Ed,

Triangle Partnership wants to grant an access and utility easement from Parcel 2, UPC number, 103106327427010101, to Parcel 1, UPC number, 103106324234120135 to access Frost Road.

The required easement width is 50 feet in width. The required road improvements would be:

- The road width is 24 feet with bar ditches on both sides of the road or wider depending on the type of development and the amount of traffic that will be generated.
- 12 inches of subgrade prep, compacted to 95%
- 6 inches of base course, compacted to 95%
- at the intersection of the private road and Frost Rd, an asphalt apron with 25 foot radius will need to be constructed.
- A culvert pipe may be needed to allow storm water run-off to drain in the bar ditch, if a bar ditch exists.
- If the owners wish to pave the private road 3 inches of asphalt would be required on top of the base course and compacted to 95%
- The private access and utility easement would also have to be named.

My supervisor's comments are attached below:

Several important aspects of this request need to be addressed. The first is that Parcel 1 is zoned M-1, which allows for some fairly intense uses, thus any granted access has to be mindful of potential large volumes of traffic. The access should attempt to use existing access points to Frost Road and a new access will need O&M's approval as well as some form of intersection evaluation. This would be considered a road and would need to be named.

FOR ACCESS COMING OFF NORTH 14 – through the triangle shaped parcel owned by Triangle Partnership. Using the Boundary Survey which shows the triangle shaped parcel's SE corner and Parcel 1's NW corner as touching each other. The following would be needed:

- Obtain an access easement from NMDOT to access North 14.
- Obtain an access and utility easement from the property to the north of Parcel 1.
- The same road improvements, shown above, would be required.
- The road would also need to be named.

Prior to BCPWD granting the access easement, we would like to schedule a meeting with you and the owners to find out what they are proposing for this site. Based on the development, there may be additional requirement that would need to
