

# i-INVENT PH Campaign

(DOST-TAPI's Programs of Assistance for Filipino Inventors)

## Concept Prototyping Program

The Concept Prototyping Assistance Program aims to tap the laboratories and facilities of RDIs and SUCs in the development of an initial working prototype of a potential or actual invention as well as strengthen the laboratories and facilities of RDIs and SUCs.

## Industry-Based Invention Development

The IBID Program supports the development of viable inventions through application and adaption to existing industry practices, and the production of the commercial prototype of the invention to be installed in the actual operations.

## Invention-Based Enterprise Development 1

The IBED Program supports an inventor in developing the invention to become a business enterprise by making it available to the consumers.

## Invention-Based Enterprise Development 2

The IBED2 Program provides supports for inventors who has sestablished their company through the commercialization of their invention by providing funds to cover additional capital.

## iTECH Lending Program

The Innovation and Technology (I-TECH) Lending Program, in partnership with the Technology Application and Promotion Institute (TAPI), funds the commercial production of patented Filipino inventions.

## Intellectual Property Rights Assistance Program

The IPRAP provides assistance in securing intellectual property (IP) protection. The Program offers a holistic package of assistance for patent, utility model, industrial design, copyright and trademark application.

## Invention Testing and Laboratory Analyses

The Invention Testing and Laboratory Analyses Assistance Program grants a financial assistance to male and female technologists, inventors, and researchers needing laboratory services for analyses and performance testing.

## Inventors' Organization Accreditation

The Inventors' Organization Accreditation Program aims to accredit and recognize inventors' organizations comprising of relatively an equal number of men and women, throughout their activities and provide incentives to accredited inventors' organization.

## Tax and Duty Exemption

The Program is tasked to evaluate and process request from inventors for the issuance of certification for tax and duty exemption application

## Invent School Program

The Invent School Program (ISP) serves as a platform for the youth to awaken their true ingenuity by stimulating their interest for creativity and inventiveness. The Program involves a two-day seminar-workshop for elementary, high school, and college students.
