Angeles Times*, May 2, 1992.
7. Nightline with Ted Koppel, *ABC Television Network*, April 25, 1992.
8. Nightline with Ted Koppel, *ABC Television Network*.
9. Stephen Strauss, “An Innocent’s Guide to the Big Bang Theory: Fingerprint in Space Left by the Universe as a Baby Still Has Doubters Hurling Stones,” *Globe and Mail* (Toronto), April 25, 1992.
10. Richard C. Tolman, “Thermodynamic Treatment of the Possible Formation of Helium from Hydrogen,” *Journal of the American Chemical Society* 44 (September 1922): 1902–8, doi:10.1021/ja01430a008.
11. George Gamow, “Expanding Universe and the Origin of Elements,” *Physical Review* 70 (October 1, 1946): 572–73,

doi:10.1103/PhysRev.70.572.2.

12. Ralph A. Alpher and Robert Herman, "Evolution of the Universe," *Nature* 162 (November 13, 1948): 774–75, doi:10.1038/162774b0.
13. Arno A. Penzias and Robert W. Wilson, "A Measurement of Excess Antenna Temperature at 4080 Mc/s," *Astrophysical Journal* 142 (July 1965): 419–21, doi:10.1086/148307; Robert H. Dicke et al., "Cosmic Black-Body Radiation," *Astrophysical Journal* 142 (July 1965): 414–19, doi:10.1086/148306.
14. George F. Smoot, "Comments and Summary on the Cosmic Background Radiation," *Proceedings of the International Astronomical Union Symposium, No. 104: Early Evolution of the Universe and Its Present Structure*, ed. G. O. Abell and G. Chincarini (Dordrecht, Holland; Boston, MA: Reidel Publishing, 1983): 153–58.
15. Craig J. Hogan, "Experimental Triumph," *Nature* 344 (March 8, 1990): 107–8, doi:10.1038/344107a0; J. C. Mather et al., "A Preliminary Measurement of the Cosmic Microwave Background Spectrum by the Cosmic Background Explorer (COBE) Satellite," *Astrophysical Journal Letters* 354 (May 10, 1990): L37–L40, doi:10.1086/185717.
16. Hugh Ross, *The Fingerprint of God: Recent Scientific Discoveries Reveal the Unmistakable Identity of the Creator*, commemorative ed. (Covina, CA: RTB Press, 2010), 69–71.
17. Ross, *Fingerprint of God*, 101.
18. George F. Smoot et al., "Structure in the COBE Differential Microwave Radiometer First-Year Maps," *Astrophysical Journal Letters* 396 (September 1, 1992): L1–L5, doi:10.1086/186504; C. L. Bennett et al., "Preliminary Separation of Galactic and Cosmic Microwave Emission for the COBE Differential Microwave Radiometer," *Astrophysical Journal Letters* 396 (September 1, 1992): L7–L12, doi:10.1086/186505.
19. E. L. Wright et al., "Interpretation of the Cosmic Microwave Background Radiation Anisotropy Detected by the COBE Differential Microwave Radiometer," *Astrophysical Journal Letters* 396 (September 1, 1992): L13–L18, doi:10.1086/186506.
20. Geoffrey Burbidge's comments were made on a radio talk show called *Live from LA* with host Phil Reid on KKLA in Los Angeles, CA. The program aired May 11, 1992 and included comments on the big bang ripples discovery from Drs. G. De Amici, Geoffrey Burbidge, Russell Humphreys, and Hugh Ross.
21. Ron Cowen, "Balloon Survey Backs COBE Cosmos Map," *Science News* 142 (December 19, 1992): 420.
22. S. Hancock et al., "Direct Observation of Structure in the Cosmic Background Radiation," *Nature* 367 (January 27, 1994): 333–38, doi:10.1038/367333a0.
23. A. C. Clapp et al., "Measurements of Anisotropy in the Cosmic Microwave Background Radiation at Degree Angular Scales Near the Stars Sigma Herculis and IOTA Draconis," *Astrophysical Journal Letters* 433 (October 1, 1994): L57–L60, doi:10.1086/187547.
