Notes:

The 2018 estimates were updated following the availability of the final 2018 Family Income and Expenditure Survey (FIES), which now includes the new urban-rural classification based on the results of the 2015 Census of Population (POPCEN 2015), in addition to other changes that were made. To ensure consistency, the 2015 estimates were also updated using 2015 FIES with the new urban-rural classification from the POPCEN 2015.

\*= significant change; The increase or decrease of the poverty incidence among families between 2015 and 2018 is significant at 10% level of significance ( $\alpha = 0.10$ ).

a/ Caution in utilizing the estimate for these provinces must be observed due to its very small sample size in 2015.

b/ Coefficient of variation of 2018 provincial poverty incidence among families is greater than 20%.

c/ Coefficient of variation of 2015 provincial poverty incidence among families is greater than 20%.

d/ The 2015 estimates of Davao Occidental were excluded as the province was not yet considered in the Master Sample.
