

Release notes for RESCU-2.3.1

1. Bug fix release. This release resolves minor bug pertaining to IO and typos in documentation.
2. One bug would cause the wavefunctions to be saved in the wrong order in the following case: LCAO basis + non-collinear spin + no-mpi + non-self-consistent + selected bands (i.e. eigensolver.bandi is set). **This may have led to incorrect results (however unlikely).**

Note: Unless otherwise specified, bug fixes do not influence previous results.
