

WHAT THE FX84 DOES

The FX84 Milk Box compressor has formatable compression, and has special high frequency expansion circuitry. The extra creamy compression the FX84 Milk Box adds with the high frequency expansion (STABILIZATION) allows you to completely control the dynamics of your guitar. You obviously haven't settled for another effects device. To eliminate the need for a 9-volt battery, attach the DOD PS200R to the AC adapter jack.

FEATURES
LED indicator shows status of effect and battery condition.
Active switching for noiseless operation.
Easy access battery compartment.
Adapter Jack for AC operation.
Rugged die-cast metal case.
Three year limited warranty.
Rubber non-skid bottom.

JACKS: Input, Output, AC Adapter (use the DOD PS200R power supply only to eliminate the need for a 9 volt battery).

LED INDICATOR: Lights when the distortion is enabled, and is not lit when the effect is bypassed.

FOOTSWITCH: Switches the effect in or out of the signal path.

ATTACK: Controls the attack time of the compressor. Turn it up for more attack time and down for less.

EXPANSION: Controls the amount of high frequency expansion. Turn the HI EXP control up for more expansion.

HI EXP: Controls the amount of high frequency expansion. Turn the HI EXP control up for more expansion.

LEVEL: Controls the output level when the effect is on. Turn it up for more volume and down for less volume. Use the LEVEL control to match the effect volume with the bypass volume.

COMPRESSION: Controls the amount of compression. Turn it up for more compression and down for less compression. When the COMPRESS is turned

up, the volume will slightly decrease. So, the QUARTS control will have to be adjusted to compensate for the lost volume.

HI EXP and ATTACK controls down, and turn the HI EXP and ATTACK controls down. This will take those

CONTROLS

OPERATION OF THE FX84

The FX84 should be operated in front of an amplifier and not in an effects loop. Since the order of the effects are very important, they should be ordered as follows: 1. compression effects (DOD FX84), 2. Wah/volume and envelope filters (DOD FX17, FX29), 3. Distortion effects (DOD FX102), 4. EQs (DOD FX40), 5. chorus, flanging, phasing, and VIBRATO (DOD FX64, FX75C, FX22), 6. Delay and reverb effects (DOD DX98, FX96).

To set up your own sound with the FX84 start by turning the HI EXP and ATTACK controls down, and turn the LEVEL

controls to the desired levels, and adjust the LEVEL so the effected signal volume matches the bypass volume.

Use this setting for a light compression sound. To do so turn the LEVEL and COMPRESSION controls to 12 O'clock. Turn the HI EXP and ATTACK controls down. This will take those

any annoying edges off, but not effect anything else.

HEAVY COMPRESSION
To squeeze every last bit, and just plain milk your guitar for everything it's worth, turn the LEVEL to 12 O'clock, the COMPRESS up, and the HI EXP and ATTACK

down. Your guitar will sound squashed but will have endless sustain.

BRIGHT HEAVY COMPRESSION
If you want to squeeze your sound and give your high end some brilliance, try this setting. Turn the LEVEL to 12 O'clock, the COMPRESS up, the HI EXP up, and ATTACK

down. Brilliant high end without your volume getting out of control, what more could you ask for?

IMPORTANT NOTES

The FX84 battery is in use whenever the INPUT jack is plugged in. If you are not using the FX84, be sure to unplug the cable from the INPUT jack. This will prevent unnecessary battery drain.

Remove the battery whenever the unit is not going to be used for an extended period of time. This will prevent possible damage due to leaking battery fluids.

If the FX84 fails to switch in or out or the LED indicator stays lit, the battery needs to be replaced.

Use of any AC adapter other than the DOD PS200R will void the warranty of this product.

Unauthorized repair of the FX84 will void the warranty. Should your FX84 require service, contact your DOD FX pedal dealer for return / repair information.

DECLARATION OF CONFORMITY
 Manufacturer's Name: DOD Electronics Corporation
 Manufacturer's Address: 8760 S. Sandy Parkway
 Sandy, Utah 84070, USA
 declares that the product
 Product Name: FX84
 Product Options: All (requires a Class II power
 adapter that conforms to the requirements of EN 60065,
 EN 60742, or equivalent).
 Safety: EN 60065 (1993) 1,2,3
 IEC65 (1985) with Amendments
 EMC: EN 55013: (1990)
 EN 55020: (1991)
 Supplementary Information:
 The product herewith complies with the requirements of
 the Low Voltage Directive 73/23/EEC and the EMC
 Directive 89/336/EEC as amended by directive
 93/68/EEC.
