

MO-FX

TIME SYNCHRONIZED FX

Mo-FX makes it easy to synchronize time-based effects. Synchronizing Flange, Tremolo, and Delay just got as simple as tapping in a tempo or sending MO-FX MIDI clock. Sculpt your sound without losing the beat!

Analog modeled Distortion will take you from subtle warming to total crunching mayhem.

The Flange spans from subtle pulsations to powerful howling jet screams.

The Tremolo and stereo panner has sine, triangular and multiple square wave patterns.

Analog Modeled Delay of up to 2.6 seconds with tape delay, looping, pitch shifting effects, and a stereo ping-pong mode.

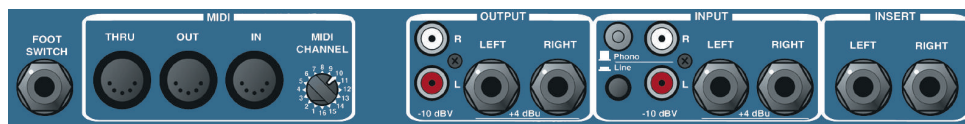

Synchronized timing and separate beat division control for each effect block.

MIDI in out and thru lets you automate and sequence every single control setting and movement.

Down And Dirty Details:

- Dedicated Controls
- 4 Simultaneous FX
- Band Limited Processing
- Momentary Engage
- Analog Modeled Delay
- Manual Flanger
- FX Sync To MIDI Clock
- FX Synch To Tap Tempo
- Controllable Via MIDI
- Transmits MIDI Performance
- Front Panel MIDI Snapshot
- Stereo FX Inserts
- Internal Power Supply
- Unique Tabletop / Rackmount Design
- Easy Grip Knobs
- Bulletproof Buttons
- Metal Construction
- Footswitch Control: bypass, tap tempo, source kill
- Stereo FX insert
- Frequency Response: 10 Hz – 14.3 kHz: ± 0.5 dB
- Dynamic range > 90 dB
- THD < 0.04%
- Stereo Balanced 1/4" and RCA +4dBu line inputs/outputs with phono preamp
- Max input / output level + 16.0 dBu

Suggested Retail Price \$449USD
