Green Light Plan

Building Better Roads for East Baton Rouge Parish

IMPROVEMENTS

- The project includes significant drainage improvements in and around the project area, including improved drainage outfall at Airline Highway.
- A two-lane round-a-bout will be constructed as part of the project to intersect with the new Stumberg Lane Extension and Woman's Hospital access drive.
- New traffic signalization will be provided for the aligned intersection of Pecue Lane at Airline Highway.
- Sewer improvements, included within this project as part of the SSO program, include the installation of new gravity sewer to ensure adequate capacity for current and future development.

BENEFITS TO CITIZENS

- When complete, the project will provide significantly enhanced access to motorists along Airline Highway and Pecue Lane, two major areas of congestion.
- Six-foot sidewalks will be included on both sides of the four-lane roadway to allow for safe pedestrian access.
- Critical access points will be established to connect the new Woman's Hospital with motorists and citizens requiring urgent care access.
- When combined with the Stumberg Lane Extension Phase 2 project, a new corridor will be established that links the existing Stumberg Lane from the Jefferson Highway intersection to Pecue Lane.

STUMBERG LANE EXTENSION PHASE 1 PROJECT OVERVIEW

With a construction cost of \$6.3 million and an anticipated construction duration of just over nine months, the Stumberg Lane Extension Phase 1 project was awarded through the public bid process to J.B. James Construction, LLC. The project, divided into two phases, will provide a connection between Pecue Lane and Airline Highway and then to Jefferson Highway. The Stumberg Lane Extension Phase 1 project will stretch from the 90-degree turn on the existing Pecue Lane to a point approximately 1,300 feet north of Airline Highway. Improvements within the Phase 1 project include drainage improvements, a two-lane round-a-bout at the intersections of the new Stumberg Lane Extension and Woman's Hospital access drive, new traffic signalization at the aligned intersection of Pecue Lane at Airline Highway, and sewer upgrades and installations.