24. C. L. Bennett et al., "Four-Year COBE* DMR Cosmic Microwave Background Observations: Maps and Basic Results," *Astrophysical Journal Letters* 464 (June 10, 1996): L1–L4, doi:10.1086/310075; C. M. Gutiérrez et al., "New Cosmological Structures on Medium Angular Scales Detected with the Tenerife Experiments," *Astrophysical Journal Letters* 480 (May 10, 1997): L83–L86, doi:10.1086/310634; E. S. Cheng et al., "Detection of Cosmic Microwave Background Anisotropy by the Third Flight of the Medium-Scale Anisotropy Measurement," *Astrophysical Journal Letters* 488 (October 20, 1997): L59–L62, doi:10.1086/310923; B. Femenia et al., "The Instituto de Astrofísica de Canarias-Bartol Cosmic Microwave Background Anisotropy Experiment: Results of the 1994 Campaign," *Astrophysical Journal* 498 (May 1, 1998): 117–36, doi:10.1086/305549; Angelica de Oliveira-Costa et al., "Mapping the Cosmic Microwave Background Anisotropy: Combined Analysis of QMAP Flights," *Astrophysical Journal Letters* 509 (December 20, 1998): L77–L80, doi:10.1086/311767; C. B. Netterfield et al., "A Measurement of the Angular Power Spectrum of the Anisotropy in the Cosmic Microwave Background," *Astrophysical Journal* 474 (January 1, 1997): 47–66, doi:10.1086/303438; S. R. Platt, "Anisotropy in the Microwave Sky at 90 GHz: Results from Python III," *Astrophysical Journal Letters* 475 (January 20, 1997): L1–L4, doi:10.1086/310453; K. Coble et al., "Anisotropy in the Cosmic Microwave Background at Degree Angular Scales: Python V Results," *Astrophysical Journal Letters* 519 (July 1, 1999): L5–L8, doi:10.1086/312093; Bharat Ratra et al., "Using White Dish CMB Anisotropy Data to Probe Open and Flat- Λ CDM Cosmologies," *Astrophysical Journal* 505 (September 20, 1998): 8–11, doi:10.1086/306139; Joanne C. Baker et al., "Detection of Cosmic Microwave Background Structure in a Second Field with the Cosmic Anisotropy Telescope," *Monthly Notices of the Royal Astronomical Society* 308 (October 1, 1999): 1173–78, doi:10.1046/j.1365-8711.1999.02829.x; Bharat Ratra et al., "ARGO Cosmic Microwave Background Anisotropy Measurement Constraints on Open and Flat- Λ Cold Dark Matter Cosmologies," *Astrophysical Journal* 510 (January 1, 1999): 11–19, doi:10.1086/306577; Martin White et al., "Interferometric Observation of Cosmic Microwave Background Anisotropies," *Astrophysical Journal* 514 (March 20, 1999): 12–24, doi:10.1086/306911; Bharat Ratra et al., "Cosmic Microwave Background Anisotropy Constraints on Open and Flat- Λ Cold Dark Matter Cosmologies from UCSB South Pole, ARGO, MAX, White Dish, and SuZIE Data," *Astrophysical Journal* 517 (June 1, 1999): 549–64, doi:10.1086/307236; E. Torbet et al., "A Measurement of the Angular Power Spectrum of the Microwave Background Made from the High Chilean Andes," *Astrophysical Journal Letters* 521 (July 28, 1999): L79–L82, doi:10.1086/312197; A. D. Miller et al., "A Measurement of the Angular Power Spectrum of the Cosmic Microwave Background from $l = 100$ to 400," *Astrophysical Journal Letters* 524 (September 13, 1999): L1–L4, doi:10.1086/312293; E. M. Leitch et al., "A Measurement of Anisotropy in the Cosmic Microwave Background on 7'–22' Scales," *Astrophysical Journal* 532 (March 20, 2000): 37–56, doi:10.1086/308529.
25. Ron Cowen, "COBE: A Match Made in Heaven," *Science News* 143 (1993): 43; J. C. Mather et al., "Measurement of the Cosmic Microwave Background Spectrum by the COBE FIRAS Instrument," *Astrophysical Journal* 420 (January 1994): 439–44, doi:10.1086/173574.
26. Katherine C. Roth, David M. Meyer, and Isabel Hawkins, "Interstellar Cyanogen and the Temperature of the Cosmic Microwave Background Radiation," *Astrophysical Journal Letters* 413 (1993): L67–L71, doi:10.1086/186961.
27. Antoinette Songaila et al., "Measurement of the Microwave Background Temperature at a Redshift of 1.776," *Nature* 371 (September 1, 1994): 43–45, doi:10.1038/371043a0.
28. David M. Meyer, "A Distant Space Thermometer," *Nature* 371 (September 1, 1994): 13, doi:10.1038/371013a0.

