

When to Use

SALICYLIC ACID VS BENZOYL PEROXIDE

GLYMEDPLUS®

SALICYLIC ACID

Exfoliates and works like a mop to absorb excess oil and remove the dead skin cells that cover the break outs and into the follicle.

ACNE
GRADE 1

Young Acne.
Mainly Open and Closed Comedones

ACNE
GRADE 2

Maturation Arrest
Texture—unmature lesions in pore.

GLYMEDPLUS®

BENZOYL PEROXIDE

Works by forcing oxygen into the pore and kills the bacteria responsible for acne.

ACNE
GRADE 3

Hormonal | Adult Acne
Mainly Papules and Pustules

ACNE
GRADE 4

Cystic Acne
Pustules, Nodules, and Cysts

GLYMEDPLUS®
