Professional Regenerative Formulas

Providing the highest quality professional skin care using pharmaceutical grade ingredients that deliver visible results to promote healthy, beautiful skin.

A Leader in Botanical Skin Care Revolution

For centuries, the use of plants has been used as a remedy for various conditions, both internally and topically. We know for healthy bodies we must fight free radicals through the use of antioxidants and with scientific support, we can have the same healthy benefit for our skin.

Our botanicals come from all parts of the world: Asia, Africa, Europe, South America and of course the US and Canada. They are grown and cultivated to retain their purity and efficacy. We demand that our botanicals come from suppliers that meet these criteria. We do our own processing using techniques that retain the beneficial properties in the highest concentrations possible, thus assuring our customers that GlyMed Plus is committed to an exacting standard of excellence.

Pharmaceutical Grade vs. Cosmetic Grade:

Pharmaceutical grade is required to be 99.9 % pure raw material. It is VITAL that what we put on the skin will penetrate the epidermis to affect the skin properly.

Pharmaceutical Grade:

- Contains higher quality and a higher percentage of active ingredients
- Required by the FDA to be 99% pure
- Contains active ingredients that make a change in your skin such as reducing wrinkles, pigmentation, alleviating acne, etc.

Cosmetic Grade:

- Not required to prove any claims they make but can cite "scientific studies"
- Required by the FDA to be up to 70% pure
- Over the counter, drugstore, MLM, etc.

Our Regenerative Formulas

The following information has been formatted to serve as an introduction to the GlyMed Plus Skin Care Systems. For more in depth training or educational materials, refer to the GlyMed Plus Institute of Skin Science™ or the appropriate GlyMed Plus reference manual.

The GlyMed Plus Skin Care System is unique and multifaceted. There is no skin condition that cannot be treated either with a combination of the various products or utilizing one in particular.

GlyMed Plus Skin Care System consists of several sub lines of products:

Age Management *Skin Care System*

This system is an exclusive selection of pharmaceutical grade components that drive results both in-clinic and for home care use. It is a highly effective group of clinical specific products that consist of cleansers, hydrators, tyrosinase inhibitors, exfoliators, AHAs, antioxidants, and sun protection.

Cell Science *Skin Care System*

The restorative and reparative power of this line counteracts the harshness of the environment and aging process. These products are aligned with Circadian balance to repair and protect the cell itself leading to younger acting skin.

Master Aesthetic Elite *Skin Care System*

Unique formulas that indulge the most challenging skin conditions to produce superior results. This system builds intercellular hydration and quickly resolves wrinkles due to its ability to produce collagen and refurbish the stratum corneum. BIOCELL-sc: an exclusive blend of bio-active components which initiate cellular interaction, increase cell turnover, and produce greater hydration resulting in a superior barrier.

Acne *Skin Care System*

State of the art acne fighting formulas designed to address characteristic problems that cause acne. Recommended by Dermatologists & Aestheticians. Works synergistically to restore healthy balance and aid in the reduction of acne lesions and scarring. All ingredients are FDA approved to help clear acne and reduce potential risk for scarring.

For Men *Skin Care System*

Efficient, uncomplicated, 100% natural and masculine. This system incorporates a perfect balance of lipids and hydration to help maintain the unique characteristics of a man's skin to look and act younger. These products obtain the highest quality ingredients and technologically advanced formulas packed with cell nutrients and certified organic natural extracts. Designed for the physiology of a man's skin.

Professional Only *Skin Care System*

Used in the treatment room combining AHAs, BHAs, TCA, enzymes, and low pH. The GOAL of professional only products is to produce a controlled partial thickness injury, stimulating the skin to generate a wound healing process to strengthen structures for new dermal connective tissue.

The GlyMed Plus mission is to create the greatest professional skin care through pharmaceutical grade ingredients that deliver visible results to promote healthy, beautiful skin.

Appropriate skin health is based on a 4 step process

1	CLEANSE
	Removes oil, dead skin cells, environmental pollutants-debris, and free radicals.

2	TREAT
	Delivers vital and effective ingredients to treat your specific condition.

3	BALANCE
	Uses targeted ingredients to revive your skin's ability to repair and renew.

4	PROTECT
	Grow and build healthy skin cells while shielding from harmful pollutants, debris, and the sun's damaging rays.