29. K. C. Roth et al., “C I Fine-Structure Excitation by the CMBR at $z = 1.973$,” *American Astronomical Society 189th Meeting*, id. 122.17, January 1997.
30. R. Srianand, P. Petitjean, and C. Leadoux, “The Cosmic Microwave Background Radiation Temperature at a Redshift of 2.34,” *Nature* 408 (December 21, 2000): 931–35, doi:10.1038/35050020.
31. In 1998 Reasons to Believe produced a one-hour television documentary, *Journey toward Creation*, that portrayed through astronomical images, video clips, and computer animations a simulated trip from planet Earth to the most distant entities in the universe, a journey toward the creation event itself. A DVD is available at shop.reasons.org.
32. Hugh Ross and Guillermo Gonzalez, “You Must Be Here,” *Facts for Faith*, vol. 1, no. 1 (2000), 36–41.
33. Stephen Hawking, *A Brief History of Time* (New York: Bantam Books, 1988), 163–65.

Chapter 5 – Twenty-First Century Discoveries, Part I

1. James Glanz, “Cosmic Motion Revealed,” *Science* 282 (December 18, 1998): 2156–57, doi:10.1126/science.282.5397.2156a; Floyd E. Bloom, “Breakthroughs 1998,” *Science* 282 (December 18, 1998): 2193, doi:10.1126/science.282.5397.2193.
2. Lawrence M. Krauss, “The End of the Age Problem and the Case for a Cosmological Constant Revisited,” *Astrophysical Journal* 501 (July 10, 1998): 461, doi:10.1086/305846.
3. Hugh Ross, *The Fingerprint of God: Recent Scientific Discoveries Reveal the Unmistakable Identity of the Creator*, 2nd ed. (Orange, CA: NavPress, 1991), 27–29; Immanuel Kant, “Universal Natural History and Theory of the Heavens,” in *Theories of the Universe*, ed. Milton K. Munitz (Glencoe, IL: Free Press, 1957), 242–47.
4. Albert Einstein, “Kosmologische Betrachtungen zur allgemeinen Relativitätstheorie,” in *Sitzungsberichte der Königlich Preussischen Akademie der Wissenschaften* (1917), Feb. 8, 142–52. The English translation is in *The Principle of Relativity: A Collection of Original Memoirs on the Special and General Theory of Relativity* by H. A. Lorentz, A. Einstein, H. Minkowski, and H. Weyl with notes by A. Sommerfeld and translated by W. Perrett and G. B. Jeffrey (London, UK: Methuen and Co., 1923), 175–88; Albert Einstein, “Die Grundlage der allgemeinen Relativitätstheorie,” *Annalen der Physik* 354 (1916): 769–822. The English translation is in *The Principle of Relativity*, 109–64, doi:10.1002/andp.19163540702.

53. Ross, *Improbable Planet*, 63–70, 72–75.
54. There exists, for example, a probability of a little less than one chance in 10^{80} that the hot air molecules arising from the flames on a gas stove instead of dissipating throughout the room could bunch together inside a small volume element, move toward you, and burn a hole through your chest and into your heart. This probability, however, is so tiny that we can safely conclude that such an event can never happen at any time in the history of the universe or at any location throughout the universe.
